AS we turn from the year we have just left behind us and enter the gateway of '99 we feel disposed to congratulate the trade upon the fairly good condition in which they find themselves.

California has seldom been confronted with a harder problem or a worse prospect than were presented at the close of the rainy season last spring when the certainty of a dry year became apparent, and when anticipations of disaster to our fruit and agricultural industries, and serious loss to our business interests, were ever present with us. Orchards were going to die, vineyards perish, and business houses fail. Statistics showing the distress accompanying the California dry years of past times were before us, and the weak-kneed were filled with apprehension, while the strongest were anxious. It soon became apparent, however, that a new element had displaced the old California rancher, and that in the southern counties at least, the resourceful Yankee was looking about him for a way to better his condition. How he tunneled the hills and drove wells in the valleys, set up gasoline engines and electrical pumps and drew from mother earth her hidden waters and saved his plantations from ruin, is now a matter of history. It suffices us to say that the well-directed energy of our own people saved us from wide-spread losses, so that instead of a season of distress and failure, we have a fairly good business year to look back upon. Looking ahead all evidence points toward a period of great business prosperity for the coming year at least, the eastern commercial journals being full of statistical showings confirming this view. It is certain that money is plentiful, and that commercial enterprises are being extended to an unprecedented degree. The retail holiday trade in the large cities shows about a twenty-five per cent. average increase over a year ago, a fact which indicates plainly the heavier purse. On this coast the lack of numerous manufacturing establishments tends to keep back the tide of progress so evident in the Atlantic States and the Middle West, though we believe our lack in this regard will be supplied later. Much attention is being paid to our favorable geographical position relative to the Oriental trade, and we cannot but think the result will be a movement of manufacturing capital to our shores, and a great improvement in all our business conditions.

Meanwhile we may congratulate ourselves upon the passing of a hard year for California with so little actual distress, and for the very hopeful future before us. The banner years for the Pacific Coast are in our early future.

THE French Government proposes to make a considerable increase in the tariff on American cottonseed oil, an advance which will practically prohibit its sale in that country. The object seems to be to protect French manufacturers who will make cottonseed products from Egyptian seed, as we learn from the Paint, Oil, and Drug Review.

It hurts a little to have the "protection" policy applied in other countries to American commodities. Let us not get warm in the collar, however, because one of our favorite theories and practices is adopted by foreign nations. The American idea is expanding, these latter days.

We suggest to the cottonseed oil manufacturers that if they would get more than even (supposing the proposed duty goes into effect) let them import a few skillful Frenchmen, who know just how to manipulate their product, and by stopping the endless chain of exports and imports of the same substance (under different names), gain for themselves the profits which now go across the Atlantic.

THE National Association of Retail Druggists have found some cases among patent medicine manufacturers where their protest against any higher prices than $2.00, $4.00 and $8.00 per dozen for 25-cent, 50-cent and one-dollar articles has been taken to mean a willingness to pay such prices uniformly. The N. A. R. D. repudiates any such interpretation of their resolution and vigorously protests against advances in articles heretofore sold at less than above rates. The Association will have its own way in this, and in all other matters where reason is on their side. Isn't it time for Pacific Coast druggists to join in the big movement?

THE Los Angeles Times of Jan. 9th, in an editorial, makes a plea for protection by law against incompetency of druggists, especially with reference to the sale of poisons, assuming that we have no laws or regulations by which the public is protected. It passes our comprehension that an editorial writer on one of the leading dailies of the Pacific Coast should be so densely ignorant of the law. With sixty or more druggists within call by telephone, two being members and one the worthy President of the California State Board of Pharmacy, it would have been the easiest thing possible to learn the groundlessness of its inferences. Almost any drug clerk could have informed him that out of the entire number of our States but two, Nevada and Indiana, are lacking pharmacy laws, and that the restriction and registration of poison sales is one of the prominent features of such laws. Also, that our State Pharmacy Law has been in operation for eight years, during which time the Board has met at least four times annually, in Los Angeles, San Francisco and elsewhere, for examination of applicants for certificates of qualification as pharmacists or assistant pharmacists, without which certificate no person has the right to dispense medicines or poisons. We trust the Times will "take a tumble to itself" before again writing upon matters pharmaceutical.

WE doubt the probability of any revision by the present Congress of the revenue stamp law, however greatly desirable. Other important legislation will receive first attention, notably the Nicaragua canal and the needs of our Philippine possessions.

If, however, a movement is made having for its object the modification of the law, we urge upon every druggist a prompt coöperation with the movers, for success will depend upon energetic attack all along the line. The suggestion of the Western Druggist that the proprietary schedule of the act of 1862 be used as a basis in place of the present unsatisfactory scheme, is worthy of consideration. We who have worked under the old law are conscious of its smoothness and simplicity of action as compared with the present act, and would be glad to return to its simpler provisions.

ANTI-VACCINATION societies, one of which is in our midst, are among the anomalies of modern times. It is strange, indeed, to find people of intelligence ignoring the inestimable value to the world of Jenner's great discovery. Could we return for but a day to the conditions existing before the dread disease came under the control of science, and could we realize the terror that prevailed among high and low alike during an epidemic of small-pox, when the sick were practically abandoned to their horrible fate (the drunken nurses, filled to their eyes with gin, being next to worthless), while the victims of the loathsome disease in the cities were dying by scores and hundreds, and even burial rites were dispensed with as the repulsive corpses were hurriedly carted to their graves; could these horrors be again visible to our eyes we think the namby-pamby sentimentalism of anti-vaccinationists would be most effectually cured. Today the population of civilized nations is practically immune, and the few sporadic cases of the disease are cared for with all the attention given other patients, and our *scares* but keep us alive to the necessity of protection. We know there were reasonable grounds for fearing blood disorders in the former time, when nearly all the virus was humanized, but now when human virus is entirely discarded and none used but that from healthy cows, no apparent grounds exist for opposition to the laws which a sound and humane policy has placed among our statutes.

To Remove the Odor of Iodoform.

Dr. Edwin Ricketts writes to the Lancet-Clinic: "To do away with the 'smell' of iodoform that comes to the hand of the surgeon, for handling the same, I find that to rub on, after use of soap and water, a teaspoonful of vinegar (found in every household) does away, promptly, with the very disagreeable odor."

Pay Their Dividends.

Hundreds of retailers will be made happy January 1st by receipt of dividend checks from the Sterling Remedy Company, makers of the famous Cascarets and No-To-Bac. Within a little over two years, Cascarets has attained the enormous sale of 5,000,000 boxes a year, and at the present rate of increase it will soon have the largest sale of any proprietary medicine in the world. Cascarets Candy Cathartic is an article of great merit and is right up-to-date. The name is particularly appropriate; it is artistic in its typographical arrangement; has a sweet, phonetic effect, and is easily remembered. A tremendous advertising force to the amount of half a million dollars was put behind it from the start, coupled with the most liberal propositions ever presented to the retail druggist. With these combinations it has been possible to build up a business, the ramifications of which cover the entire country.

Commissioner Scott, of the Internal revenue Bureau, has recommended a number of changes in the war tax law in a letter to Chairman Dingley of the Ways and Means Committee. He says the excise duty on petroleum and sugar should be made payable monthly, and is in favor of eliminating from Section 20 all reference to uncompounded medicinal drugs and chemicals.

He would amend Section 20 as follows: Beginning with "provided," strike out all the rest of the section and substitute the following:

> "The taxes provided for in schedule B of this act shall apply to all patent, trade-mark or proprietary medicinal articles, and to all medicinal articles which are put up in style or manner similar to that of patent, trade-mark or proprietary medicines in general, or which are advertised on the package or otherwise, as remedies or specifics for any ailment, or as having any special claim to merit, or to any peculiar advantage in mode of preparation, quality, use or effect; provided, that no stamp tax shall be imposed upon any medicinal drug or mixture of drugs sold to, or for the use of any person when prepared for said person according to the written receipe or prescription of any practicing physician or surgeon, by a druggist or pharmacist selling at retail only."

At the close of schedule B add:

> Provided, further, that articles taxable under schedule B of this act may be removed in bulk, for sale in the United States from the place of manufacture or importation without stamps, and afterward repacked and stamped under such regulations as may be prescribed by the commissioners of internal revenue.

It has been found impossible in the administration of the law under schedule B to deal with articles sold in bulk without imposing great hardships on the manufacturer, which this amendment will enable this office to remove by regulation.

Nebraska State Board of Pharmacy.

The Board of Examiners of the Nebraska State Board of Pharmacy met at Lindell Hotel, Lincoln, Neb., Nov. 9, 1898. The Board of Pharmacy appointed J. H. Schmidt, of Omaha, a member of the Board as Secretary to succeed Griff J. Evans, whose term expires on said board. The board proceeded to organize for the year 1899, by electing the following officers:

A. W. Buchheit, President.
H. H. Barth, 1st Vice-President.
J. H. Schmidt, 2d Vice-President.
Niels P. Hansen, Treasurer.
H. R. Gering, Secretary.

There appeared for examination twenty applicants, of which six were successful, as follows:

Davidson, Chas., Hastings, 75.8.
Geyler, Albert, Grand Island, 70.
Harrison, R. L., Jr., Grand Island, 78 2.
Wuester, Mary C., Oketo, Kas., 71.2.
Willitts, W. C., Plattsmouth, 79.6.
Wilson, S. C., Lincoln, 78.6.

The next meeting will be held at Plattsmouth, Neb., Wednesday, February 8, 1899.

A. W. BUCHHEIT, Sec.

PRACTICAL PHARMACY—A. W. BUCHHEIT.

1. Give the Latin official name of Compound Chalk Powder. How is it prepared?
2. How are the following made?: Hydrate Chloral, Boric Acid, and Chloroform.
3. Name any two preparations you have made. State how you prepared them, naming all the ingredients in each.
4. From what is Salicylic Acid derived? How would you make an aqueous solution of Salicylic Acid?
5. Why is washed Sulphur preferred for medicinal purposes? What is the dose? In what official preparation is it used?
6. What three strengths of Acetic Acid are officinal? What is the source of Acetic Acid?
7. What are Emulsions? What is the object sought by the pharmacist in making Emulsions?
8. Name five drugs liable to be attacked by insects, and state how you would avoid the pests. Name five medicines which should be preserved in a cool place.
9. From what is Bitter Almond Water prepared, and of what strength is it? Write in full Latin name.
10. How would you prepare the following?:

Turpentine oz. 2	Hydrate Chloral grs. 40
Sulphuric Acid oz. ½	Ext. Belladon. grs. 30
Olive Oil oz. 4	Camphora grs. 40
Mix.	Lanoline oz. 1
	Mix.

THEORETICAL PHARMACY—HENRY H. BARTH.

1. Define the following terms: Detergents, Emollients, Escharonics, Calactagogues, Mydriatics.
2. Give active principle of each of the following: Belladonna, Stramonium, Ipecac, Tobacco, Squirting Cucumber.
3. Give official formula for Syr. Sarsaparilla Com. Tr. Opii Deod. Massa Hydrargyri.
4. How many fluid ounces in a pound by weight of each of the following: Alcohol, Simple Syrup, Chloroform, Ether, Glycerine?
5. Give official name for Turpeth Mineral, Broom Tops, Buchu, Cochineal, Cascara Sagrada.
6. Give official description of Alcohol, Camphor, Gum Arabic.
7. Give general formula for making Infusions. Name the official infusions, and tell by which process each one is made.
8. (a) About how many drops are there in a fluid drachm of water? (b) Tr. Aconite? (c) Copaiba? (d) Fowler's Solution? (e) Castor Oil?
9. What is a saturated solution? In how many parts of water at 15° C. is one part of each of the following soluble: Tartar Emetic, Sugar, Bismuth Subnitrate, Sulphate Quinine, Bicarbonate Soda?
10. How many official tinctures are there? Tell what menstrum is used in the following tinctures: Gentian Comp., Cinchona, Guaiac Ammoniated, Deodorized Tr. Opium, Sanguinaria.

TOXICOLOGY—G. J EVANS.

1. Colocynth. Give habitat, appearance, medical properties, part used, official preparation.
2. Define Toxicology, Emetic, Antidote. In what various ways may an antidote act.
3. Give source, medical properties, official preparations, dose and antidote of Arsenic
4. State source, medical properties and dose of Atropine, Codeine, Eserine, Lanoline, Iodine.
5. What active poison is contained in Fowler's Solution, Magendi's Solution, Donovan's Solution? Give dose of each.
6. Give the poisonous salts of Lead. Soda. Potassium.
7. Name the official preparations of Gum Opium.
8. Write a prescription for 4 C. C. Give dose, each to contain an adult dose of Mercury Chloride.
9. Define the terms, Soporific, Comatose, Narcotic, Sedative, Motor depressant.
10. Name five poisons whose actions are directed to the Muscular System. Nervous System.

MATERIA MEDICA—HENRY R. GERING.

1. Define the terms: (a) Pharmacology. (b) Materia Medica. (c) Pharmacodynamics.
2. Give the official description of, (a) Arnicæ Flores. (b) Spiritus Vini Gallici. (c) Opium.
3. Give the English name, the therapeutic action and dose of, (a) Viburnum Prunifolium. (b) Santonium. (c) Potassii et Sodii Tartras. (d) Resorcinum. (e) Spiritus Ætheris Nitrosi.
4. Write the correct official title of: (a) Red Saunders. (b) Griffith's Mixture. (c) Solution of Sodium Hydrate. (d) Marigold. Carron Oil.
5. What are, (a) Glucosides? (b) Extracta? (c) Cerata?
6. Give the habitat, part used and natural order of, (a) Allium. (b) Quassia. (c) Tanacetum. (d) Triticum. (e) Eucalyptus.
7. Write a prescription, complete in all its details, containing an Expectorant.
8. Name five natural orders, and give an example of each.
9. Define the terms: (a) Root. (b) Leaf. (c) Stem. (d) Seed. (e) Rhizome.
10. Identify drugs marked one to ten.

CHEMISTRY—NIELS P. HANSEN.

1. (a) Define the Province Chemistry. (b) Physical change. (c) Division Matter.
2. (a) Define Physical and Chemical Properties. (b) Give chemical definition of Molecule. (c) Analysis and Synthesis.
3. (a) Define Quality of Atomic Combining Power. (b) Equivalence. (c) Graphic Symbols.
4. Chemically what are Alkaloids?
5. (a) Chemically what is Glycerine? (b) Complete following reaction: $Jn\,(NO_3)_2,\ K_2\,CO_3 =$
   How much Zinc Carbonate may be obtained from 200 gm. Zinc Nitrate?
6. (a) What is Mercury? (b) Give Latin name and symbol. (c) Describe Odor, Taste and Chemical Reaction. (d) Name five Salts of Mercury and give dose.
7. (a) Zinc: give Atomic Weight. (b) Tests for Zinc Salts (c) Name its official preparation.
8. (a) Why are Sodium Salts more frequently used than Potassium Salts? (b) How is Sodium obtained? Name five Sodium Salts.
9. (a) What is the present source of Potassium Salts? (b) How may Potassium in its combined state be recognized?
10. Write Chemical Formulæ of the following: Alcohol, Acidum Carbolicum, Acidum Carbolicum, Acidum Hydrochloricum, Cupri Sulphas, Sodii Nitras.

The Proper Proportions for Flag of Chemicals for the Show Window.

The standard flag is 10 feet wide by 19 feet long, or in that proportion. The blue should be seven and three-fifths long and wide enough to include the seventh of the 13 stripes, the top and bottom of which are red.

California State Board of Pharmacy.

The regular quarterly meeting of the Board was held at Sacramento on the 10th of January, 1899, and subsequent days.

Members present: W. M. Searby, President; C. A. Seifert, S. L. Waller, A. G. Oreña and E. A. Baer.

Absent: Messrs. Sale and Oberdeener.

Eight graduates in pharmacy were registered:

Robert McLeod, Ontario College of Pharmacy.
Wm. E. Anderson, " " "
Edmund J. Thom, " " "
Julius Hatzfeld, Louisville " "
H. L. Miller, California " "
H. F. Prien, " " "
R. H. Stevens, University of Michigan.
Geo. T. Wolford, N. W. University.

The following were registered as Licentiates by examination:

E. C. Hafner, Sacramento.
W. S. Brownlee, Petaluma.
Chas. Allen, Los Angeles.
J. T. Gibson, Auburn.

The following passed the examination for Assistant:

W. D. Burton, San Francisco.
I. H. Cory, San Francisco.

Two candidates for the Assistant Certificate failed in the preliminary examination.

A. E. Scamell was granted the Assistant certificate on his Licentiate examination.

R. H. Freund was registered as Licentiate, without examination.

Leo Munter, graduate California College of Pharmacy, was registered as Licentiate.

H. H. Beauchamp, graduate California College of Pharmacy, was registered as Assistant.

B. S. Virden, of Ventura, may be registered as Practicing Pharmacist on making affidavit and paying certain fees.

John Calvert, Secretary,
400 Sutter St., San Francisco.

Amended Regulations as to Cancellation of Adhesive Documentary and Proprietary Stamps.

1898.
Department Circular No. 207.
Internal Revenue No. 520.

Treasury Department,
Office of the Commissioner of Internal Revenue,
Washington, D. C., December 23, 1898.

Existing regulations are hereby amended so as to require that upon each adhesive documentary or proprietary stamp used or affixed after January 1, 1899, there shall, in addition to the initials of the person using the same and the year in which used, also appear the month and day of the month when such stamp was used or affixed. The month may be expressed by numerals—for instance, on a stamp used on January 12, 1899, the date may be written or stamped 1–12–99.

N. B. Scott,
Commissioner.

Approved:

O. L Spaulding,
Acting Secretary of the Treasury.

Rubber Prices.

It is possible that many of our readers have thought that the recent numerous advances in all kinds of rubber goods were due principally to a desire on the part of manufacturers and jobbers to squeeze to the utmost the retailers. Whatever sins these men may have to answer for, this is not one of them. The fact is, the demand for crude rubber has so enormously increased, while the supply has been so limited, that the price has been constantly advancing for over a year. In the case of some kinds of rubber it advanced from July, 1897, to July, 1898, sixty-two per cent. Nor is this all, for the end has not come yet, and it is probable that prices will in the future be higher even than they are now.—*Spatula.*

Latest Rulings on Medicinal Stamp Taxes.

The various collectors of internal revenue were last week notified of three important new rulings on the medicinal stamp tax section of the war revenue measure from the International Revenue Bureau at Washington, holding that synethic chemicals must pay the proprietary stamp tax, and refusing to recognize the decision of Justice Brown, of the United States District Court, as a rule governing the commissioner's office. They announced that an appeal would probably be taken from that decision, which, it will be remembered, exempted phenacetine, sulfonal, trional, etc., from the tax as being uncompounded medicinal preparations.

These rulings were written by Acting Commissioner George W. Wilson in answer to prominent drug dealers, who had asked for decisions on eudoxine and nosophen gauze and on elixirs, pills, tablets, etc., made from taxable preparations, but having themselves no taxable features. The first letter from the Acting Commissioner says:

"They (the dealers) acknowledge that eudoxine is protected by patents in foreign countries, and that a patent has been allowed for the same by the United States Patent Office; furthermore, that eudoxine is protected by a trade mark in this country, but claim exemption from taxation of euxdoine on account of its being an uncompounded medicinal chemical, although complex in composition. They also claim that they obtain eudoxine from the authorized importers which has been properly stamped under the war revenue law; that they add sugar of milk and gum arabic, and compress the preparation into tablets, put it up and sell it as compressed eudoxine tablets. The office holds that by manipulating eudoxine, a patented preparation, adding it to other preparations, the product ceases to be identified with the original stamped package, and hence again becomes taxable by the manipulation. The same ruling holds good with all other patented or trade marked preparations that are manipulated and put up in compressed tablets, pills and other complex forms. The decision of Justice Brown, of the United States District Court, that phenacetine, aristol, etc., are exempt from taxation as uncompounded medicinal chemicals, is not accepted as a rule governing this office. The decision will probably be appealed from. In any event, eudoxine has not been shown to be exempt from taxation. Nosophen gauze, being a medicated gauze, is taxable under Schedule B as a medicinal proprietary preparation."

The second letter contained the following words:

"This office holds that taxable preparations, either patented, trademarked or proprietary, when manipulated—that is made into elixirs, pills, tablets, etc.—cease to be identified with the original tax paid package, and hence again become taxable by such manipulation. In other words, when a taxable preparation is made into pills, elixirs, tablets, powders, etc., and placed on the shelves for future sales, they become taxable under Schedule B, and must have a revenue stamp affixed in proportion to the retail price. The decision of Justice Brown, of the Southern District of New York, holding that phenacetine, aristol, etc., are exempt from taxation as uncompounded chemicals, is not accepted as a rule governing this office. The decision will probably be appealed from."

The third ruling was in reply to a letter received by the commissioner from a firm of drug dealers, who "mentioned about 47 different preparations, claiming exemption for them upon the ground that they are uncompounded chemicals, citing the decision in the case of the United States vs. Farbenfabriken of Eberfeld Co.," which is the decision referred to in the other rulings. After again announcing that the commissioner's office will probably appeal from Justice Crown's opinion, the Acting Commissioner adds:

"In the meantime these and all other preparations sold under patent or trade-mark or other textile features must be properly stamped before removal from the factory."—*P. O. and D. Review.*

The Vital Statistics of the Novelist.

According to The Philistine, the annual births, in fiction, to deaths, are as 1 to 796. At this rate the story-tellers will depopulate the earth in 11 years, figured out mathematically. Dickens is the only author that ever lived who tried to hold the balance true. For every undertaker that he brings on the scene, he introduces a midwife. In a book by F. Marion Crawford, that I have just read, there are 91 deaths, 7 marriages, and 2 cases of obstetrics ; while in Anthony Hope's "Prisoner of Zenda" there are on an average 5 deaths to a chapter, with not a birth in the whole book.—*American Druggist.*

The Gospel of Good Goods.

Jas. W. T. Knox, Detroit, contributed the following paper to the A. Ph. A. at Baltimore : If we may be permitted to paraphrase a very good and very old proposition, we might ask, "What shall it profit a man to sell goods all day, if he does not make any money on them?" And what shall it profit a man to put in all his time making ten cent sales when he might as well be selling the same number of twenty-five and fifty cent packages? The retail druggist is in business for what he can get out of it, and when the profit ceases to be sufficient to pay bills and buy bread for his family, it is time to stop and ask, "What is the matter? where am I at?" We have all heard the cut-rate problem discussed in its various phases, I do not know how long, for I have heard it ever since I went into the business eleven years ago. Perhaps we shall hear it for eleven years more before we get it settled. What I have to discuss before you, gentlemen of the retail drug trade, is not a "problem" but merely a plain business proposition, something that does not require so much organized, as individual, effort. It is the question of selling cheap goods.

A president of the United States once aptly said, "A cheap coat makes a cheap man." We might say with equal force that "Cheap drugs make a cheap druggist" in the opinion of the public. Then the cure for that is to throw out the cheap goods.

By cheap goods I mean the dime and nickle packages which litter the counter of so many drug stores, and which for some unexplained reason many druggists push in preference to higher priced, better and more profitable goods. To be sure there are a few legitimate ten cent articles, such as potassium chlorate lozenges, soda mint tablets, cachous, etc. But headache wafers are not a legitimate ten cent article, neither are pile ointments, laxative tablets and a dozen other articles that might be named. The custom of years has fixed the price of these articles at from twenty-five to fifty cents for packages of appropriate sizes. Now is it not sheer folly to offer goods at five and ten cents when one might just as easily and in the same time sell the twenty-five and fifty cent packages? Let us always remember that medicines are necessities, or are considered so by the people who buy them. People do not buy medicines because they taste good or because they are pretty, or because it is any fun to buy them—the sole and only reason on earth that they buy our goods is because they need them or think they do, which answers the purpose in our case. Bearing this in mind, why should we teach them to buy in such small amounts? What excuse can any druggist offer for pushing a ten cent package of pile ointment on which he makes about three or four cents, when with exactly the same effort and expenditure of time he could sell the regulation fifty cent package and make twenty-five cents on it? (For I am now supposing that the druggist who is wide awake enough to leave dime and nickle goods severely alone is a good enough business man to sell his own preparations, and make a living profit on them.) What is the reason? One man said to me, rather sharply, once when I asked this question, "Well, the reason is, they sell." Postage stamps sell, but that is no sign why it pays to handle them. A thing must not only sell, but it must pay a profit, and it must not interfere with the sale of something that pays a better profit. I saw a dime package of pile ointment on the counter, and asked, "does this sell?" "Yes," was the reply. "Just sold a package a few minutes ago." "Do you sell five times as many packages of it as you did of the fifty cent article?" I asked. "No, not twice as many ; in fact but few if any more than I sold of the other," he said. "How much of the fifty cent article do you sell, now, that you are pushing the ten cent size?" I asked. "None to speak of," he said. So there it is. The druggist was deliberately cutting his own throat to accommodate some one else.

What was true of the article in question was true of nearly everything else in his line of dime and nickle goods. The druggist who pushes that kind of goods is competing not only with all the other fellows but with himself as well. What does he gain? Nothing. What does he lose? Well, he loses time, for it takes from three to five times as much time to sell the same amount of ten cent goods as it does to sell twenty-five and fifty cent goods, and if a druggist's time is not worth something to him he is in a bad way. He loses money, because his higher priced goods that he has his money invested in, stay on the shelves while people buy the dime and nickel packages. He loses the confidence of the people that trade with him, because they grow to look upon his store as a sort of a cheap counter ; nine people out of ten associate cheapness in price with cheapnsss in quality, and right here, confidentially, I want to say they don't miss it either when they guess that way. He loses trade because people get to saying, "If you want something *good*, you can always get it at B——'s," and B—— is his competitor's name. He loses in self-respect, for there are not many druggists who do not feel that they are worthy of better things than handling dime and nickle nostrums.

What to do. Throw out the dime goods; that is to say, take them off the counter and show cases, and put them back where they will not be seen. Then when a man comes in and asks for them sell him the twenty-five or fifty cent articles. I used to find it sufficient to say, "Yes, sir, we keep those cheap goods for people who want that kind, but we do not even think of offering them to our customers ; the best of everything is none too good for our trade." That always settled it. Not many people want cheap goods when it comes to medicines. More than that, it is surprising how few calls there are for the dime and nickel goods after they are taken out of display. The fact is that most of them have not merit enough to ever create a steady demand, and if they are out of sight they are surely out of mind. It is not a difficult matter to switch people on to the right track now, because they have not yet become well accustomed to buying in dime quantities. But in a few years it will be different ; people will want not only their ointments, pills, cough lozenges and headache cure in dime packages, but they will want ten cent bottles of Cod Liver Emulsion, Laxative syrup, Cough syrup, Soothing syrup and Liniment. No druggist wants to see the drug business get into that channel, yet there are thousands of them who are driving it in that direction as fast as they can.

Why not quit it? Why not return to the plan of selling people the largest packages you can induce them to buy, instead of the smallest?

Why not educate the people in the opposite direction instead of teaching them to buy cheap goods? Why not teach the gospel of *good*, fair-priced goods? If you expect to get a good thing you are willing to pay for it—why not teach your customers the same thing? You do not expect to get a good suit of clothes for $5 00, a good hat for $1,00 or a pair of shoes for $2.49, but you know very well that in buying a suit of clothes, if you only pay $5.00 you are less apt to get $5.00 worth than you are to get $25 00 worth if you pay $25.00 Why not educate your customers that good drugs are worth paying for, just as truly as good food and good clothing?

I'd rather be a fifty cent pharmacist than a "Dime Druggist" any day ; I would hate people to think that I was running a ten cent counter. If I were to run a ten cent store I would get into the business of selling tin pans, wash boards, flower pots and cream pitchers. But if I were going into the drug business I would sell good goods that would pay me for the trouble of making the sales, or I would try some other. The same thing applies to all other kinds of goods, drug sundries, fluid extracts and what not. If you get a good thing you have to pay for it, and you ought to be willing to. Most druggists know that, and, in fact, more people know it than most of us think ; that is the reason why it is possible to show them that it does not pay to fool with cheap drugs any more then it does to buy shoddy clothing, split-leather shoes or cheap hats.

Above all look out for your own interests when you are selling goods, and heed not the siren song of the smooth promoters of dime and nickel goods. Ask yourself this question, "Will they come into competition with other better, high priced, and more profitable goods?" If so, you don't want them, for you will not sell enough to make up the difference. To be sure, this question of dime goods is only a little thing, but the drug business is made up of little things. It's the little things we want to look out for, or we'll never have any big things to take care of.

The Use of Saccharin Forbidden in Germany.

A new law regarding the use of artificial sweetness was enacted on July 6 and went into effect on October 1st of this year. Section 1 of the law defines artificial sweetening materials within the meaning of the act as all substances obtained by artificial means, and possessing higher sweetening power than refined cane or beet-root sugar, without a corresponding nourishing value. In section 2, the use of artificial sweetening materials in the preparation of articles of food or refreshment shall be considered as adulterations in the sense of section 10 of the law respecting the traffic in articles of food, refreshment or general use. Articles of food or refreshment in the preparation of which artificial sweetening materials have been employed, may only be sold or offered for sale under a a denomination which distinctly indicates the fact of such employment. Section 3 prohibits the employment of artificial sweetening materials in the wholesale preparation of beer, wine or beverages resembling wine, fruit cordials, preserves, liqueurs and syrups, or the selling or offering for sale of beverages of the kind described under section 3 to which artificial sweetening materials have been added. Under section 4, any person who intentionally contravenes the provisions of section 3, shall be punished by imprisonment up to six months, and by a fine up to 1,500 marks ($500), or by one of these penalties. If the contravention has been due to negligence it shall be punished by a fine of 150 marks or detention.—*Amer. Druggist.*

Pith From the Stalks of Indian Corn.

H. W. Wiley, in a bulletin recently issued by the United States Department of Agriculture, gives some interesting facts concerning the properties of the pith of the stalks of Indian corn. In round numbers 100 pounds of stalks furnish 20 pounds of pith cellulose. This pith has a remarkably high absorption capacity for liquids, experiments showing that it will absorb twenty-five times its weight of water. It is also capable of being compressed into a very much smaller bulk, but without losing its resiliency. The compressed blocks of pith still are, to a certain degree, flexible and are capable of absorbing immense quantities of water, but not so large as in the uncompressed state. This pith has been used with greatest success in the construction of battle-ships in the American Navy, the compressed blocks being placed between the two walls of armor and by reason of their resiliency they are found to completely close up the hole made by the projectile so as to prevent the entrance of water for a considerable length of time. For this purpose it has been found to be immensely superior to other forms of pith in use heretofore, for instance, the pith of the cocoanut.

The pith, either directly or after extraction with a dilute alkali, is easily nitrated into all the various forms of material commonly made from cotton. It has many advantages over cotton for nitrating purposes, especially in the manufacture of explosives of all kinds, by reason of its more perfect keeping qualities. As is well known, the fibers of cotton are hollow and are filled with a mixture of acids during the process of nitration. It is found very difficult to remove these traces of acids by subsequent washing, and therefore the keeping qualities of explosives made from cotton are not of the best. Dr. Wiley says the pith of Indian corn stalks is not open to the objection just urged against the fibers of cotton. It is easily nitrated, easily washed, and makes an excellent article for solution in amyl acetate or orther solvent for the manufacture of varnish of different kinds, and also for making substitutes for guncotton for the purpose of manufacturing smokeless powder and other explosives.—*Era.*

Repeal the Stamp Tax.

Editor Practical Druggist :

I am quite unable to understand why the drug business, of all others, was selected for special taxation. Certainly it is not the most prosperous line of trade, and compared to the others, its volume of business is quite small. No doubt it was the intention of Congress that the druggists should collect the tax from the people who buy the goods, but, as everyone predicted, and as we all knew, this was impossible.

The tax is being paid wholly by the retailers and manufacturers, mostly by the retailers, as there are but few manufacturers who are paying the tax. Perhaps it would not be far from the truth to say that 80 to 85 per cent. of the tax is coming from the retail druggists, the rest from the manufacturers. Now this is all wrong, entirely unjust. The manufacturers and retailers of drugs pay their share of the war expenses along with every other business concern by stamping their checks, telegrams, insurance policies, express receipts, legal instruments, etc., and this is no small item for a large concern.

Inasmuch as that is their just share of the war tax, and we do not know of any one who is not bearing that part of it cheerfully, all that is collected from them in excess of that is unjust—to put it in good, plain language, it is legal robbery. I do not think it is possible to urge this point too strongly. The special tax on medicines is just that much more than should be levied on the drug trade, and should be removed because it is impossible for them to collect it from their customers. Frederick K. Stearns.

A Valuable Donation.

Mr. Frederick Stearns has generously given to the University of Michigan his famous and valuable collection of musical instruments, numbering over 1000. These have been gathered by him from all portions of the world, and represent in an almost unbroken series the evolution of the three kinds of instruments—percussion, wind, and string—from prehistoric times down to the present. Many of them could scarce be duplicated at any price ; and as a whole the collection is perhaps the most unique in this country.—*Bulletin of Pharmacy.*

Powdered Lanolin.

This is a German preparation composed of magnes. carb. zinc. oxide, or talc. with lanolin. The lanolin is dissolved in ether and the powder added ; on evaporation the residue is powdered.

The Georgia Journal of Medicine and Surgery recommends the use of a little sugar in the wash-water for freeing the hands of plaster of paris after making casts, and the same agent is useful, of course, in aiding removal of the casts from the body. —*Drug. Circular.*

Veterinary Pointers.

BY EDWARD SWALLOW.

It would be mere waste of space to point out the importance to the up-to-date pharmacist of keeping in stock a few of the more common veterinary preparations of his own manufacture, own labels, and profits all his own. I take it for granted that this branch of a pharmacist's business is worth cultivating, and moreover legitimately belongs to him.

I propose to give in this short article a few formulas which have been sold largely for some years past, giving satisfaction to all concerned.

Like human beings horses go off their feed, get out of condition, and require proper treatment. The experienced horse-keeper likes to see the animals under his charge snap their food with a relish, as he knows that when one begins to blow over the contents of the manger something is wrong.

A GOOD HORSE CONDITION POWDER

sells freely, and the following is one of the best :

Gentian root	1 pound.
Aniseed	1 pound.
Caraway seeds	1 pound.
Linseed	1 pound.
Coriander seeds	1 pound.
Resin	1 pound,
Saltpeter	1 pound.
Licorice root	1 pound.
Fenugreek	1 pound.

To above ingredients, all in fine powder, add oil of cloves two drachms and mix well in a large mortar ; it is not necessary to sieve if the resin and saltpetre are finely powdered before mixing.

These powders should be put up in one-pound tins, wrapped in blue paper, and labeled :

HORSE CONDITION POWDER.

For keeping horses in good condition, promoting appetite and digestion, they are unsurpassed ; they act as a tonic and mild diuretic and produce the much-desired glossy skin which every healthy horse should have.

Directions for Use.—One or two tablespoonsful mixed well with the food every night and morning for a week or two, then once a day.

For carriage horses a warm bran, barley, or oatmeal mash occasionally, works wonders in conjunction with the Condition Powders.

HORSE COLIC DRINK.

Another very useful stock preparation frequently called for and which should always be kept up, is a horse colic drink. In connection with this it is well to be on the safe side, as horses are liable to rapid inflammation of the bowels, which is very often mistaken by the horse-keeper for colic and treated for such, when the services of a veterinary doctor are vitally important. It is advisable to steer clear of any appearance of encroaching too much upon the "vet's" domain. A simple colic drink, efficacious for colic and pain, fills the bill all the time, and here is one I can recommend :

Tinct. opium	1 ounce.
Ol. terebinth	½ ounce.
Spirit æther nit	2 ounces.
Ol. lini	8 ounces.

Mix.

Label : "Horse Colic Drink for colic, cramps, pain. Shake well before giving, and if relief is not procured in thirty minutes, and the horse is shivering and has cold sweats, call a veterinary at once."

In case of simple colic this drink will give quick relief ; it should be followed by a warm bran mash one hour after.

PHYSIC BALLS.

The pharmacist who caters for veterinary business is always asked for physic balls. A few three-, four-, five- and six-drachm balls is no ill store, though they are best made fresh as required. A formula answering the purpose is :

Barbadoes aloes	2 ounces.
Powdered ginger	1 ounce.
Ol. cloves	1 drachm.

Soft soap, q. s to mass.

Divide into sizes as required, and bear in mind a pony does not need as much as a heavy cart horse. When pressed for time I have often found the above to mass well with a little soap liniment instead of using soft soap. The balls should be rolled in licorice powder and wrapped first in waxed paper (paste the edges), then in white paper, the latter to be removed before giving the ball. A bran mash is usually given about two hours after, or the next morning.

I have given the above because I have seen some young pharmacists stuck when asked for horse physic balls. It is these stray threads which one has to pick up and use in the drug trade nowadays, every point being useful.

DIURETICS FOR HORSES.

With regard to diuretics for horses, I have found by experience that horse owners prefer them in the shape of a ball, as it is easier to give than a drink ; and empty capsules to any size can be obtained for them and other veterinary medicines given in mass.

TONIC PILLS FOR DOGS.

Here is a form I have used for years as a tonic pill for dogs suffering from mange, etc. It seems to answer admirable in conjunction with the ordinary sulphur ointment or a lotion of sulph. precip., zinc oxide and a 20-per-cent. solution of carbolic acid :

Pil. Blaud	5 grains
Acid arsenios	1-16 grain.

Ft. pill.

DOSE : One every morning after food for small dogs. For larger dogs one night and morning.

These pills can be given in all skin diseases of dogs with marked benefit ; they are also very useful as a tonic for dogs whose age begins to tell on them.

I give these formulas and hints for the benefit of those who like to turn a dollar into their register instead of turning it away, and beg to suggest that a few good veterinary preparations for the common ailments of horses and dogs should form a profitable adjunct to a pharmacist's business in many localities. A circular to owners of horses, stablemen, etc., on the plan of the following may furnish some idea for introducing and advertising these articles :

VETERINARY CIRCULAR.

Dumb Brutes

They may be, but patient, hard-working servants they are, and as such, independent of being valuable property your horses require every attention that superior intelligence can give them.

A man who loves his horses gives them the best of fodder, and when they fall sick he relieves their sufferings as quickly as possible, and naturally enough he goes where he can obtain the best quality of drugs.

This is where we come in; we supply only drugs and chemicals of the finest quality, and will fill your private recipes with such at moderate prices. Also, bear in mind we make and keep always ready, the following veterinary medicines:

Horse Condition Powders, to keep your animals in first-rate condition, so their coats shine like silk, 50 cents 1-lb. tin.

HORSE COLIC DRINKS,

a rapid cure for colic and cramps. You should have one always convenient; 50 cents each.

PHYSIC BALLS, DIURETIC BALLS, COUGH BALLS, and our famous AMERICAN TROTTER LINIMENT, for strains, bruises, etc., 50 cents a pint.

If you own a horse or have charge of any, call on us; we would like to talk with you. Meanwhile, should you require any veterinary medicines it may be handy for you to know where to come.

PESTLE & PLASTER,
Gee Gee St., New York. Pharmacists.

—*American Druggist.*

Patents of December 6th, 13th, 20th and 27th, and January 3d, of interest to pharmacists:

Hiram H. T. Bennett, assignor of one-half to E. L. Parker, Detroit, Mich., corn or bunion plaster, 615240

Edward A. Butler, Prescott, Ariz. Ter., pessary-applier, 615425.

Leonard D. Mullen and W. C. Shannon, Sela, Alma., bandage-rolling machine, 615298.

Herman Nerenz, assignor of one-half to J. Fuger, New York, N. Y., truss, 615491.

Wm. H. Beach, Bridgenorth, England, thermocauter-lancet, 615784.

Arthur Eichengrun, Elberfeld, Germany, assignor to Farbenfabriken of Elberfeld Company, of New York, pharmaceutical compound and making same, 615825.

Arthur Eichengrun, Elberfeld, Germany, assignor to Frabenfabriken of Elberfeld Company, of New York, pharmaceutical compound, 615970.

Henry C Fehrlin, St. Louis, Mo., purifying acatanilid, 615828.

Peter Grabler, Mansfield, Ohio, expanding arm syringe, 615697.

Paul Kirschen, assignor to K. A. Lingner, Dresden, Germany, disinfecting apparatus, 615858.

Ralph Walsh, Washington, D. C , vaccine-carrier and case, 616042.

Wilson A. Allen, Rochester, Minn., invalid-elevator, 616282.

Vladimer de Baranoff and E. Hildt, Paris, France, obtaining sulphur from sulphates, 61639.

Edmund and U. S. De Moulin, Greenville, Ind., dummy lung tester, 616085.

Stephen A. D. Hardy, Aix, Mo., truss, 616319.

Charles B. Medbury, Rockdale, New York, truss, 616196.

Lewis H. Rogers, Los Angeles, Cal., surgical instrument, 616259.

Wright R. Cartledge, assignor of one-half to J. H. S. Kerr, Toronto, Canada, bandage fabric, 616524.

Emil Fischer, Berlin, assignor to C. F. Boehringer & Soehne, Waldhof, Germany, obtaining alkyl-uric acid, 616656.

Emil Fischer, Berlin, assignor to C. F. Boehringer & Soehne, Waldhof, Germany, alkyl derivatives of uric acid and making same, 616700.

George F. Kelling, Dresden, Germany, surgical instrument, 616672.

Viggo Drewsen, New York, N. Y., apparatus for making bisulphite-of-lime liquor, 617237.

Edward A. Franklin, Austin, Tex., assignor to Chicago Novelty Manufacturing Company, Jersey City, N. J , syringe and atomizer, 617245.

George Gros, Waterbury, Conn., vaporizer, 617156.

Malcolm L. Harris, Chicago, Ill., urine-segregator, 617016.

Thomas O'Malley, McKeesport, assignor of one-half to J. R. O'Mally, Pittsburgh, Pa , and E. L. O'Mally, truss, 616958.

Eugene T. Pearl, New York, N. Y., syringe nozzle, 616963.

Camillo Savino, New York, N. Y., syringe, 617127.

Gustav Wendt, Stolberg, Germany, composition of casein with lithium salts, 617210.

Mr. E. R. Sutter, formerly employed in the sundries department of F. W. Braun & Co., and the Pacific Drug Co., has gone to San Francisco to take a position in the house of Mack & Co. His friends here wish him success in his new field.

What is the Best Time to Take Medicine.

Dr. E. Vogt gives in the *Revue de Therapie* the following directions on the most suitable time for taking medicine. Most medicine can be taken any time on an empty stomach, before or after meals. But if an irritating substance is introduced into the stomach, it is important that it be not in too small a volume. If such a body is soluble in water, a highly diluted solution is given; if it is insoluble, it is given with the meal. The form of the drugs is also of importance. Thus hard pills, taken on an empty stomach, may irritate; likewise wafer capsules, whose contents first spread over a limited space in the stomach. But if such capsules, e. g., sodium salicylate, are given with the meal, the contents mix at once with the food and cannot cause any local irritation of the mucous membrane of the stomach. If, however, a prompt action is desired, the medicament is given on an empty stomach, but always diluted, because the stomach is very sensitive to strong solutions. Many have an impeding or retarding action on the digestion, e. g., chloroform, naphthol, saccharin, etc.; therefore it is of importance to administer them when the process of digestion is past or almost so. In this category fall the metal salts, the iodides and bromides, which should be taken with plenty water on an empty stomach early in the morning or late at night. Mercury salts irritate the mucous membrane of the stomach; therefore they are given in a diluted solution on an empty stomach early in the morning. The author cannot believe that calomel with cooking salt might partly become transposed into sublimate; at any rate, no accidents need to be apprehended from this source. Otherwise strict observation should guard against mistakes. A glass of quinine wine given before the meal causes a slight alcoholic stimulation in the stomach of a child, and one should be careful not to take this for the strengthening effect of the quinine. Therefore, it is better to give such wines after meals. Bitters should be taken the moment one sits down at the table, not half an hour before the meal. It is imprudent to administer cod liver oil before the meal. Why coat with oil the stomach whose walls are expected to exercise an assimilating action? For that reason cod liver oil is given after eating or at least an hour before. Sodium bicarbonate taken before the meal causes too large a secretion of gastric juice. After eating it blunts the excess of acid.—*Drug Topics.*

Dead Oil.

This is composed of a variety of bodies, including napthaline, neutral oils and tar acids in variable proportions. It is used for a variety of purposes, according to quality, including the manufacture of lamp-black, varnishes, stains, disinfectants, waterproof paper, paving cements, and largely for the preservation of wood, by the process called "creosoting." It is known in commerce as either "dead oil," "heavy oil," "tar oil," or "creosote oil," the first being its more common name. It is known commercially as an oil, and contains more or less carbolic acid as a valuable ingredient.—*Phar. Jour.*

Internal Revenue Commissioner Scott has rendered a decision regarding the stamp tax upon the Buchan preparations to the effect that the following are taxable, viz:

Buchan's Carbolic Sulphur Soap.
" " Tar "
" " Dental "
" " Medicinal "

Not taxable:

Buchan's Cresylic Ointment.
" " Sheep Dip.
" Carbolic Toilet Soap.
" " Glycerine Soap.
" " Laundry "
" " Disinfecting Soap, Nos. 11 and 12.
" " " " No. 50.

Business Personals.

Ben S. Virden has sold his interest in the business of Crane & Virden, Saticoy, to his partner, E. C. Crane, who will continue the business.

Our readers will take notice that the Kondon Mfg. Co. have made their "offer" more acceptable than ever, requiring only a $5.00 purchase. See advertisement.

Mr. Q. R. Smith, Santa Ana, has taken the room recently occupied by the Santa Ana Drug Co., a few doors east of his old stand, and will conduct his business therein.

The full-page Cascaret advertisement in the New York Journal's New Year's special photograph issue was about the most striking patent medicine advertisement we ever saw. It must have attracted world-wide attention.

G. H. Francis, Congress, Arizona, was burned out early this month. A total loss. We are not informed as to Mr. Francis' intentions for the future, but trust that his misfortune will not prevent him from again embarking in business.

T. S. Newby, Ventura, who was burned out last month, has bought H. A. F. Miller's stock, and has started in again under very favorable conditions, the Miller store being the old Newby & Miller location and one of the best business rooms in the city.

O. L. Halsell, formerly head clerk for Bristol & Rowley, Santa Ana, has taken B. & R.'s old stand, with its elegant and substantial fixtures, and has put in a new stock of drugs and drug sundries with which to continue the business. Mr. Halsell knows the trade thoroughly and will, without doubt, make a success of his enterprise.

Mit Phillips, the irrepressible, has gone into the paint trade, in Santa Ana, occupying the old Mit Phillips & Smith store, so long his headquarters while a druggist. Look out, Mit, for that old African whitewasher, who wants the best *bresh* in the house on partial payments. We don't believe he is dead yet, though we knew him back in the fifties.

Dr. J. S. Riggs, who was, we believe, the pioneer druggist of Redlands, and who continued in business until 1895, has now started a new drug business in that city. With the Doctor's wide acquaintance in the city of his home, and his intimate knowledge of the wants of the community, he is justified in expecting to do his full share of the local drug trade.

Bristol & Rowley, Santa Ana, have moved into their new building and have absorbed the Santa Ana Drug Co.'s stock and business, using the latter's fine fixtures in fitting up the new store. B. & R. present a good illustration of a successful business house, which by untiring industry and correct methods have attained not alone a strong financial position, but have gained the universal regard and respect of their fellow-citizens. May their future be no less successful than their past.

R. B. Follmer, representing Dr. D. Jayne & Son, Philadelphia, is in the city.

Dr. J. S. Allen, representing Tarrant & Co., New York, is now in Los Angeles.

Victor E. Keppell has bought the business of E. Van Dyke, Jefferson street and Wesley avenue, this city.

Dr. W. S. Wallace, the genial representative of Mellin's Food Co., is in the city attending to his firm's interests.

Frank M. Bain, Wyeth & Bro.'s well known coast representative, is doing his usual good work in this city and vicinity.

Asbury G. Smith has purchased the business of the Pasadena Drug Co., which we trust will prove an excellent investment.

Merck's Report states that J. W. Montague, who is well-known in Los Angeles, has purchased and shipped to Honolulu, a stock of drugs, and will open a new pharmacy in that city.

A Chinese Prescription.

As is well known, the Chinese use a large and varied assortment of products in the preparation of their medicines, and Mr. J. B. Davy says that in the drug stores of China Town one can usually obtain a panacea for all ills, varying in the number of ingredients according to the price paid (25, 35, or 50 cents). Such a prescription usually contains a few slices of the root of glycyrrhiza, dried flower-heads of a composite plant, dried cockroaches, dried cockchafers, and the skin, head, and tail of a lizard stretched on thin sticks; an extra 5 cents will procure a dried "sea-horse"; and yet another 5 cents a dried fish of peculiarly narrow shape and about four inches in length. All these are boiled together, and the decoction drunk as a remedy for heartburn, toothache, cough, dimness of sight, and almost any other ailment. The vegetable portion of one of these mixtures has been examined at Kew. Among the drugs recognized were the fruit-heads of a species of *Eriocaulon*. This plant has a reputation in China for various diseases, such as opthalmia, especially in children, as a styptic in nose bleeding and in affections of the kidney. Another ingredient consisted of the spiny hooks from the stems of the Gambier plant (*Uncaria gambier*, Roxb.). Transverse sections of the stem of *Akebia quinata* were found in small quantities, as well as the bark of *Eucomnia ulmoides*, known as "Tu Chung." Tonic and invigorating properties are assigned to it, and it is said to be valued at from 4s. to 8s. per pound. Though the bark is very thin, it is abundantly charged with elastic gum, which can be drawn out in silvery threads when it is broken apart.

"Anti" Medication.

Mr. Williams: Doctah, what is the mattah wid Ulysses Grant?

Doctah: He's 'flicted wid de plumbago, fum chewin' lead pencils. Let him chew injun rubbah a half 'ouah 'fo' aetin'. —*Exchange.*

OUR ADVERTISERS.

Santonin for Pigs.

Prof. L. E. Sayre, of Lawrence, Kan., sends us the following note:

"A correspondent from Fairbury, Nebraska, reports how santonin has grown into such a demand that the stock of all the druggists for miles around is depleted. 'About three weeks ago,' says the correspondent, 'some of the farmers discovered that santonin was good for wormy hogs as a vermifuge, and results were marvelous. Millions of the parasite, scattered over the hog-lot, are without a home in a short time. The fame of santonin spread, and since then we have been unable to supply the demand for it. One ounce is fed to every 35 hogs by simply mixing the principle with the swill. We are now selling santonin by the half-pound instead of half-grain.'"—*Drug. Circular*.

Three money-makers are offered to the trade by F. W. Braun & Co. in the Hayden Mfg. Co.'s Arnica Salve, Carbolic Salve and Witch Hazel Salve. They are very neatly put up in large-sized boxes, and retail at 25 cents. The uniform price is $1 per dozen Add some to your next order.

FOR SALE.—Drug stock in this city in prime condition. Will invoice about $1000, at a bargain. Address A., care of F. W. Braun & Co.

POSITION wanted in town or country. Good all-round man, not afraid of doing a little too much; can and have taken charge of store (salary or commission). Registered in California and other States. Have good health and appearance. First-class reference as to character and ability. Reasonable salary. Age 29. CHARLES ALLEN, 17 Wall Street, Los Angeles.

Pacific Coast Drug Agency
OFFERS FOR SALE
First-Class Drug Stores and Medical Practices
in all the Pacific States and Territories
Clerks Registered, Provided and Employed. Partnerships Negotiated. Lists Sent Free. Correspondence Solicited.
G. M. LUDWICK,
S. E. Corner Second St. and Broadway, Room 201, Los Angeles, Cal.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—A library of chemical and pharmaceutical books and periodicals, cheap. Also Geissler Tubes, Induction Coil, small balance, etc. Address E. Borgmann, 3951 N. Twentieth St., St. Louis, Mo.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174. Chula Vista, Cal.

WANTED—Position by graduate in pharmacy. Best reference and long experience. Please state salary can give. J. R. HODGES, Coleman, Tex.

WANTED—Partner to open new drug business. Am graduate with long experience. State amount of money can put in. Best references. Address "TEXAS," care of California Druggist.

WANTED—To sell, the Figueroa Pharmacy, the best paying outside store in the city, *at invoice*. Want to devote all my time to practice only reason for selling. Only those meaning business need apply. W. M. Johnston, M. D., owner.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—An established drug business a few miles from Los Angeles, in country town. Will sell at inventory, which will come near to $3000. Inquire of F. W. BRAUN & CO., Los Angeles

FOR SALE—A well located drug store in Los Angeles, with an increasing trade, value $1200. Expenses small. Owner not pharmacist is reason for selling. Inquire of F. W. Braun & Co, Los Angeles

FOR SALE—In coast city of Southern California, a drug business established over eight years. Stock about $2500; location first-class. Address M. H., care CALIFORNIA DRUGGIST.

FOR SALE—City drug business at a bargain. Stock about $1200, all clean and no dead stuff. Good location for a doctor. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE—Elegant clean stock in the most progressive suburb of Los Angeles. Only drug store within twenty blocks. Best reasons for selling. Value about $2000. Inquire of F. W. BRAUN & CO. Los Angeles.

FOR SALE—A good, long established drug business in this city. Price, $2500. Address "ADVANTAGEOUS," care CALIFORNIA DRUGGIST.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

FOR SALE.—Drug store and fixtures (will invoice about $5000) in one of the best and most prosperous little cities in the San Joaquin Valley. No cutting. Will invoice or lump. Sales $9000 last year and considered by all a very bad year owing to failure of crops. Failing health compels owner to quit the business. Address H. C. FALLIN, Hanford, Cal.

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

The official organ of the San Diego Retail Druggists' Association.

The official organ of the Los Angeles County Pharmaceutical Association.

ONE Edward Thimme, of New York city, has taken upon himself, it would seem, the responsibility of "reforming" the drug business in that metropolis. Not himself a druggist, and with but a very small following of drug employes, he assumes to stand for the elevation of the business through a "shorter hours league," and he has caused a bill to be introduced in the New York State Legislature limiting the hours of work to be required of drug clerks by their employers. This labor agitator makes preposterous statements of accidents and deaths occurring through insufficient sleep of drug clerks which causes them to make mistakes in dispensing, and by his plausible though grossly exaggerated statements has succeeded in working up a good deal of sentimental interest and sympathy among the good people of New York, so that there is some reason to anticipate the passage of his bill. The true grounds of Thimme's action are found in his profession as labor agitator, the relations between the drug trade and their clerks not requiring any other regulation than those which custom supplies, and there is no likelihood of a betterment of conditions through impertinent interference of outsiders. The long hours of service in drug stores have doubtless been an obstacle to the short-day agitators getting what they have always been after, viz., a day's pay for a two-thirds day's work, and we can safely assume that any success gained in behalf of the down-trodden (?) druggist will be utilized in furthering their own short-day projects. The drug journals of New York insist that neither the druggists nor the clerks desire any legislation of the kind advocated by Thimme, and denounce him unsparingly for his unasked for interference. One thing is pretty sure to happen if the proposed law goes into effect, and that is a reduction in the wages paid drug clerks in that city. Conditions with the drug trade are not so good that they can afford to hire the requisite extra help, and continue to pay present wages.

We believe the large majority of drug clerks would prefer the long hours to the short pay, and hope therefore that no restricting law will be passed without first obtaining a free expression of the wishes of the class in question.

THERE seems to be nothing much more uncertain than "decisions" and "rulings" relating to the stamping of medicines. Commissioner Scott does not seem inclined to accept the judgment of U. S. District Courts in the matter, and insists on requiring certain chemical medicines to be stamped, under penalty of seizure, although ruled by the Court to be non-taxable under the law.

A curious perversion of facts seems to have place in the minds of some expounders of the law as to "compounded medicines," one legal gentleman taking calomel as an illustration of such. To a competent druggist no such illusory notions would be possible, for if calomel is a compounded medicine then so is every substance made from a base and only the bases themselves "uncompounded." There is really nothing to be done about this discouraging tax law but to repeal it, at least so far as schedule B is concerned—and thus relieve the druggist of a burden which falls especially, and so we think improperly, upon him.

THE National Association of Retail Druggists should have from druggists everywhere at least the encouragement of sympathy, best shown by a contribution toward expenses. T. V. Wooten, Chicago, Ill., is secretary, and John W. Lowe, New Haven, Conn., treasurer of the Association. A fifty cent or one dollar remittance, accompanying a word of sympathy and encouragement is the least that a druggist (not already associated with the N. A. R. D.) should do to help along the good cause. The movement means much to the drug trade and should not be hampered, as now seems to be the case, by the lack of ready money to carry on its work.

SUNDAY, April 2nd, is Easter Sunday. Do not fail to supply yourself with Paas' or Fleck's Easter Egg Dyes, so necessary to promote the enjoyment of the little folks on that day. One-quarter gross tablets or calico papers for one dollar. Sold by F. W. Braun & Co.

THE wholesale drug houses of Chicago have sent out circulars to their customers informing them of some changes in their method of receiving returned articles, of modification of cash discounts on settlement of accounts, and of their purpose to charge an additional sum on purchases of "patents" in less than quarter-dozen lots. They argue that it is an actual loss to them to sell and deliver one or two bottles of an article at the dozen rate, and propose to make an additional charge of one, two, three, four and five cents respectively on each bottle thus sold, based upon its retail price, 25 cents and upward. This is a revival of the manufacturers' quarter-dozen plan of three years ago, which was abandoned after a short trial. It remains to be seen whether the Chicago jobbers can hold together on the proposition.

THE appointment of Mr. Carl G. Hunkel to the Stearns Fellowship in the School of Pharmacy of the University of Michigan for the ensuing year gives evidence of the breadth of the faculty, who might have been expected to make the appointment from among the graduates of their own school. Mr. Hunkel is from the University of Wisconsin and has already gained public recognition as an original investigator through his published papers on "Oil of Balsam Fir Needles," "Oil of Black Spruce," "Oil of Hemlock," "Toxic Action of Phenols," etc.

TEMPERANCE is an excellent thing; total abstinence is but a name for something that doesn't exist. All druggists know this very well. The most pronounced and uncompromising prohibitionist wants to keep a bottle of good whisky in his house against a time of need. He is correct, too, in this, although illogical, for he assumes that he has rights in this respect not due to others.

Treat the gentleman kindly, however, and wrap his bottle of Crescent Malt so that it might appear to be a bar of Castile soap he is carrying home. So shall your reward come.

PROFESSOR REMINGTON is fond of his joke and in the habit of telling good stories while lecturing to his classes. Recently on such an occasion a large piece of plaster from the ceiling fell down with a crash. It is safe to say he never more effectually "brought down the house."

WE notice that some otherwise well informed people erroneously refer to the present year (1899) as "the closing year of the nineteenth century." If that were so then it took but 99 years to complete the first century, a proposition plainly untenable. The twentieth century begins at midnight, Dec. 31, 1900.

Druggists of California

WRITE to your Representative in the State Legislature to mail you copies of Assembly Bills Nos. 7 and 36 and Senate Bill No. 240, and learn what it is proposed to do in the interest of non-registered druggists and others.

By favor of Mr. J. W. Wood we have just seen copies of those bills. We regret that we did not have earlier information, so that we could publish the text of the proposed amendments, which seem to jump our Pharmacy Law backward to a new starting point. Look them up.

THESE are just a few of the things that make a druggist's life one continual round of pleasure, "one grand, sweet song", one sublime succession of blissful heart throbs:

Yes, it is all a bed of roses. If a druggist charges a fair price for his goods the people say he is a robber; if he sells cheap they say his goods are worthless. If he sells liquors for medicinal purposes they say he is running a saloon; if he does not sell them at all they say he is a poor sort of a druggist for not keeping stimulants on hand for emergencies. If he keeps open on Sunday he is a heathen; if he does not he is an unobliging cur. If he sells his own make of goods they say he is a villainous substitutor; if he does not they say he has not sense enough to make his own medicines but has to handle what people send him ready made. If he aids local charity he is a pharisee and is doing it to help his trade; if he does not he is a hog. If he goes to church he is a hypocrite and if he stays away he is a hardened sinner. If he closes his store early he is discommoding his patrons; if he closes late he is working his clerks to death. If he is not a college man they say he does not know his business; if he is a college man they say his head is swelled and he is no good on earth. If he provides seats for his customers they say he encourages loafing; if he does not, he does not care for his customers' comfort. If he prescribes over the counter they say he is trying to knock out the doctors; if he does not they say he is in cahoots with the doctors and gets a commission on the patients he sends. If he is married he whips his wife; if he is single they say he ought to get married. If he dresses well he is a dude; if he does not he is a jay. If he lives comfortably they say he is a spendthrift; if he is economical they say he is stingy. If he carries a large stock they say his goods get old and spoil before he can sell them; if he carries a small stock they say you can never find what you want there. If he gives them just what they call for without comment they say he is too mean to give them the benefit of his advice and experience; if he offers a word of advice they tell him it is none of his business.

And so it goes. No wonder so many people go into the drug business.—*New Idea.*

The grippe and small-pox scare has enlivened the trade among the suburban druggists. The demand for gum asafœtida, camphor, cream tartar, vaccine-virus, sulphur and other disinfectants has been unprecedented, and we are pleased to state sales of such articles were not made at cut rates, but have allowed a living profit to all. Even the cut-rate stores took advantage of the times and screwed up courage to ask a profit. Let the good work go on toward profit-getting and all work in concert and harmony.

Anti-vaccination societies, one of which is in our midst, are among the anomalies of modern times.—*California Druggist.*

What a predicament the *Druggist* is in! An anti-vaccination society in one's midst would be even worse than green apples.—*Pomona Progress.*

Right you are, *Progress!* give us the green apples.—ED. CAL. DRUGGIST.

Dr. W. B. Wood, of the Orange Pharmacy, has gone for a month's visit to Kansas City. We hope the arctic weather there will not spoil all the pleasure of his visit.

A Druggist's Story.

By T. E. McGrath, Tarrytown, N. Y.

I deliberately chose my calling and studied for it, so that I have nothing against the profession to which my life must henceforth be devoted. But, sir, I believe the drug clerks, particularly in the large cities, are the hardest worked, poorest paid and least appreciated people in the community. For in our keeping, even more than in that of the doctors who prescribe, is the public health. We must keep our brains clear and be ready to fill a prescription when called from our beds at 2 o'clock in the morning as accurately as at high noon.

Some time ago I was myself under the weather. The hard work was telling on me and I was threatened with insomnia and fever. One midnight, while I was in this condition, I was rung up, and with tottering steps and a reeling brain I made my way down to the store. Outside the door I found a boy awaiting me, from a house near by, with a prescription calling for a number of half-grain morphine powders. The doctor who wrote the prescription was a friend of mine and a very careful man. The powders were for an old gentleman who had been ailing for some time, and I knew they were intended to induce sleep. I filled the prescription, properly as I thought, and when the boy left I returned to bed. As I could not rest, I was up early and down stairs. Like a dream I recalled the morphine prescription. I read it over; yes, the powders were to be one-half grain each, taken as directed.

I looked at the scales; they had not been touched since I handled them, but I was frozen with horror when I saw that there was a ten-grain weight on one side. I had given the man enough morphine to kill a dozen men, for there were four powders. I cannot describe the torture that followed. I felt that I had committed an unpremeditated murder. I shrank at the sound of every footstep, and shuddered when anyone entered the store.

About 9 o'clock my friend, Dr. Todd, came in with a very sad face, and in answer to my inquiry as to the health of Mr. O'Dell, the man for whom the medicine had been prescribed, he said:

"The man is dead."

"My God!" I gasped.

"Oh," said the doctor, "I fully expected it. The morphine was simply intended to ease him off."

"But did he take it?"

"No; by the time the boy got back with the medicine the old man was dead."

Language is all too weak to picture my joy on learning this. I kept my secret to myself and secured the powders as soon as possible. From that day to this I never made up a prescription when my hand was not steady and my brain clear.—*American Druggist.*

Mr. Tom Exton, of Exton & Nichols, Oceanside, has been having a two weeks' visit from his brother, Lieut. Exton of the 20th U. S. Infantry, who went through the Cuban campaign with his regiment, and has just gone on the Scandia to Manila with his command. Lieut. Exton was one of the fifty-five West Point graduates who were rushed through a little ahead of time last spring and put into active service. His brother accompanied him to San Francisco to see him off to his new field of duty.

Newspaper Medicine.

The New York Journal has given much space and many scare heads to the subject of "druggists' blunders," at the instigation of Labor-Agitator Thimme, but in its issue of January 22 it has perpetrated such egregious, asinine, silly blunders as no drug clerk was ever guilty of. The realm of medicine has a wonderful fascination for the untutored mind, and the greater the ignorance of the subject the more the assurance of the individual in parading it. Turn a newspaper loose into the field of medicine and you may at once call the coroner. The newest freak of this abomination of yellow journalism is a collection of formulas (?) for cosmetics. If any person could be found who was fool enough to follow the directions laid down in the first formulas given, and any druggist could be found who was stupid enough to put up the medicines ordered, the Journal would soon have a damage suit on its hands. Under the heading "To make the face fair," Mrs. Cleona M., of Paterson, N. J., tells the readers of the Journal to "take before meals a wine-glass of the following: Mix half an ounce of sulphate of manganese with one pint of water. After meals take one pill made of the following mixture: Two scruples extract of gentian, sixteen grains of sulphate of iron, ten grains of sulphate of quinine." No druggist would put this up precisely as printed, or if he did the Journal would be the first to blazon forth in big letters, "Another druggist's blunder."

Fortunately for the fools who will read and may try this silly collection of cosmetic recipes the majority of them are not dangerous or even harmful, save to the purse and patience of those who waste time and money experimenting with them, and in most cases the much-maligned druggist's advice will be asked and evil consequences thus avoided.—*Amer. Druggits.*

Luzon, a Mortar.

According to Mallet, the island of Luzon was so called because its Spanish conquerors observed that in front of the cabin of every inhabitant there stood a large cylindrical wooden mortar, which, in the language of the Tagalas, was called a losong, and in which was pounded the rice that formed, and still forms, the staff of life of these people.—*Am. Drug.*

Macaulay, the English historian, did not exaggerate when he called small-pox "the most terrible of all the ministers of death," and said in describing its ravages in the seventeenth century, "Small-pox was always present, filling the churchyard with corpses, leaving on those whose lives it spared the hideous traces of its power," for two-thirds of the pauper blind in England were made so by this cause.—*Pub. Health Journal.*

The dispensary is the most dismal place in a South Carolina town. A high fence in which there is a small opening shuts off a small space, generally about six feet deep and ten feet wide. In this space there is not even a stool or a bench. If the buyer loiters at all after a purchase, he soon becomes persona non grata, and cannot buy at all. He must leave the premises, taking his sealed bottle with him. There is nothing to induce him to stay. If he attempts to open a bottle on the premises he is at once arrested and no more liquor can be sold to him. A blacksmith or boiler shop is more inviting and hospitable than a dispensary in South Carolina.—*Liquor Trades Review.*

Cracking Coal for Cutting Glass.

	Parts.
Powdered charcoal	90
Niter	2
Benzoin	1
Powdered tragacanth	2

Mix in fine powder, mass with water, roll into pencils and dry. Let one of these, when ignited, pass slowly over the glass, and cause a drop of water to fall in the hot parts, when it cracks. The crack may be led in any desired direction by means of the turning pencil.

Cardamon	1.75	"
Sacch. alb	116	"
Ol. rosar., ol. caryoph aa. gtt	3	

Divide in pastille, 52.

The pastilles are covered with cocoa butter and vanilla sugar, and dusted over with pulv. benzoin.—*Zeit. des Allgem. Oester Apoth. Ver.*, *Phar. Journal.*

Safe Mouse and Rat Poison.

Salicylic acid	G	5
Garlic, chopped	head	1
Ammonical verdigris solution, 20 p. c	G	50
Barium carbonate	(G 50 to) G	100
Lard	G	500

Fry the garlic in the lard and tallow, the latter in amount as the season varies. When the garlic is brown, add the baryta, then the verdigris. A writer in the Sueddeutsche Apotheker-Zeitung claims that this constitutes a safe and infallible rat and mouse exterminator. It does not spoil by age.

Business Personals.

Griffith & Co. succeed E. A. Hibbard, Azusa.

W. C. Hamlin has purchased the drug business of Laudrum Smith, Downey.

F. T. Aspinwall & Co. are opening a new drug store in Kingman, Arizona.

E. E. Armour, Pomona, was elected last month to fill a vacancy in the Pomona City Council. The selection was a first-class one in all respects.

Mr. Charles Allen, of St. Louis, who comes to us highly recommended as a reliable and efficient pharmacist, has accepted a position with Messrs. Boswell & Noyes Drug Co.

Dr. J. H. Trout has a pair of pure-blooded Maltese cats that attract a great deal of attention, particularly from his lady customers. Ask the doctor about the wildcats he saw on his Eastern trip.

The New York Pharmacy has had its interior touched up with a new coat of paint and other improvements that add much to the beauty of the neat little pharmacy. Business on Main street seems to be improving.

Ben S. Virden is opening a new drug store at Oxnard. Just the right man. Success to him!

Francis Zerr, a graduate of St. Louis School of Pharmacy, has been received as an assistant in the prescription department of Sale & Son Drug Co.

Dr. J. C. Lindsey of the Alameda-street Pharmacy is again at his post. The doctor was laid up with a carbuncle and other serious complications for several weeks.

Dr. W. H. Prittie of Pasadena succeeds Aug. Krug, Seventh and Wall streets, and the Doctor is re-modeling and re-painting and will soon have a beautiful pharmacy. We bespeak for him a goodly share of the patronage of that locality.

S. Caldwell, Pomona, has exchanged his store building, together with his fine residence on Second street, with V. V. Pomeroy, of Los Angeles, for the Pacific Hotel property, Pomona. Mr. Caldwell's drug business is no included in the above transaction.

Dr. W. M. Johnston, corner Pico and Figueroa, is enlarging his drug store by adding the grocery store next door. He will have an elegant and up-to-date pharmacy. This change will certainly tend toward increasing the doctor's already large business. We congratulate him on his good taste, displayed in arranging his store and furnishing his elegant offices in the rear of same.

Frank N. Drake, sixteenth street and Grand avenue, is to be congratulated on his recent happy appearance, caused by the return of his better-half from a five months' visit among Eastern friends and relatives. For a period it was apparent to his personal friends that he was about to go into a decline, but the timely arrival of Mrs. Frank changed the atmosphere and all is serene and he wears the old familiar smile as of yore.

The drug store of A. G. Orena, sixth and Flower streets, was damaged by fire to the extent of $200, Wednesday morning, Feb. 8. Mr. Orena had gone to breakfast, leaving an oil stove burning, which exploded, causing the fire. The fire department had broken in the windows and extinguished the flames before Mr. Orena's return. The fire was in the rear of the room among the fluid extracts and pharmaceuticals and a curious circumstance in connection with it was that a one-pound bottle of the highly explosive concentrated Nitrous Ether was uninjured, while a bottle of fluid extract on one side of it and of Phospho Mur. Quinin on the other were both exploded by the heat. Can anyone explain why? No insurance.

From the Little Red School-house.

A school teacher at Port Allegheny, N. Y., the other day received the following note: "My boy tells me that ven I trink beer der overcoat from my stummack gets to thick. Bleese be so kind and don't interfere in my family affairs."—*Life.*

Sturtevant's poultry remedies and egg maker are the leaders in this line of goods, and are a desirable addition to the druggist's stock in trade. For sale by F. W. Braun & Co. See advertisement.

The Pharmacist in the Philippines.

By William E. S. Fales, C. E., M. D.
Formerly U. S. Consul to Amoy, China.

To understand the present condition as well as the prospects of the drug trade in the Philippines it is necessary to have some knowledge of Spanish law and policy. From time immemorial Spain has regarded its colonies as mines to be exploited for its own benefit and has never taken into consideration the welfare of the colonists or even their organic rights. Discriminating duties tend to give Spain and Spanish capital the exclusive benefit of colonial commerce. Thus a much higher duty is charged upon goods which are brought to Manila in foreign bottoms than in Spanish ones, and also on goods, no matter what their nature, brought from foreign countries than from Spain herself. This results in the curious commercial paradox of its being cheaper and easier to ship foreign goods to Manila by the way of Barcelonia or of Cadiz than from San Francisco, the extra expense of freight and re-shipment being smaller than the extra duty of the direct shipment from a foreign port. Thus, although the drugs and medicines used in the Philippines come from every country in the world the majority of them reach those islands from the warehouses of the Spanish merchants in Spain, and are carried there in Spanish ships.

Prior to the war the Philippines were governed by a highly centralized colonial administration, whose headquarters were at the capital, Manila. All business, legal, political, ecclesiastical and commercial, was obliged to make that city its central point or place of importation and distribution. This simplified trade and prevented the normal and healthful competition which springs up from having various distributing centers. The competition which prevails in the United States between New York, Boston, Philadelphia, Baltimore and Chicago has no parallel in the Philippines. The price of everything is set in Manila and the merchants in second-class cities like Iloilo and Cebu take their figures from the former city. Spanish taxation is unscientific and inequitable. It bears the most heavily upon the poor man and the beginner in business, and the most lightly upon large and wealthy concerns. The consequence of this condition is that Manila contains many very large houses, nearly all of which are well to do and very prosperous. In the cities of the second-class the better stores are but agencies of these Manila establishments or else are small shops possessing little capital and credit. In the cities of the third-class and the towns there are few business concerns worthy of the name. When a man is very sick he is compelled to buy his medicines from a doctor or a friar and pays accordingly for the privilege.

THE PHILIPPINE IMPORT TRADE.

Yet in spite of these almost paralyzing conditions the drug trade in the Philippines is large and profitable. It corresponds to our own, but on account of local conditions or of climate it is wider in extent. Thus many of the larger concerns import heavy invoices of wines, whiskies, ales, beers and other liquors and sell them both wholesale and retail by the bottle. They manufacture bottled soda and mineral waters. They put up many toilet preparations and carry a broad line of fancy goods and notions. The soda-water stand, so familiar in the American stores, is unknown in the Far East. Why it should be so is a mystery. There is a wide use of bottled soda, it being kept in stock in every house, club and office. There is a fair use of sirups, more especially of lime juice, lime juice cordial, raspberry sirup, quince sirup, "shrub" (which corresponds to our root-beer extract), vanilla and peppermint. Ice and ice-cream are great luxuries, so that there seems no reason why a soda-water stand with fruit sirups and even with ice-cream soda water should not be a financial success in that part of the world.

In medicine proper there is not much discrimination, for the very simple reason that Spain manufactures practically nothing in this line. The standard drugs are English, German and French. There are several patent medicines from Spain and Italy, many from England, several from the United States, and many local or Chinese. In fancy goods the English formerly prevailed, but now the French and Germans seem to have the upper hand. Some very pretty articles come from Spain, more especially those involving fine metal working. In this field of industry the Spaniards are still very expert, and do capital work in plating, inlaying, chasing and jeweling, although their jointing and designing are very much below par. This will apply to powder puffs and boxes, tooth and nail brush holders, manicure and toilet sets, cologne stands, perfumery sets, hair-pin trays, syringes, aurilaves, tweezers, nail cutters, atomizers, barbers' scissors and combs, safety razors, soap dishes and croup kettles.

The system is the one generally used, decimal. But all druggists are supposed to be familiar with both the Spanish and English systems. The prevailing practice is allopathic and of the old-school. There is a large use of old-fashioned remedies such as calomel, creta cum hydrarg., Epsom salts, Glauber salts, Rochelle salts, senna, laudanum, opium, morphine, quinine, arsenic, Fowler's solution, squills, ipecac, cantharides, calcined magnesia, potassium, carbonate, chloroform, ether, ergotin, aloes, gumarabic, cubebs, copaiba, sandalwood oil, and also of the more recent remedies, lithia, iodoform, iodol, aristol, phenacetine, antipyrine, salol, salicylic acid, antifebrin, sulphonal and bismuth.

Of American goods in the Philippine market I recall Ayer's Sarsaparilla, pills, Cherry Pectoral and Hair Vigor; Bristol's Sarsaparilla, pills, Oriental hair tonic and Anacahuita; Hood's Sarsaparilla, Jayne's and Carter's pills, Ripans Tabules, Wishart's Pine Tree Tar Cordial, Alcock's, Benson's and Seabury's plasters; Cashmere Bouquet soap and perfume, Packer's tar soap, Constantine's tar soap, Glenn's sulphur soap, Scott's Emulsion, Lanman & Kemp's cod liver oil and Florida water, Moller's cod liver oil, Barry's Tricopherous, Sozodont, Brown & Lyon's tooth powders, McKesson & Robbins' standard preparations, Chesebrough's vaseline and carbolated vaseline, cosmoline, petroleum jelly, talcum powder, Warner's Safe Cure, Pike's toothache drops, Cuticura soap and resolvent, Pitcher's Castoria, Brown's vermifuge. Mrs. Winslow's Soothing Syrup, Horsford's acid phosphate, Fellows' hypophosphites, Horlicks' malted milk, Armour's extract of beef, Rudisch's Sarcopeptones, Calisaya Elixir, Perry Davis' Painkiller, Johnson's liniment, Vinegar bitters, Syrup of Figs, Cascara Sagrada, Lydia Pinkham's Vegetable Compound, Hyomei, menthol inhalers and pencils and menthol plasters.

CONFECTIONERY AND DRUGGISTS' SUNDRIES.

There is a small trade in fine confectionery, but it is carried on under considerable difficulty. The heat of summer is of course a serious obstacle, as is also the swarming insect life of that part of the world; but a greater evil is the humidity of the rainy season. Americans had a good taste of this weather in September of the present year and will recall without trouble how the salt, sugar and confectionery became wet and finally a regular paste. To overcome this, confectioners in the Philippines, as well as all first-class pharmacists, keep their goods in ground-glass jars and import their stock from England, France, Spain and China in hermetically sealed tin or lead packages. There is a fair trade in brushes of every sort. The natives, even those in the country districts, are good buyers of this class of goods. In the stores may be found hair brushes, tooth, nail, flesh and bath brushes, hat, velvet and clothes brushes, mustache, eyebrow and baby brushes, camel's-hair pencils, Chinese brushes for writing, horse, boot and scrubbing brushes, lady's bonnet brushes, hair-dusting brushes and paint brushes. In this trade England formerly played a very important part and did more than a majority of all the business transacted. Then Germany entered the field, followed by China, and both were getting ahead rapidly when the Japanese suddenly appeared upon the scene and broke the market all to pieces.

The same thing has occurred in the American market, where Japanese tooth and nail brushes are now to be found in nearly every drug store. But it is much worse in the Philippines, where they do not fight native interests but compete with the English and Germans upon equal terms.

ESSENTIAL OILS AND PERFUMES.

There is a very large use of essential oils and toilet waters. The larger part of this profitable industry is still in the hands of Spain, which supplies the Philippines with West Indian goods or with Spanish goods made from West Indian materials. In the face of this, however, a fair business has sprung up in the Philippines in the distillation of native essential oils. The largest single industry is the making of the extract of Ylang-Ylang by a process imported from Japan. Others extract the essential oils of heliotrope and geranium, both of which grow there more like weeds than flowers, and of several of the native blossoms. Under American administration this field promises to be of the greatest value. Labor is cheap and the raw materials can be purchased for a mere song. Under American business management essential oils and toilet waters could be put upon the market for one-quarter or one-fifth of the prices of French and German goods.

JAPAN A FACTOR IN TOILET SOAPS.

There is a large consumption of toilet soaps, the favorites being Spanish and French Castile, both white and red, and next to these the fine preparations of Paris and London. Lubin, Coudray, Fay, Pear, Atkinson and Pinaud are among the favorite makers. Imitations are found in the market, which come from Belgium, Holland and North Germany. In the last five years there has been a slight importation of soaps from Japan, Hong Kong and the United States. Those from Japan have at the present time the largest future on account of the low price at which they can be laid down in Manila.

This business field has not been properly cultivated, and the trade done, though large, is not one-tenth of what it will be under a good and honest government. The native population have a profound belief in the efficacy of drugs, and if permitted to earn a good living would purchase largely. It will be slow work, however, in developing trade in the islands. Four or five years will be required before the little shop-keepers will realize that they can carry stock without immediately having their taxes doubled. At the present time a tradesman who has a stock of $200 considers himself fortunate. He buys it usually for cash, so that he is in no danger of having his paper go to protest. Neither is he in danger of that greater evil, being taxed extortionately upon a stock of which he owes for one-quarter and is carrying another quarter upon consignment.

The largest establishment in the Philippines is that of A. S. Watson & Company (Ltd.), whose main office is at No. 14 Escolta. The extent of their business may be estimated from the fact that in their main office they have English, Spanish Tagal and Chinese managers, and that they carry a force of eleven men at the head of as many departments, with clerks, porters, messengers and office boys innumerable. Their card speaks for itself. They are "chemists, druggists, perfumers, manufacturers of aerated waters, and wine, spirit and cigar merchants." They have branches in the other cities. In the official long list of Manila are given no less than twenty-three first-class boticas or pharmacies. Besides these are the establishments of the distillers of essential oils, of whom A. Schwenger, No. 12 Barraca, is the leading manufacturer, with Vicente Tavega, at No. 5 Escolta, a good second; the makers of mineral waters and the dealers who would correspond in a vague way to the proprietors of American department stores which deal in druggists' goods and sundries.

The Specific Micro-organism of Vaccine.

It is reported that Mr. Stanley Kent, of St. Thomas' Hospital, who has been working at vaccinia since 1893, has succeeded in discovering the specific micro-organism upon which it depends. He has further prepared pure cultures of the germ, and has used them for vaccinating apparently with good results.—*Chem. and Drug.*

The Phoenix Gazette says:—"The editor of the Tombstone Prospector is in a great 'pickle.' He was the recipient of a Christmas present, and he doesn't know whether it's a pair of shoulder braces or a harness for his pug dog. He doesn't dare try it on the dog for fear the donor will be offended, and he doesn't dare put them on himself for fear he will be laughed at. He is hoping the giver will soon explain the use of the durn thing."

It seems that the latest fad in the line of therapeutics and hygiene is the "nudity" cure. The method of treatment consists in obliging the patient to go naked, with the exception of a slight breech clout, similar to the article worn by Gunga Din, and described by Rudyard Kipling as consisting of nothin' much before, and rather less than 'arf o' that be'ind. We take it that in this cure everything is sacrificed to animal existence, and that the time is spent in about the same way that it is by the lizard and crocodile—the patients bask in the sun until one side is roasted, and then turn over and give the other side a chance. No one should speak ill of this cure as surely the patients get enough roasting, but one cannot help fancying how picturesque the effect must be as the patients lie and compare notes as to the amount of benefit received by the cure in such words as "you're not so warm."—*Drug Topics.*

Some Medicines of the Swampee Cree Indians of the North.*

By C. Flexon, Winnipeg, Manitoba.

At a late hour during the close of last week, a most interesting gentleman, a stranger to me, hearing that I had been appointed a delegate to this meeting, called to see if a brief record of his experience among the Swampee Indians of the North, with whom he had lived for six years, would be acceptable to me. I thanked Mr. Strath—for such is his name—and he thereupon furnished the following particulars of some of the drugs prescribed by him in his capacity of medical officer at Norway House, about 400 miles due north of Winnipeg. The conversation which I had with him was unfortunately but too short, as it was extremely fascinating. He has evidently been a close observer of those people. Apart from speaking their language fluently, I should say a pretty accurate knowledge has been gained by him of the strength and the weakness of the Cree mind. As a student of Greek and Hebrew, he has a remarkably high opinion of the Cree language. For beauty and perfection, he says, it cannot be surpassed, and to hear him talk of the poetry and eloquence of some of the native sermons which he has heard, has completely destroyed my confidence in the language in which we are conversing on this occasion and which we are conceited enough to suppose to be the best in the world.

A large number of the diseases common among the white people are just as common among the Indians, and while many of the drugs used by them are well known to us, the manner of using them is certainly different. In the treatment of worms, for instance, Male Shield Fern, the Aspidium of the U. S. Pharmacopœia; Filix Mas, of the Ph. Br., is given as a strong infusion, combined with Senna and Wild Indigo. The latter article, by the way, is used as an antiseptic, and has excellent drying properties in the treatment of eczema humidum, or "weeping eczema." One of the commonest drugs with them, and which is to be seen hanging up to dry in every wigwam or tepee, is the Wekas or Sweet Flag—the Calamus of the Pharmacopœia. It is considered a specific in all throat troubles, with the exception of diphtheria, which is unknown to them. In cases of pharyngitis and tonsilitis it is used externally and internally. The rhizonid is chewed and the saliva allowed to wash the throat. Poultices are made by mixing the powder with boiling water. It is a curious fact that the Indians are not only ignorant of gargles, but of the act of gargling, and Mr. Strath has been amused time and again in his efforts to get a Cree to gargle. This drug is carried about by the natives in the winter time as a tonic, and is chewed because of its stimulating properties by the Indians as tobacco is chewed by the white—or should we say more correctly, by the civilized man. Most of their medicines are in the form of infusions. Very little is known about the salts, and it was with the greatest difficulty that the officer could persuade a patient to take Epsom salts, in consequence of a deep-rooted superstition that the magnesium sulphate will produce inflammation of the bowels. Pills, no matter how strong, are swallowed ad libitum. Podophyllum Peltatum, or Mandrake, is taken in doses of 20 grains. Carui Fructus, or the common Caraway, is indigenous to this country and is the common remedy for colic, a complaint perhaps more frequent and more stubborn than with us.

Another indigenous plant and one which grows in that latitude in great profusion is the Caulophyllum, or the Blue Cohosh, also known by the name of Pappoose Root, Squaw Root or Blueberry Root. It is used very largely in obstetrics and all female complaints. In doses of 30 to 60 grains the powdered rhizome is given to produce abortion; but the Crees have a powder which they mix with the Cohosh, and when thus administered Mr. Strath has known more than one instance where a three-months' fetus has been expelled from the uterus without ensuing danger to the mother. He even goes so far as to say that abortion procured in this manner precludes all possibility of future conception. This powder they never allowed Mr. Strath to see, and in spite of his offer of $50 for a small sample, the secret has been kept profoundly sacred. Menstruation at the age of 11 years is the rule, and he considers it a remarkable fact in a cold country, where the thermometer often registers 50 degrees below zero.

Ladies' Slipper, the Cypripedium of the Pharmacopœia, imported from the tribes to the south, is chiefly used in rheumatism in very large doses. It is also used in the treatment of epilepsy; but this disease is of rare occurrence.

As an aromatic stimulant Hedeoma, or Pennyroyal, is as much used by the Cree women, and in a similar manner, as by our own people.

Plantago, or Plantain, is used commonly as a hemostatic, and is chewed by the doctor and applied as a paste to the bleeding surface. This drug is also their remedy for toothache. It is not put in the aching tooth, but is swallowed. Some of you will be surprised to hear that the Indians suffer very much from their teeth, and that my informant has practiced a great deal of dentistry during his residence with them.

Juniper is used in three forms. The berries are stewed and eaten as a diuretic. The leaves are dried and dusted over indolent sores, healing them with wonderful rapidity, and the root infused is administered in case of gravel. Though Bright's disease is rare, gravel is very common and most of the old men die of it. Hydrangea is used with Juniper and with great success.

Spearmint, Sarsaparilla and Dandelion are taken for the same complaints as we ourselves take them.

Hemlock Spruce is much thought of. The inner bark of the tree, freshly peeled, is mixed with equal parts of Poplar and Black Birch to make a decoction. In the process of boiling, an oil is taken from the surface. This oil is mixed in the proportion of 2 drams to a quart of water, which quantity is drunk in the course of two or three days as an abortive medicine.

We must no longer pride ourselves on the nursery toilet powders which we present to our customers in such a variety of charming packages. To the Indian, whose untutored mind, as Pope says, sees God in clouds and hears him in the wind, must we go for the most agreeable and most absorbent article of the kind yet introduced, a sample of which I have with me. It is nothing but the rotten interior of the Hemlock Spruce, lacking perhaps the extreme fineness which could only be obtained by modern methods and machinery.

We now come to Willow Bark, which is used as a hemostatic in the form of infusion. It is the belief of the Indian that bleeding should be arrested at once. He has an awful fear of death from loss of blood, and an Indian has been seen to faint whilst watching another having his finger amputated.

---

* Presented to the Scientific Section of the American Pharmaceutical Association.

Regarding Salicin, "the important constituent of Willow Bark," the Cree is incredulous as to its source. He cannot understand how a white powder can be made from a bark, and it is entirely without faith that he is occasionally induced to take this remedy or the salicylates for rheumatism.

The belief that fever can only be cured by vomiting it up has a strong hold on the Cree mind, and he therefore swallows the strongest remedies by taking what we would consider more than a maximum dose of Veratrum Viride, or the Green Hèllebore of the Pharmacopœia; but this powerful drug has another use, the story of which will, to say the least, be news to some of the gentlemen present. The rootlets and the rhizome are powdered between two stones, and as such is taken as a snuff to reduce hernia. The modus operandi is thus: The patient, naked, of course, is elevated to a horizontal position. He then takes a good pinch of the snuff and during the violent sneezing which follows, a companion standing ready at the side, plunges back the rupture with his fist, and if it is not a case of strangulation, the treatment is sufficient. To undo matters, so to speak, the patient is advised to eat all the pork he can. Mr. Strath is of the opinion that hernia is common with the tribe in consequence of the abundance of grease consumed by them, and he ventured to say that eight out of ten Crees are ruptured.

Skin diseases of all kinds are there, and are treated with an ointment made of equal quantities of gunpowder and lard.

Sturgeon Oil is used in the place of Cod Liver Oil and is clarified till it becomes the color of Tincture of Capsicum. In one ounce doses, which are considered large, it acts as a cathartic.

An infusion of wild raspberry leaves combined with willow bark is an excellent remedy for cholera infantum, if promptly administered, but there are a great many deaths from diarrhea. In that latitude and in all degrees north of 54, a very large raspberry grows which is called the "headberry" by the Indians; its botanical name is Rubus arcticus. The berry is found at the head of the stem two feet in height.

Rumex, or Yellow Dock, is well known and used extensively as a laxative and for poultices. In any critical case of illness the medicine man of the tribe is called in and is required to say whether or not the patient will recover. This skillful fakir has a powder resembling pulverized Rhei in appearance. This he places on the surface of a saucerful of water. The powder in a moment or two spreads out into rays either to the East or to the West. If to the former point of the compass, the victim will die; if to the latter, which invariably happens, recovery is promised. It is quite likely that a promise of such a nature materially helps the patient by buoying him up, and by inspiring him with hope. So much for one feature of Indian superstition.

Indian revenge, or rather that of the Northern Crees in particular, is, if true, of the most shocking character. It is said if a Cree wishes to punish another severely, he does so by disfiguring him for life, by introducing an almost tasteless compound into his tea or tobacco—generally into his tea which he drinks strong and in great quantities. This vile compound is made up of 27 vegetable and animal drugs. The victim feels no ill effects at the time of taking it, but in the course of two or three months the skin begins to peel, a rash breaks out and spreads over the entire body. Subsequently the skin gradually darkens to black, and on the exposed parts hair grows so thickly as to give the unhappy Indian the appearance of a baboon. He never recovers. There is no romance about this, I am assured, for there are at least half a dozen cases of the kind to be found in the country at this day.

Their most fatal poison is the wild carrot. These Indians have a fashion of boasting among themselves of their ability of poisoning enemies at various distances. Just imagine an Indian polishing off an enemy at a distance of five miles by a wild carrot!

Business Personals.

John R. Cauch, Santa Paula, has just completed a handsome residence for his own occupancy. This tangible evidence of prosperity is a subject for congratulation, which we hereby tender, with our best wishes for a long continued success.

E. Virden, Santa Paula, is rejoicing over the advent of another little daughter, completing a trio. One of these days "The Three Little Maids from School" will be the popular air at the Virden residence. "May they live long and prosper."

L. W. Pierce, of Pierce & Robbins, Pomona, has recently completed and now occupies an elegant new residence on Pasadena street. Mr. Pierce is one of Pomona's most popular druggists and useful citizens, and has well earned the success that he has attained in both the business and social life of his city.

T. H. Jones, senior of Jones & Son, Ventura, has obtained an option on some valuable mining property in Mono and Inyo counties, where he has spent a large part of his time during eighteen months past. We hope there will be no hitch in the good fortune that seems to await him in this deal.

Since the decease of C. B. Elbe, the Arcade Pharmacy, this city, has remained closed, though several parties have looked over the ground with a view of re-opening the store. It seems as though a young and energetic pharmacist should be able to make a good living there, and on a small investment.

La Grippe it seems will get even the best of them down. Frank D. Owen, after wrestling several days with the old rascal, has again shown up at his Corner Drug Store, West Temple street, and is again dispensing drugs and jollity in his accustomed happy style.

Mr. Joe Wetlock, late with White & Bailey, San Bernardino, has accepted a position with C. E. Weck, Riverside.

J. C. Hardman, Riverside, has been improving and inclosing his prescription department, adding much to the completeness of his fine establishment.

W. H. Harmon, the genial East Side drug man, has been laid up with the prevalent grip for several days. We hope soon to see his pleasant smile at the counter again.

Mr. Gus Hills was in charge of the Alameda-street Pharmacy during Dr. Lindsey's recent illness. We congratulate the doctor in securing the services of such a competent salesman.

Will Phillips can once more be found at Dean's Pharmacy, Third and Main streets, after a two years' absence in San Francisco and Mexico. Had to return to his first love. No place like Los Angeles.

The countenance of the genial city salesman M. F. Lucas, of F. W. Braun & Co. is again wreathed in smiles, caused by the recovery of his wife, who has been seriously ill for the past month with la grippe. He will soon be around with a new cargo of seasonable stories for the boys.

H. G. Voeckel, the Fifth and Main-street druggist has at last received a decree of divorce from his wife, she signing a complete release to all property, etc. It will doubtless call to mind the unpleasant street-corner scene of one year ago, when Mr. Voeckel so effectively wielded a pestle in defense of his marital honor, which episode resulted in the above decision of the court.

Q. R. Smith, Santa Ana, has made changes and improvements in his new store that place it in the very top notch of the fine drug houses of Southern California. The fine effect of the elegant grill work and the delicate tinting of the whole interior, the beautiful soda fountain, the pretty waiting-room, all provoke comment as being remarkable for a small city like Santa Ana, and hardly equaled in Los Angeles.

Heath & Morrison, Riverside, have made another change in their store, which has for its object the entire seclusion of prescription work from everything else. This they have accomplished by the use of an inner room which is fitted up for prescription purposes and to which all prescriptions are carried to be made up, thus insuring the pharmacist from all disturbing influences while at his work. This plan has many advantages and is strictly "up-to-date."

We are pleased to announce that Mr. Frank M. Boswell, of Boswell & Noyes Drug Co., is again able to attend to his duties at the store. Mr. Boswell was confined to his room for two weeks by a very painful carbuncle located at the base of the brain. Heroic treatment and nursing, with best of medical attendance brought about his speedy recovery. A peculiar coincidence, each member of this well known firm, and all the clerks, have in the last few weeks been afflicted with the same dangerous disease; and stranger still, all at the same or near the same spot.

OUR ADVERTISERS.

It will be of interest and value to the trade to consult our advertising columns, in which will be found represented the following firms and goods :

A. Gettleman Brewing Co.
Allcock's Plasters.
Ammonol Chemical Co.

Fullerton has a new drug store, started this month, under the name of the Fullerton Drug Co.

Pacific Coast Drug Agency
OFFERS FOR SALE
First-Class Drug Stores and Medical Practices
in all the Pacific States and Territories
Clerks Registered, Provided and Employed. Partnerships Negotiated. Lists Sent Free. Correspondence Solicited.
G. M. LUDWICK,
S. E. Corner Second St. and Broadway, Room 201, Los Angeles, Cal.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—Drug stock in this city in prime condition. Will invoice about $1000, at a bargain. Address A., care of F. W. Braun & Co.

FOR SALE—A good, long established drug business in this city. Price, $2500. Address "ADVANTAGEOUS," care CALIFORNIA DRUGGIST.

FOR TRADE—Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE—Drug stock and fixtures in Southern San Luis Obispo Co. Invoice Jan. 15, '99, $1200. Will sell for $1100 cash. Daily sales, $10 or $12 per day. Reason for selling, owner not pharmacist. Address "Pharmacist", Box 37, Arroyo Grande, Cal.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

FOR SALE—Elegant clean stock in the most progressive suburb of Los Angeles. Only drug store within twenty blocks. Best reasons for selling. Value about $2000. Inquire of F. W. BRAUN & CO. Los Angeles.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174. Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE.—Drug store and fixtures (will invoice about $5000) in one of the best and most prosperous little cities in the San Joaquin Valley. No cutting. Will invoice or lump. Sales $9000 last year and considered by all a very bad year owing to failure of crops. Failing health compels owner to quit the business. Address H. C. FALLIN, Hanford, Cal.

Three money-makers are offered to the trade by F. W. Braun & Co. in the Hayden Mfg. Co.'s Arnica Salve, Carbolic Salve and Witch Hazel Salve. They are very neatly put up in large-sized boxes, and retail at 25 cents. The uniform price is $1 per dozen Add some to your next order.

Order from F. W. Braun & Co. a supply of Eucalyptus plasters for "grip," pains and coughs, Eucalyptus lozenges for bronchial irritations. They are effective remedies and right in season.

"Coke Dandruff Cure" has an odd sound, but it is getting very rapidly into favor, whether made from coke, anthracite or cordwood. It is beautifully put up and absolutely guaranteep. See advertisement in this issue.

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

F. W. BRAUN & CO., Los Angeles, Cal.

The official organ of the Los Angeles County Pharmaceutical Association.

THE Druggists Circular for February comments editorially on the danger attending the free distribution of samples of proprietary medicines, a practice which has become widely prevalent. Instances are cited where serious results followed the injudicious and ignorant administration of "remedies" so thrown out to the public. The subject is one worthy of thoughtful attention, particularly by druggists, through whose coöperation a large part of this work is done. We all have seen free samples on druggists' counters, sometimes pills or powders, entirely free to be picked up by child or adult. A moment's thought should suggest the dangerous possibilities that might follow such free and easy medication, and the druggist should so handle the samples that no picking up from the counter would be possible. The city of Los Angeles has an ordinance forbidding the leaving of free samples of medicine at houses or throwing them about the streets; an eminently proper provision. Free samples have their proper place; let them be kept within proper bounds.

THE Pharmaceutical Era has the satisfaction of having terminated (apparently) the business careers of at least three of the drug trade swindlers who have for some years been victimizing druggists, wholesale and retail, on the Atlantic Coast. The Era's persistent and finally successful efforts to bring those frauds to justice merits the commendation of the trade everywhere.

A PATENT has recently been obtained in England for an invention of such marvelous character that the shades of Sir Isaac Newton, Herschel, Whitney, and Stephenson must have started out of their sleep to behold it. This gem of genius is a rubber nipple tied to a cord which goes around a baby's neck, and is so securely attached that a very hard pull will not separate the parts. Also, if baby swallows the nipple the cord may be used to pull it up.

Columbus discovered America, Gutenberg invented type, Balboa first gazed upon the broad Pacific, but how tame their emotions compared to the feelings of our British cousin when he first realized the possibilities of a baby-soother tied to a string.

THE British Pharmaceutical Society is endeavoring to secure an amendment of the Pharmacy Act by which the sale of all medicines shall be restricted to registered pharmacists, the same as is now the case with poisons. So very radical a measure will meet with strong opposition from grocers and other dealers, who would be prohibited from selling even sulphur, Epsom salts, or anything whatever for medicinal use. The fact that such an effort is being made indicates of itself how much in advance of American pharmacists are our English neighbors in pressing for their rights, or *supposed* rights.

"THE Coming Age—a magazine of constructive thought" comes to our desk this month; a new candidate for the favor of the enlightened public. B. O. Flower (who founded the Arena) and Mrs. C. K. Reifsnider are the editors. The February number includes articles by Philip Stafford Moxom, D. D., Henry Herzberg, Rev. S. C. Eby, Ernest H. Crosby, Charles Malloy and Rev. R. E. Bisbee, besides conversations by way of interviews with Louise Chandler Moulton, Hezekiah Butterworth and Samuel T. Dutton of whom editorial sketches are supplied. The April issue is to contain an article from the pen of the well known John Uri Lloyd entitled, "Do Physicians and Pharmacists Live on the Misfortunes of Humanity?" which will doubtless be of marked interest to all members of both professions. Remit 20 cents to "The Coming Age Co.," Station D, Boston, Mass., or to the Midland Publishing Co., St. Louis, Mo., for the April number, which will enable you to enjoy Prof. Lloyd's paper and to judge of the wide scope of thought compassed by this progressive magazine.

THE differences between the Chicago wholesale druggist and the retailers, to which we referred in our February issue, have been settled, it is reported, by the withdrawal of the obnoxious rules.

IT will be remembered by our readers that certain manufacturers in the Eastern States have been making strenuous efforts to recover from the government the rebate on alcohol to which the law passed by a previous Congress entitled them.

The Supreme Court of the United States has now rendered a decision in favor of the government, which is of course a finality, and will probably shut out any further attempts in this direction.

It is well to keep up your stock of disinfectants, as the public are ready customers for them at present. A good window display of these goods is in order, and will surely attract attention. Try how great a variety you can show.

Small-Pox.

This dread disease appears to be getting a swing throughout the world. It is making its appearance this winter in almost every city in the United States, as well as in all European cities. In Los Angeles, as we go to press, there are five cases; in Cleveland, Ohio, nearly one hundred cases, and so it goes the world over. We believe this is due to the general laxity in regard to vaccination. There is no question on which the profession is more united than on the subject of vaccination. and yet we get Eaganized on every hand. The iconoclast says we advocate vaccination for the money there is in it, yet there is not an active practitioner but dreads the vaccination season because it interferes with his practice, and is an all-round annoyance.

Recently the Health Officer of Cleveland, Ohio, on investigating sixty cases of small-pox in that city did not find a well-defined scar of vaccination on one of them. Without bluster or sensationalism, let us all quietly vaccinate the children of the families we attend and instill in their minds the value of Jenner's great discovery.

The glycerinated vaccine prepared by Parke, Davis & Co., and other reliable houses has reduced the dangers from vaccination to a minimum.—*Practitioner.*

Rising Markets.

Rarely has the London drug market been so agitated as it is now without rising to uncontrolled excitement. After a period of persistent neglect, several staples have begun to rise in value by leaps. The advance in the price of ipecacuanha last week to 13s. for the Brazilian and 9s. for the Bolivian was only surprising in respect to the fact that it had long been delayed. It might not have taken place at all had it not been that two leading American houses, seeing the possibility of a *coup*, suddenly laid their hands upon as much as they could get, with the result that the stock in the dock warehouses was on January 31st reduced to 28 bales unsold, against a stock of 201 bales on December 31st. More than eight months ago we published information predicting scarcity, and some have taken the hint and bought well, but the majority, especially continental houses, did not believe in the rise, and—they are "left."

Camphor, cascara sagrada, nux vomica, and senna are in almost similar position, supplies being exceedingly limited and the consumptive demand so good that advances were inevitable. These have been long forseen by observant buyers, but they are the few, and again it has been chiefly owing to the appearance in our markets of American buyers, that sudden and large advances have taken place in all these articles. Today camphor is worth 50 per cent more than was paid for it six months ago. Tinnevelly senna has doubled in value. Cascara sagrada is almost three times the price it was a year ago; and nux vomica, after a long period of neglect, is gradually advancing in value, and the supplies are limited. It is also to be noted that quinine has gone into the list of sharp risers.—*Chem. & Drug.*

If a man will carefully and dispassionately consider all the the adverse criticism he receives and will persistently ignore the compliments, he will in time learn many useful and valuable truths.

When a man tells you that you are the greatest thing that ever happened, and that the sun rises and sets in your immediate vicinity, he is certainly wrong, and he may be insincere.

When another man tells you that you are absolutely the most unmitigated ass that ever came down the pike, you can bet that he is sincere—that he believes what he says, and that probably there is some truth in it.

It is a good, wholesome thing to analyze a roast and find just what truth there is in it.

You can't learn anything from a compliment. A compliment only swells you up a little, and if you swell too far you are likely to burst and slop over on things.—*Printer's Ink.*

"I am looking for something real nice for a young man," said the young and pretty shopper.

"Why don't you look in the mirror?" asked the gallant clerk, and she was so flustered that he managed to sell her four different things that she did not want before she knew what she was doing.—*Chicago Post.*

H. H Watkins, Kingman, Arizona, has been appointed manager of the Kingman Branch of the Arizona Central Bank of Flagstaff, a position for which he is well fitted. The banking office is in Mr. Watkins' store, which has recently undergone important interior changes and refitting, including sectional fixtures. Mr. Watkins deservedly enjoys the respect and confidence of his wide circle of friends and acquaintances.

Kieselguhr and Other Infusorial Earths.*

BY JOHN MOSS, F. I. C., F. C. S.

Infusorial earths having recently come into request by pharmacists, and being very diverse amongst themselves, as well as suitable for a variety of purposes, it may be useful to collect leading facts of special interest concerning them, and to indicate particular applications of which they are susceptible. That is all this short paper professes to do.

Kieselguhr is the German name for an infusorial earth which is found in Hanover. It means silicious deposit, and aptly defines a geological formation, consisting of the minute fossil shields of diatoms, which is nearly pure silica in those parts nearer the surface, whilst in others lower down it is contaminated with more or less organic matter. In Hanover the deposit is 150 feet thick, from the surface downward. The upper stratum is nearly white, with very little organic matter; lower down it is grey, with very little sand, but more organic matter. The lowest and thickest stratum is, according to Thorpe, from 50 to 100 feet thick, and contains up to 30% of organic matter. We might argue from these facts that a process of oxidation goes on in the upper stratum, which changes the nature of the organic matter, rendering it more soluble and less colored. A sudden rainfall would effectually wash this stratum, carrying the organic matter downward to the lower stratum, which, being charged with air to an inferior degree, is less capable of assisting change; indeed, it would seem to have the power of preventing it, hence the accumulation of green color and organie matter, which are said to be due to extractive from the pine needles strewing the surface of the earth above the deposit. This organic matter, together with the color, is got rid of by calcining in small furnaces, which are filled with the kieselguhr, and then lighted at the bottom. The organic matter suffices to keep the whole in a glow, like peat, and the process is made continuous by raking out below, and supplying fresh material at the top. The calcined product consists almost exclusively of silica, and varies from very pale cream to a reddish color, according to the proportion of ferric oxide present. Beckerhin found 95% of SiO_2 and a specific heat of 0.2089. The strongest acids have, of course, no action upon it, but with alkalies it fuses easily, and a variety of soluble glass may be made in this way.

In France there occurs a similar silicious earth called Randanite (from Randan in the Puy de Dôme).

Other deposits are found in Scotland, near Aberdeen, and in the island of Mull; in Norway, where it is called *bergmehl;* under the city of Richmond, in Virginia; in the Bermudas, in Australia, in Algeria, in North Wales, at South Mourne, and in many other parts of the earth.

Infusorial earth consists of the silicious envelope of Diatomaceæ, a family of minute uni-cellular plants, also called "Brittleworks," from the facility with which they may be cut or broken through. The silicious envelopes, or *diatoms*, as they are commonly called, are usually of the most perfect symmetry, and often exhibit elaborately marked patterns of great delicacy, which endow them with extreme interest as microscopic objects. The forms may be simple or intricate, but all are beautiful. There are few objects so attractive to the microscopist as the minute silicious frame-work of these low forms of plant life, and many hundreds of different varieties have been catalogued.

Having regard to the origin of these deposits, diatomite would seem to be a name generally appropriate, and I purpose using it in this sense, as including all the varieties of silicious earth above referred to. I cannot hope to name every kind of diatom which has contributed to form each one of the deposits, but, having examined several microscopically, I may succeed in enumerating some of the more important individuals.

1. KIESELGHUR.—In this the forms recognized are *Surirella*, *Gaillonella*, *Diadesmis*, *Pleurosigma*, *Synedra*, *Stephanodiscus*, *Spongolithis*, *Amphora*, *Melosira*, and *Navicula*.

2. SCOTCH DIATOMITE.—This occurs in the Island of Mull, and near Aberdeen, and includes, amongst other forms, *Diatoma*, *Cymatopleura*, *Synedra*, *Gomphonema*, *Cocconema*, *Surirella*, *Primularia* and *Rhabdonema*.

3. VIRGINIAN.—A stratum 18 feet thick underlies the whole city of Richmond, extending, indeed, over an indefinite and unknown area. It is so compact as to be capable of being carved into small objects, such as the bowls of tobacco pipes, but is at the same time light and friable. It is celebrated for the number and beauty of its forms, including *Coscinodiscus*, *Dictyolampa*, *Rhabdonema* and *Triceratum*.

4. AUSTRALASIAN.—According to Dr. J. D. Hooker† there is a deposit consisting chiefly of the silicious loricæ of diatomaceæ, not less than 400 miles long and 120 miles broad, at a depth of 200 to 400 feet on the flanks of Victoria Land in 70° south latitude.

5. SCANDINAVIAN.—This is known locally as *bergmehl*, a mountain flour, and contains sufficient organic matter to occasion it in times of scarcity to be mixed with dough in making bread. I have seen no specimen of this, and am unable to describe its appearance, or to name any diatom occurring in it.

6. AUSTRALIA.—This is a beautiful, white fluffy powder, of which specimens came into my hands in 1894, through the kindness of the South Australian Government and others. It consists almost solely of the loricæ of *Tetracyclus*, with occasional *Pleurosigma*, *Surirella*, *Amphora* and *Diatoma*. There is ground for assuming that this and the Australasian deposit referred to above (which I have not seen) are the same.

The examination of eight different specimens of infusorial earth obtained from as many different sources shows important variations in composition. In no case does the silica (SiO_2) exceed 96%, and it falls as low as 70%, the differences being made up by moisture, organic matter, ferric oxide, and alumina. Moisture varies from 2.64 to 7.8%, the average being 5.73%. Organic matter ranges from 243 to 23.6, giving an average of 7.43%. Of the professedly calcined earths, I have met with specimens containing so little as 0.4% of organic matter, but the proportion usually present is from 2.5 to 3%, showing that the calcining is not perfect. Again, in some earths the iron oxide is as low as 25%, and in others it is as much as 7%.

USES.—Since 1866, diatomite has been largely used in the manufacture of dynamite. This is because it is capable of absorbing a larger proportion of fluid than any other known material that is at all available to the same extent. It will absorb three times its own weight of nitro-glycerin, and then be capable of being pressed into solid blocks.

---

*Read at the British Pharmaceutical Conference, held at Belfast, August, 1898. Reprinted from the Pharmaceutical Journal.

†Carpenter, "The Microscope," fourth edition, p. 311.

It is also used to make so-called "dry sulphuric acid." One part of diatomite to 3 or 4 parts of oil of vitrol by weight, may be mixed so as to form a mobile powder capable of being worked with iron implements and enclosed in iron drums for export without attacking the metal. I am informed that the success of this expedient is not yet fully assured.

A very important demand for diatomite is for a basis for disinfecting powder, to make which it is charged with 10 or 20% of carbolic acid or other liquid disinfectant. Such a powder is much lighter than are those with chalk or lime as a basis, and possesses the advantage of floating on the surface of any liquid upon which it is sprinkled, so that what effluvium arises must pass through the disinfectant. The crudest forms are suitable for this purpose, and one pound occupies the bulk of three pounds of chalk.

Another very important application of diatomite is found in the ease and perfection with which metals may be polished by its means, either in the form of powder or of a paste made with soft paraffin. For this purpose grit of all kinds must, of course, be carefully removed, leaving a powder of such a degree of fineness as not to scratch gold plate, yet impart a very high polish to it.

I have used diatomite associated with sodium silicate and fibrous material, such as cow-hair, for making an adherent covering for steam boilers, pipes, and pans. Loss of heat by radiation being prevented, there is a corresponding economy of fuel, and the temperature of the laboratory is moderated, to the great comfort of those who work in it.

Safe makers take advantage of its non-conductivity in the construction of fire-proof chambers. This property makes it valuable also in the construction of ice houses, and, indeed, wherever it is desirable to prevent too great loss or accession of heat.

Diatomite is said to find its way even into soap, and there is no doubt of its employment in the manufacture of ultramarine and of artificial meerschaum.

Its non-conductivity is not confined to the heat wave. It effectually smothers other undulations, and is therefore equally useful for making walls sound proof, so that the inmates of a class-room in a musical seminary may practice without disturbing or being disturbed by similar students in the next chamber.

The properties of diatomite above indicated are naturally suggestive of certain uses in pharmacy. For some of these the absence of gritty particles is absolutely necessary, and freedom from organic matter is desirable for all.

As a Filtering Medium.—My attention was first attracted to diatomite for this use. Provided it were possible to obtain or prepare it free from organic matter, it seemed to possess all needful qualities for filtering liquid galenicals and certain solutions of salts and acids. Silica has powers of resistance to solvents far greater than the filtering powders in common use, viz., the carbonates of lime and magnesia, phosphate and sulphate of lime, talc, and asbestos. All these, being compounds, are susceptible of decomposition; indeed, the four first mentioned are of more than doubtful utility, and should be banished from the laboratory for purely filtering purposes. Diatomite, which may be regarded as pure silica, is absolutely indifferent to all but the strongest alkalies at a high temperature —involving a set of conditions which the pharmacist does not have to consider. There is the further advantage that it does not clog up the filtering bag to the same degree as either talc or asbestos, and filtration is consequently more rapid. The benefit of this is not confined to the manufacturer, who is thus able to accomplish more work in the same time, but what is of greater importance, it extends to the preparation also, which must be better for less handling and exposure. This is not secured at any sacrifice of efficiency. Note may be made of a practical point here. Diatomite does not mix readily with liquids, and should not be dusted on the inner sides of the filter bag in the expectation that it will diffuse through the liquid which is afterward poured in; nor can it be satisfactorily mixed with the bulk of the liquid. It should be worked down in a mortar with a little of the liquid to be filtered, so as to form a smooth thin paste, which can then be mixed with more of the liquid to set the filter. This takes place almost at once, and but little of the filtrate requires to be returned. Inattention to this point has occasionally caused failure with diatomite as a filtering medium.

Small though the particles of diatomite may be, they appear to be large enough and to present irregularity enough, to keep apart the particles of albuminoid or starchy deposits sufficiently for the passage of the still smaller particles of liquid. It is obvious that the diatomite used for filtering must be free from organic matter — a few particles of sand may be disregarded.

Dentifrices.—For making these, diatomite must be free from sand and also from organic matter, which is apt to suggest a disagreeable earthy taste. It should be as white as possible, so as to exclude interference with the tint of the ingredients. These conditions secured, it may with great advantage take the place of ground pumice and cuttlefish bone in all cases, and of precipitated chalk in pastes and powders, which contain other alkaline bodies, such as bicarbonate of soda and borax. If no alkali is present, or if diatomite alone is considered too light, some chalk may be retained in a powder dentifrice with benefit. Diatomite properly refined is not gritty between the teeth, and polishes without scratching the enamel. Bulk for bulk it is half the weight of the lightest precipitated chalk. The formulæ appended[*] are merely suggestions as to the proportions in which diatomite may be used in dentifrices, and are, of course, susceptible of an infinity of variation, according to taste and experience.

Dusting Powders. — By virtue of its enormous and unequaled absorbent property, diatomite is unrivaled as a dusting-powder basis. It must be the very purest that can be produced, and when absolutely free from organic matter and grit is more smooth and less irritating than any other powder. Unlike vegetable powders, it does not contribute to decompo-

sition of the exudation, but keeps sweet for a long time, and may, of course, be associated with antiseptics with equal facility and greater advantage. Smoothness is imparted by the addition of boric acid in very fine powder. Oxide of zinc, kaolin, talc, or Fuller's earth may be added according to circumstances and the object aimed at, as also such antiseptics as salicylic acid, iodoform, thymol, etc. Diatomite as a polisher of metals has already been referred to, and it only remains to say of it in this connection that it is obtainable of all degrees of fineness, suitable for fire irons and fenders at one end of the scale and for the finest gold plate at the other.

In Dispensing.—The last suggestion I have to make relative to the use of diatomite in pharmacy is perhaps more debatable than any of the preceding. I mean as a diluent for hygroscopic powders, such as euonymin when made by the late Pharmacopœia process. However carefully this may be prepared according to the official directions, it presents difficulties whiah are more or less great with different batches of the drug. Being absolutely inert and insoluble in the stomach juices, diatomite cannot react on the drug as chemical powders, like magnesia may, and the mixture is much more easily reduced to powder than when sugar of milk is used; it also remains pulverulent. On the other hand, the question arises as to how far it is advisable to introduce silica, however finely divided, into the stomach. The quantity at most is a few grains, and may be less than one grain, and when it is remembered that at times of scarcity or famine the Norwegian peasantry have been compelled to eat ounces, and even pounds, in one week, the doubt is deprived of much of its significance. Further, whole meal bread is recommended and largely consumed for the wholesome action of the siliceous particles (much coarser than diatomite) in the grain husk, on the intestinal canal, so that it would seem as if only beneficial effects would be produced by the minute proportion in a dose of euonymin or similar remedy whether given in the form of a powder or of a tablet. The binding power of diatomite under pressure suggests its use in the last mentioned form for drugs which compress with difficulty.

Commended to Schenk & Co.

We clip the following from "Humors of Clerical Life" in the "Eclectic" and "Cornhill" Magazines. We cannot say how far the prophylactic was effective in this particular case, but it has as much reasonableness as many another panacea in this line for and against: "A clergyman, walking on the outskirts of his parish one day, found one of his parishoners white-washing his cottage. Pleased at this novel manifestation of the virtue that is next to godliness, he complimented the man on his desire for neatness. With a mysterious air the workman descended from the ladder, and approaching the fence, said: 'That's not exactly the reason why I'm a doin' of this 'ere job, your Worship. The last two couples as lived 'ere 'ad twins, so I says to my missus: "I'll take and whitewash the place so as there mayn't be no infection." You see, sir, as how we've got ten of 'em already.'" We comcommend the whitewashing expedient to enthusiastic experimenters who would like to rule Nature their way.—*New York Medical Journal.*

The California Druggist, $1.00 a year.

The Drummer's Reward.

M. QUAD IN AMERICAN DRUGGIST.

I happened to be in the wholesale house of Brush & Co., druggists' sundries, when Truthful James Ross applied for a position as traveler. I liked the looks of him. He was frank-faced, had an honest eye, and his smile was magnetic. Mr. Brush also liked his appearance. Mr. Ross was modest and retiring, but not too much so. In reply to certain questions he said:

"I am Truthful James Ross. I am called Truthful because I cannot tell a lie. I will go on the road with your goods, tell the truth under all circumstances, and if I cannot do fifty per cent more business than the liars I will gladly resign."

Mr. Brush had never met with a truthful drummer before, and though a little doubtful as to the experiment he agreed to give Truthful James a show. In a few days the young man was ready to start out, and from one source and another I have gleaned his adventures as a drummer. He was given a route which extended as far west as Toledo, but his first objective point was Buffalo. The train which bore him and his sample cases had scarcely rolled out of the Central depot when Truthful James opened his career of virtue and integrity. He discovered that his fellow-passenger was a man who loved the truth above all else, and he gave it to him at wholesale rates. He was the "Co." of Brush and Co. He had put in a million dollars against Mr. Brush's experience and certain discoveries. He was making a trip in order to have a personal talk with druggists. One of the discoveries was an ointment which would grow hair on a bald head in two weeks. There was a case of it right before the man's eyes. The luxuriant growth of hair on Mr. Ross's head had all grown in seventeen days. Another discovery was a disinfectant, so cheap and yet so powerful that for the trifling sum of three-quarters of a cent the air surrounding half a dozen dead horses could be made to smell like a field of roses. A third one would warm up cold feet or cool off hot ones, just as desired, and a fourth was a troche, warranted to destroy the germs of consumption within two hours. When Syracuse was reached the stranger grasped Mr. Ross's hand in a hearty way and said:

"You are well named Truthful James. I had given up all hopes of finding a truthful man in this world, and I can't tell you how rejoiced I am. Keep on in the way you have begun and your reward will be certain and great."

Mr. Ross was encouraged to persevere. At Buffalo he discovered that his figures on tooth-brushes were ten per cent. above those of rival houses. He was not ready to meet the cut, but he was ready with a reason why he could not. Every separate bristle in his tooth-brushes had been picked up by itself with a pair of tweezers and dropped into a glass of solution and deoderized, disinfected and rendered perfectly harmless to the human system before being secured to the handle. There were no germs, bacteria or microbes lying in ambush in his brushes, and he must have his price.

Rival houses had been cutting the price of soaps, but Truthful James was not in the cut. His house had its own factory. It was not situated in the midst of a marsh, where every cake of soap imbibed a certain amount of malaria, nor did it make use of the fat of cats, dogs, coons, 'possums and polecats. His factory was built on a hilltop, kissed by the rising sun and braced by the ozone of the Atlantic. The fat used was all taken from gazelles, raised on the firm's own ranch in Montana, and every cake was submitted to a pressure of 100 pounds to the square inch before being sent forth into the world. Crowned heads used it, and every American aristocrat cried for it.

Truthful James went over his route speaking the truth on all occasions and never forgetting that integrity is the stepping stone to success, and though he didn't do so well as he hoped for, he laid the foundation of his career on a sure and certain basis. Very few of the retail druggists had ever met with a truthful drummer. They were inclined to believe that Truthful James was no better than the rest. Some even did not hesitate to call him a prevaricator, and at the western terminus of his route he was thrown out of a drug store, body and boots, for what was thought to be cheek, but he was not discouraged. On his second trip he found things better, and on his third he was welcomed as an old friend, and found orders all made out for him in advance. I have treasured up some of the truths told by Truthful James during his career as a traveler, and will give them here as an incentive to beginners of a career:

He claimed that the hot-water bags sold by his house had cured hundreds of cases of enlarged liver, even when only applied to the feet of a patient.

His porus plasters had drawn needles and pins out of patients without causing the slightest pain, and thereby removed chronic ailments.

His firm always kept at least 1,000 cords of Peruvian bark on hand in their sheds, and their quinine was ground fresh to order. The grinding mills were kept open until 10 o'clock Saturday evenings to fill Sunday orders.

His chest-protectors were not made in sweat-shops and out of material taken from the rag-bag, but by Quakeresses, each of whom took a cold bath every morning, and of material manufactured for the purpose in an exclusive factory owned by a religious woman.

Every nursing-bottle sent out by his house was first inspected by three eminent physicians as a sanitary precaution, and then by a committee from the Comstock Society, to see that nothing affecting the morality of the infants of America should break loose.

His firm raised its own sponges, on its own ocean bed, and from seed carefully selected two years in advance. The moral character of each and every one was carefully looked after from its birth, and no druggist need fear to handle these goods.

The above are only a few specimens of the handiwork of Truthful James. He hadn't fairly got started when the end came. That is, he got a better thing and quit the road. The manager of a truthful New York daily newspaper heard of Mr. Ross and his strict integrity, and, arranging for an interview, he said:

"I want a correspondent to go to Cuba—one who will tell the truth though the heavens fall. The salary will be $200 per week. Will you take the place?"

"Won't I have to lie at all?" asked Truthful James.

"Not a lie."

"Nor even exaggerate?"

"Not in the slighest. I want plain facts without the slightest gloss. I could have got a liar for $100 per week, but I am after a truthful man."

Mr. Ross took the position and sailed away, and I am happy to announce that he has made a great success of it. In his very first dispatch he was two months ahead of all rival newspapers in announcing war. He has interviewed a dozen different men whom nobody ever heard of; located submarine mines all by himself; unearthed conspiracies by the aid of the kodak and ear-trumpet, and originated some fifty different theories regarding fifty different things. His jealous rivals sneer at him and talk about fakes, but Truthful James goes his way undisturbed and serene, and only yesterday telegraphed the fact that thus far he was the only newspaper correspondent who had been permitted to interview the street car drivers of Havana and learn that the batttle-ship Maine was blown up by the explosion of a kerosene lamp.

News of the N. A. R. D.

(Issued from Headquarters.)

HEADQUARTERS NOTES.

There seems to be a disposition in some quarters to expect immediate and pronounced results from the work of the Executive Committee. It should not be forgotten that in the interest of permanent results the committee cannot proceed otherwise than cautiously, and the fact should not be lost sight of that we have been a long time getting into the bad fix in which we find ourselves, and to remedy the existing conditions will not be the work of a few weeks or even a few months. A course of activity in bringing their own local organizations to a condition of greater effectiveness and of strengthening their own State associations is recommended to those druggists who find themselves over anxious in the matter of obtaining immediate results at the hands of the Executive Committee.

The secretary finds that the National Association has never been taken seriously by a great many wholesale druggists, who seem to have thrown their copies of the proceedings of the St. Louis convention into the waste basket immediately on its arrival. Many retailers appear to have adopted the same course. It is likely that within a short time more attention will be paid to the communications of this organization than druggists, wholesale or retail, have accorded to any association that has been in existence for many years.

It is a difficult matter to uproot the false impressions so firmly implanted in the minds of druggists generally, that the national organization is composed of individuals. The following is a sample of letters the secretary is receiving almost daily, embodying this misconception:

Dotham, Ala., Jan. 5.

Mr. Secretary: I desire to become a member of the National Association of Retail Druggists. I am ready to pay such fees or dues as are necessary. Please enter my name as a member and give me instructions. I am a member of my State association.

Yours truly,

Ed. Nix.

It is sincerely desired by the national secretary that local associations shall report their meetings to the secretary's office, in order that this information may be used to the advantage of the national body. To keep alive an interest in the association it is necessary that each of the various organizations composing it shall add its mite to the sum total of the enthusiasm that must become general before the ends of the organization can be accomplished.—*Amer. Drug.*

Paste to Affix Lables to Tin.

It is asserted by various experimenters that an important quality in a paste intended to affix paper to metals is that of not becoming absolutely dry. When the mucilage becomes practically free from moisture, it is apt to separate from the metallic surface. To obviate this, substances which have a strong attraction for water, such as calcium chloride and glycerin, are added to the paste.

The following formulas proposed by Leo Eliel, and printed in previous issues of the "Circular", have given satisfaction to many readers:

I.

Tragacanth	1 oz.
Acacia	4 ozs.
Thymol	14 grs.
Glycerin	4 ozs.
Water, sufficient to make	2 pts.

Dissolve the gums in 1 pint of water, strain, and add the glycerin, in which the thymol is suspended; shake well and add sufficient water to make 2 pints. This separates on standing, but a single shake mixes it sufficiently for use.

II.

Rye flour	8 ozs.
Powdered acacia	1 oz.
Glycerin	2 ozs.
Oil of cloves	40 drops.
Water, a sufficient quantity.	

Rub the rye flour and acacia to a smooth paste with 8 ounces of cold water; strain through cheese cloth, and pour into 1 pint of boiling water, and continue the heat until as thick as desired. When nearly cold add the glycerin and oil of cloves.

Perhaps a paste made from flour alone would answer, with the addition of glycerin.

For use on glass we have found a mucilage made from tragacanth alone very efficient.

A Fluorescent Show Bottle.

To our recently given formula for the colors commonly seen in show bottles, we will add one for producing a fluorescent one:

Fluorescein (resorcin-phthalein)	10 grs.
Alcohol	1 oz.
Water	2 gals.

Dissolve the fluorescein in the alcohol and add the solution to the water.

The addition of a small quantity of solution of soda increases the fluorescence in this solution. As it is liable to become decomposed, twenty to thirty drops of formaldehyde solution (40 per cent.) should be poured on the surface of the liquid after it has been filtered into the carboy. This is a novelty, the fluorescence giving the carboy the appearance of a huge opal when it is viewed by reflected light.—*Druggists' Circular.*

Application For Painful Burns.

Chloral hydrate	G 1
Menthol	G 1
Cacao butter	G 2
Spermaceti	G 2

Spread on linen and apply.

Vitalized Oil.

Oil mustard	dr. 1
Oil peppermint	oz. 1
Oil sassafras	oz. 1
Oil eucalyptus	oz. 1
Camphor	oz. 1
Liquid petrolatum (or other oil base)	oz. 32

Mix the oils and dissolve the camphor in the mixture.

The liquid petrolatum is now official, but is generally known in the market by other names; any bland neutral oil will do as a base. Camphor oil is cheap and good; olive oil, expressed oil of mustard, cottonseed oil or linseed oil will do. This is a quick-stimulating application acting as a prompt counter-irritant, excellent for neuralgia, rheumatism, pain, cramps, etc.—*Fenner's Formulary.*

Ajax Liniment.

A liniment with gasolin instead of alcohol as as a base has had an extensive sale in some parts of the country. It does well as a quick stimulant and counter-irritant for neuralgia, rheumatism, pain, etc., and is very cheaply made.

Oil wintergreen	oz. 1
Oil sassafras	oz. 2
Oil hemlock	oz. 1
Oil mustard	dr. 1
Gasolin	gal. 1

Put all the ingredients together in a gallon bottle and macerate with frequent agitation seven days, then filter quickly through paper, taking care not to get near a fire or light. This is to be applied quite freely. It is generally put up in 8-ounce bottles to retail for 50 cents.—*Formulary.*

Pencils To Write On Glass.

The British and Colonial Druggist gives the following:

BLACK.

Purified tallow	2 parts
White wax	3 parts
Lamp black	2 parts

Mix.

BLUE.

White wax	1 part
Purified tallow	2 parts
Prussian blue	3 parts

Mix.

WHITE.

Purified tallow	1 part
White wax	2 parts
Bremser's white	2 parts

Mix.

Mantrap Perfume.

An Irish girl writes to a northern chemist: "Please send me 1s. worth of the oil of come-along. I was engaged to be married, but the boy is dropping from me." It needed the poetry of the Celtic brain to translate the meaningless title which Johann Maria Farina gave to his perfume into this pretty fancy; and if the come-along does not fetch the wandering boy back to fair Elleen Mavourneen, he is not worth having.—*Chemist and Druggist.*

A new Chicago fad is to eat ice cream spread over mince pie. This produces a new and unique style of stomachache exclusively Chicagoesque.—*Denver Evening Post.*

Doctor—"Why, how is this, my dear sir? You sent me a note stating you had been attacked with mumps, and I find you suffering from rheumatism."

Patient—"That's all right, Doc. There wasn't a soul in the house that knew how to spell rheumatism."—*Roxbury Gazette.*

Wedding Bells.

Mr. Edwin J. Roberts and Miss Elsie G. Dewar, of Globe, Arizona, were married February 22. Our congratulations and best wishes go with them.

A Novel Tooth-brush.

The inventive genius of man is never at rest. A case in point is the tooth-brush.

This brush itself is of simple construction; the bristles are firmly set in a curved back and arranged in little pointed "clumps" with a larger conically shaped bunch at the end. It all is in the management of the bristles. Their peculiar arrangement and pointedness enables them to work in between the teeth and remove any particle which may have lodged there, thus preventing all possibility of decay. The name of it is the Prophylactic, which may be easily verified, as it is widely advertised, and may be obtained at any druggists's.

Right-Handedness.

Kellogg believes that the child is born using both hands, arms and legs equally well. Right-handedness is the result of careful training on the part of nurse and parent. Left-handedness is probably started by a burn, strain or injury of the right hand during the critical period of babyhood. The great advantage of ambidexterity is dwelt upon, and Alexander Mott, Joseph Pancoast, Samuel F. B. Morse, Leonardo da Vinci and Michael Angelo are mentioned among the other notable ambidexters. The crossed fibers to either brain are believed to be a switching-off apparatus, intended for only temporary use, and all arguments based on anatomy as forcing right-sidedness are thought to be weak.—Massachusetts *Medical Journal.*

A company is being formed for the purpose of working the so-called "Soda-lakes" of Wyoming. These lakes are scattered throughout the State, and the opinion of geologists is that the soda came in with the spring water, and in the evaporation of the latter, beds of soda, principally in the form of sulphate, were deposited. An examination of the extent of these lakes was made by Dr. D. H. Attfield several years ago, at the instance of an English syndicate, and it may be well to again call attention to his report. Dr. Attfield stated that the "lakes" were such only in name, and results pointed to the fact that the greater portion of the "lake" was merely top crust, with no underlying stratum of sulphate. This stratum has been asserted to be many feet thick; at the most only about six acres formed a workable deposit. Commercially, Dr. Attfield did not consider the deposit sufficient in extent to pay for working, and he stated that until the saline masses could be dried at a low cost on the spot, and cheaply conveyed, "solidified sodium sulphate lakes will continue to be useless, if not mischevious, chemical curiosities."—*Drug Topics.*

Easter comes April 2. There is yet time to order supplies of Easter egg dyes. F. W. Braun & Co. have them.

Let us stop work long enough to lift our hats to Admiral George Dewey.

Business Personals.

J. M. Folks is the present owner of the Tombstone Pharmacy, having purchased the stock of Miss Yaple.

R. F. Vogel has opened a new drugstore in his recently erected building, corner Temple street and Broadway.

T. J. Rigg, Pasadena, has sold his drug business to Webb & Green, who will continue the business at the old stand.

H. F. Messer, late of Arroyo Grande, has moved his stock of goods to San Mateo, in which location we wish him success.

Davis & Green have purchased the Safford Drug Co.'s business, Safford, Arizona, from E. T. Ijams, and will continue the business under the old name.

E. J. & W. J. Wolff, joint owners of drugstores in Grant Block, and on H street, San Diego, have divided their interests, E. J. taking the H street store and W. J. that in the Grant Block.

The old drug-house of C. Laux Co., this city, will soon change their quarters from Spring street to Broadway. They will occupy a fine store in the new Music Building, next north of the Boston dry goods store, now being finished.

W. A. Horne has purchased the drugstore of H. L. Scherb, Adams street and Central avenue, Mr. Scherb taking the fixtures of Mr. Horne's Downey avenue store in the deal, which he will put into a new store he is now building, corner Fifth street and Central avenue.

T. A. Greenleaf, San Luis Obispo, is fitting up a model prescription department, adopting the up-to-date plan of a separate room, entirely enclosed, where the prescriptionist has no interference with his work. This idea is being carried out in some of the leading pharmacies in Southern California, and has much to recommend it.

Mr. Arthur B. Thomas of the Thomas Drug Co. has just returned from a trip of about five weeks to New York and other Eastern points. He was accompanied by his accomplished wife, Mrs. Gertrude Auld Thomas, to whom the musical attractions of the great metropolis doubtless contributed much to the pleasure of the trip.

T. R. Brewer, Selma, who has interests in the Fresno County oil-field, is reaping the reward of his enterprise in revenue from a fine flowing well. His drugstore has shared the benefit in a marked degree, having been refitted with new showcases, restocked and otherwise improved. We are glad to note Mr. Brewer's well-deserved prosperity.

The Reed Drug Co., Tulare, since its extension and refitting, is one of the nicest stores in the valley. The prescription department is a model of completeness and convenience. Mr. Anderson has shown excellent taste and judgment in the arrangement of the store, and his enterprise entitles him to the reward he is receiving in increased business.

Mrs. E. V. Vickers has bought out Plummer & Prittie, Wilmington.

Harry Brisley, Prescott, Arizona, has purchased the establishment of W. W. Ross, and will hereafter run this as well as his old "Mountain City" store, next Burke's Hotel. Mr. Brisley has shown his marked capacity for business during the years of his residence in Prescott, and we hope this latest move will prove as beneficial to his interests as have his previous operations.

F. J. Wattron, Holbrook, Arizona, made us a call last month while on a visit to this city—his first visit to the coast. Mr. Wattron is filling his second term as Sheriff of Navajo county, having been re-elected to the office last fall. Holbrook is now the county seat, and very creditable county buildings are in process of erection there. A typical Arizonian is our friend sheriff (and druggist) Wattron.

Prescott is to have a new drug-house. W. P. Covillaud and G. H. Francis have formed a partnership and are opening a fine drugstore. Mr. Covillaud has recently been in business in San Luis Obispo, Cal., and Mr. Francis in Congress, Ariz. They are both well acquainted with local conditions, and Mr. Covillaud has had the benefit of a previous residence in the Mountain City. Being thorough pharmacists, as well as experienced business men, they will at once take a prominent position among Arizona drug men. We trust a prosperous career will reward their enterprise.

STURTEVANT'S

Poultry Foods
AND
Remedies....

(Trade Mark.)

IMPERIAL EGG FOOD

CREO-CARBO

A liquid lice killer. Kills lice on poultry by painting the roosts.

Clarke Bros.' Pure Rye is one of the standard brands of whisky of the United States. F. W. Braun & Co. carry it in stock in original 10-gallon kegs, besides all sizes of the bottled goods. See adv. this issue.

Dr. E. E. Beeman's portrait is more widely disseminated, we think, than that of any other man, living or dead, and his Pepsin Gum is chewed wherever wags the American jaw. The genial doctor deserves the success he has gained, as he was the first manufacturer to combine pepsin with chewing gum, and his product is always first-class. He also advertises in the CALIFORNIA DRUGGIST.

Vin Mariani in Exhaustion.

We have had occasion in numerous instances to administer "Vin Mariani" to business and professional men who complained of being gradually run down. The work of the office, the cares and worry entailed by business and the physical flaccidity brought on by overwork, all seemed to give way completely in a marvelously short space of time, despite the fact that the subjects continued uninterruptedly at their usual occupations. The notable fact to be observed is that in each instance the effect was permanent. But it must not be forgotten that, in order to make this result a lasting one, it is necessary to keep the patient upon a prolonged course in the use of "Vin Mariani." There is no doubt whatever that this preparation has proven itself a boon to mankind.—*The St. Louis Medical and Surgical Journal*, March, 1899.

Pacific Coast Drug Agency
OFFERS FOR SALE
First-Class Drug Stores and Medical Practices
in all the Pacific States and Territories
Clerks Registered, Provided and Employed. Partnerships Negotiated. Lists Sent Free. Correspondence Solicited.
G. M. LUDWICK,
S. E. Corner Second St. and Broadway, Room 201, Los Angeles, Cal.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*].

WANTED—A few dozen American Catarrh Cure. Any party having surplus stock and wishing to dispose of it, may address
JONES & SON, Ventura, Cal.

WANTED.—Salesman visiting the drug trade to introduce a specialty on commission. No one but a hustler need address. C. W. Baldridge, Fallbrook, Cal.

FOR SALE.—Drug stock in this city in prime condition. Will invoice about $1000, at a bargain. Address A., care of F. W. Braun & Co.

FOR TRADE—Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE—Drug stock and fixtures in Southern San Luis Obispo Co. Invoice Jan. 15, '99, $1200. Will sell for $1100 cash. Daily sales, $10 or $12 per day. Reason for selling, owner not pharmacist. Address "Pharmacist", Box 37, Arroyo Grande, Cal.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

FOR SALE—Elegant clean stock in the most progressive suburb of Los Angeles. Only drug store within twenty blocks. Best reasons for selling. Value about $2000. Inquire of F. W. BRAUN & CO. Los Angeles.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$1,300. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE.—Drug business in central portion of Los Angeles. Value about $2500; owner not being a druggist is the reason for selling. Inquire of Bassett & Smith, room 2, Y. M. C. A. Building, this city.

Three money-makers are offered to the trade by F. W. Braun & Co. in the Hayden Mfg. Co.'s Arnica Salve, Carbolic Salve and Witch Hazel Salve. They are very neatly put up in large-sized boxes, and retail at 25 cents. The uniform price is $1 per dozen Add some to your next order.

"Coke Dandruff Cure" has an odd sound, but it is getting very rapidly into favor, whether made from coke, anthracite or cordwood. It is beautifully put up and absolutely guaranteed. See advertisement in this issue.

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

Items of interest to Pharmacists are solicited

The official organ of the San Diego Retail Druggists' Association.

The official organ of the Los Angeles County Pharmaceutical Association.

SHOWCASE room in a drugstore is a most important help to a pharmacist's business—providing it is used wisely. A jumble of articles of all sorts and kinds placed in a case to most conveniently get them out of the way is not a pleasant sight nor a judicious use of the space. Drugstore showcases have had a remarkable development in the last half century; the old plain, shallow cherry-wood affairs, with thin and wavy mirrors set in the hinged doors, the receptacles of a little of everything the druggist wished specially to keep out of the dust—having given place to the elegant, deep plate-glass affairs of the present up-to-date pharmacy. In the old-time drugstore counter space was given grudgingly to the showcase, but cheerfully to piles of patent medicine almanacs and circulars, and not infrequently of an evening to a row of masculine story-tellers. This latter genus, by the way, seems now to be relegated to the poorer sort of country groceries. With the rapid increase of wealth has come a greatly enhanced demand for fine toilet articles, high grade perfumes, and the various accessories to luxurious living of which the drugstore seems the natural source of supply. To occupy the attention and delight the eye of the visitor the attractive showcase performs a most important function, becoming "the silent salesman"; at once the most pleasing and the cheapest of the indispensable helpers in the store. In many stores more use might profitably be made of upright wall cases, they offering an unequaled opportunity for the display of bottled goods. Finally it occurs to us to say that a larger use of plain figures in marking fine goods would be appreciated by the purchasing public, who are always interested in prices, and who are sometimes deterred from inquiring by the fear that a failure to purchase would be interpreted as inability to afford the expense. Window displays that best serve the purpose of the druggist are invariably those with the prices attached. We would extend this principle inside the doors as well.

INDIANA now has a pharmacy law (in full effect July 1st, 1899) after various previous attempts to secure the necessary legislation. There are some points of difference that may be noted between this and the pharmacy laws of many other States, and the general opinion, as we gather it from the drug journals of the country is that the Indiana law is one of the best that has been adopted. The members of the Pharmacy Board, five in number, are appointed by the governor, and must be pharmacists of recognized ability, and in no way connected with a school of pharmacy. Their term of service is four years, but the first appointments are made to expire at different times, to carry out the plan of the law to have at least one change in the board every year. Each member is entitled to $5 per day of actual service, with expenses, while the secretary may be paid $1500 per year, and necessary expenses. It is the secretary's duty to notify all licensees of the board at least thirty days before expiration of their registration in order that there may be no excuse for failure to re-register. The penalty for such failure after thirty days is from $5 to $100 for each week, thereafter. Those entitled to registration upon the passage of the act include proprietors or managers of pharmacies not less than 18 years of age, and include clerks who have been engaged for at least four years immediately preceding the passage of the act in a store or pharmacy in which physicians' prescriptions are compounded. Graduates of approved schools of pharmacy may have their term of study included in the required four years. Clerks with two years' experience in a pharmacy at the time of the passage of the law are entitled to registration as assistant pharmacists. The law has the usual provisions for examination of candidates for registration, and the board at its option may grant licenses without examination to holders of licenses from boards of pharmacy of other States. The term for which licenses are issued is two years. Re-registration fees are one half the initial charges, viz., $1 for pharmacists and 50 cents for assistants. In Sec. 8 we note the following clause relating to general dealers. "Nothing in this act shall apply to, nor in any manner interfere with the business of a general merchant in selling any of the following articles, to-wit: Paregoric, hive syrup, spirits of camphor, epsom salts, tincture of arnica, compound cathartic pills, Paris green, London purple, white hellebore, concentrated lye, sodium carbonate, sodium bicarbonate, tobacco, spices, perfumes, flavoring extracts, borax, copperas, alum, or any chemicals or preparations commonly employed as dye stuffs or insecticides, and such other articles as may from time to time be allowed by the Board of Pharmacy."

CALIFORNIA pharmacy legislation, during the recent session of our State Legislature, culminated in the passage of an act, the provisions of which changed to some extent the existing law, but a good deal of which had to do with minor points of interpretation. It is now needless to spend any time or thought upon the bill, as it failed to become a law. We are indebted to Hon. N. P. Conrey for kindly furnishing us with the desired information.

WE regret to have to record the death of Mr. J. Clifford Richardson, president of the Richardson Drug Co., Omaha, which occurred March 31st, in Pasadena, after a surgical operation for carbuncle from the effects of which he failed to rally. Mr. Richardson was a representative man in the wholesale drug trade, of genial character, high cultivation, and possessed of those traits which made him prominent in the business and social circles of Omaha as in his former residence, St. Louis, and have given him a high place in the councils of the National Wholesale Druggists' Association.

TWENTY-THREE State associations and fifty-three local bodies (says the Bulletin of Pharmacy) have already joined the N. A. R. D., and this number is sure to increase decidedly within the next few weeks. It is difficult for us on this coast to realize the great work that is in progress for the benefit of the drug fraternity. In political, financial, and religious questions, and in all matters of loyalty and patriotism California takes a lively interest and is found active and aggressive, but upon the question of contributing an effort to better our business condition through reforms in methods believed to be entirely practicable, we stand aloof with no greater interest in the subject than is expended in glancing over the printed accounts of the Association doings that we find in our trade journals. We shall share in the benefits, if the reforms are effected, but will we content ourselves to be passive recipients of favors that were gained without the lifting of a hand or the expenditure of a bean?

N. A. R. D.

AMONG the items of interest furnished by the secretary of the above association, and which we copy from the American Druggist, we find the following appreciative letter from Tacoma, which we believe is the first published communication from this coast showing interest in the work of the N. A. R. D.

"Tacoma, Wash., March 11, 1899. Mr. Secretary: We have had an association of retail druggists of 35 members for a long time, but have held no meetings recently. We desire to re-organize. I wish you would send me a few pamphlets in relation to your work that I may present them to our druggists and induce them to become a part of the N. A. R. D. I feel very kindly toward the organization, but being a member of our legislature have paid very little attention to the drug business for the past two months. I am now back at work and shall be glad to get our old members again into line and place our organization in the ranks of the N. A. R. D. Yours truly, S. N. Le Crone, President."

An Excellent Toothbrush.

The druggists sundries department of F. W. Braun & Co. introduced several years ago a toothbrush under the name "Coronado," which brush is made by special contract and under guarantee. There has been no more satisfactory article of its kind sold during the years it has been kept in stock. Its size makes it particularly agreeable to ladies, and as the bristles do not come out they have this additional reason to be pleased with it.

It is a twenty-five cent brush, the wholesale price being $1.50 per dozen, and in one gross lots $16.50. This reminder is hardly needed, except in the case of the more recent members of the trade. Don't forget the Coronado brand when you are uncertain what to order.

Illinois College of Pharmacy.

Illinois College of Pharmacy, department of Northwestern University, Chicago, has now accomplished the lengthening of its course for the degree of Graduate in Pharmacy, as announced last year, and has abolished the spring course. Students will hereafter be admitted only in the fall. The course for the degree of Graduate in Pharmacy will occupy two annual sessions of six month each, and the course for the degree of Pharmaceutical Chemist will cover two years of nine months each.

Ever since the days of Dr. Cronk of New York State—how long before we don't pretend to say—the name Root Beer has suggested something good. You could buy the old Cronk's beer in big stone bottles, whose pungent contents were truly refreshing on a hot day, and vastly superior, as we member it, to the modern "pop" that has taken its place. A close resemblance to the old fashioned kind is found in California Root Beer, which needs to be taken in hand by the housewife and used in conjunction with yeast, each small bottle making five gallons of beer when the work is completed, and supplying a good, wholesome and refreshing family drink. Druggists find the article a good seller and profitable, not interfering in the least with sales of soda water, and retailing at a price that makes it go rapidly.

Wholesale price 80 cents per dozen. Three dozen lots for $2.25 and a dozen neat fans with each dozen Root Beer. F. W. Braun & Co. supply it.

The excellent cleansing qualities of Tar Soap are so well known that it is unnecessary to argue the point with customers. They all understand it. What they may not know and ought to be informed of is that La Rue & Co.'s "Wonderful" is the most economical as well as the best in quality of all the tar soaps on the market. Test it by the scales there is more of it, try it for a week or two in actual use you find it more durable. Dealers find it more profitable and satisfactory. Cases of 50 cakes cost $3.25. It is sold in Los Angeles by F. W. Braun & Co., who are the Pacific Coast distributors of the article.

All About a Cork.

BY C. HOWARD TRIPP.

Have you, gentle reader, ever given heed or serious thought to the origin of a cork and the many processes through which cork wood must pass ere it is fit to fulfill its purpose in preserving in bottle, on the one hand, the wines of the world for rich and poor alike, and on the other hand acting as a stopper to ærated waters, the nectar of the new Rechabites? Let me ask you to imagine that you have made a pleasant journey with me to Gibraltar. We have come especially to see the cork forests. We have traveled thus far to see the cork factory, too. First, let me tell you what I can of the cork tree, and then let me take you to the cork factory to see the cork wood manufactured into corks, as we familiarly know them. The cork tree grows only in Spain and North Africa. It resembles very much the oak tree of Great Britain, and, like it, has acorns. Nothing can excel the beauty of these cork woods; the trees grow without any special regularity, and the cork woods themselves extend for miles and miles. Velvety grass, wild flowers and ferns entwine their roots, and, during the hot summer days, the magnificent old cork trees spread their branches and shade the traveler who passes by or seeks rest beneath them.

It takes twenty years' growth before the tree develops cork. There is at first only a thin layer of cork between the bark and the tree itself, and each year adds to its thickness. You can thus tell the age of the tree by the number of layers of cork wood. Little, thin, faint red lines, closely interwoven among the cork in rings, show, for each line, one year's growth. After ten years—during the months from December to February—the trees are stripped right down to the tree itself, the outside bark and cork underneath being both entirely removed. The trees, when newly stripped, present a yellowish appearance, and soon turn to a deep mahogany color from the ground as far as to the end of the branches that have been stripped, and it is a curious and picturesque sight to see these many stripped dark trunks and limbs in the forest as one passes through. But this first growth—this first ten years' growth of cork—is not of extra good quality. The tree has not yet come to real maturity. Again it rests for ten years, untouched by man, and again it year by year produces another crop of cork between the wood and the outer bark. At the end of the ten years—that is, forty years from its birth—the tree is again stripped, and then, again, another ten years' growth of cork is secured, and so on for many years, until at the age of 160 or 200 years or more, when the tree is old, and the cork again becomes very poor in quality, it is cut down. Thus it will be seen that the cork tree yields its harvest ten times only in a century, and then only after it has attained its majority of twenty years' growth. It is during the time between the fourth to the seventh or eighth stripping that the best quality of cork is obtained; that is to say, a cork tree is at its prime from sixty to one hundred years old. All the time that the tree is making its cork it bears yearly a large crop of acorns, and they form a valuable food for numerous herds of swine, which revel in the luxury and fatten upon it year after year. The cork tree wood is, like the English oak, very hard and serviceable, and, when the tree is cut down, the wood itself is valuable.

As soon as the cork and the outer bark attached have been stripped from the tree, they are removed to the store hard by in the forest, and there they are boiled in primitive boiling tanks. This is done to soften the bark, and, after boiling, it is at once handed to the "scalers"—men with scraping knives of peculiar shape, who scrape off the outer bark—and thus one step is reached in the process of making corks. The cork wood is now stacked in the open air in large stacks, and forwarded by road and rail to the factories. These, naturally, are numerous, and to be found in many countries. America, perhaps, claims the largest, and it is to America, therefore, that large quantities of the cork wood are shipped, and there dealt with at the factories and put upon the market in the shape of corks, life belts, etc.

But let me now direct your footsteps to a large factory at Linea de la Concepcion, Spain, just three miles from the rock of Gibraltar. Here all is worked in the best order with machinery up to date. The firm own large cork forests themselves and rent others, and, having an iron foundry in Malaga, they make and repair there all their own machinery. Immense stacks of cork wood are here kept in stock, and some three million corks of various sizes and qualities are, on an average, turned out weekly. The machinery is all driven by one large engine, with shafting running into the various departments of the building, and the same engine drives the electric light works, by means of which the factory is illuminated.

The first course that the cork undergoes at the factory is thorough boiling. This softens any bark that may have been left on the cork wood, and as soon as it is removed from the boiling tanks it is handed to workmen who scrape away the clinging bark now easily detachable in its moist condition, without removing any of the real cork wood. From the scalding and scraping shed the large pieces of cork wood are removed to the sizing shed. Here are several machines, set with sharp revolving knives so distanced that the pieces of cork wood are cut up in long strips and sized ready for the next process. It is here in this shed that many accidents occur. The machinery revolves with perfect precision at each lathe, and the workmen have to guide the cork against the knives, and as the pieces go through the men are wont to forget the knives' cutting power, and fingers and thumbs are severed in a moment.

From the sizing shed the cork wood is carried to a long row of sheds in which boys cut it up into squares, and very cleverly, by long practice, they so arrange the cutting of the squares that they drop into different sections below. The machines, too, are perfect and act as planing machines as well as cutting machines, so as to rid the cork wood before squaring of any rough bark or material that may be attached to it. Leaving this shed the squares of cork are removed in baskets to another large shed, well ventilated and lighted and dry, in which some fifty girls are at work. Here are novel machines for rounding the corks, machines for sizing these rounded corks off, others for cutting clean the ends, and others also for branding the name of the merchant. It is wonderful to see how well the dark-eyed, sallow-faced, brightly-clad Spanish women and girls manage the machines under their care; with one hand on the machine and the other on the square piece of cork, they will run the planing knives round and round, and see that the surface of the cork is bright and clean. At one end of this long shed there are rows of girls at work sorting out the corks into various qualities. This is a very delicate work requiring great skill, and it takes years to become an expert in it. Corks are divided into various classes, such as from 1 to 5, with an extra quality No. 1 for fine old vintage wines that may have to be kept in bottles for forty or fifty years or more, and specially selected large-sized corks for champaign, worth 2d. and 3d. apiece. The closer the texture of the cork wood, and the softer and silkier it is the higher it is classed; the rough, porous corks full of holes passing into the lower classes, and the close, clean, silky ones into classes Nos. 1 and 2.

The sizing and sorting as regards quality having been done, the corks are conveyed to a washing room close by. First they pass through five or six drawers charged with an acid solution, so that all stains may be removed. They are then washed with clean water, and finally pass through tanks of water colored red with cochineal, so as to give them that yellowish appearance that buyers demand. All this washing is done by machinery, and is most perfectly arranged. From the washing shed the corks are removed to the drying-oven where they are dried on shelves placed on movable trucks. They pass in at one end of the shed, hot air is drawn through the shed by a fan, and they pass out at the other end and are conveyed to the large store rooms, where they are kept in large bins until required. As orders are received they are usually executed from these stocks, and here again the perfection of the factory is witnessed by the fact that the corks are counted by machinery in 1000s, and packed away in bales of light canvas. These are covered with sheets of strong brown paper and then an outside canvas bale finishes the process. These bales contain 12,000 to 21,000 corks and are ready for shipment.—*London Wine Trade Review.*

Is Pure Water Harmful?

So much is certainly known about the harmfulness of water contaminated with certain impurities that it seems surprising to encounter a proposition that this essential liquid may be dangerously pure, so far as physiological action is concerned. One may be well aware that water, after having been newly distilled, is unpalatable from the absence of dissolved air and other constituents ordinarily present; and this may suggest that it might be less valuable, physiologically speaking, than when in a more natural state, especially as the oxygen it contains is so indispensable to human existence. But the possibility of direct harmful action would scarcely be suspected from such knowledge of its customary behavior.

We are now told, however, by Dr. Koppe that pure water exerts a decidedly harmful action on the animal economy, and that the freer it is from all other substances, the more active does it become as a disturber in this direction. This proposition is set forth by the Doctor in an article in the Deutsche Medizinische Wochenschrift, with the reasons in some detail which have induced him to make it.

It is pointed out as a preliminary fact that animal tissues swell when immersed in fresh distilled water, and held that the inflation which occurs is due to the rapid abstraction of salts present in the cell contents, and that the cells themselves are thus distorted and destroyed. We may add, what is not mentioned by the Doctor—probably being considered by him sufficiently well known—that microscopists prevent this distortion of tissues by the addition of a small proportion of common salt to the wash water in making histological preparations, which fact sustains the theory. The inflation of tissue, to which reference has been made, must occur, he argues, even in the living subject, and when water of too great a degree of purity is brought into contact with the mucous coating of the stomach, the superficial layer of cells will become so disorganized by the abstraction process that they will die and be cast off and a catarrhal condition thus induced.

We confess that, while this theory seems plausible, the proofs he presents do not seem to be wholly convincing; to be, in fact, incomplete.

In the first instance, he states that the harmfulness of washing out the stomach with distilled water, which has been much practiced, is now acknowledged, and that physicians are adding salt to the water to be used for that purpose. We are left to infer that the change has been a benefit, but no direct proof is offered; and it seems to us that washing the stomach with anything may possible produce disturbance; and the fact must also be taken into account that stomachs which are supposed to require washing are already in a more or less diseased state, and, consequently, subject to influences which would make no impression on a healthy organ.

The second item produced in the way of proof is also open to objection. Catarrhal symptoms following the feeding of bits of ice, as is done in some diseases, the author ascribes to the greater purity of the water resulting from the melting of the ice. This purity, it may be explained in passing, is demonstrated by a determination of relative electric conductivity; the purer the water, the less is its conductive power. That the water obtained by the melting of natural ice is freer from foreign substances than that obtained in the customary way was shown by this test.

The author points out that it is well known that the eating of snow in high mountains, or the drinking of water coming from melting glaciers, do not quench the thirst, but give rise to much discomfort; and he assumes that these waters are of a high degree of purity.

Lastly he cites the singular fact that at Gastein there exists a spring, the water of which has been known from time immemorial to exert a poisonous action. Numerous chemical examinations of this water have failed to discover in it any poisonous substances whatever, and he assumes that its deleterious effect is caused by extreme purity.

We think that in all cases of the disturbing action of water the question of temperature is one of great importance. Water immediately derived from melting ice is of course exceedingly cold, and we would look for disturbances of the mucous membrane by temperature alone regardless of the nature of the water itself. In the case of the Gastein spring, we have no statement as to temperature, so that of course the question there remains open.

But while we are of opinion that comparative temperature experiments are necessary to prove the case, we are free to admit that we think it very likely that it could be thus proven. It is perfectly reasonable to suppose that water, when deprived of the substances it always holds in solution when existing under natural conditions, has its dissolving power increased, and it is probable that it would exert action in this direction even on the living tissue.

Any one who has had occasion to wash his eye with the ordinary water knows that the operation is disagreeable, a certain degree of irritability being developed; and if he has also performed the same operation with the same water after adding thereto enough common salt to impart a distinct taste to the liquid, he will know that in the latter case there is little or no disagreeable sensation. That this fact has a bearing on the question at issue seems plain enough.—*Drug Circular*.

The Beecham Habit.

Some time ago it became necessary for me to enter a protest in these pages on the subject of art and underwear. The Ypsilanti Yagerites, with unblushing foreheads, encouraged by the high class monthlies, carried matters so far that as a man of family, with growing sons and daughters, I could no longer admit the Family Press to my home. Fortunately I succeeded in checking the exhibition without calling in the aid of Antonius Comstock.

The eczema has, however, broken out in a new place. In a recent number of McClure's Lim. I see portrayed, with all the seductive skill of an expert illustrator, a beautiful young woman with hair neatly braided down her back. She is arrayed in a night gown that is a dream. Like the Goddess of Liberty in New York harbor she holds aloft a lighted candle in one hand, and in the other—a pill.

If the scale of the drawing is correct this pill is about the size of a base ball. The import of the picture is that the lissom beauty is about to swallow the base ball. Beneath the picture is the legend: "My complexion is perfect because I take one of Billson's Bully Bilious Boluses every night on retiring."

Now, not only do I solemnly protest against this realistic tendency in art on the part of Billson, but I call attention to some truths brought to my notice by the ship's doctor on the Lucania. This doctor, who seems to understand himself, declares the Beecham habit is very much on the increase. He says that the people who insist on irritating their Erie Canal by doses of the invention of Col. Carter, of Cartersville, as soon as they come on board, are sure to pay speedy tribute to Neptune in a surprising and unexpected way, and that those addicted to the Beecham habit are the ones that suffer most when traveling on the sad sea waves.

The family papers teem with warnings that we must invest good money in Fig Syrup, Early Risers, Little Liver Pills and Base Ball Boluses in order to have good complexions and sweet thoughts. Very many people believe this. The habit begins by gently dallying with the Lady Webster Dinner Pill. It grows and grows. One pill is enough at first, but two are soon required where only one grew before, then three are demanded, and soon a change is required from pills to Fig Syrup, then Mother Shipley's Tea and back to pills—from Carter's to Pierce's, then Ayre's, Beecham's, Billson's, and at last a frantic dash is made for Ripum's Tablets.

The man's hold has been stored with such a miscellaneous cargo that nature stops perplexed: Carter is consulted, and "she starts, she moves, she seems to feel the thrill of life along her keel." Then come cold chills, hot bearings, a hawser has surely befouled the screw. Stomach protests—mal de mer comes ashore—liver lags, kidneys kick, lee scuppers are clogged, bilge accumulates and nature pipes all hands to pump the ship. The patient goes into dry dock and specialists being consulted tell him he has cancer of the stomach, fistula, appendicitis, tape worm, tuberculosis of the bowels and Bright's disease, and he has, or thinks he has, which is just as bad.

And all this as a result of the Beecham habit. It is very plain to every unprejudiced reader that the prime motive of the fin de siecle religious press is to prove that man has liver trouble and salvation can only be found by patronizing Dr. Pierce's Pungent, Pugnacious, Pollywog Perquisites.

Whether these things be indicated by Bishop, Presbytery, or Ecumenical Council, I cannot say. But Col. George Batten, expert in advertising, advises me that the proper cathartic is usually dictated by the Committee of Seventy. However this is, I find that the Outlook gives prominence and publicity to Tarrant's Seltzer, the Churchman to Fig Syrup, the Christian Register to Acid Phosphate, while strong leanings are shown by the Christian Leader for the wares of Dr. Pierce. The Christian at Work works Pierce and Ayer's, the Presbyterian likes Prune Juice, while the Christian Advocate lustily advocates Early Risers and Ripum's Tablets. The Baptist Standard goes off on a new track and favors Dr. Hall's Water Cure, Self-Treatment, while the Examiner falls back to Fig Syrup and Prunes. The Christian Herald, edited by Rev. Dr. Talmage, seems to conduct itself rather loosely, for it coquettes its favors between Hood, Beecham and Dr. Hall. As one goes south of the Ohio river, matters grow worse, for the Southern Pulpit of Louisville not only favors Pierce, Carter and Beecham, but introduces "a sure cure for flatulence," in the presence of Dr. Jingle, whose wares are vouched for by seven clergymen, three of them D. D's.

The opinion is well grounded among our agrarian population that the chief claim of our late martyred President upon the gratitude of a loving people, lies in the fact that he invented Garfield Tea.

Not long since in a court of law, fig syrup was acknowledged to be innocent of figs. And gentlemen having purchased Prune Extract and congratulating themselves that they are full of prunes, have only taken a drastic dose of aloes. It seems the part of wisdom for those on sea (and land) to monkey with their in'ards as little as possible. One's motto in this respect should be, "Place not your trust in prophylactics." It is difficult to improve on the plans of God. Many men have tried it, but to their sorrow. He has made all out-of-doors full of fresh air. He gives us pleasure in moderate exercise, the night for sleep, and fruit drops from the trees at our feet. All these He made, and I hardly think He ever intended that we should put an enemy in our mouths to steal away our digestions—still I may be wrong.—*Æsculapius in "The Philistine."*

A druggist in New Hampshire, wishing to introduce a new line of perfumes, set off a square spot in the middle of the village paper, stating above that the space was perfumed with So and So's perfume. An atomizer was used on the "spot" as the edition was being run off. It brought business. Smith's Fertilizer Works, in the same place, made application for a similar "space," to be perfumed with their product, but the hard-hearted publisher refused.—*Drug Topics*.

CALIFORNIA DRUGGIST $1,00 a year.

Exchanging Goods.

GEO. L. KELLEY IN AMERICAN DRUGGIST.

To be generous and lenient is a grand, good thing, so good, indeed, that perhaps many will question my good purpose in advising anything to the contrary. But, although in many instances advice of this nature might be condemned, yet, when to be guided by these good principles is a source of danger to the pharmacist's patrons and a menace to the stability of his reputation, he is justified in being only in a limited way either generous or lenient. By this I do not mean that every generous act of the pharmacist will result in harm either to himself or his patron. My remarks apply only to that generosity and leniency sometimes shown customers in changing articles either for their accommodation or for the rectification of mistakes which they have made.

As an example of what I mean I will cite a case which every pharmacist will recognize as one of daily occurrence. A child purchases, let us say, ten cents worth of sirup of tolu, to be dispensed in a bottle which she has brought for the purpose. The child takes the package and goes home, everything being apparently satisfactory. But it is not long before she returns, and states that she has made a mistake, or, perhaps, accuses you of having given her the wrong article. She then requests you to change it, which, of course, you are expected to do. But before doing so your own interests behooves you to consider the possible consequences.

This bottle comes to you in a condition of cleanliness of which you can know but little if anything definite. The bottle may have contained some poisonous substance or may have been in contact with a person ill with some contagious disease. Again it might contain traces of some chemical substance which might cause you trouble in a prescription should it happen that the returned article came in contact with another preparation incompatible with it. Anyone of these, if known to you, would be sufficient to prevent your returning the material to the stock container. If this is so, and if you cannot tell positively the condition of the bottle, then you are justified in telling your little customer that you cannot change the sirup, or, if the child is too small, in writing a note explaining briefly your reasons for being unable to exchange it. If the amount or value is small you may find it expedient to throw it away, and give in its place the desired article.

In the example given above I have mentioned only liquids, but the same principles are applicable to powders. With powders, however, it is usually possible to tell whether the package has been tampered with or not. In any case if the package is not returned within a reasonable time to change it would be inadvisable.

Rubber goods must be exchanged with almost the same care accorded other lines. They are used for such purposes that they are much exposed to infectious diseases. Even with nipples little freedom should be allowed the customer. Many people, not content to try a nipple by holding it to the light, wish to do so by putting it in their mouth. This practice is most reprehensible and should be resolutely put down. The same may be said of the practice of returning syringes or atomizers after using them, unless, of course, they are defective. Even in a case like this, an effort should be made to repair the article and return it to the customer rather than supply nother in place of it and return the repaired article to stock.

These points about exchanging goods are too little observed by the average pharmacist. Part of this negligence—for negligence it is—is due to a desire to please, and part is due to a desire to avoid the trouble of explaining a refusal to exchange an article. These reasons will appear to many to have merit, but do you think that a lady could stand by and see a man ask to see some nipples, try all of the nipple shown him in his mouth, which but a moment before had held a strong-smelling pipe, and then step up to make her choice? If she could she would be the most unnatural of mothers. Her first impulse would be to flee from a store where such repulsive tests of goods were permitted.

Care in a matter of this kind requires but little effort. The greatest effort is to introduce the rule, but that once done your customers will respect you for it.

Platinum Industry in Russia.

The following article has been translated from the Novoe Vremia (Consular Report): The Urals have been until now, the only source from which platinum has been procured for the international market. Its part formed over 95 per cent in the universal production of that precious metal. A small group of platinum mines, concentrated in the Verkhotursk district of the government of Perm, includes about 70 separate mines, of which only 40 are being worked, and the remaining 30 are either inactive or under investigation. During 1897 the production of platinum amounted to about six tons, of which separate enterprises produced the following amounts: Mines of Count P. P. Shuvaloof, 1 ton 396 pounds; mines of Count Demidov San Donato, 1 ton 144 pounds; mines of J. Burdakox & Sons, 1,512 pounds; mines of Kolly, 1,404 pounds; mines of Andreieff heirs, 1,188 pounds; mines of Koenigsberger, 1,008 pounds; mines of P. A. Konukhoff, 792 pounds; mines of nineteen small proprietors, 1,620 pounds.

Two of the above-named mines passed, in 1897, into the hands of foreigners. In the beginning of September other enterprises were sold to a syndicate from Paris, with a capital of several million francs. The price was fixed according to the productiveness of the mines, estimating a ton of platinum from $798,250 to $957,900; thus, for example, a mine having a yearly output of 360 pounds was estimated at from $128,750 to $154,500; a mine with a yearly output of 625 pounds was sold at from $309,000 to $386,250.

From the above it is seen that there are only seven great platinum enterprises in the Urals, of which five have been purchased by foreigners. By the sale of these mines Russia has lost the advantages which she could acquire from platinum industry. While platinum mines were in the hands of Russians the whole of the raw material was sent abroad, and the income from the manufacture of platinum articles was in the hands of foreigners. During later years the Russian platinum owners tried to get rid of the foreign purchasers, but the mines have now passed into the hands of foreigners. When one considers that no new veins of platinum have been discovered during late years, that those now existing will soon be exhausted, and that no other platinum mines have been found in the Urals, one must come to the conclusion that the Russians have lost an important industry, and the only one which enjoyed a monopoly of the world's supply.

A Test for a Pharmacist.

"Did you notice that man going out of the door," said one of the leading druggists of the city Sunday afternoon, as I held down one of his comfortable chairs, enjoying the heat coming from the radiator and once in a while helping myself to the contents of a box of sample cough drops that lay open on the counter. I nodded my head in a careless way, expecting a choice morsel of scandal, but not wanting him to realize that I was too eager, for fear he would not reveal anything.

"Well he can thank his lucky stars that I know my business or this would have been his last day on earth," he continued.

I was interested in earnest.

"Oh, you need not jump like that. It's all so. You see he brought me in a prescription from one of the leading doctors in the city. I looked at the prescription and started to go back to the case to fill it. I looked at it a second time, rubbed my eyes, laid it down on the counter, went and dusted off a counter, and went back and read it again. This time I was thoroughly aroused. Something was evidently wrong.

The compound to be mixed was an important one and a strong remedy. I knew what was usually prescribed, but such proportions were never given as this prescription's. The last time I read it it was clear that in his hurry the doctor who wrote it had made a simple mistake, and yet one, which if the prescription fell into the hands of a green drug clerk might have been fatal."

"Did you fill the prescription?" I asked.

"Why certainly," he replied, carelessly, "I simply made up the article as it should have been and in the correct proportions. The customer was none the wiser, found a little fault at the delay because he had missed a car waiting, paid his money and went out. Did I say anything to the doctor? Why certainly not. If I had he would have called me down in most harsh terms. Would have told me that was what I was paid for—had simply done it for a joke to test me, or would have said: 'Well, I guess I know my business,' and in the future would have sent his prescriptions elsewhere. All of which goes to prove," he concluded, as I ate the last cough drop in the box, "that when you are handling poisons you should know your business and that the present law in regard to licensed pharmacists is an excellent one and cannot be too rigidly enforced."—*Elmira Gazette.*

As the summer season is now approaching, it would be in order to consider stocking up on *Antiseptic Sanitary Towels*, which find a ready sale during this season, while so many people are away from home traveling, or at the mountains and seaside. This article is made of the very best material and put up in three sizes in packages containing twelve towels. As the price at which they are retailed they are an inexpensive necessary toilet article which every woman should have, and as they belong in the drug line and afford you a good profit we would be pleased to receive a trial order if you do not already stock them. Samples sent on application.

The T. B. Insect Powder is a special brand handled by F. W. Braun & Co. It is put up in 6-lb. cans and in 1-lb., ½lb., and small cans. The uniform price is 40 cents per lb. in 6-lb., $5.50 doz. in 1-lb., $3.25 doz. in ½-lb., and $1.25 per doz. for small cans with perforated covers. Always satisfactory in quality.

Insect Breeding In Crude Petroleum.

On May 20th of the past year the writer received a letter from Mr. C. C. Kellogg, secretary of the Board of Horticultural Commissioners of Los Angeles County, of Los Angeles, Cal., transmitting in alcohol some small maggots, the natural habitat of which he wrote was "in the old pools of crude petroleum oil that is wasted around the oil wells here in the city of Los Angeles." He further stated that there was any quantity of the maggots, and that he could furnish them by the gallon if necessary. The commissioners had been asked many times to name the insect, but could not do so, and wrote in search of information. Suspecting that these larvæ would prove to belong to the family Ephydridæ, the species of which have a habit of breeding in extraordinary substances, we urged Mr. Kellogg to make an attempt to rear the adults, which he succeeded in doing July 9th. A shallow dish filled with crude oil containing about fifty of the maggots was placed in a flat box with a glass top on June 18. In nine days the first maggots were seen to emerge from the oil and crawl to the under side of the glass cover of the cage, where they pupated the following day. On July 9th, the first adults were seen, having issued during the night, twenty-two days from the time of placing the maggots in the cage. Prior to this attempt, Mr. Kellogg had sent us specimens in crude petroleum, but naturally, owing to the shaking of the bottle on the trip, the maggots died from suffocation Experiments made before shipment showed that, when the maggots were bottled up in a full bottle for twenty-four hours they were killed. Although the writer has the most perfect confidence in the testimony of Mr. Kellogg and of his assistant, Mr. George Compere, gained through personal acquaintance and extended correspondence, he was anxious to verify the observations himself. and therefore suggested other methods of sending the insects to Washington. The solution was reached by the shipment of the maggots in moss perfectly saturated with crude oil. They were sent from Los Angeles August 27th, and arrived in Washington in good condition. On September 20th one adult issued.

This specimen, together with those previously reared in Los Angeles, were submitted to Mr. D. W. Coquillett for study, and he has decided that the insect which possesses this abnormal habit is a new species of the Ephydrid genus Psilopa, which he has named Psilopa petrolei.—*L. O. Howard in Scientific American.*

For a profitable and ready-selling article the Mexican Electric Oil is worthy of a place on the shelves of every druggist. It is a ready seller, for it is a preparation that is adapted to a great variety of ailments. Internal and external pains, rheumatism, cramps, diarrhea, sprains and bruises, headache, and a hundred other of the daily ills may be cured or relieved by it, and as a profitable thing to handle it has few equals. Retailing at 35 cents, it is now supplied at the low price of $2.00 per dozen, and with the first order for a dozen one-half dozen is furnished as a bonus, in lieu of newspaper advertising. F. W. Braun & Co. now have control of the article and solicit a trial order from every customer.

A man of short stature gives as a reason for his stunted growth that he was brought up on condensed milk.

If you have not already handled Raub's Egg White Soap, send us a trial order. The manufacturers are now putting up a package containing three dozen cakes, three cakes in each box, twelve photogravures, "After the Bath," two large hanging signs, and about 200 circulars. This offer costs you $2.25 or 75 cents per dozen.

The "glorious sunshine" of our favored climate begins to assert itself as April moves on, opening the golden California poppy (which ought to be our official State flower, but isn't) and likewise the streams of cooling sweetness from the numerous soda fountains. The time has come to look up fountain supplies, and to see if there may not be some novelty in the line of summer drinks not yet placed in stock. Coca cola is holding its own in popularity; fruit juices are indispensable; fountain chocolates are perpetually in demand; acid phosphates a matter of course; matchless wild cherry phosphates are taking well and should be found at every fountain; grape juice makes a delicious beverage; effervescing mineral salts are staple, while root beer is a perennial favorite. A new drink, celerine, is on the boards for 1899. It is prepared by J. M. Spence & Co., San Francisco, is sold $1.50 for 1-gallon jugs and down to $1.30 in barrels. F. W. Braun & Co. will supply it, as well as the before-mentioned items, together with Stone's straws, all flavors, colorings, acids, bicarbonate of soda and rock candy syrup. Prepare for a "dry" season; take good care of the soda fountain and it will take good care of you.

Business Personals.

Heath & Morrison, Riverside, are rejoicing in a fine, new plate-glass front to their store, which, with its antique oak framing, is certainly a magnificent improvement.

C. M. Kilbourn, Selma, has sold his drug business to G. W. Woods.

J. D. Se Brell, Riverside, made a remarkably fine Easter display in his big show window, chickens and rabbits of gorgeous colors furnishing the living show, while callas and vines made up the decorations, a beautiful cross of callas being chiefly noticeable.

Mr. Frank E. Moore (Godfrey & Moore) has been for some days suffering from an attack of rheumatism, which has necessitated his absence from business, at least part of the time. Some of his friends are mean enough to accuse him of having the gout, and he an Ohio man!

E. A. Baer, Bakersfield, was made happy by the arrival, March 28th, of a daughter. The "boys" were served most hospitably by papa Baer with the finest of Perfectos, and congratulations were hearty and sincere. We join in wishing the little lady a long and happy life.

W. M. Bramhall, San Bernardino, is making some fine improvements in his store, broadening the floor space three feet and extending the room about ten feet. The prescription case will be set further to the rear, giving a much larger general space. An elegant Onyx Soda Fountain is to be added to the attractions, and when the new decorations are completed Mr. Bramhall will have one of the most beautiful drugstores in Southern California.

At the recent State championship shoot at Sacramento we are pleased to learn that Lieut. Frank. W. Mixter of Visalia won the silver badge, the second prize, coming within one point of securing the first prize, a gold badge.

It is the legitimate result of our friend Mixter's high grade work with the Springfield rifle during the years he has been a member of the National Guard, and that he is a druggist is an additional reason for our congratulations.

A peculiar accident occurred in the City Drugstore, Redlands, one day last month, which, though not productive of serious consequences, might easily have been. The front window, in which was a display of big Mexican straw hats, is exposed to the direct rays of the sun, which, through the medium of one of the show bottles, was, on this particular occasion, focussed on a hat, burning a good sized hole in its side. An early discovery of the fact by Mr. Chestnut doubtless prevented a bonfire.

Saturday, April 8th, was fixed upon by Q. R. Smith, Santa Ana, as a grand opening day—inaugurating his splendid soda fountain, and incidentally showing the beauties of his entire establishment. Handsome invitations were sent out to the ladies, to whom ice-cream soda was freely dispensed, while a fine orchestra,. stationed in the balcony (a pretty feature of the store), enlivened the occasion with their choicest selections. That the opening was a brilliant success goes without saying, and if the fountain isn't worked up to its full capacity this season it will be because the ladies have lost their taste for ice-cream.

Dr. S. Whitehorn has returned to Los Angeles and opened a drugstore at 808 Mateo street.

Sam Bothwell, lately with Thomas Drug Co., has accepted a position with Off & Vaughn.

Reginald Petter, formerly with Godfrey & Moore, but recently in St. Louis taking a medical course, has returned to Los Angeles and entered the employ of Boswell & Noyes Drug Co.

Dr. Liscomb, Fifteenth and Main streets, has enlarged his store by taking in the adjoining room. This gives room for the display of his large stock of stationery and sundries, and adds much to his business facilities.

H. L. Scherb's new store, the new Arcade Pharmacy, is a fine looking place, and a great improvement on anything heretofore in that locality. We are glad to learn that Mr. Scherb's business is opening very satisfactorily.

The familiar name, C. Laux Co., appears in big gold letters over the new Broadway store the firm will occupy May 1st. Their room is receiving the final touches from the carpenters and will soon be in the hands of the decorators.

C C. Abbey, Redlands, has sold his fine store to Dr. D. W. Hunt. Dr. Hunt was one of our early friends, having been in business in Anaheim when the CALIFORNIA DRUGGIST was first issued. We welcome him back into the trade.

Dr. H. B. Fasig, Downey avenue, has been making some alterations in his store, which with fresh decorations, paper and paint, have greatly improved its appearance. His private office, too, will be appreciated by his many patrons.

Chas. H. Weller, vice-president and manager of the Richardson Drug Co., Omaha, with Mrs. Weller, has been spending some days in Pasadena and Los Angeles, and having, we trust, a pleasant visit in the land of sunshine. Col. Dan Y. Wheeler, veteran traveling representative of the Meyer Bros. Drug Co., St. Louis, was also of the party. Their headquarters in Los Angeles were at the Van Nuys Annex.

The Escondido Advocate has the following regarding recent improvements made by Mr. S. S. Rogers :

Mr. Rogers, who opened up a drug business in Escondido about ten years ago, has been compelled from time to time by the growth of the business to increase the capacity of his store. He has just completed another important change. He has moved the prescription case back about 12 feet and added new fixtures to fill up the new space. Besides adding a large stock of new drugs and notions, the entire room has been re-papered and new economy gas lamps installed for lighting, which makes the place one of brilliancy and beauty.

Few cities of Southern California can boast of a handsomer drugstore than this, and its increasing trade is well merited. Its proprietor, S. S. Rogers, is an enterprising, progressive citizen and has built up a large drug business.

Joe Wetlock, lately with White & Bailey, San Bernardino, now occupies the position of second clerk at Chas. E. Weck's, Riverside.

The well known drug house of Harry Brisley, Prescott, Ariz., has taken on a new name, after the approved modern fashion, and the Brisley Drug Co. will henceforth be its title. This is not a change in title only, for Mr. Ed. Litt, late head clerk in the house, becomes a partner. The extensive improvments the firm is making at the old Ross corner will transfer that well known place into a veritable palace of pharmacy. Prescott is certainly to be congratulated on its drugstores, which may well be the special pride of the Mountain City.

The death of Mr. H. C. Fallin, Hanford, which occurred last month, removed from the ranks of the drug trade one who had no enemies, and whose quiet though hospitable welcome will long be remembered by the traveling drug men. Mr. Fallin was not without a history, for he was one of the early settlers in the mussel slough country who defended his possessions with a shotgun against the aggressions of the railroad company. His later years were accompanied by delicate health, which largely restrained his naturally active temperament. A premonition of his final breakdown seems to have seized him, for only a few days before his last sickness he rerequested us to advertise his store for sale. We learn, however, that it is the present intention of his family to continue the business, his daughter, who is administratrix of the estate, having secured the service of Mr. W. E. White, late of Santa Cruz, to conduct the business.

S. E. Corner Second St. and Broadway, Room 201, Los Angeles, Cal.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

WANTED.—Salesman visiting the drug trade to introduce a specialty on commission. No one but a hustler need address. C. W. Baldridge, Fallbrook, Cal.

FOR SALE—Drug business in this city ; stock about $500. Dwelling attached, also for sale if desired. M. Armstrong, 2715 Pico street.

FOR SALE.—Drug stock in this city in prime condition. Will invoice about $1000, at a bargain. Address A., care of F. W. Braun & Co.

FOR TRADE—Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

FOR SALE—Elegant clean stock in the most progressive suburb of Los Angeles. Only drug store within twenty blocks. Best reasons for selling. Value about $2000. Inquire of F. W. BRAUN & CO. Los Angeles.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards ; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk ; splendid location ; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt ; 10 miles from ocean ; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE.—Drug business in central portion of Los Angeles. Value about $2500 ; owner not being a druggist is the reason for selling. Inquire of Bassett & Smith, room 2, Y. M. C. A. Building, this city.

Three money-makers are offered to the trade by F. W. Braun & Co. in the Hayden Mfg. Co.'s Arnica Salve, Carbolic Salve and Witch Hazel Salve. They are very neatly put up in large-sized boxes, and retail at 25 cents. The uniform price is $1 per dozen Add some to your next order.

Druggists who are wise will not fail to lay in a good stock of prescription and other bottles very soon. Take this as a "pointer."

"Money to patent good ideas may be secured by our aid. Address THE PATENT RECORD, Baltimore, Md."

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

THE manufacture of citric acid in California from lemons, concerning which considerable interest has been taken on the Atlantic Coast, is not yet, apparently, on a footing to promise success, or to inspire alarm in the minds of the producers of the acid in the old way, i. e., from concentrated lime juice. Experimenters and theorists have not been lacking with us, and some plants have been started, usually in a small way, and by inexperienced men to work up the numerous "culls." Acid has been made, though not in quantities to affect the market in the slightest degree, and it is yet an open question whether the industry will ever be one of importance to our State.

It should be remembered that limes, the usual source of the acid, are produced in tropical countries, with little labor, and from lands of small value, while lemons in this country, are a product of skilled labor and high priced soil. The most favorable condition for the industry in question is a depressed market for the fruit, at which time many more lemons than usual are discarded by the packers as culls, and as such have no salable value, the producers having to haul them away to the refuse heap, besides losing the fruit. Lemons that are scratched and injured in appearance by our occasional winds, or that are too small or too large to be acceptable, always constitute a considerable proportion of the crop, and these must furnish the basis of calculation to the manufacturer, who must be prepared by large tank capacity to store juice in extraordinary quantities when unusual conditions furnish the occasion. Given adequate capital, experience in the manufacture, and good business capacity, there seems to us a fair chance of success in the business, especially in view of the fact that the production of the fruit is yet in its infancy in California, and that many times the present output may be expected within a few years.

We add the opinion of Mr. B. A. Woodford, secretary and manager of the Ontario-Cucamonga Fruit Exchange, North Ontario, whose position in one of the most important lemon-growing sections of Southern California gives his views much weight. Answering our inquiries and after rehearsing this season's disaster through frost, he closes his reply as follows: "We believe that with the first normal crop of lemons, such as we had two years ago, there will be obtainable a sufficient quantity of unmerchantable fruit at a price that will warrant the manufacture of the acid, provided the party who undertakes the same is properly equipped with machinery and capital, and understands the business."

AMONG the advertising circulars the druggist sends out to his customers a sheet devoted to domestic cooking material ought not to be overlooked. The pure cream tartar and soda he carries as distinguished from the substitutes often sold in grocery stores; the fine flavoring extracts of his own make, the pure powdered spices carefully selected (make this a fact) furnish material effective as well as truthful, and should be serviceable in increasing family trade. The druggist thus coming into touch with his fellow-citizens has, or should have, a definite object in view, which is no less than the building up of a solid and permanent reputation for business integrity and trustworthiness. It is worth noting in this connection, that in the mind of the public the goods purchased of a druggist partake of his character. "It must be all right, I bought it at X——'s", expresses to a nicety the favorable judgment of his fellow-men upon Mr. X——.

THE boys at F. W. Braun & Co. were considerably amused a few days ago when a big four-horse team and desert wagon were backed up to the shipping platform and an order from a distant mining camp handed in. "One milligram rider" the requisition read. Considering that the article in question is about the size of a girl's eye-lash the incongruity of the transportation furnished was fair ground for a smile.

SOLIDIFIED alcohol is a recent product of German pharmaceutical art. The object is to supply material in convenient form for burning, in place of the ordinary alcohol lamps, the tin container serving for the lamp. The composition of solid alcohol consists of 62 per cent of alcohol, 20 per cent of soap and 18 per cent of water. We have not yet noted the article in the American market.

TO mask the unpleasant odor of petroleum an addition of 1 per cent of amyl-acetate is recommended by a German writer.

AT the commencement of the St. Louis College of Pharmacy April 12, thirty-nine candidates received the degree of Graduate in Pharmacy, ten of Bachelor of Pharmacy and one of Pharmaceutical Chemist. One lady took the Bachelor degree, and two that of Ph. G.

WE have received from Secretary H. M. Whelpley a statement that the correct date of the annual meeting of the Missouri Pharmaceutical Association to be held at Jefferson City, is June 6 to 10. Also that indications point toward a large attendance of members from the various sections of the State.

THE thirty-first industrial exhibition of the Mechanics Institute, San Francisco, will open on September 2 and continue till October 7, following. This, the only great regular exposition of the Pacific coast worthily sustains our credit in the eyes of the world. This year's exhibit will present some entirely novel features from the Philippine Islands, and will be of more than usual interest to the public. The high aim and great usefulness of the Mechanics Institute in the cause of education endears it to the heart of every Californian, and insures a very large attendance at its exhibitions.

Did you ever sell any thermometers except from your customer noticing them in your showcase? At all events it is rare to have a party come in especially to buy one. You sell them, of course, and make a good profit on them, but it is rather singular that your display originates the demand.

This demand may be greatly stimulated by a handsome window display, and the season is at hand when you can work upon the inherent desire for a nice thermometer through the show you may easily make. The pink advertising pages of our present issue contain cuts of a portion of F. W. Braun & Co.'s large line of these goods, among which the highly finished and ornamental "House Thermometers" constitute an an attractive feature, and this season's prices are low.

The season is here for excursions into the mountains and for prolonged camping therein. Druggists should keep in sight of their customers these days the various requisites for such outings. Those little packages of *saccharin* save a lot of weight in sweetening material. A small flask of Witch Hazel is a needful thing to carry, and the Mission Poison Oak Remedy is another article of prime necessity, a little 25-cent box of which may save the camper from a most distressing experience. A good glycerine compound or the Petrolina Cold Cream will relieve the annoyance of sunburn and should be included in every outfit. A cooling acid drink in concentrated form, like Matchless Wild Cherry Phosphates, adds greatly to comfort, and should not be forgotten in making up the list. Wide-awake druggists find every season with its special wants and make corresponding efforts to anticipate the season's demands.

The man who introduced the cut-rates on proprietary medicines in Boston—Harlow E. Woodward by name—has entered a petition for bankruptcy. His liabilities are estimated at $66,000, his assets at $9,000. It is significant that most of his indebtedness is to proprietors. The largest creditor among the wholesale trade is not affected more than $100. Will Brother Faxon of the P. C., N. W. D. A. please observe who the Ethiopean among the saw-logs is in this case? Well, he's the fellow that is generally at the bottom of the cut-rate evil whereever he is found.—*P. O. & D. Review.*

Origin of Swaim's Panacea.

Prof Lloyd says the important fact elucidated by the history of oil of gaultheria, that it first received recognition in Swaim's Panacea, leads to a few words concerning this compound. In the beginning of the present century a French proprietary remedy "Rob de Laffecteur" was very popular throughout France and her colonies. It was invented by a French apothecary Boiveau, who affixed to it the name of Laffecteur to make it popular. In 1811 certain New York physicians used this "Rob de Laffecteur" with success and Dr. McNevin, who obtained the formula from a French chemist, M. Allion, made its composition public.

Mr. Swaim, a bookbinder, was treated by Dr. A. L. Quackinboss and experienced great benefit from the remedy. Procuring the formula from Dr. Quackinboss, his physician, he modified it considerably and put the mixture on the market under the name Swaim's Panacea. This became very popuular and at last attracted the attention of the medical profession, and by the analysis of Mr. Chilton (1829), under the auspices of the New York Medical Society, it was positively shown that Swaim had replaced sassafras by wintergreen oil, and had also introduced corrosive sublimate into the mixture. —*Practical Druggist.*

Newman Hall on Tobacco.

Newman Hall's Autobiography (Cassell & Co.) will be full of gossipy anecdote about himself and other members of the dissenting ministry in England. In his account of his childhood days he mentions that "at nine years old I began to smoke. At nine years old I left off for good. In my ninth decade I do not desire to recommence. On a certain Sunday during our weekly work my schoolfellows found some dried cane branches (perhaps 'traveler's joy') and cut them into cigarettes. I smoked with the rest, but becoming very sick I threw my weed away. During seventy years I have pursued my life travels so pleasantly as not to need this traveler's joy." From which it would appear that Mr. Hall smoked dried cane, and, finding it made him sick, gave up tobacco !—*The Herald.*

The assayer's department of F. W. Braun & Co. has recently received a large addition to its line of fine balances and bullion scales, and now makes a showing of these goods such as probably was never before seen on the Pacific Coast. Prices on balances range from $250 down, the large variety of styles adapting itself to all requirements of purchasers. New showcases for this line add much to the attractive display and greatly facilitates selections. Increasing business in this department from far and near indicate appreciation on the part of the public of the firm's efforts to supply modern, highgrade apparatus at lowest prices.

An Enterprising Legislature.

The Kansas Legislature has originated a plan for making pharmacists which is much superior to the old and tedious methods of practical experience, home study and college instruction. One of the members of the house recently introduced a bill "authorizing W. H. Wilkie of Olathe to avail himself of the provisions of section 2 of chapter 174, session laws of 1887," which meant that Mr. Wilkie would simply have to file affidavits and secure from the State Board of Pharmacy a certificate declaring him to be competent to practice his calling! Mr. Ravenscraft moved as an amendment that there be included in the bill the name of a certain physician in his county, who was anxious to become a pharmacist. This started the ball a-rolling. For a few minutes the pages were kept busy carrying names up to the reading clerk to be included in the bill. Pretty soon Mr. Jaquins suggested that "if anyone knew the name of any other joint-keeper who would like to get in on this deal, his name ought to be included." This checked the rapid manufacture of pharmacists. We have not yet heard what was done with the bill.—*Bulletin Phar.*

Polonium.

The new metal, polonium, lately discovered by M. and Mme. Curie is said, by Crooks (Brit. Journ. Phot.) to possess some peculiar properties. It possesses in a four-hundred fold degree the mysterious power of uranium (with which it is associated in pitch blende) of emitting a form of energy capable of impressing a photographic plate and of discharging electricity by rendering air a conductor. It also appears that the radiant activity of the new body needs neither the excitation of light nor the stimulus of electricity; like uranium, it draws its energy from some constantly regenerating and hitherto unsuspected store, exhaustless in amount.

Chipped Soap Bark, in five and ten-cent boxes, saves much annoyance. You can hand it out without a sneezing fit, and make about the usual profit. 35 and 60 cents per doz. by F. W. Braun & Co.

Novel Window Display.

A novel window display is the one made by John Metzger, on North Main street, Providence, R. I. The window bottom is laid off in the form of a checkerboard made by two colors of paper. On the bright squares are placed crude drugs of various kinds, with a card giving the name of the drug and the country from which it comes. A large sign reads: "A few things the world contributes to your health," and a smaller one, "Have you ever thought that the drugs you use are gathered from over the entire globe?" Some forty drugs are shown, and the countries include nearly the whole world. —*Drug Circular.*

F. W. Braun & Co.'s Fruit Juices and Crushed Fruits are sold at notably low prices, and have a reputation for quality that is unsurpassed. These products are made under their own roof from the fruit when perfectly ripe and in the best condition. It would be difficult to make a stronger statement regarding their quality, unless indeed their increasing sale year by year furnishes the ground. You make no mistake when you order Braun's.

"Business Hints as to Business Success."

Under this title, a neat, attractive and valuable little pamphlet has just been issued by the Business Literature Committee of the National Association of Credit Men. We do not hesitate to say that this booklet is entitled to the thoughtful and respectful attention of every retail merchant for whose benefit we should judge it has been primarily published. In the preface to the pamphlet, all intention to preach or lecture to the merchant is emphatically disavowed, and its purpose is expressed as being "more especially of compiling and arranging in convenient form, views and customs which have been found in practice helpful and profitable."

The book is composed of numerous short articles upon topics of business prepared by men whose experience, judgment and ability, entitle them to speak with authority. Such topics as "The Cash Principle in Retail Business," "Advantages and Disadvantages of Retail Credits," "The Merchant's Bank Profits," "Fresh Stocks," "Handicapped by Unsalable Goods," "Early Buying and Systematic Buying," "Buying and Over-Buying," "Annual Inventories," and others have been treated in a remarkably lucid and strictly practicable manner.

Not the least important feature of the pamphlet is the article explaining the system of filing invoices and recording them for payment which has been indorsed by the Association of Credit Men. There is scarcely anything of more importance to the retail merchant than to know at any and all times the grand total of what he is owing, and also so arranged as to tell when it falls due according to months. The system adopted by this Association seems to be very perfect, while its suggestion as to filing invoices appears to have many valuable features.

Every retail merchant should send twelve cents in two-cent stamps to The National Association of Credit Men, 20 Nassau street, New York, for one of these pamphlets, as it will be found to be crowded with valuable suggestions for the improvement of his business and the enlargement of his profits.

We read of eucalyptus leaves being spread under carpets to keep out moths; maybe they are good when fresh, but for permanent effect there seems to be nothing equal to naphthaline. The flake form is adapted to this use, while the balls are all right for chests, drawers, and clothing. "Packing" camphor and pure camphor are both very good for turning the moth from his "wool gathering," though much more costly. But when you see the insect flying about, you are too late—the mischief is already done You have only the consolation of swearing at the holes, which isn't very satisfactory, after all.

The large use of Caffeine Hydrobromate at the soda fountain suggests the purchase of an economical as well as satisfactory article. The "Dupont" brand fills the bill in both particulars. Single pound bottles are sold by F. W. Braun & Co. at 45 cents, five pounds at 40 cents, and five-pound cans at 35 cents. Give it a trial if you have none in stock.

F. W. Braun & Co. have taken the agency for the Barrister cigar, and excellent reports are coming in from parties who have purchased them. The Little Barrister is as fine and sweet a smoke as ever was put on the market, has pure Havana filling, and sells for 5 cents. Try a line of the Barristers.

Stamp Tax on Petrolatum.

The Internal Revenue Bureau has prepared a new ruling of the highest importance to oil refiners making any grades of petrolatum. The Bureau has just completed an elaborate investigation of the plants and methods of a number of refiners with a view to modifying its previous rulings regarding the taxing of petrolatum and similar products, the result of which, together with the Bureau's conclusions as to the tax, are set forth in the following circular which will be sent to collectors of internal revenue in all oil-producing districts:

"Recently the several collectors of internal revenue were instructed to cause an investigation to be made with the view of ascertaining if the various oil refining companies within their districts were complying with the regulation, relating to the stamping of petrolatum. Many reports of the results of these investigations were received by this office, which have been supplemented by personal visits and letters from representatives of the various refining companies throughout the country.

"Upon careful examination of all the evidence submitted, it appears that there are many grades of clarified petrolatum, each having a particular price, based upon the cost of production to the refiner and his ability to extract the higher grades of refined petrolatum from the crude stock. The grades of petrolatum are based principally, if not wholly, upon the color of the refined product, which varies from a dark brown to a pure white; and the price to the consumer is in adverse ratio to the amount of the coloring matter contained, i. e., the less of coloring matter the more of cost to the consumer.

"It further appears that certain refineries make a specialty of certain grades of petrolatum; for example, one refining company confine themselves almost exclusively to the production of the higher grades of petrolatum, such as the white and the product known as 'Vaseline,' such products are employed exclusively in the manufacture of the high grades of cosmetic and medicinal articles. It is obvious, therefore, that a standard rate of taxation for petrolatum, based upon the retail price to the consumer of a two-ounce package, it is inequitable, when applied to petrolatum sold in bulk. The more clearly is this apparent, when it is shown that the proportionate cost of two ounces of petrolatum is to the cost of its container, as one to three; while, compared to the retail price to the consumer, it is as one to fifteen. It still further appears that there intervene between the manufacturer and consumer another class of dealers heretofore unconsidered, known as bottlers. This class buy petrolatum direct from the manufacturer in barrels, and, after treating it chemically with heat, and usually by the addition of certain oils, draw it off into small retail packages, stamp it and otherwise place it in a salable condition. The dealer ordinarily buys the petrolatum that he retails from this class.

"Circular 501, Revised, p. 6, under Unclarified Petroleum and other Incomplete Manufactures Shipped in Bulk, states:

"While the Act of June 13, 1898, specifically provides that the stamp taxes shall apply to petrolatum, it is held to be the intent of the statute to impose the tax upon the clarified product only. The unclarified is an unfinished product, requiring to be treated with heat and otherwise manipulated before it will be accepted by manufacturing druggists for various ointments, or drawn off into small packages and sold as vaseline, and may be shipped in bulk without stamps.

"If, however, the unclarified, unfinished petrolatum is sold for use by consumers, either at wholesale or retail, it is liable to the stamp tax at the same rate as the finished product.

"Many articles which ultimately become taxable are not so when they are first removed from the manufacturing chemist's laboratory, but are incomplete manufactures, the process of manufacture not being completed until they are bottled, labeled, or otherwise placed in a salable condition.

"After a consideration of all the facts, this office is of the opinion that petrolatum being specified as taxable under Schedule B of the Act, is taxable, first, regardless of the style and manner in which it is put up and sold, or how it is held out or advertised; and, secondly, it is taxable, whether intended to be used as a medicine, cosmetic, lubricant, or otherwise, so long as it is known as petrolatum, and intended for consumption (by consumption is meant any process whereby the identity of petrolatum is destroyed), and it is so held.

"It is therefore the duty of the manufacturer, or more properly speaking, the refiners, to stamp petrolatum in bulk or otherwise, before removal from his possession for consumption or sale, and the stamp tax must be computed upon the retail price of the article, which is held to be the refiner's price, with a reasonable profit to the jobber and retailer added.

"But the ruling as to 'incomplete manufactures,' quoted above, applies equally to petrolatum as it does to every other article or class of articles mentioned in the statute. Applying this ruling, it becomes the privilege of the manufacturer or refiner to remove unstamped such unclarified (granulated) petrolatum in bulk as requires to be treated with heat and otherwise manipulated by the bottler or retail dealer, before it is placed in a finished and otherwise salable condition.

"This, however, must not be construed to relieve the manufacturer or refiner from stamping such unclarified petrolatum in bulk or otherwise, when sold in that condition direct to the consumer, who makes use of it as such, or destroys its identity by converting it into medicinal, cosmetic, lubricating or other substances.

"One, five, ten, twenty-five, and fifty pound tins of petrolatum intended to be consumed by pharmacists, physicians, manufacturers, barbers, etc., in their business must be stamped before removal from the refinery in proportion to the price charged to the consumer.

"To recapitulate: The stamp tax shall apply to all clarified petrolatum removed from the place of manufacture or refinery for consumption or sale.

"The stamp tax shall be computed upon a fair retail price, which is held to be the manufacturer's or refiner's price with a reasonable profit to the jobber and retailer added. This is held to include one, five, ten, twenty-five and fifty pound tins of petrolatum not ordinarily rebottled, but used by druggists, physicians and others in their professions and trades.

"Unclarified (granulated) petrolatum sold to dealers or bottlers to be treated with heat, bottled, labeled and otherwise placed in a salable condition, does not require to be stamped, when it is removed from the refinery in an unclarified state; it being incumbent upon the bottler or dealer to affix the requisite amount of adhesive stamps when it is placed in a finished and salable condition.

"The amount of stamps to be affixed to such petrolatum as has been clarified, bottled or otherwise placed in a salable condition by the bottler or retailer must be computed upon the retial price at which the package is sold to the consumer.

"Unclarified petrolatum sold in bulk to the consumer, who makes use of it as such, or who destroys its identity by converting it into medicinal, cosmetic, lubricating or other substances, requires to be stamped by the manufacturer or refiner when sold to such consumers.

"You will please advise the various oil refining companies in your district in accordance with this ruling."

WASHINGTON, April 7, 1899.

The Stamping of Petrolatum.

WASHINGTON, April 28th, 1899.

The Bureau of Internal Revenue has succeeded in getting into a serious muddle concerning the stamping of petrolatum. From time to time the bureau has given hearings to representatives of refiners in different parts of the country, and an effort has been made to ascertain as accurately as possible the conditions under which this product is manufactured, refined and marketed. The Internal Revenue Bureau recently had occasion to completely revise its former position concerning the stamping of petrolatum in bulk, and because of the decision then reached the bureau has been subjected to a bombardment of protests from manufacturers and dealers throughout the country. Among these protests there have been various suggestions as to the manner in which the bureau may modify the regulations requiring bulk goods to be stamped by the refiners. Recently a number of suggestions were received from the Beaver Refining Company of Washington, Pa., in reply to which the Commissioner has written the following letter, which covers a number of points, some of which are still under advisement in the bureau :

"You acknowledge the receipt of a letter from this office under date of April 17, 1899, in which you were informed that a jobber in Chicago, upon request for information, was advised that it is the duty of the refiner to stamp such bulk packages of petrolatum as are intended to be sold in the unclarified state through the medium of the jobber direct to the consumer, and you were requested to advise this office if this was your understanding.

"In reply, you quote from the decision 20,982, of April 5, 1899, as follows :

"'Unclarified (granulated) petrolatum sold to dealers or bottlers, to be treated with heat, bottled, labeled, and otherwise placed in a salable condition, does not require to be stamped, when it is removed from the refiner in the unclarified state, it being incumbent upon the bottler or dealer to affix the requisite amount of adhesive stamps when it is placed in a finished and salable condition.'

"You state, in accordance with your interpretation of this paragraph, the refiner is privileged to ship unstamped unclarified (granulated) petrolatum in bulk, i. e., quantities in excess of 100 pounds, to wholesale dealers. You state further that when the refiner ships a carload of petrolatum (60 barrels) to a wholesale dealer or jobber, the latter will dispose of the carload as follows : Probably 25 barrels will be repacked and properly stamped, 20 barrels he will export and the remaining 15 barrels he will sell direct to the consumer. You submit that it is impracticable for the refiner to undertake to stamp such petrolatum as is sold by the wholesale dealer direct to the consumer in bulk. The refiner knows that a certain portion of the carload will be sold by the wholesale dealer to the consumer in the condition that it is shipped from the refinery, but he is unable to say exactly what portion.

"You suggest that the refiner be authorized to ship bulk packages of unclarified petrolatum to the wholesale dealer unstamped, provided the following printed caution is affixed to the bulk packages :

"'These goods are sold as bulk goods, to be repacked, and must not be consumed. When repacked or sold to a customer they must then be stamped as per ruling April 5, 1899.'

"Your suggestion is believed to be a good one, with the exception, however, of the wording of the caution. The fact that bulk goods are shipped to be repacked cannot be advanced as a sufficient reason, under the statute, for the prohibition of their consumption. These goods are all privileged to be removed from the refinery unstamped simply on the ground that they are an unfinished product so far as the obligation to stamp them applies. The following printed caution affixed to the bulk package of unclarified petrolatum will operate to relieve it from the liability to the stamp tax until it has been repacked or otherwise placed in a salable condition :

"'These goods are removed from the refinery unstamped as an unfinished product, to be repacked, stamped and otherwise placed in a salable condition. If sold to a consumer in this condition it must be stamped in proportion to the price at which it is sold at the rate of 2½ cents for each one dollar's worth of value.'

"You suggest, also, that the refiner be required to stamp nothing in excess of a 10-pound package, making it incumbent upon the refiner, wholesale or retail dealer to see that all petrolatum is stamped whenever they sell direct to the consumer, no matter in what size or shape sold. You state that there is no question that there is a great deal of bulk petrolatum sold by the retailer which should not be stamped, for example, when he buys a 25 or 50-pound package, the larger part would be used in compounding physicians' prescriptions, when, under the statute, it is exempt from taxation.

"Your suggestion is based upon an erroneous conclusion. The exemption provided under section 20 of the act, for 'any medicine sold to or for the use of any person which may be mixed or uncompounded for such person according to the written recipe or prescription of any practicing physician,' applies to medicines only. Petrolatum is not a medicinal article, as contemplated by the act of June 13, 1898, and it, like other substances, can be rendered medicinal only by holding it out as a remedy for some ailment affecting the human or animal body. Petrolatum was placed by the framers of the act in the category with 'perfumery, cosmetics, and other similar articles,' and like other articles of its class is specified therein as taxable, and the exemptions provided in section 20 have no application to it. Therefore, in order that the stamp tax shall be properly charged to such quantities of petrolatum as are sold direct to the dispensing druggists or other consumer, it becomes the duty of the refiner to stamp such packages before removal from the place of manufacture or refinery. This office was advised by your representative that refiners usually do sell from 10 to 50-pound, and occasionally larger packages, direct to the dispensing druggists and other consumers, and that such packages the Beaver Refining Company invariably stamp.

"This office at any time will cheerfully explain its position on this or any question involving the revenue and will take under careful consideration any suggestions that may from time to time be offered that have for their object the attainment of a more simple or equitable method for the collection of the revenues."—*Oil, Paint and Drug Reporter.*

The Davis corkscrew is one of the most useful of its line. It has a pointed lever attachment by which a sunken cork with wire loop may be raised, and closing up to carry in the pocket, forms a convenient implement both at home and on a journey. The "Davis Knife" and the "Detroit leg" are modifications of the original Davis. The first named costs $3.00, the Davis Knife $3.75 and the Detroit $2.50 per dozen. Druggists find them ready sellers. F. W. Braun & Co. sell these as well as an extensive line of other pocket and standard corkscrews.

Quinine Chlorocarbonic Ester, lately patented, is recommended as a substitute for quinine.

The manufacturers of Pazzoni Powder are offering with each half dozen a handsome display banner, which if shown should materially increase your sales. Send in your order.

N. A. R. D. Notes.

The Constitution and By-laws of the National Association of Retail Druggists are being printed for distribution to the members of the organization. Requests for copies, if sent to the secretary, at 943 W. Madison St., Chicago, will receive prompt attention. The booklet contains the names and addresses of the officers and committees of the association for the years 1898-99, and will be of value to those who are interested in talking up the advantages of coöperation with the N. A. R. D. at State meetings. The Executive Board hopes to give the booklets wide-spread distribution, and asks the help of the members to this end.

The National Executive Committee is sometimes embarrassed by the difficulty of securing promptly the coöperation of local organizations whose help is needed in the prosecution of its work. Interest in the plans of the N. A. R. D. is not lacking anywhere, but the officers of some associations seem disposed to allow somebody else to do work they themselves ought to do, and to wait until the national organization has become a success before taking an active part in its labors. The growth of the organization has been very satisfactory, but it would have been more rapid if the disposition to sit down and wait for the N. A. R. D. to achieve success had been less pronounced.

The secretaries of the various State associations that hold meetings in May are requested to communicate with the National Secretary in order that fresh literature may be furnished by him for the purpoee of creating renewed interest in the work of the N. A. R. D., to the end that enthusiastic indorsement of the latter may be secured at those meetings. It is a matter of congratulation that every State Association which has not during the year 1899 given emphatic approval to the National Organization and the Executive Committee are anxious the record shall not be broken.

The fancied security of retail druggists in cities and towns free, as yet, from the price-cutting evil is beyond comprehension. In any given locality the advent of a department store or a cutting drugstore will in an incredibly short time, demoralize prices almost beyond all possibility of restoring them. Observation teaches that the druggists of one city after another are having this calamity befall them. In view of this fact it is most remarkable that druggists neglect to organize for mutual protection. The National Association of Retail Druggists was formed for the specific purpose of preventing trade demoralization and of correcting the evil where it already exists. In several towns and cities the cutter's source of supply has been cut off through the mediation of the N. A. R. D. To this end its good offices are extended cheerfully to every association of retail druggists in the United States.

It is now settled that the forthcoming meeting of the N. A. R. D. will be held in Cincinnati during the first week of October. The following letter in regard to the matter is self-explanatory :

Cincinnati, O., April 1899.

Mr. Thomas V. Wooton, Secy.

Dear Sir: I am instructed to say that the Cincinnati Academy of Pharmacy appreciates the compliment of the selection of this city for the first regular meeting of the National Association of Retail Druggists. Next week there will be a special meeting of the board of directors of our society to appoint committees in connection with the work of securing proper hotel rates, selecting a place of meeting, etc. I shall communicate with you as soon as our committees shall have made their reports. Yours very truly,

Martin Dodsworth, Secy.

The disposition on the part of some associations to wait for the National Executive Committee to take up for them the perplexities which they ought to be busying themselves to remove, is not very creditable to these societies. It is well for them to reflect that there are now one hundred associations affiliated with the N. A. R. D. and that the National Executive Committee has a good deal to do. Notwithstanding the fact that organization is far from complete in any locality, invaluable help has been given to every association that has applied for assistance, with the single exception of one society, the mêmbers of which did not represent, adequately, the retail trade of its territory. A clear statement of the conditions your association has to contend with, sent to the national secretary, will be turned over by that officer to the executive committee and every possible effort made to afford relief. The committee doubts the advisability of making public its acts, as this course would, in many cases defeat its plans; but it is very seriously in earnest and is prepared to demonstrate, in a way to astonish some croaking wiseacres, its ability to render needed assistance. Bring this matter to the attention of your association ; the N. A. R. D. is doing business right along —its headquarters are well known.

Confidential.

I have a competitor who has a terribly bad reputation as a substitutor and seller of something just-as-good. Now, I suppose I don't have the proper spirit in me, or I should lay awake night worrying about this hereafter, but it doesn't bother me a bit. Some how or other, it seems that the more he substitutes and is found out, the better my trade is.

Sometimes a doctor fixes up something for a patient at his office, and when it is used up the patient says to himself, "I'll have this refilled at the druggists and it won't cost so much." He doesn't say that to the druggist, he always tells him that he can't find the doctor.

That sort of a fellow strikes me once in a while, and even if I were a good guesser, my conscience isn't seared enough to allow me to run the risk of being found out, so the fellow steps across the street, has no trouble to get it put up and goes on his way rejoicing, thoroughly satisfied that I am a full-fledged chump, an opinion that he will retain unless the doctor accidentally finds out what was done.

Under such circumstances I grieve very much over the wickedness of my competitor, because he turns a penny to his own account and casts a reflection on my ability, probably confirming somebody's belief that I was a fakir anyhow.

I can say another good thing for my competitor : he never cuts prices ; whenever he can he adds fifty to one hundred per cent, a fact that redounds to my advantage very often when his customer finds it out. Still, another good point. He lets the junior clerk who has had about six months' experience, fill prescriptions when he is out of the store himself. I can't explain the philosophy of it. I simply mention it as a fact, that the knowledge of that clerk's privilege in that store makes some people come to me with their prescriptions, and when they tell me why they come, I rejoice in that young man's freedom.

I have the kindliest feeling for my competitor, because of the many good turns he does me ; not that I think he does them intentionally, but he does them all the same. I wonder very often what kind of an impression my dissatisfied customers have given him of me, but I suppose I'll never know. Did he ever tell you ?—*Spatula*.

Proprietary Medicine Rebates.

It looks as though the rebate plan of selling proprietary medicines was going to be thoroughly enforced or discarded altogether. If it is a good thing, as all parties are constrained (for prudential reasons) to admit, then it should be lived up to in both letter and spirit. That it has not been lived up to is evidenced by the meeting of various elements in the trade every few months in conference, at Chicago, St. Louis or New York, and "resolving" that henceforth "we will maintain prices and confine sales to the legitimate drug trade", etc.

The Review's position is well known as regards the question of proprietary rebates. It has urged that rebate contracts should be kept inviolate ; or if this be impractical, discard the contract plan openly, and adopt some other system of restricted selling, or declare an "open market." Be honest, whatever the plan. We have maintained that the proprietor was the "weak sister" in the rebate compact. At heart the average proprietor is not in sympathy with the spirit and aim of the rebate scheme. He wants to sell as much of his goods as possible by the means of rebate agencies, and as much more as possible over the head, under the feet, and through the middle of the rebate plan. He is a dodger, a trimmer, a double dealer, when he can be ; and when pushed into a corner, he is a flagrant prevaricator. His goods are in every department store and cut-rate pharmacy in the country, and he wants them there and knows how they got there. The jobber breaks faith with the rebate scheme as a measure of self-defense. but the proprietor cleans up the cut-rate platter pretty well, leaving only a few small crumbs for the drug distributing factor. This is about the situation, and there is but one remedy and that is the exercise of square-toed honesty on the part of proprietors.

What of the future ? We think the proprietors will soon be converted and live in virtuous accord with their promises under the rebate compact. The splendid organization of the retail drug dealers of the United States, only recently perfected, will supply the converting influence, for the N. A. R. D. has already proclaimed a parallel to that good scriptural doctrine, "Ye cannot serve God and Mammon." The proprietors will have to make a choice between the legitimate retail drug trade of the country and a handful of "cutters", and they can be depended on to choose the larger slice of bread carrying the greater quantity of good creamery butter. The alternative would be but as a piece of crust smeared over with fourth-quality oleomargarine.—*Paint, Oil and Drug Review.*

Valuable Advertising Matter Free for the Asking.

We have been informed that H. Planten & Son, the old and reliable capsule manufacturers, have ready for distribution the fifteenth issue of the Vest Memorandum Books, advertising their capsules, and containing at the same time several blank pages for memorandum. You can hand out these little books to cigar purchasers, and we are sure they will be appreciated by the men as a vest memorandum book is always handy to carry.

Write to H. Planten & Son, 224 William street, New York, to send you a supply, and watch how your trade on Planten's Capsules will grow, and incidentally your profits, with very little trouble and no expense to yourself.

Mention this journal.

What to Do In Case of Drowning.

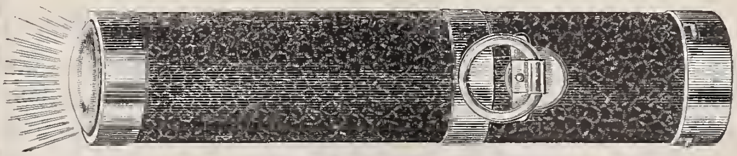
Dr. McNaughton-Jones says : "It is not necessary to enter into the details of the treatment of the drowned. While waiting for the arrival of a doctor, see that the person is carried to the nearest suitable spot, in order to strip, warm and dry the body and to conduct artificial respiration. The first step is to free the mouth of mucus, as also the nose. Turn the patient on the face and hands, let the head hand forward, drawing the tongue out in order to clear the mouth with the finger. It may be well also to hold up the body with the head downward, so as to let any fluid escape. Before practicing artificial respiration have the lower extremities protected and kept warm. Then use Sylvester's method, before doing which take care that a roll of clothing or a small bolster is placed under the chest of the person, so as to throw the head well back. The movements imitative of respiration are carried out at least some thirty times in the minute. While the movements are being made, general friction over the body and application of heat to the extremities should not be forgotten. (The right way to learn Sylvester's movements, or Howard's, is to practice them on the living.)"

Pocket Flash Light.

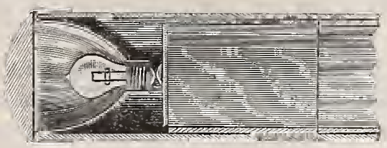
THE ever ready Electric Pocket Flash Light. Carried in the pocket. No oil, no chemicals, no wires, no danger.

No. 1. Size 8½ x 1½ inches. 3½ volt lamp, $3.00 each. Will give 6000 to 8000 lights before the battery requires renewal. Extra battery 30 cents each.

No. 3, size 13 x 1½ inches. 5½ volt lamp, $5.00 each. Will give 6000 to 8000 lights of extra power before renewal. Extra battery 50 cents each.



As carried in the hand or pocket.



Showing a section of the dry battery with the light bulb, bulls eye or lense and interior.

New batteries put in without difficulty, simply removing the cap covering the end of the tube.

By the pressure of a finger (pressing the ring into contact with the nickel band) you have a brilliant search light. The light may be continuous, or repeated flashes. It will cease instantly on removing the pressure.

Carried in the pocket. Placed beneath the pillow. Passing dark stairways, lanes or alleys, or awakened suddenly at night, — instantly — silently — your surroundings are clearly revealed — and any lurking criminal blinded by the flash of your search light. F. W. Braun & Co. sell them.

Hires Root Beer Extract is no longer subject to Stamp Tax, the manufacturers having made a change in the wording of their cartons, under a ruling of Commissioner of Inter. Rev., Nov. 21, 1898.

400 Sutter street, San Francisco, Cal.,
April 14th, 1899.

The regular quarterly meeting of the California State Board of Pharmacy was held at the College of Pharmacy, San Francisco, on the 11th–14th April, 1899, for examinations and other business.

A committee of the Board held a meeting for examinations on the 4th–8th inst., at Los Angeles.

The following were registered as Graduates in Pharmacy :

C. Milne, E. M. Warhanik, C. T. Larkins, W. T. Hinman, C. E. Freitas, D. C. Collins, C. D. Schreiber, C. Overholt.

Certificates of registration as Licentiates were granted to the following candidates :

J. P. Bowman, A. E. Scamell, J. E. Cone, M. T. Harrington, E. H. Coffee, C. D. Evans, T. A. Donlon, W. G. Clute, T. W. Morrish, W. A. Madden, G. J. Redmond, E. Kahler, E. T. Krebs, W. C. Eppenheim, T. C. Peters, L. C. Jacobs, B. Pennington, C. V. Baxter, G. A. McCarty, E. M. Martin, F. C. Rulison, A. E. Teague and J. W. Calder.

B. S. Virden was registered as a Pharmacist.

The following having passed a satisfactory examination were registered as Assistants :

W. R. Laist, T. M. James, J. Estudillo, O. T. Clough, R. S. Petter, R. M. Fernald, J. H. Mallery, E. M. Fowler, O. A. Longley, O. G. Freyermuth, A. B. Jacobs and G. L. Smith.

The next meeting of the Board will be held on Tuesday, July 11th, 1899, at the College of Pharmacy, Parnassus avenue, San Francisco.

John Calvert, Secretary.

Arrest of Hiccough by Depressing the Tongue.

Dr. Louis Kolipinski reports in the Maryland Medical Journal the arrest of persistent hiccough by depressing the tongue, which effect was accidentally discovered. A patient suffering from chronic gastritis was attacked by hiccough, which had persisted for four days before being seen by the author. He complained of the fullness in his throat, a condition which he thought the result of the hiccough. He was directed to sit up, and with a large spoon handle the tongue was pressed down and back with steady force to allow inspection of the fauces. The soft palate was found to be congested and the uvula thickened and elongated. The hiccough recurred twice, and each time the elevation of the soft palate and uvula was noted. Firm pressure on the tongue with the hope of further noting the action of the palatal muscles was continued, when to the author's surprise and the patient's astonishment and joy, the hiccough ceased. Under a dose of morphine and chloral he passed a comfortable night. "An hour after my departure," says the author, "the hiccough returned, but the patient, with great zeal and confidence, placed himself in front of a mirror, passed the spoon handle to the back of the tongue, and with both hands depressed and steadied it. The hiccough at once ceased. In the morning, on awakening, the hiccough again returned, but stopped spontaneously on his getting up and dressing. Two days later it reappeared, but was promptly arrested by the patient himself in the manner described. The time required in each instance to accomplish the desired result was one minute or less."—*Druggists' Circular.*

Note on Syrup of Ferrous Iodide.

BY W. A. DAWSON, HEMPSTEAD, L. I.

Prize Essay.

Much has been written on the subject of keeping syrup of ferrous iodide in dispensable condition, owing to its proneness to decompose by part of the iodine being released.

I have used the U. S. P. formula and have found no difficulty in keeping the syrup in good condition for any reasonable length of time. I usually make sufficient to last several months at a time, and have kept it a year without change. I always choose a sunny day for making this preparation and the whole operation is conducted in direct sunlight. Sometimes when time was of no moment I have omitted the heating at the end of the reaction ; instead, setting the flask containing the iron, iodine and water where the sun would shine on it for a day or two. The syrup so made seemed to keep quite as well as where heat was used. When finished, the syrup was decanted into quart, white flint glass bottles, cork stoppered, and placed on a white shelf that ran across the sunniest window of the laboratory, so that it would get all the sunlight possible.

Dispensing is done from these containers and no precautions are taken about keeping the containers full or securely stoppered. The temperature has varied from 30 to 100 degrees Fahrenheit at different times of the year, so the corks are usually lightly inserted to accommodate these changes. Kept thus in full sunlight the syrup keeps perfectly its characteristic light green color.

Diffused light of any degree decomposes the syrup in a short time. Absolute darkness retards decomposition, but does not prevent it. Colored glass containers do not seem to retard decomposition ; in fact, amber glass seems to hasten it. I have often wondered why some manufacturers send out this syrup in amber glass bottles. Also have I wondered why so many pharmacists will pay manufacturers 60c. a pound or more (12 fluid ounces) for a preparation that is so quickly and easily made as syrup of ferrous iodide. This syrup should be dispensed in white glass bottles bearing a label worded like the one here shown.—*American Druggist.*

CAUTION.

Keep this medicine in a sunny place. If the liquid has turned brown, it should not be taken, as it is then irritating to the stomach. Set the bottle in the sunlight until the liquid turns white. It is then fit for use again.

New and Seasonable.

A new article has just been introduced on the Coast for the extermination of the troublesome ants and flies which, from now on throughout the summer season, infest our homes.

Useful premiums are given free to retailers who handle this article, which pays one hundred per cent profit.

Order *Fly Buttons* from your jobber. See description in our advertising columns. Jobbers supplied through G. L. Noble & Co., 421 Market street, San Francisco.

"Now," said Bunker, "I can once more face the world an honest man. The last of my debts is outlawed."—*Philadelphia North American.*

Business Personals.

Covillaud & Francis, Prescott, are occupying a store in the new post-office building.

Dr. D. J. Brannen, Flagstaff, has returned home from a business trip to Chicago, St. Louis and other eastern points.

H. P. Wightman, Pima, has planned for the erection of a brick business building for his growing drug business.

Mr. H. W. Drenkel, late of Dickinson, N. D., has bought the drug business of W. W. Boswell, corner Hill and Fourth streets.

E. C. Howard, formerly with J. H. Trout of this city and recently with H. Goodman, Phoenix, has accepted a position with Dr. G. H. Keefer.

Laird & Dines, Tempe, have moved into a room opposite their late place of business, and have fitted it up in handsome and attractive style.

Mr. H. Brisley of Prescott is erecting a building of concrete in the burned district of Jerome, which will be occupied by E. F. Tarr, druggist, on its completion.

Mont P. Chubb, who has for some time past been in the employ of the Phoenix Drug Co., has accepted a position in E. S. Wakelin's pharmacy.

Wolf & Chilson, Broadway and Second, are preparing to enlarge their store by adding the adjoining room on Broadway, which will give them greatly increased facilities for handling their large business.

Mr. F. M. Boswell of the Boswell & Noyes Drug Co., started April 26th for an extended eastern trip, during which he will visit the principal cities of the country. He expects to be gone about two months.

Mr. Judd Rounceville, formerly head clerk for the Williams Drug Co., has recently been engaged in developing some promising copper claims near Williams, and his brother, who is recently from Chicago, has taken his position in the store.

Off & Vaughn, Fourth and Spring streets, have incorporated under the name of the Off & Vaughn Drug Company. Under the new arrangement Messrs. Wood, Newlin, Smith and Boswell, old employees of the house, become members of the corporation; a highly commendable plan.

Mr. Frank Jones, of Jones & Son, Ventura, started May 2d for San Francisco to attend the meeting of the Grand Lodge I. O. O. F., to which he is a delegate. Mr. Jones was accompanied by his wife, and will take a somewhat extended outing before returning home.

Morris Johnson, for twenty years a drug clerk in this city, and of late employed by F. C. Rimpau, died on the 10th inst., after a short illness. Mr. Johnson had in the past been in the employ of several of the leading drugstores of Los Angeles, and was connected with some of our prominent Spanish families.

J. T. Crane & Co., Santa Barbara, are making some extensive changes in their store, including a new and modern tiled entrance and deep show windows. Their prescription case will be moved back several feet and the sales room correspondingly lengthened, giving increased and much needed space for the accommodation of their growing business.

Dr. G. H. Keefer, Phoenix, is fitting up an elegant place of business on Washington street near the Bank corner, and but a short distance from his present location. A waiting and toilet-room for ladies, a truss and rubber-room and a handsome balcony with grill-work and nickel silver railing, are among the features of the new store, which is to be one of the most attractive drug establishments in Arizona.

H. C. Hitchcock, Globe, has recently completed a substantial two-story brick business building, the lower floor of which will be occupied by his drug establishment, while the rooms above will be used for offices. The fine fixtures for the new store were supplied by F. W. Braun & Co., and are up to date in style and quality. Mr. William Butler, Ph. G. (California), is manager of the drug business.

Mr. Edwin Virden, Santa Paula, went East April 24th to appear for himself and brother, Ben. S., of Oxnard, in the settling of the estate of a rich uncle, and to receive the inheritance coming to them, amounting to some ten thousand dollars each. Mr. Virden will take the occasion to visit Philadelphia, in which city he commenced his business life, as well as other points of interest on the Atlantic Coast. His trip will occupy about four weeks.

The formal opening of Bristol & Rowley's fine establishment on April 21st and 22d was a notable event in the business history of Santa Ana, and an occasion thoroughly enjoyed by the crowds of citizens who partook of the hospitality of the enterprising firm. Music, flowers, soda-water and ice-cream form a most attractive combination, to the ladies in particular. We renew our congratulations to our friends, the proprietors, and wish them abundant success as the reward of their enterprise.

Our contemporary, the San Francisco and Pacific Druggist, in its April issue, published a sketch, with portrait, of the late Brooke Powell, whose death occurred in San Francisco March 1st. Mr. Powell's long connection with Redington & Co., of which house he was a highly esteemed and talented salesman, brought him into close relations with the drug trade of this coast, and his loss will be felt by them as a personal one. Mr. Powell was for some time established in this city as the local representative of his house.

The establishment of a well equipped analytic and bacteriologic laboratory by the Cutter Pharmacy, Fresno, marks a most progressive step in the development of this drug-house. Mr. E. A. Cutter opened the pharmacy bearing his name one year ago, with the ambition to take position in the front rank of his profession. The recent advanced movement indicates how well he is keeping to his mark, and shows also his desire to forward the investigations in pathological science. The Cutter Analytic and Bacteriologic Laboratory, has, we trust, a successful future before it.

We dropped in at C. Laux Co.'s new store, opposite the City Hall, one day last week, to get a glimpse of what that firm had been doing in the way of bettering itself. We found everybody busy with customers or prescriptions, and with little time for visiting. However, we learned that the move from Spring street had not been detrimental to business, as the new trade coming in equaled that lost by moving, while the future has a much brighter outlook than the old location could claim. The Broadway store is a most attractive place, the very high ceiling, with its handsome decorations, presenting a feature of unusual beauty, while the numerous plate-glass mirrors, the magnificent soda fountain, and the brilliant show-cases fill the eye of the visitor with pleasure. The place creates an impression of hospitality too, homelike, though fine —and the waiting or rest-room is quiet and comfortable for the ladies.

The many years of service to the public spent by the head of the house, Mr. C. Laux, was fairly indicated at the time of our visit by a window full of strings of physicians' prescriptions, representing a part of the 250,000 (nearly) on the files of the store. With the active assistance of Mr. C. F. Dollinger, the popular and genial junior partner, of Mr. W. E. Cates, the head prescription clerk, Mr. Ernst C. Laux, and of all the working force of the store, there is no doubt of the increasing success of this popular house—an establishment in which Los Angeles may well take pride.

OUR ADVERTISERS.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

WANTED.—Salesman visiting the drug trade to introduce a specialty on commission. No one but a hustler need address. C. W. Baldridge, Fallbrook, Cal.

FOR SALE—Drug business in this city ; stock about $500. Dwelling attached, also for sale if desired. M. Armstrong, 2715 Pico street.

FOR TRADE — Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards ; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk ; splendid location ; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean ; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

WANTED—Position by an apprentice in a drug store, have had two years experience and graduate of high school. Can give best of reference. Address Box 285, Escondido, Cal.

At your soda fountain are you using the patent porcelain top acid phosphate bottle? If not, you don't know what you are missing. F. W. Braun & Co. sell them for 25 cents each, which is the manufacturer's price cut in half.

Treatment in Grippe.

The Journal de Medicine of Paris says : "Dr. Dujardin-Beaumetz concluded that influenza has its seat in the gastric organs, and that the preventive and curative treatment consists chiefly in judicious laxative medication. Those who keep the digestive organs in a good aseptic state adopt the best means of escaping the epidemic. For this purpose it is necessary to have recourse to the natural purgative waters, of which Apenta is the type."

Sulphur is now being inquired for, and contracts made for delivery up to July. F. W. Braun & Co. are handling the old reliable Eastern flowers, always satisfactory. Get quotations early.

"Money to patent good ideas may be secured by our aid. Address THE PATENT RECORD, Baltimore, Md."

The dry summer weather suggests the much needed feather duster, which good housekeepers hang outside their doors for the dusty shoes of visitors. The cheapness of dusters makes their sale large. A full line of turkey-feather and ostrich dusters are sold by F. W. Braun & Co.

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

THE announcement of the coming year's work of the California College of Pharmacy will be found in our advertising columns. It needs no labored argument to show the great value of a pharmaceutical college course to the prospective druggist. It is fast coming to the point of "no college no pharmacist" for our young men to consider. Times are different now from the old days, and the pharmacist of the near future is to be, as a matter of course, a man of education and consequent high standing in his community. We are fortunate indeed on this Coast in having a College of Pharmacy of high grade, a department of our great University, where a thorough course may be taken and degrees given under the seal of the University of California, which is no small honor. We trust that no seeker after the higher things in pharmaceutical lore will deem it necessary to leave our own shores to find them. It will be noted that August 15 is the date of opening the work of the college this year, a highly suitable time in the cool climate of San Francisco. Write to W. M. Searby, Dean, 400 Sutter street, San Francisco, for any desired information.

THE framing of a model pharmacy law which shall meet the requirements of the entire country is one of the leading objects to be striven for at the coming meeting of the American Pharmaceutical Association at Put-in-Bay, September 4 to 18. Such a law would greatly facilitate interchangeable certificates of registration between the States, a system desired by many of the profession.

THE starting of a cut-rate business in patent medicines by a general merchandise house in Fresno last month has caused quite a commotion in that lively little city. To nullify the effect of this outbreak against good sense all the druggists entered into an agreement to sell these goods at actual cost until the firm in question had enough of it.

The business men of the city generally are said to join with the druggists in condemning the action of the cut-rate concern. We believe the time is near at hand when the work of the N. A. R. D. is going to make such "breaks" extremely difficult. May the day be hastened.

THE graduating exercises of the College of Pharmacy of the University of California were held at Berkeley, Wednesday, May 17. Following are the names of the graduates:

Milton Auerbach, Mary Elizabeth Christal, John Vincent Craviotto, John Guy Davisson, Francis Marion Duncan, Asa White Gray, George Halloran, Raimondo Jadarola, Malachi William McMenamin, Harry Chrisley Moore, Zadoc J. Riggs, Maurice James Ryan, Urbano Giovanni Spagnoli, Albert Paul Seymour, Abraham Spiro, Charles Augustus Triebel, Frederick Ludwig Volberg, John Morton Waste.

THE Philadelphia College of Pharmacy graduated its 78th class at the time of its commencement exercises April 19, conferring the degree of Doctor in Pharmacy (P. D.) upon 117 candidates; of Pharmaceutical Chemist upon five, and of "Graduate in Pharmacy" upon one. What distinction the college makes between the first and the last named we do not know. It seems evident, however, that "P. D." has taken the place of "Ph. G." in this institution. Among the many graduates of the class of '99 one student, Mr. Milton W. Bamford, of Reading, Pa., received the lion's share of the honors. Mr. Bamford's name was announced by the Dean as having reached the grade of Distinguished. He was the recipient, likewise, of the following substantial prizes, viz:

The Proctor Gold Medal, the Wm. B. Webb Memorial Prize of Gold Medal, and the Operative Pharmacy prize of $20.00 in gold; besides the Alumni Gold Medal for highest general average. Wm. Stair Weakley received the Pharmacognosy prize of $25.00 and the Maisch Histology prize of $20.00. Richard J. Gasslein captured the Remington gold medal for an original device or contrivance useful in practical pharmaceutical work.

Robert G. Shoults took the $25.00 prize for quantitative chemical analysis. Chas. E. R. Smith the Materia Medica prize of $25.00, Christopher Koch, Jr., a Chemistry prize of $25.00 from the American Journal of Pharmacy; Alfred Heineberg the Robinson prize of gold medal for best examination in chemistry, Richard L. Fishburne the prize of a Troemner agate prescription balance, given by Mahlon N. Kline for best examination in theory and practice of Pharmacy.

President Bullock, in his remarks at the faculty reception, stated that a striking feature of this year's examinations was the large percentage that had passed, and the grade of general averages. It had been the most satisfactory examination of years in the high character of results attained. For the first time in some years the Proctor medal had been awarded, the requirement for its award being the grade "very satisfactory" in all branches.

The old college is evidently maintaining its high standards.

We are indebted to the interesting Alumni Report for above data.

California College of Pharmacy Alumni.

The annual meeting of the Alumni Association of the California College of Pharmacy was held on Thursday, May 18th, 1899, at 2 o'clock P. M., in Eldorado Hall, Alcazar Building. At 5 P. M. the meeting adjourned to reconvene at 8 P. M. at Delmonico's and resume consideration of matters of interest to the Association.

The reports of the secretary and treasurer indicated a healthy growth, both financial and numerical.

In his annual address, President Harvey referred particularly to the completion and occupation of the new affiliated College Building of the University of California, which now possesses facilities for instruction equal if not superior to the best schools of pharmacy in the United States.

This successful achievement was in a great measure due to the efforts of the Alumni Association, and of which they as a body may well feel proud.

The removal to the new and commodious quarters necessitated quite an expense, to defray which the Alumni Association voluntarily tendered a theater entertainment at the Tivoli Opera House, for the benefit of the removal and equipment fund of the College.

This effort was energetically assisted by every member, and the entertainment proved a grand success, both financially and socially. The theater was crowded by a large representation of alumni members with their ladies and other well-wishers of the College of Pharmacy.

The wholesale drug-houses and other merchants interested in the drug trade also came forward in their usual liberal manner and contributed to the fund.

The net proceeds enabled the Alumni to present to the College the sum of $500 as a token of esteem of their Alma Mater, with the assurance that if ever the necessity should arise, the helping hand would be willingly extended.

The President recommended as a means of popularizing the Alumni Association, the coöperation with all the other alumnæ of the University of California. To facilitate this, the delegates to the Council of Associated Alumni of the University of California have been instructed to arrange if possible a semi-annual or annual or theatrical entertainment as the most convenient and popular means of assembling and keeping alive the sentiments of good fellowship.

Mr. G. E. Bacon, one of our delegates to the Associated Council of the Alumni of the University of California, announced that an annual prize of $100 would be given by the council for an original essay, open to all members of the Alumni, the subject for the first year to be, a "Remedy for the Prevention of Disease."

He further mentioned that all arrangements for commencement exercises of all departments of the University had been placed in the hands of the Associated Alumni, and the result of this move had proven a grand success, the graduating exercises of the academic and professional colleges were held in Berkerley the same day, May 17th, after which over 700 members of the Associated Alumni attended the annual lunch in the Harmon Gymnasium.

The committee on membership reported favorably on the following graduates, who were then elected to membership:

F. L. Volberg, class '99; Edward O. Webb, Jr., class '98; M. G. Spagnoli, class '99; M. McMenamin, class '99; L. C. Jacobs, class '98; Asa W. Gray, class '99; M. Auerbach, class '99.

The following officers were elected for the ensuing term:

President, Geo. J. Harvey (re-elected); First Vice-President, M. Auerbach; Second Vice-President, H. M. Beck, M. D.; Registrar, J. A. Haderle; Treasurer, L. W. Bahney; Secretary, Emery P. Gates (re-elected).

The Board of Trustees are: J. J. Crowley, Jr., L. W. Bahney, G. E. Bacon, Geo. J. Harvey, E. P. Gates, H. M. Simmons, A. E. Briggs.

After installing the new officers, the meeting adjourned to Delmonico's large banquet hall, where the following menu was served:

MENU.

Covers were laid for seventy-five, the tables being beautifully decorated with flowers. Delightful vocal and instrumental music and recitations were rendered by eminent artists, and the whole programme passed off pleasantly. The following toasts were offered: "Our New Home," responded to by G. E. Bacon, President of the college; "The Alumni Association," by Prof. F. T. Green; "The Faculty," by Prof. W. M. Searby; "Country Members," by A. D. Walsh; "Past President," by Miss Josephine E. Barbat; "Life Members," by C. J. Schurz, M. D.; "Class President," by Z. J. Riggs; "Future Pharmacy," by E. P. Gates.

President Geo. J. Harvey officiated as toastmaster, and acquitted himself in his usual good style. This banquet will always be remembered as one of the most successful given under the auspices of the Alumni.

Corrected Ruling on Witch Hazel.

We have just received notice of a change in the ruling regarding the stamping of Witch Hazel, the Commissioner of Internal Revenue now ruling that the article need be stamped only when sold with label giving directions for use.

In the present issue will be found an advertisement of Soluble Ginger from the laboratory of F. W. Braun & Co.

There are many extracts of ginger upon the market and some of them are mighty poor. It is confidently claimed that for strength, fine flavor and solubility the above preparation has few rivals and no superiors.

Your soda water business needs the finest of flavors. A fine ginger is a trade builder. Give F. W. B. & Co.'s Soluble Ginger a trial and note results.

St. Louis College of Pharmacy.

At the regular meeting of the Board of Trustees of the St. Louis College of Pharmacy, held Tuesday afternoon, May 16, 1899, the following business matters were transacted, which are of importance to the pharmaceutical profession at large, viz., Dr. Otto F. Claus was elected a member of the College.

The following committee was appointed to have the revised Constitution and By-laws printed and distribute the same to every member of the College, namely, J. C. Falk, O. A. Wall and Louis Schurk.

It was also decided to establish an advanced course of laboratory work in microscopy.

Dr. H. M. Whelpley resigned as quiz-master in Pharmacognosy, on account of his time being all required in his microscopical work, he still retaining the chair of Microscopy.

Dr. O. A. Wall, Jr., a bright, energetic young man, was elected as quiz-master in Pharmacognosy.

The faculty, which for years has taught the young minds the mysteries of the drug profession, was re-elected, the same being constituted as following:

Otto A. Wall, Ph. G.,
Professor Pharmacognosy and Botany.

James M. Good, Ph. G.,
Professor of Pharmacy and Dean of Faculty.

Francis Hemm, Ph. G.,
Professor of Practical Pharmacy.

H. M. Whelpley, Ph. G., F.R.M.S.,
Professor oj Microscopy.

Gustavus Hinrichs, A. M., LL.D.,
Professor of Chemistry.

John C. Falk, Ph. G.,
Instructor in Pharmacy.

Wm. K. Ilhardt, Ph. G.,
Demonstrator in Microscopy.

Carl G. Hinrichs, Ph. B., Ph. C.,
Instructor in Chemistry.

Oscar H. Elbrecht, Ph. B.,
Assistant in Microscopy.

Otto A. Wall, Jr., Ph. B.,
Instructor in Pharmacognosy.

The following standing committees were appointed for the ensuing year:

Committee on Hall:

S. Boehm, chairman; Louis Schurk, H. T. Rohlfing.

Committee on Cabinet and Apparatus:

T. F. Hagenow, chairman; Wm. C. Bolm, H. W. Scheffer.

Committee on Library:

Wm. C. Bolm, chairman; E. P. Walsh, Prof. G. Hinrichs.

Committee on Publication:

Prof. J. M. Good, chairman; J. C. Falk, T. F. Hagenow.

Auditing Committee:

H. F. A. Spilker, chairman; Thos. Layton, Louis Schurk.

Committee on Course if Study:

Thos. Layton, chairman; H. T. Rohlfing, T. F. Hagenow.

Committee on Examination:

THEORETICAL PHARMACY:

E. P. Walsh, J. C. Falk, L. A. Leitz, Dr. O. F. Claus.

PRACTICAL PHARMACY:

S. Boehm, Wm. C. Bolm, Henry Fischer, Ambrose Mueller.

THEORETICAL CHEMISTRY:

H. W. Scheffer, H. F. A. Spilker, J. Fahlen, Paul M. Wake.

PRACTICAL CHEMISTRY:

Thos. Layton, J. E. Koch, H. W. Scheffer, Dr. Enno Sanders.

THEORETICAL PHARMACOGNOSY:

H. T. Rohlfing, T. F. Hagenow, Thos. A. Buckland, Dr. O. A. Wall, Jr.

PRACTICAL PHARMACOGNOSY:

J. C. Falk, Louis Schurk, F. L. Whelpley, Wm. K. Ilhardt.

"Vin Mariani" is essentially the brain and nerve tonic of of those who have talent and genius. These it is who compose the great army of intellectual workers, and the ravages made upon their nervous systems by the demands made upon them are at times truly appalling. This damage and consequent drain yield to nothing more quickly than to "Vin Mariani." The most noted European physicians, litterateurs, musicians, singers, artists and diplomats have sent the most flattering letters to M. Mariani extolling his product. Not only these but crowned heads as well have been mentally invigorated and rejuvenated by "Vin Mariani" and never tire of speaking words in its praise. It must be acknowledged that unsolicited testimonials, couched in such glowing terms, from such sources, are the best evidence possible that can be offered for the merits of the preparation. When "Vin Mariani" becomes as well known in this country as it is in Europe, it will be adopted as one of the indispensable remedies in the household.—*The St. Louis Medical and Surgical Journal*, May, 1899.

Hanford, Cal., May 8, 1899.

Fly Button Co.,

Gentlemen: Please find enclosed three (3) coupons for which please send me the Ink Bottle, as stated thereon. We are selling the Fly Button, and must say it is one of the best sellers we have ever handled, and will sell a great deal during the season.

Yours truly,
J. W. Birkbeck.

ANOTHER CASTORIA VICTORY.

Eslinger Convicted in Criminal Court. He Must Pay a Heavy Fine or Go to Jail for Imitating Castoria Label.

Samuel W. Eslinger, who was recently enjoined in the United States Court by Judge Adams from imitating the packages of The Centaur Company, such as are used on its Castoria, was today arraigned before Judge Hirzel in the Court of Criminal Correction and tried under the Missouri statute which makes it a criminal offense to imitate the trade-marked label of another. Lfter hearing all the evidence, Eslinger was found guilty and sentenced to pay a fine of $250, and if the fine be not paid four months in jail. The Centaur Company have been litigating extensively for the past three years in an effort to protect its Castoria against imitations, in the civil courts. Mr. Charles H. Fletcher, President of The Centaur Company, has decided to change the policy of his company, and hereafter to institute proceedings in the criminal courts against those who pirate or sell an imitation of his Castoria. The case heard in St. Louis today is the first of several that will be fought on these grounds. Heretofore The Centaur Company has contented itself with securing injunctions and other civil proceedings, but the effect of stopping imitations was not obtained, hence the change to the policy of instituting proceedings under the criminal code. Eslinger did not make a duplicate of the Castoria wrapper, but the Court held, however, that the imitation was sufficient to deceive, and so he was found guilty and fined. Judges Seddon and Harvey represented The Centaur Company.—*St. Louis* (Mo.) *Republic*, May 16, 1899.

Examination Questions—Oregon State Board of Pharmacy

CHEMISTRY—JUNIOR.

1. (a) Outline the process for generating oxygen from Chlorate of Potash. (b) Give symbol, atomic weight, and mention its properties.

2. Mention the source of nitrogen ; how may it be obtained, giving the proportion in air ; also symbol and atomic weight.

3. Of the following elements mention those which are of a gaseous, liquid or solid state, giving symbol of each :

Lead, Mercury, Sulphur, Aluminum.
Copper, Bromine, Carbon, Potassium.
Nitrogen, Chlorine, Phosphorus, Silver.

4. Mention the difference between Chloride and Chlorate of Potassium, with symbols of each.

5. What is the difference between a mixture and a chemical compound? Give illustration of each.

6. Give chemical name and uses of the following : (a) Epsom Salts ; (b) Glauber Salt ; (c) Cream of Tartar ; (d) Chlorate of Potash ; (e) Sal Soda.

7. Describe sublimation, and how it differs from distillation, giving example of three substances obtained by sublimation.

8. Bichloride of Mercury : Give its chemical formula, properties, dose and antidote.

9. Describe the action of Dilute Sulphuric Acid on Bicarbonate of Soda.

10. Mention two official preparations in which Metallic Mercury enters with percentage of quicksilver in each.

TOXICOLOGY—JUNIOR.

1. Name six of the most common poisons and dose.
2. What is the active principle of Jaborandi ?
3. Name the official preparations of Opium and their strengths.
4. State the adult dose of (a) fluid extract of Aconite ; (b) Corrosive Sublimate ; (c) Tincture Nux Vomica.
5. Give dose and official name of Fowler's solution.
6. Give antidotes for Morphine, Opium, Strychine and Belladonna.
7. Give percentage of Opium in Paregoric. Dose.
8. What is a poison ? An antidote ?
9. What is meant (a) by a maximum dose ? (b) by a minimum dose ?
10. Give an example of an irritant poison ; of a narcotic poison.

MATERIA MEDICA—JUNIOR.

1. Define Materia Medica.

2. What is meant by the terms habitat, natural order, indigenous, fructus, folia, radix ?

3. What precautions must be observed in gathering, drying and preserving a drug to insure its highest efficiency ?

4. What degrees of fineness for powdered drugs does the U. S. P. mention ? State number of meshes to the linear inch for each powder.

5. Give safe maximum dose of the following powdered drugs : Aconite root, Belladonna root, Nux Vomica, Digitalis.

6. From what drugs are the following alkaloids obtained : Strychnine, Veratria, Narcotina, Brucia, Codeia ?

7. Give common name for Althea Officinalis, Citrus Vulgaris, Sanguinaria Canadensis, Barosma Betulina.

8. What part of the following drugs are used : Cannabis Indica, Capsicum, Cardamon, Spigelia, Ergot ?

9. Senna—Mention part of plant used, different varieties, habitat, properties and official preparations.

10. Belladonna—Give habitat and properties. What alkaloid does it contain ? Give dose of alkaloid. To what other poison is it a physiological antidote ?

PHARMACY—JUNIOR.

1. What is the official strength of Dilute Acids, U. S. P.? How would you make Acid. Phosphoricum Dil. U. S. P., from Acid Phosphoricum, 85 per cent. ?

2. What is the Latin name of Paregoric ? Of Dover's powder ? Give formula for their manufacture.

3. What is a tincture ? A spirit ? A fluid extract ? State difference between them and describe process for their manufacture.

4. What is the Latin name of lard, lanoline, suet, cold cream, musk, ox gall, cod liver oil, white wax, sugar of milk, spermaceti ?

5. What is the official name of Seidlitz powder ? Give formula and mode of preparation.

6. What is ebullition, vaporization, distillation, sublimation, desiccation, spontaneous evaporation ?

7. What is meant by trituration ? Describe the process.

8. What are syrups ? Give two or more methods of manufacture, and name several official ones.

9. What is Pepsin ? How is it prepared, and how many preparations official ?

10. What is your idea of an ideal pharmacy ?

CHEMISTRY—SENIOR.

1. Define (a) element ; (b) atom ; (c) molecule ; (d) mixtures ; (e) chemical compound.

2. (a) How is chemical force distinguished from other forces ? (b) Describe combustion.

3. (a) What is meant by specific gravity ? (b) How would you take the specific gravity of a liquid ? (c) Give the specific gravity of Glycerin ; (d) Ether.

4. Give a test for (a) Bichloride of Mercury ; (b) Calomel ; (c) Nitrate of Silver ; (d) Sulphate of Morphia.

5. Mention the source of Bromine and Iodine, describing appearance of each, their uses, and give the antidote for Iodine.

6. Give the chemical names and uses of the following : (a) Blue Vitriol ; (b) Oil of Vitriol ; (c) Common Salt ; (d) Plaster Paris ; (e) Cream of Tartar ; (f) Tartar Emetic ; (g) Salt Petre ; (h) White Vitriol.

7. Define analysis, dialysis, synthesis.

8. (a) How would you detect Morphine from Quinine ? (b) Corrosive Sublimate from Calomel ?

9. (a) What is the source of cyanogen ? (b) How much cyanogen does Dilute Hydrocyanic Acid contain ? (c) Give doses and antidote.

10. How may Chlorine be prepared, mentioning its properties, also official preparation ?

TOXICOLOGY—SENIOR.

1. What is the percentage of Strychnine in Citrate of Iron and Strychnina ? What would be the proper dose ?

2. Give Latin name for Foxglove. Name its official preparations and doses of same.

3. (a) What is a poison ? (b) What is a counter-poison ? (c) What is an antidote ? (d) Explain the difference between a chemical and a physiological antidote. Give an example of each.

4. (a) What is the respective opium strength of Laudanum and Paregoric ? (b) The percentage of absolute Hydrocyanic Acid in the official dilute Hydrocyanic Acid ?

5. (a) What would you do if you were called to a case of poisoning supposed to be caused by Arsenic ? (b) By Strychnine ; (c) Corrosive Sublimate ?

6. (a) How is Chloral made ? (b) What are its toxic effects ? (c) What is the best treatment of poisoning by it ?

7. (a) Give antidotes for Caustic Potash or Soda. (b) Sulphuric or Muriatic Acid.

8. Name some ready method of distinguishing between Quinia Sulphate and Morphia Sulphate.

9. What powerful emetic is made from morphine and what is its dose ?

10. Give source and dose of the following : Codeine, Pilocarpine, Physostigmine, Santonine, Cocaine.

MATERIA MEDICA—SENIOR.

1. Name six official barks, giving official and common names.

2. Give official name, habitat, and properties of the following roots : Belladonna, Sarsaparilla, Aconite, Dandelion, Ipecac.

3. Wild Cherry—Mention official name, part used and where found. What principles does it contain ? Why is it desirable to use very little heat in its preparation ? What acid is formed on moistening it and allowing it to stand ?

4. What is Ergot ? From what source obtained ? Mention properties and doses of official preparation.

5. Give definition of an alkaloid ; a glucoside ; an oleoresin, with examples of each.

6. Buchu—Mention official name, habitat, part used, official preparations and doses. To the presence of what principles is its activity due ?

7. From what plants are the following obtained: Iodine, Tannin, Tartaric Acid, Pilocarpin, Hydrocyanic Acid?

8. Give common name of Fel Bovis, Gossypium Purificatum, Humulus, Haematoxylon, Krameria, Mel Despumatum, Sapo Mollis, Sassafras Medulla.

9. Name three each, Narcotic, Diaphoretic, Cathartic, and Emmenagogue drugs, with doses.

10. Rhubarb—General habitat, official preparation and doses. What two antagonistic medical properties does it possess that make it valuable?

PHARMACY—SENIOR.

1. What are Oleoresins? Give a general formula for their preparation.

2. Citrine Ointment—Give Latin officinal name. State formula and how prepared. Should the mixture be stirred while effervescing? Why?

3. What is the meaning of "official"; of "officinal"?

4. Describe the following: Ignition, fusion, calcination, deflagration, carbonization, torrefaction, incineration, sublimation.

5. Chloroform—How is it made? How can it be made by acting on Chloral Hydrate? Name one of the U. S. P. tests. Describe its odor, taste, smell. Is it inflammable?

6. Volatile Oils—What are they, and whence are they obtained What is the color of most of them when pure? What is their most characteristic feature? How do they differ from fixed oils?

7. Alkaloids—What are they? Where are they found? What element do they all contain? Describe their usual form, color, and solubility.

8. Suppose you have a 4, 6, 12, 15 per cent. solution of Cocaine, and you wish to make a 10 per cent. solution therefrom, how much of each solution must be used?

9. What is dialysis? What are crystalloids? What are colloids? Give an example of each. What is the most convenient substance to use for a dialysing medium.

10. Write the following in Latin:

Subnitrate of bismuth........................drs. 2.
Paregoric.. .... dr. 1.
Chalk mixture.
Distilled water of each q. s. ad............ oz. 4.

Mix and direct a teaspoonful every four hours.

Notes to Members of the National Association of Retail Druggists.

BULLETIN No. 3.

Office of the Secretary,
Chicago, May 10, 1899.

The Executive Committee officially announces that Cincinnati, Ohio, has been selected as the place, and Tuesday, Wednesday, Thursday and Friday, October 3rd, 4th, 5th and 6th, 1899, the time, for holding the first annual convention of the National Association of Retail Druggists.

The attention of associations is directed to the following extract from the Constitution: "Article III, Sec. 2. Each State and local association shall be entitled to one delegate for each one hundred active members or fraction of one hundred members. Such delegates shall be actively engaged in the retail drug business"; also to the first By-law, "Each delegate shall be entitled to a vote upon all questions coming before the association for consideration, when present in person or by alternate, and delegates present are empowered to cast the full vote of their delegate representation."

The Executive Committee urges upon all organizations the necessity of selecting as delegates thoroughly representative men. The questions to be discussed at the approaching convention are momentous and the decisions reached will exert a powerful influence for good or ill upon the whole future of the retail drug trade of our country.

Notice.

The following new laws were passed by the last Legislature of the State of California, to which your attention is called:

[Approved March 9, 1899.]

The People of the State of California, represented in Senate and Assembly do enact as follows:

854¾. Every person who shall willfully deface, erase, obliterate, cover up or otherwise remove, destroy, or conceal the duly filed trade-mark, or name of another, printed, branded, stamped, engraved, etched, blown, impressed, or otherwise attached to, or produced upon any cask, keg, bottle, vessel, siphon, can, case, or other package, for the purpose of selling or trafficking in such cask, keg, bottle, vessel, siphon, can, case, or other package, or refilling such cask, keg, bottle, vessel, siphon, can, case, or other package, with intent to defraud the owner thereof, without the consent of the owner, or unless the same shall have been purchased from the owner, is guilty of a misdemeanor.

[Approved March 14, 1899.]

354½. Every person who willfully sells, or traffics in any cask, keg, bottle, vessel, siphon, can, case, or other package bearing the duly filed trade-mark or name of another, printed, branded, stamped, engraved, etched, blown, or otherwise attached or produced thereon, or refills any such cask, keg, bottle, vessel, siphon, can, case, or other package, with intent to defraud the owner thereof, without the consent of the owner thereof, or unless the same shall have been purchased from the owner thereof, is guilty of a misdemeanor.

The dry summer weather suggests the much needed feather duster, which good housekeepers hang outside their doors for the dusty shoes of visitors. The cheapness of dusters makes their sale large. A full line of turkey-feather and ostrich dusters are sold by F. W. Braun and Co.

He Just Couldn't.

Doctor (to Gilbert, aged four)—Put your tongue out, dear.

Little Gilbert protruded the tip of his tongue.

Doctor—No, no; put it right out.

The little fellow shook his head weakly and the tears gathered in his eyes. "I can't, doctor, its fastened on to me."

When a good insect powder is desired you will find it under the brand "T. B." A six-pound can of it costs $2.40. Small cans for retailing are sold at $1.25 a doz., ½ lbs. $3.25, 1 lbs. $5.50 doz., by F. W. Braun & Co.

St. Louis College of Pharmacy.

The annual meeting of the St. Louis College of Pharmacy was held on Monday, April 24th, 1899, at its hall, No. 2108 Locust street.

The president, H. F. A. Spilker, called the meeting to order with a larger attendance than there has been for a number of years.

The various reports of the officers were read and approved.

The treasurer's report was highly gratifying, as it showed that the institution is in a first-class financial condition.

An amendment to the constitution was adopted, creating a new degree, viz., the degree of Pharmaceutical Chemist or Ph. C., showing that the institution is always keeping abreast with the tide of progress.

The election of officers was then held with the following result, viz.:

President, H. F. A. Spilker; Vice-President, Theodore F. Hagenow; Treasurer, Solomon Boehm; Recording Secretary, Dr. J. C. Falk; Corresponding Secretary, William C. Bolm; Board of Trustees, members for two years, Chas. Gietner, H. W. Scheffer, Louis Schurk; the members of the Board of Trustees holding over being Thomas Layton, E. P. Walsh and Henry T. Rohlfing.

Immediately after the meeting adjourned, the Board of Trustees held a meeting, and elected Mr. Charles Gietner as its chairman for the ensuing year, the gentleman having held this position for several years past and rendering good services.

It was decided that the prospectus for the college should be issued at an early day, and in accordance the following committee on publication was appointed, with full power to act, viz., Prof. James M. Good, Dr. J. C. Falk and Theodore F. Hagenow,

---

The word "bronchitis", according to Dr. Samuel Gee, was invented in 1814 by Dr. Charles Badham, F. R. C. P. L. It superseded the old phrase, "pulmonary catarrh."—*Chemist and Druggist.*

Aunty Cameo and Utica Canine.

The junior clerk had just filled a written order for "ten cents Aunty Cameo tablets for teetake" without hesitation and without cracking a smile.

He was smilling in the mirror and wondering why Providence had endowed him with so much wisdom and beauty, when someone's servant came in for "a bottle of Utica Canine."

The clerk looked dazed. In the language of the ring, the servant "had him going." "Um—ah—yes," he stammered, while his memory galloped over the ten thousand articles in stock, looking for the substance to fit the words without avail.

"Is it for a dog?" he cautiously asked.

"Sure it's for no dog at all; it's some red sthuff the boss rubs on his head to kape his hair from lavin' him."

The clerk reached for a bottle of Eau de Quinine and wrapped it up. There was a far-away look in his eyes as though he were thinking something about pride going before a fall—*American Druggist.*

Merz Santal Capsules have been placed in stock by F. W. Braun & Co., and will doubtless receive favorable attention from the trade, as their low price ($3.00 per doz.) permits a large profit to the retailer. Include some with your next order.

The special offer sent out this month by the druggists' sundries department of F. W. Braun & Co. covers a large line of corkscrews. These are summer goods, or at least are in largest demand in summer, and it will pay you to make a selection at the special discount.

Odor as a Symptom of Disease.

J. H. McCassy says that most diseases have characteristic odors, and by the exercise of the sense of smell they could be used in differential diagnosis. For example, favus has a mousey smell; rheumatism has a copious, sour-smelling, acid sweat. A person affected with pyæmia has a sweet, nauseating breath. The rank, unbearable odor of pus from the middle ear tells the tale of decay of osseous tissue. In scurvy the odor is putrid; in chronic peritonitis, musky; in syphilis, sweet; in scrofula, like stale beer; in intermittent fever, like fresh-baked brown bread; in fevers, ammoniacal, etc.—*American Druggist.*

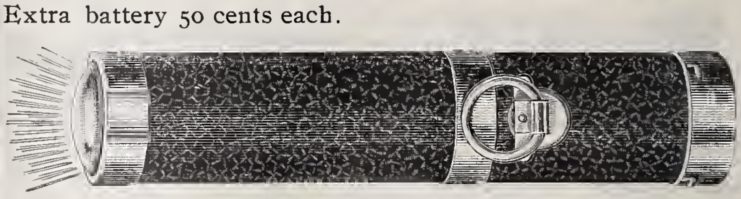
The Western Wholesale Drug Association, at a recent meeting in St. Louis, passed a resolution requiring their members to restrict sales of proprietary articles to legitimate retailers, and to refuse to sell to department stores and aggressive price-cutters.—Says Meyer Bros.' Druggist.

Pocket Flash Light.

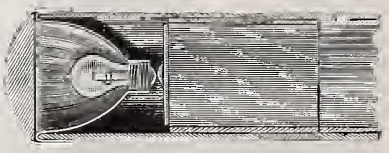
THE ever ready Electric Pocket Flash Light. Carried in the pocket. No oil, no chemicals, no wires, no danger.

No. 1. Size 8½ x 1½ inches. 3½ volt lamp, $3.00 each. Will give 6000 to 8000 lights before the battery requires renewal. Extra battery 30 cents each.

No. 3. Size 13 x 1½ inches. 5½ volt lamp, $5.00 each. Will give 6000 to 8000 lights of extra power before renewal. Extra battery 50 cents each.



As carried in the hand or pocket.



Showing a section of the dry battery with the light bulb, bull's-eye or lense and interior.

New batteries put in without difficulty, simply removing the cap covering the end of the tube.

By the pressure of a finger (pressing the ring into contact with the nickel band) you have a brilliant search light. The light may be continuous or repeated flashes. It will cease instantly on removing the pressure.

Carried in the pocket. Placed beneath the pillow. Passing dark stairways, lanes or alleys, or awakened suddenly at night—instantly—silently—your surroundings are clearly revealed—and any lurking criminal blinded by the flash of your search light. F. W. Braun & Co. sell them.

A neat 4-oz. spirit lamp of copper, with cap of same material, is now supplied for 35 cents by F. W. Braun & Co. This is greatly superior to the glass lamp in durability.

N. A. R. D. Notes.

A prominent western jobber writing to the national secretary says: "In regard to the bad conditions here, it seems to me the whole thing can be handled by the retailers themselves if they only thought so. If they will organize a strong local association they can exert an influence on the jobbers which will be practically irresistible. It is mighty hard to save people unless they are willing to make a stromg effort to save themselves." This is the position taken by the executive committee of the N. A. R. D. Not only the moral support of retailers, but vigorous efforts put forth by themselves is necessary to the inauguration of reforms and the maintenance of satisfactory conditions after they have been secured. The wisdom of this course in more than one instance has been conclusively proven.

The National Executive Committee is glad to find that its suggestion to local associations that they send delegates to their several State conventions is being almost universally adopted. The workings of the plan are most satisfactory and the committee takes this opportunity to urge upon all local bodies the importance of its adoption. Wherever practicable an official member of the National Association, or someone who participated in the organization convention, will attend the several State meetings; but members of the N. A. R. D. should not wait for this additional help in the work of placing prominently before the members of State organizations the salutary efforts of coöperation for mutual advantage with the national body.

The Oklahoma Pharmaceutical Association at its recent meeting adopted a resolution indorsing the National Association of Retail Druggists and authorizing its treasurer to remit the dues of its membership. Considering the fact that there is very little price cutting in the State this action is all the more grateful to the officers of the N. A. R. D., who appreciate the unselfishness which prompts the Oklahoma brethren to do what lies in their power to alleviate the financial troubles of the drug trade in other parts of the country.

A representative of a manufacturing house who travels through the States of Kentuckey and Tennessee writes thus to the national secretary: "Being closely associated with the drug trade I am very much interested in the N. A. R. D., and I believe a solution of the cut-rate business has been reached. I want to scatter the glad tidings over my territory and try to induce every man to become a member. I feel satisfied that I can get 75% of the trade I call upon interested within the next 90 days. I would like for you to send me ten copies each of the proceedings and the bulletins, as well as instruct me how to proceed to take in members." The letter was accompanied by the names and addresses of several zealous workers in local and State associations who had given expression to their interest in the doings of the national body.

The Louisiana Pharmaceutical Association at its meeting held at New Orleans May 16 and 17 adopted a resolution heartily indorsing the National Association of Retail Druggists, and directing its secretary to make application on behalf of the organization for membership.

The demand for literature pertaining to the N. A. R. D. has never been as large as within the last few weeks. The National Executive Committee consider this a strong indication of increasing interest in the organization's work, and are encouraged accordingly. Members of the association in a position to use printed matter to advantage should write to the national secretary at once. Such matter as is required will be furnished free of expense in any desired quantity.

Tending to Politics.

BY T. E. MC GRATH.

I found the druggist reading a newspaper and apparently considerably excited. A county ticket had been nominated the day before, and it turned out that he did not favor some of the candidates, although of his party. Notwithstanding I was a stranger he began talking local politics to me, and was going it strong when a colored man came in.

"Now, then, what do you want?" demanded the druggist.

"Quinine, sah—ten cents' wuth."

The druggist went back to the counter to put it up, still talking politics, and the longer he talked the madder he got. I did not pay strict attention to what he was doing, but after the negro was gone it struck me that a mistake had been made.

"Did that man ask for quinine?" I asked.

"I believe he did, and what on earth could have possessed that convention to nominate such a man as Sam Jones for sheriff! I——"

"Are you sure you gave him quinine?"

"Why, I presume I did. I'll see that ticket in —— before I'll support it."

"My friend," I persisted, "I believe you gave that man morphine. Isn't that the label on the bottle?"

"Didn't he ask for morphine?"

"No."

"Well, he's got some, confound him! Here—where'd he go."

He ran to the door and called, "Sam! Sam!" and presently the colored man returned.

"Sam, what did you ask for?"

"Quinine, sah."

"Well, I guess I gave you morphine. Hand it over, and I'll exchange it. The idea of putting up Sam Raines when there was such good timber. I'll bolt the whole ticket from top to bottom!"

He made the exchange in such a cool, matter-of-fact way that after the customer had departed I said:

"That was a narrow escape for some one, eh?"

"Yes; might have killed a nigger. And I'll let that crowd know that they can't stuff no such nominations down me. It's an outrage, and one which must be rebuked at the polls as it deserves."—*Amer. Drug.*

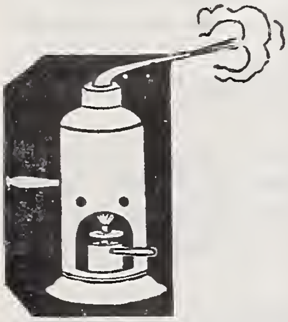
For a refreshing addition to the bath there is nothing nicer than Braun's Florida Water. It is unquestionably one of the choicest of toilet preparations, and has superseded in many localities the higher priced but nowise better Florida waters. Braun's is sold at $3.75 per doz. in full size and $1.75 for small. Consult your interest and push the profitable article.

A Big Story; or, a Small Spelling Book.

When an abscess in a patient's groin was opened recently in a London hospital, the abscess was found to contain a small spelling-book. It was ascertained that this patient, when a boy, was shot, and it was supposed that the spelling-book was in his trousers pocket, and was shot into the groin.—*Medical Press and Circular.*

Unless your arrangements are particularly convenient for making your soda syrups you will find considerable advantage as well as saving of time and trouble in buying Rock Candy Syrup, which is perfect in quality and costs but 65c. per gallon in bbls. or 67 cents in half bbls. F. W. Braun & Co. recently landed a carload of it and solicit orders for same.

Simplex Vapor Lamp.



Medicated Inhaler and Steam Formalin Sterlizer. For La Grippe, Asthma, Croup, Diphtheria, Neuralgia, Hay Fever, Pneumonia, Catarrh, Ear, Eye, Nose, Throat, etc. Use Formalin in the boiler (40 per cent of Formaldehyde) for disinfecting and fumigating. The Sterilizer is of nickel plate, ornamental, durable, highly finished, simple, useful and cheap. Also adapted for heating and cooking. This inhaler was employed by Mr. Rudyard Kipling throughout his recent severe illness and during his convalesence from Pneumonia. Pennyroyal on the cotton in the dome will rid a house of moths, flies and mosquitos in one half hour's time.

Sold by F. W. Braun & Co.,
Los Angeles, Cal.

A gallon jug of F. W. Braun & Co.'s Acid Phosphate, which costs but $1.00, is a good purchase to make at the beginning of the soda water season.

Business Personals.

W. C. Hamlin has accepted a position with E. E. Hamilton, Corona.

R. J. McClure, Whittier, has just added a fine white onyx soda fountain to his attractive establishment.

Denton E. Hull, late with Heath & Morrison, Riverside, has accepted a position with Gillis & Spoor, Redlands.

The Abbey Pharmacy, Redlands, has recently been brightened up by a new linoleum floor covering.

Mr. Linne T. Ellis, recently with E. E. Hamilton, Corona, has accepted a position with H. Fairbanks & Son, Santa Ana.

We regret to note the death, June 5th, of J. G. Madden, Covina, who has for several years carried on a drug business in that town.

Mr. T. H. Jones, Ventura, goes this month to Colorado to take charge of some mining operations in which he is interested.

Vogel & Co. have bought Mrs. Williamson's stock, Boyle Heights, the old Jno. Harris store, and will divide it up among their stores.

Heath & Morrison, Riverside, are doing a fairly good business in golf supplies, both members of the firm taking a personal interest in the game and being expert players.

Mr. C H. Rowley, Santa Barbara, had the misfortune, May 24, to drive a large sliver into the ball of his foot, causing him much pain, as well as inconvenience.

Mr. C. C. Newman, Santa Barbara, reports a favorable yield from his oil wells in Summerland. This source of revenue is "like money from home."

J. H. McKie, Visalia, accompanied by Mrs McKie, started May 20th, on a trip to their former home, Ione, and will visit San Francisco before returning.

W. D. Rosenberger, Ontario, has gone East for a somewhat extended visit to his old home, Philadelphia. During his absence Mr. Taber will be the efficient manager of the business.

Mr. W. A. Trueblood, who for the past eight months has been manager of the National Pharmacy at Sixteenth street and Grand avenue, has accepted a position with the Ellington Drug Co.

W. M. Bramhall, San Bernardino, has just received from the manufacturers an elegant onyx fountain, all in white with tracery of gold, which will add much to the attractions of his fine store.

Mr. S. Caldwell, Pomona, has been quite ill during a portion of last month, but we are glad to hear is now able to be out again. Mr. Caldwell is one of the pioneer druggists of Southern California.

Mr. Geo. L. Robbins, of Pierce & Robbins, Porterville, is taking a much needed vacation of a month or two. During his absence Mr. Lloyd Simmons, head clerk of the firm's Pomona house, takes charge of the business.

Mr. W. G. Lutz's branch store at Kern City is now located in the new brick block on the corner opposite the S. P. depot, the most prominent position in the city. The store is fitted up in modern style and is a credit to the judgment and good taste of the proprietor. Mr. J. F. Davis is the capable manager of this branch.

Towne & Lamb, San Bernardino, have been making a fine window display of late, showing pharmaceutical operations in actual progress, greatly interesting the public, who, by the way, are always eager to see things actually working. A new musical device recently put in also furnishes agreeable entertainment for their visitors.

White & Bailey, San Bernardino, have a drawing card in Mr. E. E. McGibbon, whose facile use of the Spanish and Indian languages brings many from the near-by tribes to make purchases and hold converse with him. Mr. McGibbon in years past was the leading dealer in rare Indian baskets in this section of country, and became well acquainted with the native artists in this line of goods.

Otto G. Freyermuth, is spending the interim between his College of Pharmacy terms in serving the firm of Pierce & Robbins, Pomona, filling the place of Mr. Simmons, who is temporarily in Porterville

Wilson & Jackson, Long Beach, are about moving into their new brick building, a few doors from their old location, and will put in a handsome onyx fountain and new fixtures. It will make a very attractive store, corresponding with the many improvements made in their city the present season.

The J. T. Baker Drug Co., Hanford, is contemplating a move into new quarters, as soon as the new building for their use is ready. Mr. Howland, manager, is planning to have the finest establishment of the kind in Central California, all of which we hope to see and "make a note on."

One of the most effective window displays we have seen for a long time was that of Violé and Lopizich, early last month. It consisted of a "battery" of eight large glass percolators, the center pair of two-gallon size, which were flanked by one gallon and half-gallon sizes, and the entire series connected by rubber tubing with an immense bottle placed under the middle of the row. The percolators were charged with the components of the firm's preparation of sarsaparilla, each being labeled with the common name of the drug, while the big receiver had upon it the name of the completed preparation. The occasional renewals of the menstruum and the constant dropping of the percolate were sources of much interest to passers-by, who had also an opportunity to see the material in dry form displayed in heaps in the windows, as well as the wrappers and cartons pertaining to the finished product. We imagine this to have largely increased the sales of the preparation as well as inspiring confidence in the firm's pharmaceutical proficiency and skill.

Since the removal of our old friend J. J. Lasch into his new store, the purchasing public of Tulare have reason to take pride in the fact that they now have one of the largest and most complete pharmacies in the San Joaquin Valley from which to obtain their supplies. Doctor Lasch has for many years conducted his establishment on the principle of supplying every demand for goods in his line, and the completeness of his stock was always a surprise to the traveling man. Now, in his much larger room he is able to make an adequate display of his abundant stock. The new store is about 27 by 90 feet in size, the back part containing a nice office, a sleeping-room and a work and storage-room. The store proper is fitted up with an abundance of fine show cases, three of the dozen or more being the new glass-to-the-floor style, all packed with the endless variety of sundries found in the first-class drug store, among which a big stock of fine perfumes and toilet accessories are prominent. Eight or more large double burners furnish a brilliant light.

The genial proprietor's efforts to give Tulare the advantages of a complete and up-to-date pharmacy are evidently appreciated by the public, who also keenly enjoy the trenchant political criticisms from his lips, charged as they are with facts gathered from his wide experience and unfailing memory. Long may the hospitable doctor continue to extend his warm greetings to his many friends.

San Diego Personals.

Mr. A. M. Ferris is now having a good time in the back country.

Mr. T. J. Fisher, of the Coronado Pharmacy, is making an extended stay at his mine.

Mr. L. E. Corbin is now keeping Bachelor's Hall, Mrs. Corbin having gone East for the summer.

P. C. Caroway has returned from the North and is assisting Mr. Hooker at Chase's Pharmacy.

C. Woulf and family left for Cincinnati on the 11th inst., where they will make their home.

Mr. C. A. Chase left on the 12th for a trip to Alpine and Descanso, taking a much needed rest.

Mr. E. Meyer, of Strahlmann & Co., is taking a three weeks' vacation looking over San Francisco.

Mr. C. I. Ferris has returned from "The San Roque Placers," and while he did not bring back a very heavy sack of gold, reports a pleasant trip and a good time.

FIRE AT NEEDLES.

Drug Store and Its Owner Severely Burned.

NEEDLES, May 24—The drug store of Dr. Francis J. Kelley was destroyed by fire about 10 o'clock tonight. Kelley, who was alone in the store, upset a lamp, and the building was quickly in flames. A valuable stock of jewelry, diamonds and drugs which was destroyed, was partially insured. Nothing was saved except the safe and its contents. Dr. Kelley emerged from the store with his clothing afire.

Above associated press dispatch appeared in the Los Angeles Times of May 25, since which date Dr. Kelly was removed to a hospital in this city where he died from his injuries Saturday, June 3. His remains were taken to Brooklyn, N. Y., for burial.

The deceased was one of the most active, genial and popular of the business men of Needles, where he had been established during nearly the entire life of the town, and his untimely loss will be deeply deplored by his many friends.

STURTEVANT'S

(Trade Mark.)

Poultry Foods
AND

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

WANTED.—Salesman visiting the drug trade to introduce a specialty on commission. No one but a hustler need address. C. W. Baldridge, Fallbrook, Cal.

FOR SALE—Drug business in this city ; stock about $500. Dwelling attached, also for sale if desired. M. Armstrong, 2715 Pico street.

FOR TRADE—Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards ; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk ; splendid location ; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt ; 10 miles from ocean ; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE—Stock and fixtures for a small drugstore. Inquire of Viole & Lopizich, 427 North Main st., Los Angeles.

WANTED—Position by a first-class watchmaker, jeweler and engraver. Am also a registered pharmacist. Address Box 208, Sander, Wyo.

FOR SALE—The only Drug Store in a new growing factory town. No store nearer than 8 miles. Good farming country. Can be bought for $600. Write to Phillips & Smith, Santa Ana, Cal.

At your soda fountain are you using the patent porcelain top acid phosphate bottle? If not, you don't know what you are missing. F. W. Braun & Co. sell them for 25 cents each, which is the manufacturer's price cut in half.

MONEY To PATENT Good Ideas
may be secured by
our aid. Address,
THE PATENT RECORD,
Baltimore, Md.

F. W. Braun & Co.'s Fruit Juices and Crushed Fruits are sold at notably low prices, and have a reputation for quality that is unsurpassed. These products are made under their own roof from the fruit when perfectly ripe and in the best condition. It would be difficult to make a stronger statement regarding their quality, unless indeed their increasing sale year by year furnishes the ground. You make no mistake when you order Braun's.

"Dearest", asked the confiding girl, after her usual manner, "am I really your first and only love?"

"No, darling", said the young druggist, "but you are something just as good."—*Indianapolis Journal.*

PRICE LIST OF DRUGS, CHEMICALS, ETC.

These prices are for quantities as ordinarily bought by average buyers, and include containers, unless otherwise indicated. Subject to market changes.

For special quantities we will make special figures.

F. W. BRAUN & CO., Los Angeles, Cal.

The official organ of the Los Angeles County Pharmaceutical Association.

THE Drug Clerks' Shorter Hours Bill, which labor agitators, headed by Edward Thimme, succeeded in getting passed by the Legislature of the State of New York, has been squelched by Governor Roosevelt's veto, after a careful examination of the situation. The drug trade—proprietors and clerks alike—of New York city vigorously protested against the assumptions of the self-constituted champions of the abused and down-trodden (?) pill rollers, proposing to do their own agitating for reforms when such are needed, and not to be made to pose as proteges of the working men's organizations of their city or State. The veto of Gov. Roosevelt seems to us to be wise and proper, for the effect of the law in question upon the drug clerks would have been to reduce their wages with but slight compensating advantages, while the plea of danger to the lives of the community through mistakes of overworked prescription clerks is specious and unwarranted by facts.

There is no doubt in our minds, however, that the effect of the hard fight over the bill has been to bring the question of reducing the present long hours of drug service prominently before those immediately interested, and that some reasonable adjustment will be made, satisfying alike to the employers and their employees, and that without calling in any walking delegates.

HEROIN, the new hypnotic, is morphine diacetic acid ester. One centigram is a suitable dose for allaying cough in an adult.

THE Proprietary Association of America met, June 8th, in New York city, and, as was expected, devoted a good deal of attention to the wishes or demands of the National Association of Retail Druggists, regarding the supplying of goods to cutters and department stores. The following resolution, which was offered by Dr. R. V Pierce, was passed without a dissenting vote, although the wording of the resolution was declared by Messrs. M. N. Kline and H. M. Sharp, of Philadelphia, to be such as could not be carried out in practice:

"Resolved, At a meeting of the Proprietary Association in New York city, June 8, 1899, that the members of this association are in full sympathy, and are ready to co-operate, with the National Association of Retail Druggists to stop the cutting evil, and require the jobber to confine his sales to the legitimate channels of trade, refusing all orders from department stores and aggressive cutters; and, farther suggest as one means for accomplishing this end, that the N. A. R. D. require retailers to abstain from substitution for standard proprietary articles."

This resolution was amended upon the motion of Mr. Alfred E. Rose, of the firm of J. C. Ayer & Co., by the addition of the following:

"And that we require the National Association of Retail Druggists to notify the manufacturer of any jobber who violates his contract in this respect, with a view to removing him from the recognized list of jobbers."

The resolution as amended was adopted by unanimous vote.

THE National Association of Retail Druggists are to be congratulated upon the recognition their efforts have received at the hands of the Proprietary Association, in so far at least as resolutions go; although it may be a long distance from an accomplishment of their desires. We note that Mr. H. L. Kramer of Cascaret fame is the newly elected 2d Vice-President of the Proprietary Association, and argue from that fact, knowing his untiring energy and his hearty sympathy with the objects of the Retail Association, that the coming year will show a marked improvement in the situation. The plan inaugurated in the conduct of Mr. Kramer's own business appears to be working well and effectually shuts off cutting on his goods. Possibly we may yet see most of the leading "patents" sold on a similar plan, the net result in profits amply repaying the druggist for the trouble of collecting his coupons or rebates. Meanwhile, stand by the N. A. R. D. in its worthy work.

A PATENT has been taken out in Germany for a process of incorporating formaldehyde with plaster paris, for surgical bandages and the like, the antiseptic effect of the formaldehyde being developed gradually by the heat of the body.

LIQUID hydrogen was shown and handed round for inspection at a lecture by Professor Dewar, June 7th, before the Royal Institution of London. This was the first occasion, says the *Era*, that the substance has been seen outside the laboratory. The meeting of the Society was the celebration of its centenary. A number of noted scientists from abroad were made honorary members of the Institution, America being honored by the election of Professors John S. Ames (Baltimore); Geo. F. Barker (Philadelphia); Carl Barus (Providence); S. P. Langley (Washington); Albert A. Michelson (Chicago); Robert H. Thurston (Ithaca); and W. L. Wilson (Washington). The Prince of Wales "did the honors" by presenting the diplomas with his own hand to the several recipients with most cordial words expressing his satisfaction in the function. The Prince can do a thing of that kind, charmingly. Besides the Americans, seventeen European savants received like recognition.

THE warm weather so long delayed is now doing a little in the way of helping the soda-water trade as well as sending the boys out for summer vacations. Los Angeles doesn't suffer much, however, from climatic changes. It is rarely too warm for woolen garments, and nights are almost invariably cool. The National Educational Association, who have turned out by many thousands to visit our city this month will doubtless disseminate on their return home much valuable information regarding the comfort and healthfulness of our summer climate. We, of Southern California, are bound to encourage this branch of education.

THE *Era* of June 8th contains a statement from a correspondent that a carload of extracts of vanilla and lemon were sold to the United States government recently and is going from Boston via San Francisco to Manila for the use of our troops.

As delicacies of this kind are not included in soldiers' rations we judge the shipment to be for the use of our hospitals, and the incident indicates the paternal care exercised by the government over our sick and wounded soldiers.

The Successful Man.

The late Sir Andrew Clark, in addressing his students on one occasion, said he presumed those present would like to know from him what conditions he thought were essential to make a man successful. Here are the opinions he expressed on this point: "Firstly, I believe that every man's success is within himself, and must come out of himself. No, true, abiding, and just success can come to any man in any other way. Secondly, a man must be seriously in earnest. He must act with singleness of heart and purpose; he must do with all his might and with all his concentration of thought the one thing at one time which he is called upon to do. And if some of my young friends should say here, 'I cannot do that—I cannot love work,' then I answer that there is a certain remedy, and it is work. Work in spite of yourself, and make the habit of work, and when the habit is formed it will be transfigured into the love of work; and at last you will not only abhor idleness, but you will have happiness out of the work which then you are constrained from love to do. Thirdly, the man must be charitable, not censorious—self-effacing, not self-seeking; and he must try at once to think and do the best for his rivals and antagonists that can be done. Fourthly, the man must believe that labor is life, that successful labor, with high aims and just objects, will bring to him the fullest, truest, and happiest life that can be lived upon the earth."—*Manitoba Lancet.*

On Distilled Water.

The last of the series of pharmaceutical meetings of the Philadelphia College of Pharmacy for 1898–99 was held Tuesday, May 16, with Wm. J. Jenks, second vice-president of the college, in the chair.

Otto de Kieffer was the first speaker on the program, and read a paper on

"DISTILLED WATER AND ITS USES,"

which contained a number of useful and pertinent suggestions. Mr. de Kieffer showed how unfit any but distilled water is for pharmaceutical uses, by considering the various sources of supply and the contaminations which are likely to be found in the water of each class. He also showed that sedimentation and filtration, as now carried on, are inadequate to remove mineral matter held in solution, nor in a great many cases will they remove the bacteria; on the contrary, the number of bacteria is increased by some of the processes in use, the filtering medium acting as an incubator.

WHY WATER FOR PHARMACEUTICAL USE SHOULD BE DISTILLED.

The author said that to him it seemed incomprehensible that the Pharmacopœia should specify distilled water for some preparations and not for all. He said in regard to the syrups that they look much better and keep much better when made with distilled water than with the water ordinarily in use. He also spoke of the variability in appearance in prescriptions compounded in different parts of the country on account of the variability of the mineral constituents in water in different localities. For these and similar reasons the author therefore recommended the use of distilled water for all pharmaceutical purposes, and its complete adoption in the next revision of the Pharmacopœia as being along the line of progress, and a step which would reflect credit on the druggist himself.

TO REMOVE ORGANIC IMPURITIES.

For getting rid of organic matter entirely the writer recommended adding a small quantity of potassium permanganate to distilled water and then redistilling it, care being taken to throw away the first and last portions. According to his experience block tin is the best material for building distillatory apparatus. In purchasing distilled water he recommended the application of the pharmacopœial tests, as some of the product sold contains considerable quantities of iron. In conclusion, the speaker referred to the fact that distilled water is coming more and more into use, as for instance in surgical practice, and in this connection he also referred to its use in the U. S. Navy, and to a statement by Surgeon-General Tryon in regard to the improvement in health which has followed its introduction. —*Amer. Drug.*

The nuisance of ants is especially noticeable this month when the new broods are appearing. ANTILENE is the accepted remedy, apparently, and its sales are large. Read the advertisement in our columns, this issue.

Why Pharmacy Laws Are Needed.

Dr. Geo. C. Diekman, a member of the New York City Board of Pharmacy, at a recent meeting of the German Apothecaries' Association, gave the following and other examples of replies to board questions received from applicants for examination and registration. (We copy from D.-Amer.-Ap. Ztg.)

PHARMACY.

Q.—How is Emplastrum Plumbi prepared?

A.—(1.) A board is made and an outline of size of plaster is marked on paper, strips of paper are use to make the plaster of uniform size. The lead is boiled in a vessel until it becomes liquefied, and this is poured on the paper space which has been outlined, then smoothen with a spatsiler, then cut out with a knife or scissors. (2.) Made by melting the ingredience in a suitable vessel until it commences to smoke, stirring with a wooden pestle and cooling and solidifying. (3.) Lead with wax yellow is heated, and lard ad to it. (4.) Carbonate of Lead, resin and fat are respectfully melted and mixt and worded to homogeneous mass under water. (5.) Lead oxide is on a water bath heated with Wax and Vaseline, thoroughly mixed and cooled of. (6.) You spread resin plaster on musline and coat with lead acetate.

Q.—Name six solvents that are employed in the manufacture of pharmacopœial preparations.

A.—Parke, Davis & Co., Schieffelin & Co., McKesson & Robbins, Klein & Co., Eimer & Amend, Lehn & Fink.

Q.—What are the chief components of Plummer's Pills?

A.— (1.) Plums. (2.) Plummers pills contain lead which is known to the trade as solder, they have nothing to do with pharmacy, being employed only by plummers (plumbers).

Q.—What is James' Powder?

A.—(1.) James' powder is a patent preparation made by Dr. James and contains as medicine Jamestown weed. (2.) James powder is Wine of Antimony.

Q.—What is the difference between infusions and decoctions?

A.—(1.) One is used internally and the other externally. (2.) One is a vegetable and one is a mineral. (3.) One is made by cooking and the other by boiling.

Q.—How is citrine ointment prepared?

A.—Mix citric Acid and Vaseline.

Q.—What is the difference between chemically pure and so-called Carboy Acids?

A.—Chemically pure acids are made by Kalbfleisch and Carboy acids are made by distilling carboys.

Q.—How is absolute alcohol obtained?

A.—(1.) By specifying it from your dealer, who must be reliable. (2.) It must absolutely do no harm when taken in the body.

CHEMISTRY.

Q.—Define the terms proto, pyro.

A.—Proto means more than it should be sufficient, Pyro means less than it ought to be as before.

Q.—What happens when lime water and Calomel are mixed?

A.—Blue pill is fast formed, but it gets black after awhile and then it gets a poison.

Q.—What is the composition of air?

A.—Oxygen and Hydrogen.

Q.—Give chemical name and source of CaC_2.

A.—(1.) (Calcium carbide.) CaC_2 should be CaO_2. CaC_2 never did exist and never could exist. I have never heard of it and there is no such thing. (2.) Calcium carbid, found in mines in South Carolina where it is removed by mining.

Q.—Name some reducing agents.

A.—Aconite in very large Doses, Antipyrin in capsules, Pheneacetine given per rectum, Anti fat, Phytolaccin.

Q.—How is pure silver obtained?

A.—Mix quick silver with lime, fuse it and the quick will go over to the lime and form quick lime and pure silver is left behind.

Q.—What is meant by the temporary hardness of water?

A.—When it is frozen.

MISCELLANEOUS.

Q.—Name three of the most important drugs used for destroying cutaneous parasites, mentioning any special points connected with the use of each.

A.—(1.) Strophantus deprived of its long point, known as its awn. (2.) Ink, because it contains tannic acid and is good for ring-worm. (3.) Oil of penny royal, which is particularly good for South American mosquitos. (4.) Castor Oil is given to remove all the proteids from the body before giving the worm seed. (5.) Carbolic acid acidifies germs, blow them up and then kills them. Sulphuric acid acidifies germs burns things by combiston and finally eats them up. Alkalies alkalinize germs and then they die.

Q.—How and from where is pepsin obtained?

A.—From the inside of a hogs bowels, by tying the hogs mouth shut, and holding some appetizing food in front of it. when the pesin will ooze out.

Q.—How does the pancreatic juice reach the intestines?

A.—Through a pipe which starts from the pancreas & perforates the diaphragm and the liver, and then gets back into the place it started from and is joined to the bowel by a flap joint.

Q.—Where are nut galls found?

A.—(1.) They are excresences on the gall and gall bladder of stout people who eat much and dont do enough work. (2.) Nut galls are made by a bug which climbs up an oak tree, and deposits its young ones under the bark of the tree.

Q.—From where is Opium obtained?

A.—(1.) It is grown on biennial and perenial herbs and shrubs in China and Japan. (2.) Opium is encapsulated in a ball and is found on trees in China, Chinese raise opium like American raise buskwheat and beans.

Q.—What is the difference between cow and human milk?

A.—(1.) One comes from a cow and the other from a mother, the father never has been known to have any milk. (2.) Human milk comes from a human woman, sometimes a mother does'nt have enough milk, then Mellins food is good, or sometimes she has too much milk and then one of Seabury & Johnson Belladonna plaster placed on the right side is good. Cows milk comes from a cow and cows never have any trouble with their milk.

Q.—What is the office of the saliva.

A.—The mouth. Office hours not stated.—*Era.*

Missouri Pharmaceutical Association.

The twenty-first annual meeting was held in the State capital Jefferson City, June 6, 7, 8, with two hundred delegates and visitors registering.

President T. A. Moseley's address discussed membership, N. A. R. D. legislation, national formulary, metric system, A. Ph. A., pharmaceutical literature, and the sale of poisons.

The Treasurer reported $163.60 on hand, with a total membership of 473.

Exhbits were made by eight firms and individual pharmacists.

The National Formulary Committee recommended several additions and changes in formulas.

U. S. Pharmacopœia Committee made a careful report suggesting changes, and urging Missouri retail druggists to discuss the revision work.

The following new members were elected: Miss Virginia Tisdale, Sweet Springs; Jas. L. Wright, Jefferson City; Roy Walker, Windsor; Martin L. Eckert, Joplin; Glen V. Waggoner, Browington; A. C. Smith, Carrollton; W. S. Morgan, Lawson; G. A. Le Deis, Cedar City; G. A. Fischer, Jefferson City; F. W. Bredemeyer, Jefferson City; Cash Blackburn, Jefferson City; C. M. T. Klie, St. Louis; N. W. Bonham, Jefferson City; Theo. G. Herman, St. Louis; Hosier Keeney, Breckenridge; J. W. Figgins, J. A. Hummel, W. B. Kerns, Bunceton; W. H. Lamont, St. Louis; J. Syd McNair, Sitka, Alaska; Mr. Niemeyer, St. Louis.

The Board of Pharmacy reported that 221 persons had been examined, of whom 101 were registered.

Prof. Francis Hemm's paper entitled, "Does the Attorney-General Understand the Situation?" was based on the action of the Attorney-General in bringing suit against the St. Louis and Kansas City Associations under the anti-trust law. The paper was received with applause, and a committee appointed to present it to Attorney General Crow.

A resolution was adopted disapproving of a paper read at the Missouri Medical Association in which the author recommended the use of proprietary preparations in the Army as almost a necessity of modern civilization and modern civilized warfare.

The M. Ph. A. decided to join the N. A. R. D. and pay its assessment.

New officers were elected as follows:

President, H. M. Pettit, Carrollton.
First Vice-President, Paul L. Hess, Kansas City.
Second Vice-President, Chas. Gietner, St. Louis.
Third Vice-President, Fredericka de Wyl, Jefferson City.
Treasurer, Wm. Mittelbach, Booneville.
Permanent Secretary, H. M. Whelpley, St. Louis.
Assistant Secretary, Ambrose Mueller, Webster Groves.
Local Secretary, A. T. Fleischmann, Sedalia.
Council: Eugene Soper, St. Joseph; J. M. Love, Kansas City; A. Brandenberger, Jefferson City; H. F. A. Spilker, St. Louis; T. A. Moseley, Harrisonville.

Pertle Springs (Warrensburg), June 12 to 15, 1900, is the place and date of the next meeting.

The following is a list of the papers read and prizes awarded:

1. How to Secure the Family Trade in Spices, etc., Wm. Mittlebach.

Awarded—½ doz. lacquered display cans, each filled with 5-lbs. Pure Food Spices. Presented by Meyer Bros. Drug Co.

2. How to Secure the Family Trade in Spices, etc., G. H. J. Andreas.

Awarded—Notes on Pharmacognosy by Wall. Presented by Dr. O. A. Wall.

3. A Chemical Pharmacist or the Pharmacist's Chemicals, by J. F. Llewellyn.

Awarded—Hinrich's General Chemistry. Presented by Dr. G. H. Chas Kli.

4. Investigation of two samples of Glucose, by C. M. T. Klie.

Awarded—$25.00 worth of Merck's chemicals by Merck & Co., New York city, for the best scientific paper.

5. Commercial Pharmacy, by O. F. C. Bausch, St. Louis.

Awarded—$10 in gold by Moffitt-West Drug Co., St. Louis, for best paper on the subject.

6. How to Make a Drug Store Pay Best, by Wm. Mittelbach, Boonville.

Awarded—Ivory Hat Brush. Presented by Fuerborn Notion Co.

7. Women in Pharmacy, by Fredericka de Wyl.

Awarded—One-pound bottle extract white rose. Presented by Griffith & Co.

8. Financial Points for a Retail Druggist, by Otto F. Klaus.

Awarded—$5.00 in gold. Presented by St. Louis College of Pharmacy Alumni Association.

9. Does it Pay the Pharmacist to Make Compressed Tablets? by Ambrose Mueller.

Awarded—One bottle (fine cut glass), with perfume worth $5.00. Presented by Evans-Smith Drug Co.

10. The following papers were not in competition for prizes:

Does our Attorney-General Understand the Situation? By Francis Hemm, St. Louis.

11. Report on the Metric System in 280,000 prescriptions? By H. M. Whelpley, St. Louis.

12. A few suggestions to our Pharmacopœial Committee, by Francis Hemm, St. Louis.

13. The Retail Druggist and the Coming Revision of the Pharmacopœia, by Gustavus D. Hinrichs, St. Louis.

14. The Prescription Scale and Quantitative Chemical Work of the Druggist, by Carl G. Hinrichs, St. Louis.

15. Retrospective Index to the Contributions to the M. Ph. A. to date, by Ambrose Mueller, Webster Groves.

16. The Physiology of the Stomach, by H. M. Whelpley, St. Louis.

The entertainment feature of the meetings was discussed at length, and the entertainment committee informed that the M. Ph. A. members would be satisfied with less expensive entertainment in the future.

A vote of thanks was extended to the Missouri Pharmaceutical Travelers' Association and the organization invited to meet with the M. Ph. A. next year.

The chairmen of the committees were named as follows:

Membership and Attendance, Otto F. Claus, St. Louis.
Papers and Queries, Francis Hemm, St. Louis.
Legislation, A. T. Fleischmann, Sedalia.
National Formulary, ——— ———.
Entertainment, A. Brandenberger, Jefferson City.

Trade Interests, Eugene Soper, St. Joseph.
Pharmacopœia, Wm. Mittelbach, Boonville.
Exhibits, W. M. Federmann, Kansas City.
Deceased Members, F. R. Scharlach, Moberly.
Drug Adulterations, C. M. T. Klie, St. Louis.
Transportation, Geo. R. Parsons, Kansas City.
H. M. Whelpley, Secretary.

Planten's old Standard Capsules maintain the good reputation they gained more than a half century ago. They have attained a wider sale, probably, than any goods of like character ever put on the market. You can always find a line of Planten's manufactures at F. W. Braun & Co.'s.

U. S. P. Revision.

In accordance with instructions given by resolutions passed at the National Convention for Revision of the Pharmacopœia of the United States of America, held in Washington, A. D. 1890, I hereby give notice that a general convention for the revision of the Pharmacopœia of the United States of America will be held in the City of Washington, D. C., beginning on the first Wednesday in May, 1900. It is requested that the several bodies represented in the convention of 1880 and 1890, and also such other incorporated State medical and pharmaceutical associations, and incorporated colleges of medicine and pharmacy, as shall have been in continuous operation for at least five years immediately preceding this notice, shall each elect delegates, not exceeding three in number; and that the Surgeon-General of the Army, the Surgeon-General of the Navy, and the Surgeon-General of the Marine Hospital Service shall appoint, each, not exceeding three medical officers to attend the aforesaid convention.

It is desired that the several medical and pharmaceutical bodies, and the medical departments of the Army, Navy and Marine Hospital Service shall transmit to me the names and residences of their respective delegates, so soon as said delegates shall have been appointed, so that a list of the delegates to the convention may be published in accordance with the resolutions passed at the 1890 Convention for the Revision of the Pharmacopœia, in the newspapers and medical journals in the month of March, 1900.

Finally it is further requested that the several medical and pharmaceutical bodies concerned, as well as the Medical Departments of the Army, Navy and Marine Hospital Service, shall submit the present pharmacopœia to a careful revision, and that their delegates shall transmit the result of their labors to Dr. Frederick A. Castle, 51 West Fifty-eighth street, New York city, Secretary of the Committee of Revision and Publication of the U. S. Pharmacopœia, at least three months before May 2, 1900, the date fixed for the meeting of the convention.—H. C. Wood, M. D., President of the National Convention for Revising the U. S. Pharmacopœia, held at Washington, D. C., A. D., 1890. University of Pennsylvania, Philadelphia, May 1, 1899.

An item of decided interest is the new Health Cigar, which is being widely introduced, particularly in Europe, and concerning which F. W. Braun & Co. are mailing folders to the trade. The claim is made that the nicotine in the tobacco leaf is neutralized (not removed) by a process discovered by Prof. Hugo Gerold, of Germany, and that without changing the flavor of the tobacco, smokers may safely enjoy their cigars without danger of any nicotine effects. All druggists handling cigars will of course be eager to give the Health Cigar a trial, for if the claims that are made for it are justified by the facts a very large demand is sure to arise. The price is $50 per thousand, in boxes of 100. Send in a trial order.

The National Association of Retail Druggists.

Office of the Secretary, 943 W. Madison St., Chicago,
July 7, 1899.

To Proprietary Medicine Manufacturers:

I am instructed by the executive committee of our association to direct your attention to the following communications received from wholesale drug houses in Chicago:

"Thos. V. Wooten, Esq., Secy. N. A. R. D., City: Dear Sir, We notice the 'Proprietor's Association,' at a meeting in New York on June 8th, adopted a resolution expressing their sympathy with the efforts being made by the National Association of Retail Druggists to stop the 'cutting evil.' We desire to convey to the National Association of Retail Druggists, through you, an expression of our full sympathy with the spirit of that 'resolution.' This 'evil' can only be remedied by the combined and harmonious action of proprietors, jobbers and retailers Yours very truly,

"(Signed) Fuller & Fuller Co.,
"June 23, 1899. J. Walker Scofield, Sec."

"Dear Sir: It gives us pleasure to state that we will be pleased and happy to assist in preventing goods getting into the hands of cutters, and we agree to abide by the resolutions passed by the Drug Association recently, and in every way in our power assist in maintaining the rights of the retail drug trade. Respectfully,

"June 28, 1899. (Signed) Robert Stevenson & Co."

"Dear Sir: Yours enclosing Bulletin No. 4, dated June 20th, addressed to the members of the National Association of Retail Druggists, received, and in reply would say we sincerely wish you success in your efforts to restore and eliminate cutting of prices from the retail drug business. We would gladly welcome a return to old time conditions, as we believe cutting of prices not only injures the retailers, but the jobbers and manufacturers, for reasons that are well understood by parties interested. Again assuring you of our best wishes for your success, we are yours very sincerely,

"(Signed) Humiston, Keeling & Co.,
"June 27, 1899. By F. Keeling, Treas."

"Dear Sir: Supplementing conversation the other day with your good self and Dr. Dyche, we but wish to confirm same by giving you our assurance that it shall be our pleasure to coöperate with you toward maintaining the new resolution as recently recommended at the meeting of the Proprietary Association. Wishing you continuous success, we remain, yours truly,

"June 30, 1899. (Signed) Peter Van Schaack & Sons."

"Dear Sir: Referring to the resolution adopted at a meeting of the Proprietary Association of America, held in New York city June 8th, 1899, we write to say that we are in full sympathy with the efforts of your association to confine the sale of proprietary goods to the proper channels, and the purposes of the resolutions referred to therefore have our approval. Yours truly,

"June 28, 1899. (Signed) Morrison, Plummer & Co."

As a result of conversations and correspondence with the jobbing drug trade the committee is convinced the sentiments herein expressed are held in common by nearly, if not quite, all the wholesale drug houses of the country; that they reflect the sober judgment of the better class of wholesale druggists everywhere there seems not the slightest reason to doubt. Very truly yours,

Thos. V. Wooten, Secretary.

Among the seasonable goods having a ready and increasing sale, there are none of better repute than Prof. I. Hubert's Malvina preparations—Cream and Lotion and Ichthyol Soap. No drug stock is complete without them, and their use is in the highest degree satisfactory. Supplied by F. W. Braun & Co.

Sudden Drowning.

During the warm season, news items like the following are almost daily met with: "Mr. ——, an expert swimmer, was seized with cramps while bathing, and without outcry or struggle sank and was drowned before his friends could reach him."

"This," says Dr. T. A. Smurr, in the Medical Brief, "is a fatal, hoary-headed professional pathological blunder, which we have taught and are still teaching the people, and which makes us guilty of thousands of deaths annually."

He thus explains his position: "The normal heat of the blood is about 98°. As it rises above this, we rapidly approach the danger line. In summer the temperature of our lakes and streams rarely goes above 70°, while in sun exposure it often runs up to 110 or 120°. Your expert swimmer has his blood heated by exercise to a temperature above normal It is driven from the very extensive capillary circulation of the skin, as it is shown by the shriveled, pale appearance of the skin of any one long in the water. The vessels of the brain and head are relaxed by the intense heat of the sun and invite the tidal wave of dangerously overheated blood driven from the skin circulation. With what result? An absolute stagnation of the cerebral circulation, and death by sun or heat apoplexy. No warning, no muscular cramp, no outcry for help, no struggle—the victim just sinks like a plummet, rarely coming again to the surface, and is found where he sank, every muscle relaxed, the face calm and composed as if asleep, the skin of the body shriveled and pale, the neck, head and face livid.

"Teach this to the people and they will promptly recognize the great risk which no amount of good health or other favorable conditions can in any way lessen, and will see to it that the present rate of accidental drowning is soon reduced by 50 or 75 per cent."

Dr. D. Jayne & Son's standard medicines are among those proprietary remedies most favorably known to the general public and whose sales are constant. The almanacs issued every year by this house are eagerly sought and carefully preserved in thousands of households. By their assistance mothers wean their babies in the proper Zodiacal sign, farmers figure out the approaching storm and the changes of the moon, while the Jews keep track of their various feasts and holidays. No wonder Jayne's preparation are popular.

Dickey's Creme de Lis is owned by E. B. Harrington & Co. of this city, and their advertisement in this journal will be noted by the trade. The reputation of this toilet preparation is so well established that comment upon it seems entirely unnecessary. It is particularly in demand upon this coast, where its virtues are best known. F. W. Braun & Co. sell it.

LOST HIS SUIT.

A Jury Decides That Joseph P. Cowan Was Not Libeled.

In Common Pleas Court No. 3 a verdict for the defendants was returned in the case of Joseph P. Cowan against Hiram Walker & Sons, to recover damages for alleged libels. Cowan is a saloonkeeper at 6027 Penn-ave., and the defendants are Canadian distillers. The plaintiff alleged that the defendants exhibited large posters in which it was stated that he was selling a liquor purporting to be what it was not. The defense undertook to convince the jury that what they had set forth in the posters was true.

By reference to our advertising columns it will be seen that F. W. Braun & Co. are handling Gray's Pure Malt, and that it is a profitable brand of bottled whisky for the druggist to carry in stock, as it may be retailed at $1 with a good margin of profit. Add a case as a trial order with your next list.

It was an Irishman who said that, "There are so many perils between the cradle and the grave, that it is a wonder that a man ever gets from one to the other."

IN THE CIRCUIT COURT
OF THE
UNITED STATES.

In and for the Ninth Circuit, Northern District of California.

CALIFORNIA FIG SYRUP CO.,
Complainant,
vs.
CLINTON E. WORDEN & COMPANY, a Corporation, J. A. BRIGHT, T. F. BACON, E. LITTLE, C. J. SCHMELZ and LUCIUS LITTLE,
Respondents.

Injunction Made Permanent June 5, 1899.

Order for Injunction, Pendente Lite.

It is thereupon ordered, adjudged and decreed, that the injunction and restraining order heretofore made herein be continued until final decree herein, and to that end that an injunction be issued as prayed for in the bill of complaint herein, strictly commanding and enjoining the defendants, Clinton E. Worden & Company, a corporation, J. A. Bright, T. F. Bacon, E. Little, C. J. Schmelz and Lucius Little, and each and all of them, their and each and all of their agents, employees, workmen, servants, attorneys and counselors, from making, using or selling any liquid laxative medicine, marked with the name "Syrup of Figs," or "Fig Syrup," or any colorable imitation of the same; from making, using or selling any laxative medicine put up in boxes, wrappers or cartons, having on the same the name "Syrup of Figs," or "Fig Syrup," or any colorable imitation of the same; from making, using or selling any liquid laxative medicine put up in boxes, wrappers or cartons, so as to be like the cartons, wrappers or boxes used by complainant in connection with the liquid laxative medicine made by it, or so as to be a colorable imitation of the cartons marked Exhibit A, and filed in this case, being a carton, box or wrapper used by complainant for its liquid laxative medicine, marked and named "Syrup of Figs," or "Fig Syrup"; from making, using or selling any box, wrapper or carton as a wrapper or case for a liquid laxative medicine, bearing upon it the figure of a branch of a fig tree with leaves and fruit, and surrounded by the words in a circle "San Francisco Syrup of Figs Company, San Francisco, Cal.," or any similar words or figures, or any colorable imitation of such a symbol or mark, or from making use of, in any way, in connection with a liquid laxative medicine the name "Syrup of Figs Co.," or from using any name whereof the words "Fig Syrup Co.," or "Syrup of Figs Co.," form a part as a business name of a company, or concern, or corporation engaged in the business of making and selling a laxative medicine.

Not an Antidote to Paris Green.

From time to time we see various antidotes for this common poison. As a rule, however, people are slow to report failures in antidotal treatment. One that has recently come to our notice is of such a nature that we trust it will never be repeated. A young lady in Newark, N. J., took Paris green with suicidal intent. Her parents were believers in Christian Science, and as such secured the services of a healer to act as an antidote to the poison. The girl died, however, and our readers should place Christian Science treatment on the list of tried and found faulty antidotes for Paris green poisoning.—*M. B. Druggist.*

N. A. R. D. Notes.

The druggists of Nashua, N. H., have an organization, composed of most of their number, that has been doing effective work for several years. Writing to the national secretary the treasurer of the association says, "Our association voted at their last meeting to join the N. A. R. D., and I enclose a check for the membership fee of said association. We are not troubled with cutters and get good prices. We are in sympathy with the National Association, and hope that others in our State will join us. We realize that we can get no benefit in this city from the N. A. R. D., as we ourselves make prices and live up to them; but we do not know how soon a cutter with yellow wings may alight in our peaceful valley and we shall get another taste of the 57 cent business. By banding together we know that we may be able to help our brethren of some other city, and we believe in the N. A. R. D. fully."

The druggists of Norfolk, Va., encouraged by the action of the Proprietary Association at their recent convention, are considering the advisability of joining the N. A. R. D. Price cutting in Norfolk is so universal and so disastrous that they are casting about with much concern for some means of relief.

The druggists of San Francisco are greatly interested in the plans of the N. A. R. D. This city, as much as any other in the country, has suffered from the cut-rate evil. The local association on account of the general demoralization and hopelessness that has taken possession of the trade, long since ceased to be effective. A new organization to affiliate with the N. A. R. D. is one of the probabilities of the immediate future.

A novel proposition has been received by the officers of the N. A. R. D. from a Southern city. The writer says that the advent of a cutter in his city was followed by general price slaughtering, the organization of druggists going to pieces within a short time. Having noticed that the National Association was restoring prices in some localities and emboldened by the recent action of the Proprietary Association, this druggist writes that if the N. A. R. D. will cut off the supplies of the trade demoralizers in his city and force them to do business properly, the druggists there will re-organize and pay their dues to the national treasurer. It is hardly necessary to say the proposition was declined with thanks. If the retail drug trade of a given community expects the national executive committee, unassisted, to remedy their bad condition, when they themselves have done nothing toward the accomplishment of the task, they richly deserve the disappointment they have invited.

The demand for the constitution and by-laws recently issued by the association has been unexpectedly large, but several thousand copies still remain in the national secretary's hands. These will be sent free of expense to retail druggists in any quantity desired.

F. W. Braun & Co.'s special offer for July comprises assortments of hair brushes ranging in retail value from .25 to $2, and which are clearly described in the special offer circular. These offers are well known to be genuine, and no "fake." Those of the trade who have not taken advantage of the "special" for this month will be wise to do so while it is open.

Coyle's Egyptian Salve and Egyptian Pile Remedy are medicines of which highly favorable reports are made. They are being introduced in many towns and a good wholesale demand is springing up. See advertisement in our current issue.

A New Solution for Nasal Cleansing.

Dr. Murray McFarlane, of Toronto, Canada, writes to the Medical Council that for cleansing the throat and nose he employs the following tablet with much benefit :

Sodium chloride	80 grs.
Sodium sulphate	22 grs.
Sodium phosphate	4 grs.
Potassium chloride	6 grs.
Potassium sulphate	4 grs.
Potassium phosphate	5 grs.
Menthol	18 grs.

Make one tablet.

One to be added to four tablespoonsful of lukewarm water, used in an atomizer as desired.

New Turpentine Liniment.

Turpentine	4 drs.
Wool fat	2 drs.
Water	14 drs.

Mix the wool fat with an equal weight of turpentine, and gradually add the water with constant stirring. Incorporate in the mixture the remainder of the turpentine, shaking or rubbing until a perfectly homogenous opodeldoc-looking liniment is formed.

Colorless Varnish.

I.

	Parts.
Sandarac	8
Chloroform	1
Oil of lavender	6
Alcohol	40

Set the mixture aside in a well stoppered bottle for fourteen days, during which period the resins will have almost completely dissolved ; then carefully decant the clear liquid from the sediment.

II.

	Parts.
Damar	2
Acetone	9

Proceed as above.—*Drug. Circular.*

Compound Syrup of Codeine.

(A. N. S.) We know of no specific formula under this title, although Shoemaker ("Materia Medica and Therapeutics") gives the following formula :

Codeine	3 grains
Tincture belladonna	1 fl. dram
Syrup wild cherry enough to make	3 fl. ozs.

Dose, teaspoonful. Useful in the treatment of spasmodic and violent coughs. In phthisis it is said to check the cough at night and reduce the tendency to night sweats.

Under "Sirup de Codeine" the French Pharmacopoeia gives the following :

Codeine, pulverized	0.20 grams
Alcohol (60 per cent.)	5 grams
Syrup	95 grams

Dissolve the codeine in the alcohol and add the solution to the syrup. Twenty grams of syrup contain four centigrams of codeine.

The following modification is given in the Era Formulary :

Codeine	20 grains
Dilute alcohol	1¼ fl. ozs.
Distilled water	1¼ fl. ozs.
Syrup to make	20 fl. ozs.

Furniture Paste.

Paraffine wax	7 ozs.
Petroleum jelly	2 ozs.
Solution of potassa	5 drs.
Yellow wax	3 ozs.
Alkanet root	1 oz.
Turpentine	12 ozs.

Place the first four ingredients in a vessel and melt with gentle heat, then add the others, digest an hour and strain.

Liquified Sodium Phosphate.

Several formulas have been published for a liquified preparation of sodium phosphate. The following is from the Formulary of the Cincinnati Academy of Pharmacy:

Sodium phosphate	100 grams
Citric acid	23.4 grams

Triturate together and heat on a waterbath until liquified. Strain through a pellet of cotton if necessary. This preparation crystallizes at 15° C. (59° F.), but will readily liquify upon warming. It is miscible with water or syrup in all proportions without separation. Each fluid-dram represents about 75 grains of sodium phosphate. The preparation is said to be cathartic, antilithic and a stimulant of biliary secretion. It is also useful as a mild laxative and in the treatment of calculi of the bladder.

Another formula is that by Westcott, as follows :

Sodium phosphate, crystals	3650 grains
Citric acid	475 grains
Sodium nitrate	73 grains
Water, a sufficient quantity to make	8 fl. ozs.

Triturate the salts and acids until they liquify, and add the water.—*Phar. Era.*

Persian Sherbet.

Prepare a syrup as follows :

Orange syrup from the fruit	10 fluid ounces
Vanilla syrup	10 fluid ounces
Pineapple syrup	10 fluid ounces
Sherry wine	2 fluid ounces
Grape juice	1 fluid ounce

Dispense 1½ fluid ounce in an eight-ounce glass with some shaved ice, filling the glass with the coarse stream of carbonating water.—*Hiss' Manual of Beverages.*

Don'ts Worth Remembering.

Don't judge a man by his nose ; perhaps it is only sunburned.

Don't think you can offend a Justice of the Peace by calling him Judge.

Don't imagine you can make soft pillows of feathers from Cupid's wings.

Don't wait until the good things of life get by before looking after them.

Don't think the man who is always on the run wins the most of life's races.

Don't attempt to determine the gender of your chickens before they are hatched.

Don't envy the man with a wonderful memory ; he remembers much that he'd rather forget.

Don't think a woman will ever discover that she is beautiful if she waits until some other woman tells her.—*Chicago News.*

Business Personals.

Mr. C. Laux is spending some weeks at Redondo Beach for health and recreation.

D. Sale and wife have returned from an extended visit to the principal Eastern cities.

They say Trout, the druggist, has a wild-cat brand of cod liver oil. See him about it.

C. E. Bean is putting in an entire new stock of drugs in his old place, corner Twenty-fifth and Main streets.

E. L. Hereford, late of Twenty-fifth and Main streets, has moved his stock-in-trade to Chloride, Arizona, a mining camp near Kingman.

C. A. Cover, formerly in business in Corona, has purchased the drug store of Griffith & Co., Azusa. We wish him success in his new field.

"Luke" says that A. J. Watters, the Fifth-street druggist, is becoming quite an expert boatman since his Fourth of July experience. Maybe the statement conceals a joke.

A. Hawthorn has opened a new store on Pico Heights, which he will take personal charge of, leaving to his brother's care the store corner of Union avenue and Pico street.

F. M. Boswell, of Boswell & Noyes, has returned from a two months' trip to the East, during which he visited all the principal points of interest in that part of the United States.

Among the numerous San Diegans enjoying Alpine scenery and climate the druggists are well represented by Mr. Parrett and wife, E. Strahlmann and family, and F. E. Van Haren's family.

F. M. Moore is fast recovering from his long spell of rheumatism. The Hot Springs and mountain resorts did him much less good than expected, but Los Angeles climate is restoring him all right.

C. A. Ludden, of Pomona, has bought the business of S. Caldwell of that city. Mr. Ludden is an old druggist, formerly in business in Minnesota, and, with his son, will keep good the reputation and trade of this old stand.

Dr. W. M. Johnston, of Pico and Figueroa streets, is spending the month of July in Oregon, where fishing, hunting and outdoor life generally will furnish the needful recreation. While absent his store will be in the efficient charge of Mr. Hortmann.

A new pharmacy has been opened by S. A. Harper at Washington and Georgia Bell streets. Mr. Harper sold his former business in this city, and has been spending the past year in the East. We welcome him back to the "land of sunshine."

Mr. Chas. E. Weck, of Riverside, has taken the storeroom next to him on the north side, and will at once begin to enlarge and change his store generally; special attention given to accommodating soda-water customers, and displaying California and Mexican curios to advantage.

Mr. Warder McKim, of McKim & Chambers, San Jacinto, made us a friendly call on the 10th inst. Mr. McKim reports a fine fruit crop in his section this year, and a fair condition of trade. We would be glad of more frequent visits from our San Jacinto friends.

Mr. S. Caldwell, who has retired from the drug business of Pomona, will spend the balance of the warm season at the beach. His health has been much impaired, we are sorry to say, by a partial paralysis, but we trust that the ocean air will prove a restorative to him.

Mr. Robert G. Shoults, who took the $25 prize for quantitative analysis at the Philadelphia College of Pharmacy, is a graduate of the California College of Pharmacy, who went East for the degree of Doctor of Pharmacy. Hereafter students on this coast will not need to go abroad for this degree, as the California College expects next year to inaugurate a third year course, and to confer, at its satisfactory completion, the doctorate in pharmacy.

Dr. W. H. Davis, representing Parke, Davis & Co., Frank M. Bain, representing John Wyeth & Bro., and Chas. S. Ruggles, who stirs up things for Hance Bros. & White, were all in Los Angeles in attendance upon (this is assumed) the late N. E. A. meeting.

Whether the schoolma'ams could give any valuable pointers to our friends the medicine men may be questioned, but such a brilliant and good-looking crowd of damsels, added to the staple attractions of our city, furnish an irresistible combination.

F. W. Braun & Co. have made up and are mailing a circular descriptive of musical instrument strings, by which it is very easy to make up an order. Druggists can easily make twenty-five to fifty dollars a year on these goods on an investment of a few dollars. Keep the list for reference.

Dewey Outdone.

This summer the great American admiral will return to the United States.

There will be more ants and flies destroyed by "Fly Buttons" than there were people injured in our late unpleasantness with foreign powers.

Put "Fly Buttons" in stock and receive the premiums given. Read description in our advertising columns.

"The celebrated chemist, Van't Hoff, maintains that we stand very near to the time when we shall be able to fabricate albumen in the laboratory. As to the father of organic synthesis, Berthelot, his firm belief that our food will soon be made by the chemists out of oxygen, hydrogen, nitrogen and carbon is well known."—Prince Paul Kropotkin.

Mr. Wellcome (of Burroughs & Wellcome, London) presented a fine portrait, in oil, of Pocahontas to the American Senate at the last session. A special resolution was passed by the Senate thanking Mr. Wellcome, and instructing that the picture should be hung in the Senate wing of the Capitol.—*Chemist and Druggist.*

A Run on Sodium Phosphate.

Some time ago a Buffalo paper copied from a Chicago paper a story in which a nurse is made to say that she has obtained her elegant complexion by the use of 25 cents' worth of sodium phosphate. At once the demand for the compound set in. The woman who wishes to be more beautiful includes the entire sex, apparently. Not only were the drug stores beset for sodium phosphate, but it had to be sold in 25-cent packages or its supposed beautifying qualities were lacking. Druggists were obliged to order it by telegraph, even after the leading wholesale house had ordered it in quantities as high as 300 pounds.—*American Druggist.*

F. W. Braun & Co.'s Fruit Juices and Crushed Fruits are sold at notably low prices, and have a reputation for quality that is unsurpassed. These products are made under their own roof from the fruit when perfectly ripe and in the best condition. It would be difficult to make a stronger statement regarding their quality, unless indeed their increasing sale year by year furnishes the ground. You make no mistake when you order Braun's.

Remember the SOLUBLE GINGER of F. W. Braun & Co.'s manufacture, for the preparation of Syrup of Ginger. One trial will convince you of its advantages over other preparations of the kind. Strength and fine flavor are its special characteristics. Do you use Ginger Syrup at your soda fountain? That is a good place to test it. See advertisement for price.

Jasmal is the latest of the synthetic perfume products to be offered the public. It is said to be a perfect reproduction of the delicate odor of the jasmine and as such will be welcomed by perfumers.

F. W. Braun & Co.'s Ess. Jamaica Ginger is a leading seller during the summer season. The 25c. size is $1.50 per dozen, which gives a satisfactory profit. It is well to be provided with a bottle when camping, for it cures incipient bowel complaint and colics, promotes digestion and brings a comfortable glow when the system is chilled.

OUR ADVERTISERS.

It will be of interest and value to the trade to consult our advertising columns, in which will be found represented the following firms and goods :

A. Gettleman Brewing Co.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—Small neat drug store in suburbs of Los Angeles. Will sell at invoice for cash. Recent invoice, stock and fixtures, about $1600. Established four years. Average daily cash sales for last twelve months, $12.50; total expenses, $30 per month. Business increasing; very little credit; first-class community; good school trade. Address "Druggist," care of F. W. Braun & Co.

WANTED.—Salesman visiting the drug trade to introduce a specialty on commission. No one but a hustler need address. C. W. Baldridge, Fallbrook, Cal.

FOR TRADE—Valuable real estate for drug business. Ranch and city property. Either for a deal. Inquire of F. W. BRAUN & CO., Los Angeles.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE—Stock and fixtures for a small drugstore. Inquire of Viole & Lopizich, 427 North Main st., Los Angeles.

WANTED—Position by a first-class watchmaker, jeweler and engraver. Am also a registered pharmacist. Address Box 208, Lander, Wyo.

FOR SALE—The only Drug Store in a new growing factory town. No store nearer than 8 miles. Good farming country. Can be bought for $600. Write to Phillips & Smith, Santa Ana, Cal.

At your soda fountain are you using the patent porcelain top acid phosphate bottle? If not, you don't know what you are missing. F. W. Braun & Co. sell them for 25 cents each, which is the manufacturer's price cut in half.

The official organ of the Los Angeles County Pharmaceutical Association.

IN our May issue we stated that the citric acid industry was not yet, apparently, on a firm footing in Southern California. A late article from the San Diego Union upon the citric acid and oil lemon output at National City, from the works of the San Diego Land and Town Company, makes the statement that the enterprise has proven very successful, and that steps will soon be taken to enlarge the factory. It is interesting to know that lemon-growers are receiving $5.00 per ton for their culls, and that about forty pounds of citric acid may be expected per ton, besides from four to nine pounds of oil lemon.

The statement of the Union that the lemon oil made in Europe by hand is not satisfactory, for the reason that it is not pure, is absurd. The process described by the Union is but one of several methods in use in that country, and in all cases the product is pure How could it be otherwise? The fact of adulteration being practiced is another matter, an altogether subsequent proceeding, and not limited by any geographical bounds. We rejoice to learn that the National City product goes out strictly pure, and trust it will never be otherwise; also that the new industry has been successfully inaugurated by the enterprise of the San Diego Land and Town Company.

There are several other lemon-growing centers in Southern California of equal promise which doubtless will in due time be occupied by similar establishments.

THE use of liquid air for refrigerating purposes is to have a practical demonstration in Los Angeles, a large fruit-shipping firm here having contracted with Eastern parties to establish a plant in this city for the supplying of the material. The great advantage to be gained is in saving of space occupied by ice in the refrigerating cars and by largely reducing the weight carried, thus enabling the shipper to load a much larger quantity of fruit in the car. The cold is produced by evaporation of liquid air, which is placed in vessels open to the atmosphere, there being no practical method of safely confining this material in tight containers. It is expected that by establishing stations at suitable distances fresh supplies of liquid air may be obtained as needed on the long route to Eastern markets.

The proverbial ingenuity of American inventors will doubtless be exercised in many ways to bring into common use the wonderful new product. It will cool houses during the heated season, perhaps through the same appliances by which the same are heated in winter. It will be adapted to soda fountains, doing away with the necessity of using ice. It will freeze ice-cream in less time than is now occupied in packing the freezer. Railroad traveling will be made as comfortable as a ride on the lakes, simply by evaporating the material and conducting the cooled air into the coaches. Surgeons will utilize it in some of their operations, and even now it is claimed that the germs of the terrible cancer are destroyed by its use, thus giving new hope of life to the heretofore doomed sufferers from the disease. One sanguine individual has been proposing to project liquid air into the sky for the purpose of producing rain by the sudden chilling of the atmosphere, selecting the mountains above San Gabriel cañon as the place for experiment, and thereby so affecting the minds of some reservoir builders near by that, fearing a washout, they applied to the courts for an injunction to restrain the rain-maker from his operations. The Judge seems to have been less credulous, however, for he denied the unique request.

We are inclined to believe that there will be found abundant use for this interesting substance in the industrial arts, and that it will be quite as well to leave rain-making to the higher powers.

AS the time approaches for the first annual meeting of the N. A. R. D. (Cincinnati, Oct. 3), the interest of the trade in the association grows stronger. The leaders in the movement are strong and influential members of the retail trade and well fitted to handle the questions involved in their dealings with the other great branches of the drug business—the jobbers and the manufacturers. The jobbers are already practically unanimous in their desire to further the efforts of the retailers, so that the weight of their influence will be felt in the attempt to bring the manufacturing interest into harmony with the distributing interests. The earnestness with which the preliminary work has been and is being done gives promise of success, for a great body of business men, when united in their demands for justice and fair dealing are not to be ignored nor turned aside. The issue will be forced, and something is going to crack unless the proprietors are wise enough to make peace with the retail interest. Strengthen the hands of the N. A. R. D.

The Secretary of the N. A. R. D. writes, "The greatest obstacle to the success of our work is that sort of hopelessness that prompts men to sit down and say that nothing can be done, a species of cowardice wholly unworthy of self-respecting Americans.

AMONG the future sources of income in California there is much to be hoped for in the production of perfumes. Climatic conditions in portions of this State are apparently favorable to the industry, and by making judicious selections of locations and conducting experiments to ascertain what particular plants are best adapted thereto there is little doubt of ultimate success.

New industries have their drawbacks, and especially where long continued experiments are needed, for people look for prompt returns for their labor, and are easily discouraged if early experiments chance to be unfavorable. In the case of the industry in question its great importance to the interests of our State suggest the propriety of public rather than private experiment, the agricultural experiment stations now in operation furnishing the needed facilities. Among the perfume-bearing plants those seemingly best adapted to the soil and climate of California include the rose, rose geranium, lavender, and heliotrope, all of which are luxuriant growers with us, not to mention the citrus trees which cover thousands of acres of our domain.

Spasmodic attempts have been made at several places in California to raise perfume-bearing flowers, but the lack of persistent effort and probably the need of prompt returns for the outlay of labor, have stood in the way of success. There is reason to believe that Southern California may become another South of France in the important industry of perfumes. It seems to need only systematic and thorough experiments, such as government alone is able to conduct, to demonstrate the possibilities in this direction, and to start us upon a new and profitable as well as most pleasing industry. Any party desiring to learn already ascertained facts bearing upon this subject should write to the Department of Agriculture, Washington, D. C., for Reports relating to the industry in question.

IT is an unfortunate drug man, be he proprietor or clerk, in Southern California, who cannot take a run to the beach during the warm season now on. So much of relief and comfort is found in the cool ocean air and a dip into the salt water, that a weekly trip, if for but a few hours, is worth vastly more to one than the small amount of coin it costs. Los Angeles has no greater charm than its position near the ocean gives it.

THOSE desiring examination for pharmacy certificates will remember the Los Angeles meeting of the State Board of Pharmacy, Wednesday, Oct. 4th, next.

AN attempt has been made by a "promoter" to form the wholesale drug trade of the country into a trust after the fashion that has become so prevalent in manufacturing lines. It is a matter for congratulation that the wise heads of the N. W. D. A. refused to be drawn into the scheme, and that a quietus has been put upon the whole matter.

MERCK & CO. have, wisely we think, given up the business of supplying the physicians at their pharmacy and of filling prescriptions for the general public. In a circular to the druggists of the United States, dated July 1st, their position is stated as above. They will continue to fill prescriptions for the trade.

THOSE of our readers who chance to live in damp localities may be saved from the nuisance of mosquitoes by the use of permanganate of potash, a very little of which dissolved in the water of standing pools will kill the germs. The small quantity required for the purpose would not harm domestic animals that might drink of the water.

THE prosperous business which is so marked a feature throughout the United States, has not brought about any very notable changes in the prices of drugs, which, as a rule continue low, much to the advantage of the retail trade. It is well that this is the case, for it furnishes something in the way of an offset to the increased prices of proprietaries, the advances in which, in the past two years, probably reach an average of ten per cent. With the restoration of full retail prices now confidently hoped for through the work of the N. A. R. D., the condition of the drug business will be fairly satisfactory.

Federal Judge Rules on Stogies.

A decision has been handed down by Judge Colt in the U. S. Circuit Court in this city (Boston) which will likely be far reaching in its effects in the tobacco trade. The court held that stogies bearing the name "Wheeling" or Wheeling Stogies" could not be manufactured in Boston or elsewhere than Wheeling, W. Va., and sold as "Wheeling Stogies." The decision applies to Key West cigars not actually made in Key West.—*Era.*

Bath brushes are in order these days, in fact are all-the-year-round goods, but of special interest now when the most negligent of people can hardly avoid the daily bath. Fully sixty styles of bath and flesh brushes are displayed in F. W. Braun & Co.'s sample cases, furnishing the largest opportunity for choice. There are the straight long-handled kinds, for the stiff, straight backed, trolley-pole style of man; the slightly curved variety for the graceful feminine form; the deeply curved shape, that will reach around the hump of a Punch or scratch the spine of a Barnum fat boy. There is the sort with battery connections and the Magnetic Horsehair variety, the kind with removable head and a strap for the hand—many with no handles at all. There is the friction belt of bristle, or loofah, or of harsh Turkey crash—the fine soft brush for the delicate and the stiff brush for the rugged; the one-sided and the two-sided brush; the soft rubber styles for the complexion and for shampooing. In short, there is material here for a suggestive study of human needs and fads, simply in the matter of a bath brush.

The Change at Plimpton's.

BY M. QUAD.

Mr. Plimpton had been a druggist in Charlotte for ten years when I joined the gang which had its headquarters in his store. I was No. 15 Every night in the week, except Sunday, we dropped in. The idea was to hear the news, tell stories, brag and lie, and have a pleasant evening. Mr. Plimpton was a good-natured, easy-going man, and if he did not encourage the growth of the gang, he certainly made no protests. If one of the gang bought a porous plaster or a box of pills once in six months, Mr. Plimpton was agreeably surprised, but he was not a man to force trade. So far as buyers were concerned, he could have closed up at 9 o'clock, but he always kept open until the last of the gang was ready to depart. He had only three chairs in the store, and, of course, we took possession of them and of all the counter room besides, but Mr. Plimpton never threw out any hints to hurt anyone's feelings. We cracked the glass in his show cases, broke his bottles and upset his boxes, but he always looked upon such things as unavoidable accidents, and never made a demand for pay. In the early days of the gang, when there were only six or seven members, they might have felt under obligations to Mr. Plimpton for rent, fuel and gas, but after a while all such feeling passed away. The gang came to feel that it had moral and legal rights which it would not surrender without a gigantic struggle.

If Mr. Plimpton's brother hadn't died in the East and left a business to be looked after, the druggist would have made no change. As it was, he had to sell out and leave Charlotte. It was a hard blow for the gang when he announced his intentions, but it was somewhat mitigated by his solemn assurance that his successor would be a man who would give us a cheerful welcome. In fact, the gang and the drug store went together. Whoever bought the one must take the other and use it well. We had our doubts and fears, but it was old Silas Bebee, the founder of the club, who strengthened our hearts.

"The gang will go right on as usual," he said, in his decisive way. "The only change will be in the proprietorship of the store. Unless the new man is the biggest fool on earth he will not seek to drive us away. He must realize that it would be his ruin."

Mr. Plimpton's successor was a man named Edgar. He took possession one Monday morning, and as evening came and one member of the gang after another showed up the new druggist met him with a smile and a hand-shake and blandly said :

"I am more than glad to see you. There will be no change. I shall even hope to see the number of the gang increased to twenty. Have a cigar with me?"

There was a blandness and a softness about the new druggist which touched our hearts, and the good feeling for him was further increased when he offered us the free use of his telephone and errand boy, and placed a package of licorice-root and a box of gum convenient to all. We had just got settled down for the evening when the store began to fill with smoke and an alarm was raised. There was a rush of the gang for the fire engine, but when it arrived the fire had been extinguished. It was only a little one for a cent among some boxes down cellar, but the druggist had to close up and clean up. We were on hand again the next evening, but scarcely had we taken our accustomed seats on the counters and boxes when a dog fight occurred in front of the store. Every man rushed out to see the affair, which lasted about five minutes, but the rushing back was a different thing. The new druggist met us at the door to say :

"As we have been interrupted and our evening broken up, I think I'll lock up and do a little painting. Be sure to be on hand early tomorrow evening."

The next evening we found fourteen camp-stools placed in the store for our benefit, and the druggist had bought a pound of smoking tobacco and a score of clay pipes. Each one of us was greeted effusively, and when all had gathered and the bragging and lying were about to begin, Mr. Edgar said :

"Gentlemen, I wish to make you feel at home, and if no one objects I will start the exercises of the evening with a story."

His offer was hailed with enthusiasm, and he was just geting ready with his yarn when the telephone rang. It was to notify him that his wife had been suddenly taken ill. There was nothing to do but shut up the store and go home, and, of course, we were turned into the street. He gave us to understand that he was full of sorrow and regret, and that he should expect us with the next evening, but we were a lonely crowd. It was dark and stormy, and some of the gang got home at 8 o'clock for the first time in fifteen years. When evening came again we were welcomed even more blandly than before, and were glad to hear that his wife was out of danger. In addition to the pipes and tobacco there was to be a free treat of hard cider, but only half of the gang had got their legs crossed and their pipes alight when a boy opened the door and wanted to know if we had heard of the murder on Rose street. Everybody rushed out and ran half a mile to Rose street, but some how or other no case of murder could be found. We straggled back to the drug store to find it closed, and, though we went over to the lumber yard and sat around for two hours, nobody's heart was in the convention. Doubts and fears began to creep in, and old Silas voiced the general feeling as he suddenly shivered and said :

"Boys, I dunno—I dunno. It kinder seems to me that sumthin's going to happen."

We were a little shy on the fourth night, but the new druggist was bland and full of regrets, and we soon regained confidence. He brought out two new checker-boards, which he had purchased for our use, and it was his proposition that no one should start for home before 11 o'clock. There was evidently a pleasant evening before us, when the telephone informed the druggist that his baby had swallowed a cork-screw or screw-driver or something of the sort, and he had to turn us all out again and fly. On the next evening a smell broke loose and drove us out, and on the next the stove smoked and made the place uninhabitable. The new druggist was still bland—still smiling—still full of regrets, but the fifteen of us went over to the lumber yard and sat down on beams and posts and planks for a long time without saying a word. It was Uncle Bill Hutchings who finally stood up and and solemnly queried :

"Gentlemen, if she be in order I'd like to ask if anybody feels anything?"

"We do," we all replied in chorus.

"Is it a feeling of goneness?"

"It is."

"And mongled with that feeling of goneness is there a feelin' that we are slowly but surely bein' trod into the airth?"

"There is."

"Then I'd like to hear from Silas Beebe what we are goin' to do about it."

"Wall, boys," said Silas, "it ain't no use to deceive ourselves. The fust time we was turned out of the store I thought it might be an accident; the next time I thought it might be a coincidence; the third time it looked a leetle bit like what they calls a sequence, but when the fourth and fifth and sixth come along I knowed that this gang was throwed down. Yes, boys, we've been throwed, and throwed heavy, and thar' ain't but one thing left for us to do."

"What's that?" asked three or four in chorus.

"To adopt a resolution that all men ar' born free and ekal, and that we take our stand on the constitution of the great United States of America!"

The resolution was unanimously adopted and we all went home. It is now twelve years since I heard from any of the gang, but I haven't a doubt that every living man is still standing on that constitution with both feet.—*American Druggist.*

Firework Papers — Igniting Papers.

DRUGGIST, St. Louis—Please give some formulas for preparing paper so that when it is set fire to it will burn with a colored light—red, blue, green, yellow, etc. Please state how the slow-match paper for touching off fireworks is made.

For an igniting paper, for "touching off" fireworks, proceed as follows: Make a solution of

Potassium nitrate	2 parts
Lead acetate	40 parts
Water	100 parts

In this, place sheets of blotting or unsized paper, and raise to a boil, and continue boiling for twenty minutes. If the paper is to be "slow," it may now be taken out and hung on strings to dry. If a quick burning paper is desired, the boiling should be repeated in a fresh charge of the solution.

BENGAL PAPERS.

These, we suppose are what you desire, as we published some years ago a formula for preparing such papers. From a recently published work of M. Villon we obtain the following new and approved formula, for solutions into which unsized paper is macerated as described further on:

RED FLAMES.

1.	Strontium nitrate	20 parts
	Potassium chlorate	10 parts
	Alcohol	20 parts
	Water	100 parts
2.	Strontium nitrate	20 parts
	Strontium chlorate	5 parts
	Alcohol	20 parts
	Water	100 parts
3.	Strontium chlorate	20 parts
	Alcohol	20 parts
	Water	100 parts
4.	Lithium chloride	20 parts
	Potassium chlorate	10 parts
	Alcohol	20 parts
	Water	100 parts

GREEN FLAMES.

1.	Barium chlorate	20 parts
	Alcohol	20 parts
	Water	100 parts
2.	Barium nitrate	10 parts
	Potassium chlorate	10 parts
	Alcohol	20 parts
	Water	100 parts
3.	Barium nitrate	10 parts
	Barium chlorate	20 parts
	Alcohol	20 parts
	Water	100 parts

YELLOW FLAMES.

1.	Sodium oxalate	10 parts
	Potassium chlorate	10 parts
	Alcohol	20 parts
	Water	100 parts
2.	Sodium chlorate	20 parts
	Potassium chlorate	10 parts
	Alcohol	20 parts
	Water	100 parts

BLUE FLAMES.

1.	Potassium chlorate	10 parts
	Copper chlorate	20 parts
	Alcohol	20 parts
	Water	100 parts
2.	Copper chlorate	100 parts
	Copper nitrate	50 parts
	Barium chlorate	25 parts
	Potassium chlorate	100 parts
	Alcohol	500 parts
	Water	1000 parts

VIOLET FLAMES.

1.	Strontium chlorate	15 parts
	Copper chlorate	15 parts
	Potassium chlorate	15 parts
	Alcohol	50 parts
	Water	100 parts
2.	Potassium chlorate	20 parts
	Strontium nitrate	20 parts
	Copper chlorate	10 parts
	Alcohol	50 parts
	Water	100 parts

LILAC FLAMES.

Potassium chlorate	20 parts
Copper chlorate	10 parts
Strontium chloride	10 parts
Alcohol	50 parts
Water	100 parts

Many other formulæ might be given, but these will suffice to make a very handsome and entertaining display. Each formula produces its own pecular shade, those for red, for instance, producing flames from light red to crimson.

The paper should be unsized, and the weight should be suited to the volume of flame and length of burning desired. By rolling up the sheet into a roll more or less tight, as desired, a sheet of paper 12x16 inches may be made to burn for several minutes. The paper is placed into the solutions, allowed to become saturated, then removed and dried by hanging over a string stretched across a warm room.—*National Druggist.*

They Come, But Go Not.

So peculiarly attractive to neighboring Ants and Flies are the now famous "Fly Buttons" that when the buttons are set for business, these household pests gather around and die.

Read in our advertising columns of the good profits and premiums offered retailers.

Revision of the Pharmacopoeia from the Druggist's Standpoint.*

BY PROFESSOR GUSTAVUS D. HINRICHS.

St. Louis College of Pharmacy.

The Pharmacopœia is the self-imposed law governing the druggist in the mode of preparation and especially in the chemical purity and strength of the articles described therein. In the past, the retail druggist has not felt the full weight of the latter requirements of the Pharmacopœia, and the present edition, in force since January, 1894, but called the Pharmacopœia of 1890, has not even found its way into one-fifth of the drug stores of the country.

The druggists of Ohio, and especially of its metropolis, Cincinnati, were a few years ago, quite rudely awakened to the requirements of this, their self-imposed law-book. As a rule, even the best and most honorable men pleaded guilty and paid the costs. The immediate cause of this sad experience was the attempted enforcement of a so-called pure food law for the State.

It is known to every retail druggist that a most powerful agitation is going on in favor of a National pure food law. At a recent public hearing before a Congressional Committee at Chicago, some of the most sensational statements were made by chemists in favor of such legislation. Some of these advocates represent a powerful department of the government.

It is not my purpose, nor would this be the place, to discuss the great question of a pure food law. It would, no doubt, be delightful if through any law passed by Congress, and carried out by the official chemists of the National, State and city governments, all "impure food" could be driven from the market so that no citizen would suffer from such. I would suggest, however, that the pollution of air and water, the most important of all material for healthy human life, should first be prevented, and at least not be officially encouraged. This I must consider much more important than any merely chemical "pure food" examination of beer or tea, because these articles are not necessities, while water and air most assuredly are such. Anyone can manage to get along without beer or tea, while he must have water and air to live.

But we must not be drawn into any discussion of the general question. I only wish to have the retail druggists of the State take notice of the powerful agitation in favor of a so-called pure food law, and each to ask himself, what will be the most certain and immediate effect of such a law.

The druggists imposed upon themselves the requirements of purity and strength of the Pharmacopœia. Any merely technical statement in this book becomes of practical weight in the courts. The revision now about to be made should be placed in the hands of the men who will not allow far-fetched, non-essential conditions to be imposed, and certainly none that it is impossible to meet.

Our Pharmacopœia has become a big volume, mostly printed in small type. It is swelling up toward the dimensions of a dispensatory. In its last revision it absorbed a goodly portion of what exclusively belongs to chemical literature.

When some spy has given a retail druggist five cents for a correspondingly insignificant portion of a chemical or chemical preparation enumerated in the Pharmacopœia—an arrest may follow with results as in Cincinnati.

Our Pharmacopœia should contain not a word that is not essential; and if essential, it should be printed in good sized type, so that it can easily be read by the druggist who is bound in law by that word. I do not believe that the Pharmacopœia should contain any fancy requirements as to strength and purity, but only such as are essential and can be complied with in practice.

---

*Read before the Missouri Pharmaceutical Association and reprinted from Amer. Drug.

State Board of Pharmacy Meeting.

A regular quarterly meeting of the California State Board of Pharmacy was held on the 11th to 15th of July, 1899. Present, Messrs Searby, Waller, Oberdeene, Seifert, Orena and Baer. Absent, Mr. Sale.

Examinations were held for the registration of Licentiates and Assistants consisting of Practical, two days, including identification of chemicals by tests, by appearance and taste. Identification of drugs and pharmacopœial preparations.

Then followed the written examination in Chemistry, Materia Medica, Pharmacy and Toxicology.

The following were granted the Licentiate certificate on examination: Chas. S. Kelley, Leon A. Mendelson, John R. Callahan, Albert Forneris, Wm. H. Stark, R. L. Prouty, H. M. Jewell, O. S. Scholz, Wm. A. Maguire, J. J. Wadams, Orin Eastland, R. A. Norman, Ed. C. Worth. Three failed.

The following were registered as Licentiates on certificates: N. F. Sellgren, M. Carlberg, Wm. C. Riddell and Wm. M. Hickman.

The following were registered as Assistants on examination: G. B. Ingram, R. Herndon and T. B. Thomas. Four failed.

H. M. Jewell was granted Assistant certificate on his Licentiate examination.

The following were registered Assistants without examination: H. A. Hornung and Roy T. Eaton.

The following were registered as Graduates in Pharmacy: C. P. Collins, G. H. Voss, V. L. Schaefer, G. B. Wilson, C. J. Dietz, M. G. Spagnoli, H. C. Moore, E. O. Webb, A. Spire, R. R. Giffen, F. L. Volberg and John M. Waste.

Mr. Waller reported from Finance Committee that the accounts of John Calvert, Secretary and Treasurer, had been examined and found to be correct.

W. M. Searby was re-elected President of the Board. S. L. Waller was elected Secretary and Treasurer.

A vote of thanks was tendered to John Calvert, the retiring Secretary and Treasurer, to be engrossed and signed by all the members of the Board.

The next meeting will be held at Los Angeles on Wednesday, October 4th, 1899, to be adjourned to meet at San Francisco on Tuesday, October 10th, 1899.

JOHN CALVERT, Secretary.

The liberal monthly discount offer of F. W. Braun & Co.'s Druggist Sundries' Department for July was on hair brushes, and was taken advantage of by many druggists. As Russia bristles are expected to be extremely high in price in the near future all such purchases of the higher grade goods will give the buyers a probable 50 per cent advantage. These discount offers should never be overlooked.

Legitimate Substitution in the Drug Trade.

The substitution question is one of many phases, some of which are entirely ignored by proprietary medicine manufacturers in their customary hot-headed arraignment of the practice. The Hood people, for instance, dote on the substitution of their remedies for those of Dr. Jayne by those in need of curative agents which are retailed as proprietaries, and the chief aim of their advertising is to convince the reader of the wisdom of substituting for the remedies he has been using those of the advertiser. Dr. Jayne employs the same methods and like resources. Thus a brand of substitution that is thoroughly legitimate and commercial is developed.

Owing to the more liberal education, skillful training and business acumen of the retail druggist of today, as compared with his brother of a quarter of a century ago, or even the preceding decade, he has quite naturally become a Hood or Jayne in a small way himself; he has a "World's Dispensary" of his own, as it were, *a la* Dr. Pierce—only his *world* is local, not national or international. Then he, like Hood, Jayne and Pierce becomes a substitutor of the competitive type. He puts his knowledge and reputation up against that of the proprietor in a distant city and says to his neighbors: Take your choice. He sells his own goods on their merits, and if he deserves success at all, he wins patronage, *i. e.* his remedies are substituted for the proprietor's by his patrons.

The honorable pharmacist, however, will never cross the boundary line of legitimate substitution; he will never sell goods under false claims, or under false titles. He will never trade on the reputation of other manufacturers, nor substitute his own preparations for those of any other manufacturer, except with the knowledge and consent of the patron, and then only in the belief that his own are of equal merit or better than those displaced. And, above all, he will never make use of a wrapper similar to that used on any well known preparation, and thus deceive the public.

The proprietor has a right to demand that dishonest substitution, wherever practiced, shall cease, and that retail druggists coöperate with him in the prevention of frauds of this and every kind and in the prosecution of such offenders. The honorable pharmacist will do this not only without any thought of compensation, but as a duty; but in all candor, isn't it about time for the proprietor to exercise a little discrimination when arraigning substitution and substitutors, and in so doing avoid the blunder of confusing legitimate competition with trade piracy?—*P. O. and D Review.*

SOMETHING WORTH SEEING.

One of the Exposition Features will be the Illustration of Wireless Telegraphy.

PHILADELPHIA, July—, 1899.

Wireless telegraphy will perhaps have its first great test during the holding of the National Export Exposition to be held here during the fall. No effort will be made to duplicate the Eiffel Tower, but a structure of some kind is being considered that will hold up a copper wire 1000 feet in air.

It is claimed by Marconi, the inventor of wireless telegraphy, that if this is done by the Exposition people he will telegraph by flashes of electricity from the top of Eiffel Tower in Paris. A feat of this kind, successfully performed, will be the wonder of the world and worth crossing the ocean from Europe to see.

Superfluous Hairs.

THE LIMIT OF ELECTROLYTIC DEPILATION.

It is a common error to suppose that the electrolytic method of removing superfluous hairs is universally applicable, and young ladies whom Nature has endowed with a delicate dark fur on the upper lip want to try it. Mr. Balmanno Squire, F. R. C. S., has in the Lancet given pithy advice for such a case, and he shows so admirably the limitations of the electrolytic method and its consequences that we cannot do better than give his own words:

The case is that of a young woman, aged 26 years, who is developing a "mustache of a dark color" which "is now about one-eighth of an inch long," and the question is raised whether the destruction in detail of the roots of these hairs by the electrolysis needle would conduce on the whole to her benefit. I should be disposed to say that it certainly would not do so. I never employ electrolysis in a case of that kind, and always endeavor to persuade the patient not to think of having it done. My reasons are these: In juvenile feminine hirsuteness the hairs on the upper lip are, as a rule, fine—that is to say, silky, are short, and are thickly sprinkled—that is to say, are extremely numerous on a comparatively small area. Each introduction of the electrolysis needle produces always a minute scar. When the hairs are so closely placed together as they are in cases of this kind and are thus operated on, the minute scars overlap one another and thus considerable disfigurement is unavoidable. I have seen many cases where electrolysis has been performed, evidently with due care, for the destruction of the mustache in young women, with a rather deplorable result—that is to say, the production of an uneven, even a bridled, scar occupying the greater part of the upper lip and constituting a noticeable disfigurement of a somewhat forbidding character. It is a question of taste. For my own part I prefer the mustache. But, what is more to the point, I have always found that the patient herself has greatly regretted the event, and would, if she could, exchange the scar for the mustache. It is otherwise with senile feminine hirsuteness. There the hairs of the mustache are long, are coarse, and are spaced much more widely apart. In such cases treatment by the electrolysis needle is suitable, and is capable of producing results of a satisfactory kind. But even in cases of this kind the less practice the operator may have had in performing the operation the worse will be the result which awaits him. What, then, is the best thing for the patient to do? Something that she will in all probability firmly refuse to do. She ought to shave, and to shave habitually. What is the thing which she is likely to do? She will most probably pull every one of the hairs out over and over again; in this respect following the example of her ancient Roman, her ancient Grecian, nay, even her ancient Egyptian, sisters. Why will she refuse to shave? Because she thinks that such a course will make the hair grow more thickly, coarser and longer. Is this so? Not at all. I have satisfied myself, by repeated and careful experiment, that it is not so. What will be the result of her pulling the hairs out over and over again? It will make them grow much more thickly, much coarser, and very much longer.

F. W. Braun & Co. carry a line of rubber bathing caps for the protection of ladies' hair in surf bathing. They are good sellers at this season of the year.

N. A. R. D. Notes.

The national secretary is compiling a list of the aggressive drug cutters of the country and the help of every member of the retail drug trade is asked in order that the list may be complete. All retailers are requested to write at once to Thos. V. Wooten, Secretary, 943 W. Madison street, Chicago, and give the name of the firm or firms in their respective communities who are cutters from choice or as a matter of business policy and not because they are compelled to do so. The letter should state what class of goods is being sold at cut prices, whether the cutter is a druggist or what is his principal line, and to what extent prices are reduced below the usual selling price. This matter is a most important one and deserves the immediate attention of every druggist who wishes his business to be profitable, and desires the prosperity of the retail drug trade.

Thos. V. Wooten, Sec'y., Chicago. Dear Sir:—At the annual meeting of the Maine Pharmaceutical Association held July 6 and 7, '99, the following resolutions were adopted:

WHEREAS, The National Association of Retail Druggists has shown by its work the past year that great benefits will result to the retail druggists of this State if their work be continued, therefore

Resolved, That this Association express to them our great satisfaction for what they have already accomplished, and strongly indorse their methods, and pledge them our united support.

Resolved, That this Association send delegates to their first annual convention to be held at Cincinnati, Ohio, Tuesday, Wednesday, Thursday and Friday, Oct. 3d, 4th, 5th and 6th, 1899.

Yours truly,
M. L. PORTER, Secretary.

Treasurer John W. Lowe has received the membership dues of the Peoria, Ill., Retail Druggists Association, composed of the druggists of Peoria county, thirty-seven in number. There is no price-cutting in Peoria and the trade of that city is in excellent condition. The officers are L. C. Wheeler, Pres., John Kneer, Jr., Secy., and W. M. Benton, Treas. The Association was represented in the organization convention by Mr. F. Lueder.

The druggists of the several States of Virginia, Tennessee, Colorado and Iowa held their State Association meetings simultaneously during the third week in July. It is gratifying to the National Executive Committee that in each of these States resolutions were adopted cordially indorsing the work of the N. A. R. D. and giving it financial support. There are few obstacles to securing indorsement of the plans of our organization wherever they are understood, and the perpetuity and future usefulness of the national body seem to be, beyond question, assured.

One of the most recent additions to the National Association is the Monroe Co. (Bloomington) Ind. Association. This organization was formed by Executive Committeeman Timberlake and represents the entire drug trade of Monroe county.

Resolutions passed at the 17th Annual Meeting, Maryland State Pharmaceutical Association, Ocean City, July 11, 15, 1899:

Resolved, That this Association in annual session heartily indorses the action of its members at the last semi-annual meeting when they agreed to affiliate with the National Association of Retail Druggists. It also wishes to express its belief that such an organization is necessary for the welfare of retail pharmacists and views with a feeling of satisfaction the progress this Association has made.

Resolved, That the incoming president be instructed to appoint a delegate to represent this Association at the first annual meeting of the N. A. R. D., at Cincinnati, October 3d and 6th next.

Resolved, That the treasurer be instructed to send at once to the treasurer of the N. A. R. D. a sum equal to twenty-five cents for each member who has not joined a local organization paying a per capita assessment to the National Association.

Navy Full-Diet Table.

After much study the medical officers of the navy have adopted a new full-diet table, in which every care has been taken to provide for a proper quantity of proximate principles in a variety of food suitable for a liberal diet. For each meal in the table running through a week the precise amounts of albuminoids, carbo-hydrates, and fats were arranged, bearing well in mind the preferences developed by a seaman's life. The bills of fare represent not only the ideal poor man's food, but food that cannot be surpassed by royalty as well. It is found in practice from the returns of all hospitals that these meals cost an average of 30 cents per day per person, or about 10 cents per meal. The tables are thought to constitute the best possible fare, and represent a most excellent foundation for carrying other gastronomic luxuries. The naval full-diet table is as follows for one day in the week, the number after each article relating to ounces: Breakfast—coffee, 1; bread, 4; butter, 1; milk, 6; sugar, 1; oatmeal, 1; beefsteak, 6. Dinner—rice soup, 8; bread, 4; roast beef or roast or boiled fowl, 8; potatoes, 8; other vegatables, 6; pickles, 1; bread pudding with sauce, 6; or custard frozen, 8; fresh fruit, 6. Supper—Tea, ¼; bread, 6; butter, 1; milk, 2; sugar, 1; cold roast mutton or cold roast beef, 4; stewed dried fruit or baked fresh fruit or apple sauce, 4. The staples—coffee, bread, butter, milk, sugar, and fresh and dried fruit—are the same for each meal, but there is a daily variety in meats and other articles for breakfast, dinner and supper. The proportions are about the same, however, especially in the matter of meats, as in the specimen diet table given above. In addition to its use for convalescents the table is now observed for all naval hospital employés, and is gradually becoming the standard aboardship and in the marine corps. Its adoption was the result of most patient and thorough investigation by Surgeon I. D. Gatewood, who consulted all the leading authorities on the subject.—*Medical Progress.*

The young man at Perry's soda fountain, Indianapolis, is "right up" on everything pertaining to the soda business, though he is not a druggist. A lady came in, stopped at the soda counter and asked: "Have you any hive syrup?" "No, madam," said the youth, "but we have any other kind, with ice cream."—*Drug. Circular.*

Sulphate of Magnesia.

Britton (Medical Council, May, 1899), writing on the more important uses of sulphate of magnesia, quotes from Bartholow and the experiments of Brunton in rating this salt as the most valuable of the saline laxatives and purgatives. * * *

In active inflammatory states, as in the early stage of typhoid fever and peritonitis, when the arterial tension is high, as well as in intestinal torpor and fecal accumulation, sulphate of magnesia fully meets every indication for purgative treatment. * * *

It is so gentle in action and mild in effect that there is scarcely a morbid condition calling for laxatives or purgatives in which it may not be administered with advantage.

The use of sulphate of magnesia is restricted mainly by the lack of means for its pleasant administration, improvised solutions being disagreeable to most palates. Natural waters only exceptionally contain enough of this salt to make them of value as a substitute. Apenta, according to Professor Pouchet of Paris, is an exception. He finds this water so rich in the sulphates of sodium and magnesium, especially the latter, that it may well be classed among the strong purgatives. In addition to these salts it contains lithia, making it diuretic, alterative and anti-rheumatic as well as purgative.—*Medical News, June 3, 1899.*

Many up-to-date soda water dispensers supply a pretty Japanese napkin to their customers at the fountain. These napkins in various designs are in packages of 1000 and sold by F. W. Braun & Co. at lowest prices.

Eucalyptus Oil at Garden Grove.

Anaheim, Aug. 1—The eucalyptus oil plant at Garden Grove is to be doubled. Increased demand for the California product, which is taking its place as a superior article to that imported, which has heretofore controlled the American market, gives cause for enlargement of this plant. The best season of production will soon be at hand, the eucalyptus leaf giving a greater percentage of oil in the fall and early winter than at any other season. It is intended to run the Garden Grove plant night and day as soon as the new still can be added.—*Cor. L. A. Times.*

A fine balance is an object lesson in delicacy and accuracy. The display of this class of goods in F. W. Braun & Co.'s salesrooms is well worthy of examination by druggists and chemists. As an indication of the extreme delicacy attained in these instruments we instance a button balance which will weigh 1-400 milligram, equivalent to about 1-25,000 of a grain. In use the beam drops but 1-1000 of an inch. This balance is worth $200, and though not the most costly is the most sensitive of the line.

The assayers' supplies of all kinds also shown by the firm include many items of interest to those who like to inform themselves regarding the appliances of scientific study.

The rubber goods made by the Goodrich Rubber Company are unsurpassed by the manufactures of any other concern in America. It is always safe to inquire for the "Goodrich" brand. See advertisement.

Business Personals.

L. J. Huff, Pasadena, with his family, has gone for his annual vacation down by the sea.

L. W. Pierce, Pomona, has been spending a week, with his family, at Long Beach.

Mel. Fellows, head clerk for E. E. Armour, Pomona, is enjoying his summer outing at the seashore.

Lloyd S. Simmons, head clerk at Pierce & Robbins' Pomona store, is taking his outing with his family at Santa Barbara.

Mr. F. L. Wingard, with Mrs. W., gave us a call August 4th. Mr. Wingard reports business as excellent.

W. T. Gillis, of Gillis & Spoor, Redlands, is visiting his old friends at Santa Monica and getting a taste of ocean air.

C. S. Chesnut, of the City Drug Store, Redlands, recently spent a week, with his family, at Santa Monica.

Mr. Francis Persey, formerly of Long Beach, has accepted a position as manager of the Abbey Pharmacy, in Redlands.

Frank M. Towne, of Towne & Lamb, had a few days' outing at Redondo with his family, who are spending the season at that resort.

Mr. Sam W. Pearce, Pacific Coast traveling representative for Wampole & Co., Philadelphia, is again doing active work in Los Angeles.

Dr. D. W. White, of White & Bailey, San Bernardino, has been ill for a week or two, but, we are glad to say, is now on the convalescent list.

E. F. Root, Tempe, Ariz., has sold to Broadway & Moeur. The new firm have engaged Philo Ozanne of Tempe as their clerk.

W. P. Covillaud, of Covillaud & Francis, Prescott, Ariz., has purchased his partner's interest and will continue the business in his own name.

Aug. Lang made a flying trip around the "Kite shape" last week. He received the impression that business is quiet all along the line.

J. H. Trout took a ten-day flying trip recently to Dakota, going via Kansas City. He says times are prosperous in that part of the country.

Mr. Colson, of Buker & Colson, Fresno, with Mrs. Colson, is spending a few weeks at Catalina for the enjoyment of the delights of that famous ocean resort.

E. F. Tarr, Jerome, Ariz., is now occupying the new concrete building erected for his use by Mr. H. Brisley of Prescott, since the late disastrous fire.

Messrs. Bristol & Rowley, Santa Ana, have been taking their outings at the very convenient Newport beach, with their families, during the past month.

J. D. Se Brell, Riverside, spent the last week in July at Long Beach. Mrs. Se Brell's illness at the beach was the occasion of Mr. S.'s unusual absence from business.

E. E. Armour, Pomona, and F. M. Heath, Riverside, are among the Southern California druggists who have recently enjoyed outings at Avalon, Catalina Island.

Messrs. E. Virden and J. R. Cauch, Santa Paula druggists, paid us a visit during the last days of July. The former, with his family, intended spending some time at Catalina.

Walter Hicks, head pill-roller of the Boswell & Noyes establishment, is spending his vacation at Catalina. It is reported that he is enjoying himself immensely.

We extend our congratulations to Mr. and Mrs. H. N. Stone, San Pedro, upon the advent of a hearty boy, who opened his eyes upon the "harbor" on the 29th of July.

J. W. Wood, Pasadena, left on the 10th inst. for Berkeley and San Francisco, accompanied by Mrs. Wood and their son. The latter will enter upon a course at the University.

We note among the city druggists who are taking summer outings at present, Dr. J. H. Trout, C. A. Black, M. W. Brown, F. N. Drake, Aug. Lang and Dr. S. Whitehorn.

Mr. Charles Fairbanks of Santa Ana is the owner of a fine yacht, and manages it with the skill of an old sailor—so says Will Leithead, who was a guest of Mr. F., one day recently, at Newport.

Edgar J. Mayers, the breezy representative of Andrew Jergins & Co., Cincinnati, has recently been visiting the drug trade of Southern California, and reports increasing sale of Eastman's perfumes.

The store of Collins & Co., Phœnix, Ariz., is now called the Hotel Adams Pharmacy. It is under the efficient management of Mr. Marshall Armstrong, who was formerly head clerk in the Eschman drug house.

Among the successful candidates at Licentiate examination at San Francisco was Ed C. Worth, head clerk of H. G. Dean. We congratulate you, Doctor, and trust that your next trip to the metropolis will bring you equally good fortune.

T. W. Brown, Twenty-fourth and Hoover, recently shipped fifty gross of his well known Mexican Toothache and Neuralgia Remedy to New York—a good order for a local remedy. We hope it will make a fortune for its owner.

James Medland, for five years clerk in the Abbey Pharmacy, left today for his home near Toronto, Canada, upon a visit He will later go to Texas to engage in business in partnership with C. C. Abbey, formerly of this city.—*Redlands Facts.*

Charles Kelley of Long Beach was seen in company with Ed C. Worth on their trip to San Francisco. Reports are that he (Worth) is as happy over the examination as a school-boy in love. That's a strong statement. We await further particulars.

Mr. W. H. Baldridge of Escondido paid us a pleasant visit last week. Mrs. Baldridge and Miss Baldridge, who accompanied Mr. B. as far as Redondo, continued their journey by water to Berkeley, where Miss B. is entering upon a course at the University.

Boyd Bros., late of National City, were moving to Jerome, Ariz., with their stock, when the news of the big fire was received, delaying them en route. Their store, in the new Connor Hotel block, was expected to be ready for occupancy on the 15th inst., so we assume, as we go to press, that the business of the firm has commenced in their new location.

E. J. Laisy has opened a new store at 1545 Loraine street, Cleveland. Mr. Laisy is an alumnus of the Cleveland School of Pharmacy, class of '92. After graduation he went to California, and had been in business there with Smith Bros., of Fresno. The window of his new store exhibits a unique collection of barks from the redwoods of California—one piece measuring two feet and six inches across.—*Drug Circular.*

Wolf & Chilson had their opening August 1st, celebrating the completion of the enlargement and improvement of their beautiful store. The throngs of interested visitors were entertained by performances on the Æolian piano, and by examining the handsome interior. Some fine paintings also contributed to the elegance of the decorations, attracting much attention. We congratulate the proprietors upon the excellent taste displayed in perfecting their fine establishment, and do not doubt that an increased business will reward their enterprise.

Boswell & Noyes narrowly escaped a disastrous fire on the 7th inst. Their porter was filling a five-gallon can from a barrel of alcohol in the vault, and as it was rather dark in there, he struck a match to see how near the can was to being full. He will know better next time, for he got badly burned in the flames that instantly burst out, consuming what had been drawn from the barrel, For a wonder, he had the presence of mind and the courage to close the faucet before saving himself. Had the fire got into the barrel, there's no knowing what the consequences would have been.

His Best Patient.

The young doctor and his friend the drug clerk were sitting at the club window when a richly dressed lady passed by. "There goes the only woman I ever loved," remarked the young M. D. "That so?" queried the other. "Then why don't you marry her?" "Can't afford it," replied the doctor; "she's my best patient."

Good, reliable remedies for chicken diseases are desirable goods to handle. Every druggist has a demand for such. The Sturtevant preparations stand at the head of the list. Look over the advertisement in this issue and see if your line is complete.

The Chemist and Druggist, London, has lost its old-time editor, Mr. A. C. Wootton, who has for thirty or more years filled that responsible position. Mr. Peter McEwan, F. C. S., late assistant editor, assumes the chair made vacant by Mr. Wootton's resignation.

The Lot of a Drug Clerk.

In some respects the lot of a drug clerk is not an enviable one; in many others it is exceedingly so.

The drug clerk is apt to overlook the latter and exaggerate the former, but we believe it to be a fact that the bright, energetic, ambitious drug clerk of the present day has more to look forward to than at any other period in his history that we know anything about. And it is also true that the mere time-killer who does his work in a perfunctory manner and has no thought for the welfare of the man who pays his salary, has less chance to succeed than ever before. One of these truths can hardly be less satisfactory to us than the other, for the clerk of today is the proprietor of tomorrow, and if the clerk is energetic and conscientious and ambitious, the better proprietor he will be, and the better proprietors we have the better will be the condition of the drug business in general.—*The New Idea.*

OUR ADVERTISERS.

The official organ of the San Diego Retail Druggists' Association.

The official organ of the Los Angeles County Pharmaceutical Association.

THE National Wholesale Druggists' Association and the Proprietary Association of America, whose annual meetings are held at the same time and place, decided to change their place of meeting from Old Point Comfort to Niagara Falls, on account of the possibility of yellow-fever germs remaining in the former locality. The date of the meeting is October 10, and the occasion will be one of special interest to the retail trade, as the question of harmonious relations with the proprietors will depend to considerable extent upon the action taken at this meeting to bring into line the members of the P. A. of A. who are antagonistic to the plans and wishes of the trade. The large number of proprietors who are outspoken in favor of supporting the demands of the retailers, but emphasizes the stubborn self-sufficiency of those who have refused to fall into line, and it will be interesting to note the manner in which the matter will be handled by the Association when the representatives from tha N. A. R. D. present their case and insist upon action.

THE olive-growing industry of Southern California is under discussion these days, and widely varying opinions are promulgated as to the present and prospective outlook of the business. It is doubtless true that in some localites where the olive has been extensively planted the yield of fruit has been disappointing, while in other sections we learn that the crop is satisfactory. It is a fact that there is no longer a boom in the olive nursery-stock business, which a few years ago was so prosperous, and we hear of no new orchards being set out. We should, however, remember the habit of California orchardists to expect quick profits, and that many orchards have been dug up and planted to other fruits because of a temporary dulness in price of the one and a high price for the other fruit. There is an old saying—"plant a vineyard for yourself, an orange grove for your children, and an olive orchard for your grandchildren." Possibly our large yield of olives is to come many years hence, when our orchards are old and another generation is cultivating our fields. Be that as it may, we are not to neglect the proper care of our trees, nor may we allow the black scale to sap their vitality. Crops of scale and of olives need not be expected the same year. Let the trees be kept clean or dig them out.

DRUGGISTS, see if you have done your whole duty by the N. A. R. D. This is the critical year, and local associations should be found wherever practicable, and stand up with their brethren who are actively engaged in the work of reforming trade conditions. The very moderate contributions asked for are actually needed, and should be promptly as well as most cheerfully accorded.

WE are in receipt of a copy of the Proceedings of the Missouri Pharmaceutical Association at their 1899 meeting, which as usual, is full of interest, containing many suggestive papers by members upon practical questions. Missouri pharmacists are ever alive to the interests of their profession.

A NATIONAL Exposition of American Manufactures for the Expansion of Export Trade. Philadelphia, Sept. 14 to Nov. 30, 1899. Above few words give just an inkling of what will probably prove one of the most important moves on behalf of American commerce that has ever been made. The interest that has been taken by the manufacturers of this country in securing space for their products indicates their intention to put forth their best efforts to show to the world whatever of superiority may exist in American manufactures, and to impress the same upon our foreign visitors.

It will be notable as a strictly business exhibition, the delegates from foreign countries, a very large number of whom will be present, coming, not to gratify a transient curiosity, which is the mark of most World's Fair visitors, but to study our processes and compare our products with those of other countries. In the second month of the exhibition (Oct. 10) will be held an International Commercial Congress in Philadelphia to which the leading governments will send representative men, and for the success of which, as well as of the exhibition, the city of Philadelphia is putting forth its most earnest efforts. The triumphs of the arts of peace will for the time being overshadow the war spirit, and nations will be brought to friendlier relations under the shadow of old Independence Hall.

Whether California will take any part in the exhibition is unknown to us, but in fact the position of the Pacific Coast relative to our new possessions brings us geographically to the front commercially and industrially, and we shall be greatly disappointed if the results of the Philadelphia Exhibition and Congress do not help us to see our opportunity.

THE opening of the Twenty-eighth Session of the California College of Pharmacy occurred on Wednesday, August 16th, and we regret that we were unable to accept the invitation to be present so cordially extended by the President and Faculty. It is a matter of congratulation that the College now occupies its new quarters in the Affiliated Colleges Building on Parnassus avenue, where its work may go forward to ample fruition under its able corps of instructors.

We once more advise every young pharmacist on the coast, whose ambition is above bottle-washing, to make his plans cover a course in the California College of Pharmacy.

THE return of the California troops from Manila to be mustered out furnished our San Francisco friends last month with a first-class opportunity, which they did not neglect, to display their hospitality as well as patriotism.

In consequence, the boys came home in a blaze of glory, and the metropolis was wild with enthusiasm. Los Angeles will soon be able to welcome her contingent, Battery D, who will some day this month, after being mustered out at San Francisco, be received with a royal welcome by their Los Angeles friends.

WE regret to announce the death of S. Caldwell, Pomona, which occurred Wednesday, Sept. 6, from an apoplectic stroke, at his rooms in the Caldwell block.

Increasing infirmity, which had been coming on for several years, led him to dispose of his drug business about three months ago. Mr. Caldwell was a man of the most scrupulous integrity of character, simple-minded and unsuspicious, yet successful in business, having accumulated a fair amount of this world's goods during his many years of business life. He came to Pomona sixteen years ago and was therefore one of the pioneers of that flourishing city. We add our tribute of respect to his memory, which will long remain green among his fellow citizens and friends.

Here at Last.

The retail trade have now an opportunity to supply their customers with a positive ridder of ants and flies.

This very effective article is described in our advertisement of the "Fly Buttons," and will be found attractive and readily salable.

Retailers realize rare premiums and rich profits.

Druggists who are critical in the matter of pure liquors will be interested in the advertisement of Shufeldt's Gin on second page of cover.

We take from the supplement to the Chemist and Druggist's midsummer issue the following description of the establishment of Wm. Sanderson & Sons in Messina, Sicily, which we are sure will be read with interest. The article is illustrated by many fine cuts, which we regret our lack of space to reproduce:

The main part of the business of this firm is the manufacture of Essence of Lemon, to describe which process is the chief object of this sketch.

It also manufactures Oil of Orange and Oil of Bergamot. For the special production of the latter there is a branch establishment in Reggio Calabria, the best Bergamot and Orange growing in that district, the Sicily fruit found deficient in perfume.

Peels in brine are another one of the citrus products in which the firm operate largely.

The process is most simple; the fruit is cut in two and placed in pipes or half-pipes, which are then filled up with sea-water. After standing for about ten days the pipes are emptied, the fruit washed, repacked in the pipes and coarse salt put in to the amount of 80 lbs. to each pipe, or half that quantity to each half pipe, and it is then ready for shipment.

One of the very first moves made by the present head of the firm was to throw more safeguards around the manufacture of *Oil of Lemon*, which, since time immemorial, has been made by the very primitive, and by no means cleanly, method of expressing the oil by hand upon a sponge which, when full, was squeezed into a basin. It is needless to say that the surroundings of the peasants, who worked in their own houses, were by no means inviting. To accomplish his idea the first necessity was to establish a factory where the oil could be made under his personal supervision, which was at a great expense, and after surmounting an almost endless array of obstacles finally successfully accomplished.

Starting from the city office, one of the handsomest buildings on the Marina, let us make a visit to this structure, which is located at Tremesieri, about three miles from Messina.

Our route leads us along the shore of the lovely Straits of Messina. Opposite, upon the Calabrian Coast, basks Reggio, the Reggium of ancient times, made famous by the visit of St. Paul. On our right rise up the Sicilian Mountains, on the incline of one of which we see the Campo Santo, equal in magnificence to that famous other one at Genoa, while on either side of the drive the gnarled and irregular hedges of cactus, like a battalion of cripples drawn up in line, guard the way. From our carriage on our return we see Nature painting the placid bosom of the Straits in the sunset, with combinations of colors that the mind of even a Turner could never conceive, and which are ever shifting like the tinted fragments of glass within a kaleidoscope.

Yon tall chimney, from which issues a pillar of smoke both day and night (the whole building being illuminated by electricity), for the work never ceases during the busy season, tells that we have arrived.

Before entering, the visitor's attention cannot but be attracted by the very great advantages of the site from a commercial point of view. Standing about three hundred yards from the shore, shipments intended for foreign ports can be put directly aboard the steamers, which anchor a few yards from the beach. The main railroad of Sicily passes directly in front of the factory, where is situated the station of Tremestieri. This road is built immediately through the lemon-producing center, and so, practically, the fruit is brought from the tree and landed ready to be worked.

In addition there is a steam tramway which also passes the door, its termini being Messina and Giampilieri.

For the shipment of goods by steamer, a private narrow-gauge line runs direct to the water's edge, whence the goods can be speedily put on board. The lemons used, however, do not all find their way here by either rail or tram. The primitive Sicilian cart is a large factor in the transportation, for thousands and thousands of boxes come from the interior, where the echoes have yet to be awakened by the shriek of a steam whistle. This vehicle has its prototype nowhere in the world. In its conglomeration of colors, the proverbial coat of Joseph must have been a weak, insipid and colorless symphony.

Its decorations show that numberless embryo Michael Angelos have talents that go a-begging in Sicily. The panel on one side of the cart will perhaps represent an historical scene, such as Dionysius in the forum at Siracusa, while the other will depict the adoration of the Magi, or some similar biblical episode.

Let us follow a load of these lemons from the cart through the factory until we see the essence packed. Passing through the large gateway, their first halting place is in a bin, of which there are seven, each capable of holding about 170,000 lemons, so that in the busy season there is never less than one million lemons on hand. From the bins they are carried in baskets to an over-head platform, where we find, not as in the old method, men, women and children, whose personal appearance by no means impressed one that a daily or even a monthly ablution was one of their indulgences, but the cutting machines.

By the side of each one of these stands a child who deftly places a lemon into each of the small scoops, which are continually revolving, being driven by a 20 horse power Tangye engine. These scoops come in contact with stationary knives, the fruit is cut exactly in halves and passes down a wooden shute to a lower platform where the pulp is "spooned," as it is termed, from the skin by women.

What becomes of the former we shall see later on; for the present we shall confine ourselves to the skins, which are at once submerged in pure water in order to relax the pores, so that the oil will issue more readily, and are then allowed to dry for twelve hours.

And now we come to the greatest achievement in the manufacture of Lemon Essence. In this establishment *no human hand coaxes from the peel the virgin oil.* The work is done *entirely by a machine*, the construction of which is most ingenious, the motion reproducing that of the human fingers, which gently bruise the cells, and the exuding essence, averaging about ten drops to the rind of each lemon, is collected upon sponges, which are kept thoroughly cleansed, and the contents from time to time automatically squeezed into earthenware basins placed beneath them.

To the observant onlooker at this process, the impression given must be a most gratifying one. With Bergamot, which finds its great consumption in the manufactures of Cologne, soap, etc, it makes comparatively little difference under what conditions it is produced, but with an essence which enters largely into our food consumption as does Essence of Lemon, it will be a pleasure to the consumer to know that the extract which gives gusto to his puddings and his sweetmeats, has been expressed by the polished fingers of mechanism, and not by the filthy hands of a Sicilian peasant family in a squalid hovel, where pigs and poultry claim equal domain with humanity.

Previous to the building of this factory, no house in Messina was ever able to manufacture, upon the premises, all the lemon oil for which it had demand, and was therefore necessarily obliged to buy from peasants. who, stupid as they may appear in other respects, know full well that a pound of turpentine is many times cheaper than a pound of essence, and never hesitated, in former times, to adulterate to as great a degree as they dared, so that the merchants themselves who were not practical chemists, were often deceived; but even in the old days, no claim was ever made that the house of W. Sanderson & Sons sold but the purest, for no oil was ever offered that was not submitted to the most crucial analysis in the very complete laboratory attached to the city office. From the earthenware receptacles into which the oil is squeezed from the sponges, it finds its way to large tin-lined copper stand casks, where it remains until thoroughly settled.

It is then drawn off, passed through filtering paper and packed ready for shipment in copper jars, also tin-lined, generally of a net capacity of 25 English pounds.

To profitably manufacture Oil of Lemon, it is absolutely necessary that every particle of the fruit be used to some purpose, and this brings us to the pulp, which we left under the platform, near the cutting machines.

This is utilized for the making of both raw and concentrated juice, which enters largely into chemical uses, and the manufacture of which requires boilers, presses, etc., with which the factory is largely provided.

This pulp is first taken in round straw baskets and placed under powerful presses, from which the juice runs into troughs, and from thence pumped into large wooden vats where it is allowed to clarify. The residuum in the baskets, after the presses have done their work, is sold for cattle food at about two cents for 200 pounds.

The product, which is technically known as Raw Juice, in order to concentrate it, is then run in vacuum pans or open cauldrons, and boiled down until it is evaporated to from one-sixth to one-tenth its original volume, according to the degree of concentrated acidity required. It is estimated that one pipe (viz. 130 gallons) contains the raw juice of 13,000 lemons, while a pipe of concentrated juice will require the product of 130,000 lemons.

The entire output of this branch of the business is sold upon the London market or elsewhere.

F. W. Braun & Co. have received from the manufacturer RAUB'S CUTANEOUS SOAP, which is sold at the same price as Raub's Egg White Soap and with free sample cakes equaling in number the regular size bought. The splendid sale of the "Egg White" testifies to its high quality and the "Cutaneous" will be found quite as desirable, being well made and highly perfumed, while filling a real want of the trade. Add some to your next order.

Mr. Smiler's Little Way.

BY M. QUAD.

When Mr. Smiler bought out the White Front Drug Store a few months ago the business was on its last legs, and it was the general opinion that he'd sink what money he had and throw up the sponge. The White Front was a good location, but business had been falling off for several years and no one could exactly tell why. I had ceased to be a customer, with many others in the neighborhood, but if asked why, I had no good reason to offer. I was among the first to walk in on Mr. Smiler to get a line on him, and ten minutes later I'd have bet dollars to cents that he would make a success. What the White Front man had lacked, Mr. Smiler had up his sleeve by the carload. He hadn't a hundred dollars in cash as spare capital, but he had a way with him.

"Why, good morning to you — g-o-o-d morning!" he heartily exclaimed, as he advanced with outstretched hand. "You are looking well this morning, and I hope none of the family are ailing. Tooth powder? Why, of course, and if you find it to your liking I'll keep it in stock for you. Just got my soda water fountain in operation this morning. Try a glass of my root-beer to please me. I see you smoke. Just mention your brand and I'll have it here in stock. Drop in for a chat occasionally. I'm new to the locality and want to get posted."

That was all taffy, of course, but it flattered me just the same. I went home to hunt up the family ailments, and within twenty-four hours I had sent to Mr. Smiler for vaseline, paregoric, borax, cough syrup, bird-sand, malt and cod liver oil. Not only that, but I told my neighbor, Mr. White, to drop in. He did so, and Mr. Smiler greeted him with:

"Ah! glad to see you, sir—g-l-a-d to see you! I believe your servant girl was in here after a bottle of magnesia for the children. Hope they are all right, Mr. White? You are looking rugged, and I congratulate you. Sit down and smoke a cigar with me and tell me what was the matter with this store before I bought it out."

That was taffy again, but Mr. White was pleased over it. That was the line Mr. Smiler took from the very first day. I knew he had struck the road to success, but I dropped in occasionally to note how he dodged the corners. I was present when a lady called to dispose of three $1 tickets for a Sunday-school excursion.

"Sunday-school excursion!" exclaimed the smiling Mr. Smiler, as he came out from behind the counter rubbing his hands—"dear me, but I'd buy twenty-five tickets if I wasn't pinched to meet a bill due tomorrow. Bless the Sunday-schools and the dear children and the teachers! I feel like paying for the whole thing, but I must look out for my business credit. There'll be another excursion later on, or a church festival or a fair, and don't forget me or my feelings will be hurt. Good evening to you, and just use my name everywhere you go, and don't fail to call on me next time."

I was there when the secretary of the Amalgamated Workingmen's Union came in with five $1 tickets to a barbacue. His programme was to remark to Mr. Smiler that 250 of the members lived within a half a mile of the store, and that they patronized the druggist who patronized them, but before he could get out a word the druggist had him by the hand and was saying:

"Had you passed me by I should have felt slighted. Yes I saw by the papers that you were to have a barbacue. Good thing. Splendid thing. Can't help but strengthen your cause and lead to success. If I only had time I'd be with you that day and make a little speech. As to tickets, I'd take fifty if I wasn't so infernally pushed for money. Can't spare a dollar today upon my word, but don't miss me next time—d-o-n-'t miss me! I'm with you, you know, but I've got to pay my bills or those heartless wholesalers will close me up. Here—have a cigar or a glass of soda.

And again I was present when the woman who wants poison and sympathy equally mixed made a call. She shows up at every family drug store about once a month. Trouble with her husband has decided her to shuffle off through the medium of arsenic, but before taking the fatal dose she wants to be assured that she has the sympathy of the public.

"My dear, dear woman", began Mr. Smiler as he took both her hands in his, "don't take arsenic and don't die. We all have our home troubles, but we must bear them bravely. Your husband can't spare you, the church can't spare you, and the neighborhood would be grieved and astounded to hear that you even contemplated suicide. Bless my heart, but what an idea—what an idea! Never worry over anything your husband says or does. Men are strange animals, and you must take them as they run. Here—take a glass of wine, and let's hear no more about arsenic. James, put on your hat and see the lady home in good shape—in g-o-o-d shape."

Mr. Smiler knew that the ward politicians would be canvassing him to know where he stood, and he was ready for them. When the plummer on the next block came in one day for a five-cent cigar and incidentally remarked that a Democratic ward caucus was to be held that evening, and he hoped to see every true patriot on hand, Mr. Smiler smiled his broadest and blandest as he replied:

"A ward caucus, eh? Ah! if I only had a responsible person whom I could leave in charge here for an hour or two! I'll try my best, but if I'm not there I hope you'll drop in and tell me who was nominated. Of course, we'll elect him by a large majority—bound to elect him—b-o-u-n-d to do it."

The plummer went away to tell everybody that the druggest was a Democrat from head to heel, and a day or two later the butcher dropped in to get a porous plaster and to carelessly observe:

"Knowing that you are in favor of honest local government I thought I'd remind you that we have our Republican ward caucus tonight."

FACSIMILE OF OUR
ONE OUNCE

Copper Container of Otto of Rose

OTTO OF ROSES
KAZANLIK
Bolu Pappazoglou & Co Kazanlik
from Bulgaria

This very desirable package enables the drug trade to buy the article strictly as imported from Bulgaria, as the original seals and marks upon the coppers preclude any possibility of tampering with the contents.

We are confident that purchasers will be pleased with the goods, and solicit orders for the same. **Price, per oz., $6.50**

Be sure and specify Pappazoglou's.

F. W. BRAUN & CO.
LOS ANGELES, CAL.

"Ah! thank you—thank you", replied Mr. Smiler in the heartiest manner. "Yes, we must have an honest man to represent this precinct, and I shall be proud to help nominate and elect him. I'll do my best to get there, but if I don't show up I'll take off my coat on election day and make things hum. Got to elect him by 200 majority—g-o-t to do it."

Deacon Schemerhorn, who never patronizes anything outside of the Methodist church if he can help it, dropped in to see how the land lay and mention that there was a vacant pew next to his, and Mr. Smiler fairly beamed on him as he replied that he hoped to get settled within a few weeks and reserve church hours for himself.

Deacon Sabin, who wouldn't buy coal, meat or groceries of anybody but a Baptist, dropped in after Deacon Schemerhorn to solicit a contribution to purchase a bell, and Mr. Smiler was softer than silk as he replied:

"Why of course—of course! We must have a bell for our Baptist church, and it must be a boomer. Let's see, now—let's see? Come in later and we'll talk it over. Yes, we've got to have a bell—g-o-t to have one, and I don't know but I'll go in for chimes."

I can't tell you whether Mr. Smiler is a Democrat or a Republican; whether he sympathizes with labor or is a high-headed aristocrat; whether he believes in expansion or contraction—free silver or gold basis. He doesn't mean that I or anyone else shall know. It's his business to be bland and smiling and fatherly and urbane. It's his business to dodge and evade, and yet be interested in everything. The White Front drug store is doing such a rushing trade that he must shortly get in a third clerk. Until last night I couldn't ex-

Watered Whisky....

RED FERN

Fine Old Sour Mash

This whisky, made by the Greenbriar Distillery, is one of Kentucky's best whiskies; it has been stored in United States Government Bonded Warehouse for years and is properly matured. Under Government supervision and internal revenue regulations, in bonded warehouse, this whisky was reduced to 90 proof, repacked in new freshly charred barrels, and is perfection itself. No whisky should be sold *for consumption* at a higher proof than 90, and while any one can add water to whisky, few recognize the fact that good whisky is spoiled by adding water at inopportune times and under wrong conditions.

Whisky should have proof reduced only in well charred wooden packages, and after addition of water allowed to stand for sometime to permit of thorough assimilation, as well as absorption by the charcoal in the barrel of oils and ethers always present in and held in solution by high-proof whisky, but liberated when water is added, and the elimination of which is necessary to secure that fine rich smooth taste always sought for by consumers of whisky.

Order a barrel of "Red Fern," let your most critical customers try it and you will be pleased with results.

actly figure it out why I went back on the other druggist. Then I went into Smiler's for some quinine and he came rushing at me to exclaim:

"Ah! but I was just thinking of you and about to send around to the house and ask if you were ill! Why don't you come in oftener and give me pointers? Always open to pointers, you know, and you've got a level head on you. Drop in every day and say good morning at least—d-r-o-p in any time."

And then it came to me that the other druggist didn't have a little way about him—a Smiler way—a t-a-f-f-y way.—*Amer. Drug.*

A New American Novelist.

A new figure in American literature is Cyrus Townsend Brady. He was born in Allegheny City, Pensylvania, in 1861. His ancestors fought in the army and the navy during the Revolution and the succeeding wars, two of them being officers of the Continental line. One commanded a regiment under General Scott in the war of 1812, and died a Major-General. One was killed at Antietam. Young Brady thus inherited from his Scotch-Irish stock the sturdiest courage and patriotism. At seventeen he entered the United States Naval Academy and graduated in the class of 1883. Ten years ago he entered the ministry of the Protestant Episcopal Church. For three and one-half years he was Archdeacon of Kansas, and for four years he has been Archdeacon of Pennsylvania. In the recent war he went to the front as Chaplain of the First Pennsylvania Regiment.

Doctor Brady has written a new romance of the War of 1812, following the fortunes of "Old Ironsides," and in it his brilliant genius has produced the most thrilling novel of sea life in American literature. It is called For the Freedom of the Sea, and its serial publication will begin in the Saturday Evening Post of Philadelphia, in September.

Scientific Tooth Powders.

Arthur Thayer, Ph. G., very correctly lays down the principle that a tooth powder must contain a detergent but be free from gritty substances and ingredients liable to ferment, not to mention those chemicals attacking the enamel. Besides, a tooth powder should be slightly alkaline to neutralize the acids of the buccal cavity. Antiseptics are desirable. These requirements are met by carefully bolted precipitated chalk, castile soap, saccharin and betanaphthol. Many dentists, however, advocate levigated prepared chalk. The soap, which in itself is a good disinfectant, may be present in the proportion of from 3 to 5 per cent. The betanaphthol, the author says, leaves in the mouth a pleasant, pungent taste; he calls it the best germicide for the purpose. Oil of cassia and wintergreen, it may be remembered, are also strongly antiseptic. The best authorities now condemn the presence in tooth powder of vegetable powders, like orris, and of sugar. Mr. Thayer submits the following as almost ideal preparations:

PLAIN TOOTH POWDER.

Precipitated chalk	92	g.
Castile Soap, dry	8	g.
Saccharin	0.15	g.
Oil gaultheria	6	m.

ANTISEPTIC TOOTH POWDER.

Oil sassafras	6	m.
Precipitated chalk	96	g.
Castile soap, dry	3	g.
Betanathphol	1	g.
Saccharin	0.42	g.
Oil rose	3	m.
Ext. musk, opt	2	gtt.

The flavors, of course, may be varied to suit, one good combination, resembling Kallidont, being 45 parts each of oil of peppermint and gaultheria, 12 parts each of oil of clove and cassia, and 4 parts of oil of anise.—*West. Drug*,

Ointment with Cocoanut Oil.

An ointment base composed largely of cocoanut oil may be made on the plan of the so called "cold creams," the proportions being changed or modified to suit the conditions or purposes for which the preparation is wanted. Here are two formulas which are offered as suggestions:

(1)	White petrolatum	6	ounces
	Paraffin	1	ounce
	Cocoanut oil	8	ounces
	Lanolin	4	ounces
	Water	6	ounces

Melt the petrolatum, paraffin and cocoanut oil, pour into a warm mortar, add the lanolin and with constant stirring incorporate the water. The mixture may be perfumed as desired or employed as an ointment base for the administration of other medicaments.

(2)	Cocoanut oil	½	pound
	Petrolatum	¼	pound
	Lanolin	¼	ounce
	Powdered soap	2	drams
	Water	4	ounces

Mix the cocoanut oil, petrolatum and powdered soap and gently heat on a water bath; when melted incorporate the

N. A. R. D. Notes.

CHICAGO, August 5th, 1899.

San Francisco, July 18th, 1899. Mr. T. V. Wooten, Sec'y. N. A. R. D., Chicago.

Dear Sir: It is highly gratifying to the writer to state that organization of the retail druggists has at last been accomplished. The organization is known as the Associated Retail Druggists of San Francisco. Great enthusiasm was shown by all present. The following were the officers chosen: H. F. Wynne, President; E. P. Gates, Vice-President; H. Haman, Secretary; J. S. Warren, Treasurer. At the next meeting it is expected that our members will be greatly augmented; everything looks bright for the future as far as members are concerned. Kindly send me any information you can for our next meeting. Will affiliate with the N. A. R. D. in the near future. I will inform you occasionally as to the progress made. Very respectfully,

H. HAMAN, Secretary.

The retailers of Tennessee are thoroughly in earnest in their determination to put an end to price cutting in their State. Writing to the National Secretary a prominent member of the Tennessee Druggists Association says: "I believe the situation in this State demands vigorous action from the start. I think we have officials that will push it when is is started, and I want to get them started in the right way so as not to undertake anything that we cannot sustain and push to a finish." It is worthy of comment that no State association has given the N. A. R. D. more hearty endorsement than that of Tennessee. One member writes that the hope inspired by the new movement has given the druggists of that commonwealth a new lease of life.

The following extracts from letters received during the week from proprietary manufacturers are self-explanatory, and will be regarded interesting reading by those who desire to know the attitude of this branch of the trade toward the progress being made by the N. A. R. D.:

"We are heartily in accord with anything that will reestablish the former retail price and prevent cutting of all proprietary articles, and you may place us in your report as heartily in sympathy with you."

"Regarding the placing of proprietary medicines in the hands of department stores and cut-rate establishments, we wish to emphatically state that you cannot deplore it more than we do, and if there is any way by which we can stop the same, you may rely upon us to adopt that method. The only way that we are aware of at present is to refuse to sell to all who are not acknowledged to be reputable and responsible wholesale dealers, and this has been our policy for the last thirty years. We have never sold our medicines to any persons, either directly or indirectly, whom we knew or suspected to be cutters, and if our medicines are found upon their shelves, we must beg that you do not blame us. We are able to swear that we have conscientiously endeavored in every way to keep our medicines out of the hands of cutters and department stores."

"Your favor of the 15th just received, and if we have erred in making any shipments to the ——— firms enumerated in your list, we did so solely because we were not in possession

THE U. S. DISPENSATORY

For sometime out of print, is now coming out in a New Edition, which we expect to receive about October 1st. We shall be pleased to enter orders to be filled on arrival.

It will be several years before the revision, to be made in 1900, can be issued.

F. W. Braun & Co.

of facts, nor any requests made by your committee or any committee, wholesale or retail. We appreciate your kind remarks, and wish to assure you that we will not put a barrier in your way by supplying the dealers in question with any more goods until perfectly agreeable to the N. A. R. D."

DURHAM, N. C., July 28th, 1899.

Thos. V. Wooton, Sec'y, Chicago.

Dear Sir: I enclose you application for membership in the N. A. R. D. for the North Carolina Pharmaceutical Association. The subject of joining the national association was brought up at our meeting in May, and our entire membership was very enthusiastic and voted to join without a dissenting voice. We are all in sympathy with the movement, and you will have our hearty co-operation. We are in the fight and propose to fight to a finish, Yours truly,

(Signed), P. W. VAUGHAN, Sec'y N. C. P. A.

NEBRASKA STATE PHARMACEUTICAL ASSOCIATION.
BULLETIN NO. I.
PRESIDENT'S OFFICE, KEARNEY, NEBRASKA,
July 31, 1899.

To the Druggists of Nebraska: Your attention is respectfully called to the resolutions passed at the last meeting of Nebraska Pharmaceutical Association: (1) Our complete and unqualified endorsement of the N. A. R. D. (2) Provisions for the affiliation of our State association and for sending delegates to the first annual convention of the N. A R. D., to be held at Cincinnati October 3rd, 4th, 5th and 6th, 1899. (3) Provisions for the organization of our State by counties in the manner suggested in enclosed communications. Realizing the efficiency of any association depends largely on the support it receives in each locality, the State Pharmaceutical Association believes that by joining the National Association we will help it both in a moral and financial sense, and by so doing protect the individual druggist in getting a fair profit for his goods and a satisfaction in doing business throughout the land. The organization of the State by counties has been commenced and we trust in a short time to have same completed.

Brother druggists, the time has arrived when we must ally ourselves for the common cause, and to that end I request you to contribute toward defraying the expense of joining the National Association. The cause is a worthy one, and I trust you will respond at once, so that we can file our application in plenty of time. Remittances can be made to me direct or through assistants appointed by me. The names of all donors will appear in Omaha Druggist. Enclosed is printed matter regarding the N. A. R. D. which will be of interest to you.

Yours fraternally,

H. A. SMALL, Pres. N. S. P. A.

At a meeting of the Philadelphia Association of Retail Druggists, held August 4th, the names of twenty-eight new members were presented, making a total membership to date of 361. A list of the aggressive cutters and department stores handling drugs was ordered to be sent to the national executive committee. The Alumni Report was made the official organ of the association. It was decided to hold the October meeting September 29th, in order not to conflict with the time of holding the meeting of the national association. A special committee, composed of Messrs. Poley, Morrison and Gabell, was appointed to inquire into the formation of near-by county associations, the committee to report at the next meeting. Some other important items of business were considered. The next meeting of the association will be held at the Philadelphia College of Pharmacy, Friday, September 1st, at 3:00 p.m.

At a recent meeting of the Virginia Pharmaceutical Association the following was unanimously adopted: "Resolved, that in order to strengthen the power of the National Association of Retail Druggists the Virginia Pharmaceutical Association declares itself in full accord with its aims and objects and promises its hearty affiliation." The meeting is said to have been a very lively one, the debate on the resolution calling forth some excellent speeches.

The Colorado Pharmaceutical Association endorsed the N. A. R. D. at its recent meeting. Resolutions were adopted commending the work of the National Executive Committee and promising it financial aid. Delegates will be sent to the Cincinnati convention.

The exhibition of nauseous drugs in palatable form has of late years reached the distinction of a fine art, and manufacturing chemists are now reaching out in all directions with a view to finding new methods of exhibiting drugs in a form in which they will be most readily assimilated. One of the most difficult drugs for patients to assimilate is iron, and a French chemist has devised a novel way of introducing it into the system. He has observed that hens can readily digest iron, and render it back in the form of egg albumen, which is easily digested by the weaker stomach of the human being. He therefore administers considerable quantities of iron to the hens with their food, and, after three or four days, the eggs are found to be very rich in iron, and by modifying the amount administered he is now enabled to offer to suffering humanity eggs containing any percentage of iron which the physician may desire to use. Experiments are also being conducted with a number of other drugs, and the Frenchman hopes soon to place on the market a line of eggs which will relegate to the background the pill and tablet lists of the manufacturing pharmacists.—*Drug Topics.*

MEDICINE TAX RULING WILL BE ENFORCED.

Collector Treat Receives Notice of the Internal Revenue Commissioner's Recent Decision Regarding Remedies that are Advertised.

The ruling of the Commissioner of Internal Revenue, reported in Wednesday's Commercial, that all patent medicines are taxable, has been called to the attention of Collector Treat. The matter is covered in circular 501, revised, pages 4 and 5, paragraph 8, which reads as follows :

"All mixtures or prescriptions by whomsoever sold, the demand for which is created by circulars, circular letters or public advertising, and which by reason of such solicitations pass through the mails or express to the consumer. This includes preparations made by physicians or other persons who seek patronage by postoffice or by printed circulars or advertisement or who solicit the afflicted by means of classified lists of afflicted persons."

"The one material point," Commissioner Wilson says, "that renders the medicine taxable is the established fact that the physicians or companies so advertise their ability to cure disease, and so supply patients with certain medicines whether prepared by themselves or other persons."

Collector Treat will make a systematic investigation in the Second District with a view of ascertaining if such advertising physicians or companies are stamping their medicines. If the fee is, say $5, the medicines supplied must be stamped to the amount of 12½c.—*N. Y. Commerial.*

F. W. BRAUN & CO.

HOUSTON, TEXAS, June 28th, 1899.

Editor California Druggist :

DEAR SIR—We are looking for the heirs of Patrick Burton O'Connor, who, we have reason to believe, went to your State in '49. Any information will be received with thanks by

Yours truly,

Box 523. HENRY MALMYSER.

Business Personals.

Lynn Boyd succeeds Boyd Bros. at Jerome, Arizona.

Dr. A. S. Russell has opened a drug business at Washington, Ariz.

Dr. Emilio Weschcke has opened a new pharmacy at Nogales, Ariz.

Geo. W. Wood succeeds J. F. Campbell, Selma, Cal., in the old Kilbourn store.

N. J. Sanders has moved his drug stock (the N. Y. Pharmacy) from Los Angeles to Oxnard.

Geo. Phillips, late with the Natick House Pharmacy, this city, has accepted a position with Jones & Son, Ventura.

Mr. W. M. Bramhall, of the Court House Drug Store, San Bernardino, paid a business visit to our city on Thursday last.

Mr. Lloyd S. Simmons, head clerk for Pierce & Robbins, has resumed his accustomed labors after a pleasant vacation spent at Santa Barbara and Ventura.

J. A. Lyon, formerly of Bakersfield, has bought the Eagle Drug Store, Salinas. We extend to him our hearty good wishes for a successful business in his new field.

Dr. D. W. Rees, of Needles, is spending a short time in and about Los Angeles for purposes of business and recreation. We received a pleasant call from him on the 7th inst.

Otto G. Freyermuth, who has been with Pierce & Robbins, Pomona, during his summer vacation, has returned to the California College of Pharmacy to continue his studies.

J. J. Schnitker, who is a popular employé of Heath & Morrison, Riverside, called on us last week. He is taking his summer outing and we trust enjoying himself to the full.

Geo. L. Robbins, Porterville, managing partner of Pierce & Robbins in that place, is said to dispense the finest ice cream soda in the San Joaquin (or any other) valley. This is no joke either, but a cold fact says our informant.

As we go to press the wedding bells are ringing for the marriage of H. P. Wightman, Pima, Arizona, and Maud, daughter of Mr. and Mrs. S. J. Sims, of the same place (Sept. 12th). Our congratulations and best wishes are hereby heartily extended.

Frank Kemper of this city has accepted a position in Tombstone, Arizona, where he takes charge of the Tombstone Drug Store. Mr. Kemper bears an excellent character as a man and as a competent pharmacist, and we doubt not will make many warm friends in his new location.

The Parchen-D'Acheul Drug Company, Butte, Montana, has sold out to James Finlen, M. J. Mendin, Hugh I. Wilson and W. J. Welch. The name of the corporation has been changed to the Finlen-Mendin Drug Company, of which W. J. Welch will be secretary and manager.

B. F. Crews, Monrovia, has returned from an outing at Catalina.

R. F. Billings, Corona, is spending his vacation in San Diego.

Q. R. Smith, Santa Ana, took a week off at Newport early this month.

C. E. Weck, Riverside, has returned from his vacation which was spent at Catalina.

Harry Brisley, Prescott, A. T., has recently added a very fine cigar show case to his equipment.

Frank M. Towne, San Bernardino, is having a three weeks' outing, with his family, at Redondo.

Dr. D. W. White, San Bernardino, has returned from his San Diego outing greatly improved in health.

Frank Morrison of Heath & Morrison, Riverside, has returned from a two weeks' outing at Long Beach.

I. N. Wood, lately with Off & Vaughn this city, has accepted a position with O. L. Halsell, Santa Ana.

W. T. Gillis of Gillis & Spoor, Redlands, started on the 7th inst. for a two months' visit to Nova Scotia, his early home.

Tom Neville, with B. F. Crews, Monrovia, has recently returned from a four weeks' hunting and fishing trip in Kern county. It was a health-giving excursion, and somewhat exciting. On one occasion the party almost saw a bear!

F. W. Smith, late of Seligman, Ariz., has bought the interest of Dr. C. F. Roberts in the drug business at Seligman, and has moved the stock to Williams, where he has opened a new store. Mr. Smith's long experience and his familiarity with local conditions give him a strong pull on the trade of Coconino county.

The Orange Pharmacy, which for some time past has been owned by Dr. Wood, has been purchased by Mr. K. E. Watson, late of Prescott, Ariz., but formerly a resident of Santa Ana. This is a good store in a good town, and will be run in good shape by Mr. Watson, for whom we predict a successful business career.

O. L. Braddock has purchased the business of H. I. Nance, Fifth and Hill streets, this city, and has moved the stock and fixtures to Pasadena, making large additions to his prescription stock, drugs and sundries, in order that his variety may be second to none. We trust he may find a favorable field in his new location.

H. Fairbanks & Son, Santa Ana, have enlarged their salesroom, recently, by moving back their prescription department, and have made some handsome improvements in the interior arrangements of the store putting in elegant linoleum floor covering, a new perfume case, etc. Mr. Fairbanks, senior, now has his business desk in the front part of the store.

E. L. Hill, late of Pomona, has accepted a position with F. G. Ludlow, in the Natick House Pharmacy, this city.

San Diego Items.

E. J. Wolff and family enjoyed their outing this year at La Jolla.

E. Strahlmann has returned from his mountain trip feeling much invigorated.

Chas. A. Chase and wife and Major Levi Chase have returned from Lake Tahoe.

Mr. Huckstable of the Coronado Pharmacy has returned from a month's outing in the Yosemite.

Mr. C. I Foote, who has been studying under F. H. Furnald is now in San Francisco for a course at the California College of Pharmacy.

L. E. Corbin's store is somewhat cramped, while the building is being enlarged; but when completed the additional space and accommodations will well repay the present inconvenience.

The Antilene Company, in their advertisement in this issue, publish a letter from the well known firm of Bishop & Co., which is as convincing a proof of the merits of Antilene as could be asked for. Look it up.

The numerous inquiries for particulars as to hotel accommodations, railroad rates, etc., already being received at the National Secretary's office indicate that the coming convention of the N. A. R. D. in October will be largely attended. The letters are from all parts of the country, and it is likely very few States will fail of representation by delegates numbering from one or two to a score. Letters of inquiry should be addressed to the Chairman of the Transportation Committee, Frank H. Freericks, Grand and Nassau streets, Cincinnati. If necessary Mr. Freericks will turn over correspondence to which he cannot give personal attention to the proper committee of the Academy of Pharmacy. All communications will receive prompt and careful attention.

Dr. Lister, walking his wards with his class twenty years ago, said: "Gentlemen, I have often noticed that bad contusions, not complicated by lesions of the skin, nearly always do well; those with lesions of the skin have trouble. I am not able to explain this, but the one who does will make his name immortal." He explained it afterward himself, and his name is immortal.

OUR ADVERTISERS.

It will be of interest and value to the trade to consult our advertising columns, in which will be found represented the following firms and goods:

A. Gettleman Brewing Co.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

WANTED—Situation as clerk by druggist; 15 years experience; 35 years old. Can come about January 1st. Salary reasonable. Can give satisfactory references as to character and ability. Registered in Missouri by examination. Have had country and city experience. Prefer country town. Address, W. E. Elliott, Centralia, Mo.

FOR SALE—A drug business and medical practice in a growing community in Arizona. A money making proposition for a physician wanting to run both branches. Price, including dwelling-house and land, $2,000. No competition nearer than 42 miles. Address for further particulars, W. A. Graham, M. D., Duncan, Ariz.

FOR SALE.—Small neat drug store in suburbs of Los Angeles. Will sell at invoice for cash. Recent invoice, stock and fixtures, about $1600. Established four years. Average daily cash sales for last twelve months, $12.50; total expenses, $30 per month Business increasing; very little credit; first-class community; good school trade. Address "Druggist," care of F. W. Braun & Co.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE—Stock and fixtures for a small drugstore. Inquire of Viole & Lopizich, 427 North Main st., Los Angeles.

WANTED—Position by a first-class watchmaker, jeweler and engraver. Am also a registered pharmacist. Address Box 208, Lander, Wyo.

At your soda fountain are you using the patent porcelain top acid phosphate bottle? If not, you don't know what you are missing. F. W. Braun & Co. sell them for 25 cents each, which is the manufacturer's price cut in half.

The official organ of the Los Angeles County Pharmaceutical Association.

AN active drug market is reported from the principal business centers, and a few leading drugs have considerably advanced, from legitimate causes. It has become difficult in these later years to control the market for speculative purposes, for the reason that such operations are too vast for any ordinary combination of capital, and because a serious obstacle is presented in the great number of small holders of leading articles, who seize the opportunity to realize upon their holdings and thus demoralize the attempted manipulations of the market. Nevertheless, conditions of supply and demand are constant factors in changing values, as illustrated at the present time by large advances in glycerine, cocaine, canary seed, cuttle bone, salacin, ginseng, and Mexican Vanilla beans, all of which are from legitimate causes. Attempts have been made to produce a stringency in the opium market also, but accurate information of the condition of the new crop, which is a good one, balked the speculators.

Quinine exhibits an uncertain condition, with a tendency to further decline, while camphor tends upward. To the retail druggist, however, the fluctuations of the drug market are really of far less consequence to his profits than are the hoped-for changes in the methods of marketing proprietary medicines, for the success of the National Retail Drug Association in their plans will inevitably result in the most gratifying improvement in the financial condition of the trade in all parts of the country where cut-rates have prevailed.

OAKLAND druggists have fallen into line with San Francisco, Los Angeles, San Jose and Sacramento in advancing prices on patent medicines, the schedule agreed upon being the same as adopted in the other four cities. The advance, while but about 10 cents on the dollar, is a move in the right direction, and the action will tend to bring the warring elements into more harmonious relations, so that the next move will be easier to make.

AT a recent meeting of the California State Board of Health a resolution was adopted as the sense of the Board that steps should be taken to quarantine the State against consumptives.

According to the Los Angeles Record of Sept. 20, some of the prominent physicians of this city expressed themselves favorably toward such action—as follows :

Dr. Ralph Hagan, police surgeon of this city, said today :

"I think there is as much need for quarantining against tuberculosis as against leprosy. When a consumptive is isolated an action is taken that should have been taken years ago. The natives of the State, among whom lung trouble was almost unknown half a century ago, are dying off from the results of imported tuberculosis."

Dr. J. Lee Hagadorn said :

"Quarantine is the only means whereby the disease may be stamped out in Southern California. Why should the results here be otherwise than elsewhere in the world? In the famous health resorts of France and Switzerland, where tuberculosis was formerly unknown, the natives are being decimated by consumption, caught from tourist invalids. Those who perform laundry work and other kinds of drudgery, quickly become infected."

Dr. Frank Ainsworth said :

"Exclusion and quarantining of consumptives would be a good thing, if the idea could be carried out, but in my opinion it cannot. You can't shut a man up merely because he is expectorating microbes everywhere."

A LIST of thirty-two State Pharmaceutical Associations that have indorsed the N. A. R. D., and are actively co-operating with the National Executive Committee, is published in N. A. R. D. notes this month, in another column. Three other State Associations will hold their annual meetings yet this year, and in each the national organization has a strong following. With such a showing as this the retail druggists of the United States may well take courage and press on to the victory that is in sight.

Too much praise can hardly be given to the efficient management of the leaders, who have thrown themselves into the work of organization with a vigor and determination worthy of a military campaign. A failure now would be a shame and reproach to the trade, whose interests are certainly bound up in the success of the vast movement now in progress. But the thought of failure may be put aside. It isn't in the program.

THE issue of the 18th edition of the U. S. Dispensatory is an important event. The druggist who is looking for the latest authoritative information on new remedies, and on the progress of pharmacy here finds the familiar work of Wood, Sadtler and Remington in their respective fields, and feels secure in accepting their conclusions. The late revision of the British Pharmacopœia comes in for examination, comparison and criticism, which add to the interest of the work.

THE meeting, Oct. 3 to 6 at Cincinnati, of the National Association Retail Druggists is too recent an event for us to receive and review its proceedings before going to press this month. We may assume, however, that the occasion was one of great interest and that distinct progress was made in the work of the Association. At this writing indications point to a large attendance. We shall print in our next a report of the proceedings.

Auragia, a Moth-Destroying Plant.

A plant is cultivated in New Zealand with great care and on a large scale (Montreal Pharm. Journ.) which has the singular property of destroying the moths that infest vegetation. This valuable plant is the auragia albens. It is a native of South Africa, but is easily acclimated wherever there is no frost. It produces a large number of whitish flowers of an agreeable odor, which attract insects. On a summer evening may be seen bushes of the auragia covered with moths, which by the following morning have quite disappeared. The action of the flower is entirely mechanical. The calyx is deep and the nectar is placed at its base. Attracted by the sight and powerful perfume of this nectar, the moth penetrates into the calyx and pushes forward its proboscis to get the precious food, but before it is able to do this it is seized between two solid jaws that guard the passage, and that keep the insect a prisoner until it dies.

The Drug-Ad-Smith.

Having failed at everything else I started out as an ad-writer. I advertised to get up advertisements for merchants that would present their claims for patronage much better than they could do it themselves. Merchants as a class don't know enough to tell the public, and as I had more brains than I could possibly use, I concluded I could score a big success.

* * * *

The next application was from a druggist who made a leader of face powder. I made a great effort for him, as follows:

"Our face powder is the finest on earth. We want all the old, wrinkled, sallow-complexioned, freckle-faced, homely women to come to our store at once and buy our face powder. If its use is persevered in for three or four years it will make the worst looking old hag look quite decent and respectable. Price 50 cents a box, and much cheaper by the barrel."

He returned it, but he wrote me a respectable letter. He said: "Your ad is a dandy, but is not exactly what we want."

Adwriting is a failure with me. I shall seek some other line.—*National Auctioneer.*

"Why is a merchant who does not advertise like a man in a row-boat?" asked the student. "Keeps going backward", guessed his friend. "No; he is trying to get along without sales."—*Spokane Spokesman-Review.*

N. A. R. D. Notes.

September 2d, 1899.

THOS. V. WOOTEN, Secy.

Dear Sir: We have succeeded at last in "starting the ball a-rolling" in our city. At a meeting held last Monday afternoon the Nashville Drug Association was organized with J. L. DeMoville of DeMoville & Co. as president, C. S. Martin of Spurlock, Neal & Co. as vice-president, A. P. McLure of the McLure Drug Co. as treasurer, and your humble servant as secretary. Over eighty per cent of the druggists of the city have signed as members, and I think every one will come in as soon as we get started. Steps will be taken at once to connect ourselves with the N. A. R. D. I will appreciate it very much if you will send me a copy of the constitution and by-laws adopted by two or three of the different local associations belonging to the N. A. R. D. I will also thank you for any suggestions you may feel disposed to offer which will have a tendency to start us off on the right foot. I believe the N. A. R. D. is bound to succeed, and be a blessing to the retail trade.

Wishing you Godspeed in the good work, I remain

Very truly yours,
J. O. BURGE, Secy.

DETROIT, MICH., Aug. 28th, 1899.

MR. T. V. WOOTEN, Secy.

Dear Sir: The following are the resolutions passed by the Michigan Pharmaceutical Association at its recent meeting in support of the N. A. R. D.:

"Whereas, the National Association of Retail Druggists is an association organized and conducted solely for the purpose of securing for the retail drug trade better commercial conditions, therefore be it

"Resolved, that the Michigan State Pharmaceutical Association is heartily in sympathy and accord with the N. A. R. D. and thoroughly appreciative of the good work started, and highly commends the progress so far made by its officers; and be it further

"Resolved, that we strongly recommend to the members of this association and the retail drug trade of the State in general to organize locally in support of the N. A. R. D., in order that it may have the vigorous moral support and the necessary financial strength to consummate its work."

The dues of the membership have been paid, and the following were selected to represent the association at the coming convention of the National Association: A. H. Webber, Cadilac; A. S. Parker, Detroit, and D. E. Prall, Saginaw.

The following extract is from a letter written by the National Secretary in reply to the criticism of an Eastern correspondent, that, "If the retailers ever accomplish what they desire they will do it in some other way than that decided upon last year":

"You state that you are in favor of a National Association; that you are in favor of anything that promises to bring relief. One hundred and ten druggists as honest as you assembled in St. Louis in October last, many of them at considerable personal expense, in order to do that which they considered best to secure relief for themselves and their oppressed brethren of the trade. You say that you are not in favor of the plans adopted at St. Louis, but hope that something better may be brought forward at Cincinnati; that you do not believe that delegates from State Associations should be admitted; that the delegates should represent local associations entirely ; that the retailer who signs a contract with the manufacturer should purchase on equally good terms with anyone, etc. These questions were debated for four days, evenings included, in St. Louis, by druggists representing the retail trade of eighteen States. Some of the brightest men of the retail trade of the United States fought and wrangled over these questions in committee rooms and on the floor of the convention until they were worn out. A decision was reached representing the judgment of the majority. Everybody went home determined to abide by this decision. Every man was convinced that every other man in that convention was as sincerely honest and as sincerely anxious to do the best thing for the retail trade as he was himself. The result has been the accomplishment of a vast amount of hard work and some results that are little less than marvelous. That a few men in the State Association of ——— should make up their minds hurriedly that the work done at St. Louis is not worthy of indorsement because they did not happen to understand fully why the plans decided upon at St. Louis were adopted, and to hold aloof from participation in the National Association until such time as their own peculiar ideas of policy shall have been adopted by the National Association, is to be guilty of egotism, not to say unreasonableness, almost incredible.

"It is hoped you will not think these plain words were written in a spirit of captiousness. The writer is perfectly willing to accord to you personally, and to those members of the —— Association who believe as you do, entire honesty and a sincere desire to benefit the retail trade of the country. He is not willing to admit that you are doing the best thing by refusing to give the N. A. R. D. your support, for the reason that you do not believe all its acts have been inspired by the highest wisdom."

The following State Pharmaceutical Associations have indorsed the N. A. R. D., and are now actively coöperating with the National Executive Committee :

Alabama, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, Washington and Wisconsin. The only other State associations to meet during the year are those of New Hampshire, Vermont and Oregon, in each of which the national organization has a strong following.

It is hard to believe it, but there are some places where the trading stamp is an unknown quantity. "We give trading stamps", read a woman with a shrewd business-like face. "Say, Jake, ask the man for em." Jake asked and was told all about them. His eyes opened and his jaw dropped in amazement. He and his wife conferred. The outcome was a purchase of two 5-cent cakes of soap. The man and woman examined the prize—in other words the stamp, with curiosity. As they discussed the scheme their wonder grew. But at last the woman's business instinct triumphed. "Jake, we'll never be here long enough to buy enough to get a book full of stamps. Let's spend the stamp now." So they hied them to the soda fountain and were thoroughly non-plussed when the soda man refused to exchange drinks for the stamp "There's ten cents thrown away, Jake, we don't need no soap", exclaimed the woman.—*Drug. Circular.*

The Hayden Manufacturing Co. have brought out an Eff. Cit. Lithia Tablet to meet the demand for a first-class article at a low price. The Hayden goods are entirely reliable and are sold at the low price of $2.00 per dozen bottles, for five grain tablets. They are supplied by F. W. Braun & Co. and guaranteed to be as represented.

F. W. Braun & Co. are offering a handsome case of assorted clinical thermometers containing one dozen of excellent quality for the low price of $6. The form of this little outfit makes it very desirable for the showcase, as it helps materially in making sales. Add a case to your next order.

The U. S. Dispensatory—18th Edition.

Edited, revised and rewritten by H. C. Wood, M. D., LL.D., Joseph P. Remington, Ph. M., F. C. S., Samuel P. Sadtler, Ph. D., F. C. S. *Thoroughly revised*, with comments on the *New* British Pharmacopœia, and including the vast number of new synthetic remedies and the latest additions in materia medica, therapeutics and pharmacy.

Price, in sheep, $6.50. With patent thumb index, $7.00.

For sale by F. W. Braun & Co.

For thirty-two acres in New York city there are 986.4 people to the acre. The nearest approach to this congested condition is a little spot in Bombay, where there are 759.66 to the acre. The densest London district has only 365.3 people to the acre.

Metals Made Pliable by Tauric Acid.

Another discovery is claimed that, if true, bids fair to give as important results in the world of science as any that has been made in many years. It is the result of experiments carried on by Theodore Olan, a Swedish chemist at Washington, and was found by the merest accident.

Mr. Olan's discovery consists in finding a new agent which will soften steel, gold, silver, and many other metals, making them soft, pliable and ductile as a piece of putty and quite as easily and safely handled. He has named the new chemical agent tauric acid, because it is obtained from tauric moss, a peculiar lichen, or fungus, which grows upon rocks and roots of trees very generally in the country, but it has never before been the subject of chemical investigation. The new acid has been tested by many eminent chemists in the country who pronounced Mr. Olan's discovery to be one of the wonders of the world of chemistry, and it is believed that it has a great and important future before it in the arts and sciences. It is remarkable that the discoverer has given it gratuitously to the world.

Mr. Olan gives the processes that led to the results reached by saying that while making some experiments with tauric moss in his laboratory, he found the bottom of the metal dish he was using became soft. At first he supposed the dish had been partially decomposed by other acids, but upon investigation he proved this was not the case, and fully satisfied himself that the change was caused by tauric acid, and this led him to making experiments which fully verified his opinion. He says:

"By placing gold, silver, steel, aluminum or lead in this acid, I found they became soft as dough, so that they might be worked with the hands into any shape or form. Although steel softens readily when placed in a vessel containing tauric acid, strange to say the acid has no effect upon iron. Tauric acid will be of great value to jewelers in making designs in precious metals. Designs may be molded or beaten to the required shape without heat being used at all."

The process of making the acid is very simple and inexpensive. Mr. Olan describes it as follows:

"My plan for bringing out the acid from the tauric moss is to put in a deep vessel a layer of chloride of lime, then a layer of tauric moss, to the depth of two inches, and then a layer of chloride of potash of about the same thickness. This is saturated with water until the lime is slacked away. After the fire has gone out of the lime the liquid is drawn off. After this, creosote of tar is added until a saturate solution results. The solution is precipitated with a solution of sulphuric acid, one part in ten. After precipitation the supernatent liquid is decanted, and the residue is found to consist of pure tauric acid." —*Popular Science News.*

The editor of Medicine, discussing the proper mode of executing criminals, suggests as an obvious and simple solution of the whole matter—now that a broader humanity has done away with unseemly haste in the infliction of the death penalty—that we should choose "the somewhat slow but perfectly effectual method of natural decay of the body which comes of advancing years." It is, he feels sure, "the only solution that will give perfect satisfaction to the condemned, conserve the feelings of relatives, and keep intact the esthetic sense of an advanced and advancing civilization."—*Med. Times.*

Watered Whisky....

RED FERN

Fine Old Sour Mash

This whisky, made by the Greenbriar Distillery, is one of Kentucky's best whiskies; it has been stored in United States Government Bonded Warehouse for years and is properly matured. Under Government supervision and internal revenue regulations, in bonded warehouse, this whisky was reduced to 90 proof, repacked in new freshly charred barrels, and is perfection itself. No whisky should be sold *for consumption* at a higher proof than 90, and while any one can add water to whisky, few recognize the fact that good whisky is spoiled by adding water at inopportune times and under wrong conditions.

Whisky should have proof reduced only in well charred wooden packages, and after addition of water allowed to stand for sometime to permit of thorough assimilation, as well as absorption by the charcoal in the barrel of oils and ethers always present in and held in solution by high-proof whisky, but liberated when water is added, and the elimination of which is necessary to secure that fine rich smooth taste always sought for by consumers of whisky.

Order a barrel of "Red Fern," let your most critical customers try it and you will be pleased with results.

Pharmacy Legislation.

Massachusetts still leads the van in its satisfactory treatment of the druggists' liquor tax problem. Efforts made by some of the druggists of Massachusetts to take the annual granting of certificates of fitness for a liquor license out of the hands of the Board of Pharmacy were strenuously opposed by representatives of temperance organizations on the ground that the local authorities refuse to act where druggists were selling liquor contrary to law, in marked contrast with the Board of Pharmacy's method of investigating complaints and revoking licenses where an illegal business is being carried on. It is with much pride that we point to this attitude on the part of the temperance organizations, for they were at one time the most bitter opponents of the present law, which places the responsibility and authority for the regulation of the liquor traffic by druggists in the hands of the Board of Pharmacy. Experience has evidently demonstrated even to these doubting Thomases that no better method can be devised of treating ing this delicate question than that adopted in Massachusetts, which leaves the protection of the fair name of the pharmacist in the hands of the pharmacist himself. To all who have anything to do with liquor legislation we would commend the example both of the Legislature and of the Board of Pharmacy of the State of Massachusetts.—*Amer. Drug.*

The quality of Gray's pure malt, now being supplied by F. W. Braun & Co., is superior to any similar goods on the market at or near the price. Order a case ($7) and you will be easily convinced that above statement is a fact. No whisky label on the bottle.

ONE OUNCE

Copper Container of
Otto of Rose

OTTO OF ROSES
KAZANLIK
Boru Pappazoglou & Co. Kazanlik
from Bulgaria

This very desirable package enables the drug trade to buy the article strictly as imported from Bulgaria, as the original seals and marks upon the coppers preclude any possibility of tampering with the contents.

We are confident that purchasers will be pleased with the goods, and solicit orders for the same. **Price, per oz., $6.50**

Be sure and specify Pappazoglou's.

F. W. BRAUN & CO.
LOS ANGELES, CAL.

Which is the Best Cod Liver Oil?

Prof. Armand Gautier still holds to his idea that it is alkaloids in cod liver oil which make it nutritive. In a recent letter he says that virgin oil of a slightly green color obtained at the fishing places does not contain the alkaloids which stimulate nutrition. The very pale oil cannot be recommended—the Madeira-colored oils are the best; and in reply to the criticism that the livers must be allowed to decompose before such oil is obtained, he replies that the initial decomposition of the livers, during which the cells disgorge the oily contents, is a diastasic phenomenon not in the nature of putrefaction.—*Chemist and Druggist.*

Druggists and other dealers requiring supplies of writing tablets are notified that F. W. Braun & Co. carry a large line of these goods and sell at prices that cannot fail to satisfy the most critical buyers. Examine or order samples.

Answers for the Anxious.

Gum Arabic.—It would be hard to say what is the best paste for attaching labels to blocks of ice. Soft solder would probably answer as well as anything else.

Aërated.—Soda-water straws are not intended to show the amount of wind in the beverage.

Apprentice.—In tying a package of epsom salt, pink sea island twine is quite the proper thing. Do not bite the string, as such practice is likely to injure the teeth, and besides looks too much like chewing the rag.—*The Stroller, in Druggists' Circular.*

Shorter Processes for Some of the Pharmacopoeial Preparations.*

BY F. W. E. STEDEM, PHILADELPHIA.

The writer desires to call your attention this afternoon to some methods in use by authority of the pharmacopoeia which, in his judgment, could be modified to advantage. It is not his purpose to pose as the author of any of these modifications or changes. He wishes simply to add testimony as to their usefulness and emphasize the desirability of their adoption in future publications of the pharmacopoeia. A few samples are submitted as specimens of finished products made by the methods desired. Most of the processes outlined have been in use by various pharmacists for years, and bear the stamp of approval of some of the best men of the land. We will first consider some of the tinctures of the pharmacopoeia.

TINCTURE OF ASAFETIDA.

Tincture of asafetida, as you are all aware, is directed to be made by maceration and then to filter, adding alcohol through the filter until the desired quantity is obtained. This preparation can be made by percolation. Select the asafetida and reduce to a coarse uniform powder. Introduce into a percolator prepared in the usual way, add alcohol in suitable quantity, macerate for forty-eight hours and proceed with the operation of percolation. The advantages are all those of concentration of effort, avoiding the necessity of filtration, reducing the uses of utensils and vessels to the minimum and obtaining a tincture of reliable and standard quality in at most three or four days.

TINCTURE OF CALUMBA.

Scarcely a month goes by without the appearance of an article in some one of the pharmaceutical journals relating to this tincture and the difficulty of preparation when the pharmacopoeial process is followed. The whole difficulty can be obviated by carefully preparing the powder No. 20 and proceeding with the percolation and observing the precaution of packing loosely, not moistening the drug, as directed by the pharmacopoeia.

TINCTURE OF GUAIAC AND AMMONIATED TINCTURE OF GUAIAC.

These tinctures can easily and quickly be prepared by reducing a selected resin to a fine powder in a mortar and adding the necessary menstruum gradually, triturating constantly. When most of the resinous matter is dissolved, transfer to a prepared filter and wash the residue and filter with enough menstruum reserved from the original quantity to make up the measure. The whole operation need not take more than two or three hours, and the results are entirely satisfactory. This has been proven by comparative weighing of residue on preparation of the two tinctures by both processes.

TINCTURE OF IODIN.

Reduce the iodin to a uniform coarse powder. Use a glass funnel and press a plug of absorbent cotton tightly into the neck; lay over this an evenly cut piece of white filter paper. Introduce the iodin into the funnel, and add alcohol carefully. Should all the required alcohol be added and the iodin not all dissolved, reintroduce the weak tincture and continue until the iodin is all dissolved. By careful preparation of the funnel,

Price, Inclusive, per gal............................80c.

This article is proving satisfactory to the trade and is quite low in price.

F. W. BRAUN & CO.

however, I have always succeeded in completing solution by first treatment. My attention was called to this method by our fellow member, Mr. John H. Hahn.

TINCTURE OF MYRRH.

By far the most important of any of the various resinous tinctures is that of myrrh. The process of percolation is beautifully adapted to the making of this important tincture. Reliable and satisfactory results are always obtained, and the advantages are many, saving of time and cleanliness being not the least important. This process was taught me by my old friend and preceptor, Mr. E. M. Boring, he being the originator of it. I may here add that from this preparation and the successful conduct of it I got the idea of extending the method to all the resinous tinctures of the pharmacopoeia. Prepare a percolator in the usual way. Put in the myrrh (previously reduced carefully to a uniform coarse powder, say 16 to 18), without moistening, pack gently, and add menstruum until the liquid wets the cotton of the percolator; close the lower orifice of the percolator, and allow the mixture to stand twenty-four hours, then proceed slowly at first and more rapidly toward the end of the process. An examination of the gummy residue will convince anyone of the reliability of the method.

CAMPHOR WATER AND AROMATIC WATERS.

Camphor water can always be had in quantity and without the least trouble if several fair-sized pieces of camphor are weighted with fragments of glass rod or selected clean stones and immersed in a suitable quantity of distilled water. After a few days' standing the water will be found to be saturated. The process is that of circulatory displacement; those particles of water next the camphor, becoming saturated, ascend to the top of the vessel, and so on continuously. Each time camphor water is required and taken from the vessel an equal quantity of fresh distilled water should be added, as by that means the supply is inexhaustible.

New Device For Destroying Ants and Flies.

There has been brought upon the market a new and convenient exterminator of ants and flies. The "Fly Button" is a clean and effective article, which will at once commend itself to all housekeepers. Handsomely boxed; a ready seller; one hundred per cent profit to retailers. See descriptive offer in our advertising columns.

Indian Doctors.

A man who has worked the country long and successfully as an Indian doctor, gives directions for the pursuit of this noble calling. Buy a job lot of senna and make it into senna tea, with a few other "yarbs." Bottle it and take it out on the road with a wagon. Name it Yokotanki, the Great Blood Purifier of the Pugwash Indians. Men will throng to the wagon to get it, and, going to the edge of the crowd, will take a furtive swig to see how much better they feel. They usually think they do, and after their bowels have moved the next morning, they know they do.—*Cleveland Journal Medicine.*

Bit of Philosophy.

What's the use o' lyin'—
Cryin'—sighin'?
What's the sense o' fussin'—
Mussin'—cussin'—
Does the savages' complainin'
Stop the rattle o' the rainin'?
Does the tormentin' an' teasin'
Make the winter quit a freezin'?
Quit a blowin'?
Quit a snowin'?
Does the grumblin' an' the groanin'
Do a bit toward atonin'
For the miserable moanin'
Thro' the trees?
Does the scowlin' an' the growlin'
Stop the prowlin' an' the howlin'
O' the breeze?
Won't the sunlight be the brighter
If we keep our faces lighter?
Don't the dreary day seem longer,
And the wailin' wind seem stronger,
If one frets?
Make the best o' all the weather!
Sing an' smile an' hope together!
Won't you? Let's!

—*Medical Times.*

The Leper Colony on Molokai Island.

There is no doubt but disease is affected very materially by climatic influences. Eczemas are more common and more severe in the moist atmosphere of the sea-coast; leprosy is seldom seen, and certainly does not flourish, in the United States, but in Iceland, with its intense cold, and in Hawaii with its tropical warmth, it is so common and so much dreaded, that special locations have been appropriated to it, and the inmates shut off from contact with the world. In Hawaii the leper settlement is located on the island of Molokai, and is called Kalaupapa, "The Living Tomb." This is the home of thirteen hundred human beings, where men, women and children tainted with leprosy are banished till death relieves them of their bondage of suffering.

While Molokai is one of the largest and most fertile of the Hawaiian isles, the narrow, lava-covered strip of land devoted to this greatest pesthouse known to history is the most desolate and barren spot in all Hawaii. It is only a few hundred acres in extent, and the greater portion of the ground is strewn with sharp, flinty rocks of volcanic origin.

In the center of the settlement rises abruptly an extinct volcanic cone, shaped like a huge punch bowl and known to the natives as the "bottomless pit." Soundings have thus far failed to reveal its depth. On three sides the waves of the Pacific break and roar against its rock-bound shore, while from the land side rises a perpendicular wall of black lava, which, mingling with the clouds at a height of 3,500 feet, shuts out from the hungry eyes of the lepers a vista of beautiful valleys and rolling hills clothed in the magnificent green of a tropical vegetation, with vast stretches of waving golden sugar-cane and groves of lordly palms, and trees heavy with fruit and flowers.

Kalaupapa is a natural prison, from which there is no escape, and as if the very elements themselves had conspired with man to make the lot of the leper more unendurable, the great black wall of lava, which stretches far out into the Pacific, attracts immense quantities of moisture, which, forming into clouds, pours upon the poor huts and cottages of the settlement an almost incessant deluge. At other times the fierce sun of the tropics is sending down his scorching rays.

Once a month a ship visits the island to carry supplies, but there is no wharf for a landing. The rough and dangerous passage from the ship to the shore is made in stout boats and then on planks from rock to rock.

A curious caprice of leprosy is that a healthy child may be born of leprous parents. If the child at twelve months shows no signs of the disease it is taken from the mother and sent to the retention home, conducted by the sisters in Honolulu. Here they are kept till the age of twenty-one, when, if they show no sign of the disease, they are set free. One of the strangest characteristics of this disease is, that in outward appearance it affects no two persons alike. One is stunted in stature, another grows to gigantic size; in one the skin is turned to an inky black, while another may be white, or red, or copper colored. A peculiar leonic expression of the face attaches itself to certain cases of leprosy. The head swells to almost twice its natural size; the skin assumes a reddish brown color and hangs in heavy folds about the face, while the eyes, small, bloodshot and receding, look like those of a beast of prey; the whole framed in a mass of tawny hair, takes on a faithful likensss of the lion—tired but patient under years of captivity.

Leprosy is one of the marvels of disease and the *bete noir* of our profession. It spares neither age, sex or color, and has completely baffled thus far the world of medical science. Even the manner in which it is contracted is a disputed question, and so-called remedial agents are powerless in its presence. Possibly a bacillus may yet be discovered which will disclose the cause and indicate the remedy, but at present the stricken may look forward perhaps to years of life, but always a life of suffering, ever under the chill shadow of death.—*Med. Times.*

An excellent seller is Euthymol Tooth Paste, which has made its way without special advertising and now enjoys a wide popularity. The best way to handle the article is by means of the little showcase furnished free with a three-dozen lot. F. W. Braun & Co. can supply you with the goods and the case, which includes 3 dozen free samples, and 25 Toothbrush envelopes.

Ten Prize Hygienic Rules.

The following maxims won a prize offered in 1897 by the Parisian publishers, Hachette & Company, for the ten most effectual rules for the preservation of mental and bodily health. The author, Dr. Decornet of Fertésur-Aube, won over five hundred competitors. The rules, as translated in The Lancet, run thus: 1. General Hygiene: Rise early, go to bed early, and in the meantime keep yourself occupied. 2. Respiratory Hygiene: Water and bread sustain life, but pure air and sunlight are indispensable for health. 3. Gastro-intestinal Hygiene: Frugality and sobriety are the best elixir for a long life. 4. Epidermal Hygiene: Cleanliness preserves from rust; the best kept machines last longest. 5. Sleep Hygiene: A sufficiency of rest repairs and strengthens; too much rest weakens and makes soft. 6. Clothes Hygiene. He is well clothed who keeps his body sufficiently warm, safeguarding it from all abrupt changes of temperature, while at the same time maintaining perfect freedom of motion. 7. House Hygiene: A house that is clean and cheerful makes a happy home. 8. Moral Hygiene: The mind reposes and resumes its edge by means of relaxation and amusement, but excess opens the door to the passions and these attract the vices. 9. Intellectual Hygiene: Gayety conduces to love of life and love of life is the half of health; on the other hand, sadness and gloom help on old age. 10. Professional Hygiene: Is it your brain that feeds you? Don't allow your arms and your legs to become ankylosed. Dig for a livelihood, but don't omit to burnish your intellect and elevate your thoughts.

Hood's Calendar Offer is now out for 1900. It must be returned with order and signature before November 1st.

A Queer Coincidence.

The Stillwater (Minn.) Prison Mirror tells of an Irishman at McCook, Neb., who went out to celebrate the other night and returned at three in the morning only to find that his family had been enlarged by three in the meantine.

He looked at the clock and then at the kids, and remarked: "It's a quare coincidence. Howiver, Oi'm dom'd glad Oi didn't return at eight."—*Omaha Druggist.*

Pharmacology and Therapeutics.

LOCAL CANCER CURE.

Dr. F. H. Lutterloh describes, in the Medical World, what he believes to be a successful local application for the cure of cancer. He acquired the formula from a non-professional person after knowing this cure to have "taken out many cancers, roots and all, as far as lymphatics contained cancer cells." None of the malignant tumors thus treated has returned so far as he knows. The escharotic is made as follows :

Sanguinaria	G 1
Galangal	G 3
Zinc chlorid	enough

Mix the powdered roots, then gradually incorporate sufficient zinc chlorid to form a thick paste. With the fingers press this into a plaster one-eighth inch thick and of a shape to extend about one-eighth incn beyond the borders of the tumor, the healthy skin around being protected with collodion or isinglass. Fastén in place by means of a compress and strips of adhesive plaster. This paste quickly hardens, hence must be freshly made when wanted. Renew the application once a day until the tumor is destroyed. For the pain, administer morphine as needed, keeping bowels open and prescribing nutritious but not coarse diet. The case treated by the author was lupus exedens of the nose, the tumor measuring three-fourths by one inch. He renewed the paste on the second and fourth days, and on the fifth found the tumor black and shriveled, i. e., "killed." Thereafter the tumor was dressed once daily with compound resin ointment until the tumor could "come out," which was after about five days. The wound healed with scarcely a scar. No microscopic test seems to have been made.—*Western Druggist.*

Temporary Absence in Illinois (172).

The Illinois Board of Pharmacy interprets and enforces the Illinois pharmacy law. The registered pharmacists of the the State are of two classes : those registered as pharmacists and those registered as assistant pharmacists. The latter are permitted to take charge of a store during the temporary absence of the registered pharmacist.

The Board of Pharmacy has only recently given a definite idea of just what is meant by temporary absence. The board defines this to mean absent from the store for such purposes as going to the meals, but the registered pharmacist is not permitted to remain longer than the usual time on such occasions. Assistant pharmacist cannot legally take charge of the store for a half a day or so at a time, while the proprietor is out on business or pleasure bent.—*M. Bros. Drug.*

Antasthmatic Powder.

The *Annales de la Polyclinique de Lille* is authority for the following :

Datura stramonium, leaves	30 parts
Belladonna leaves	30 parts
Potassium nitrate	15 parts
Opium	2 parts

Pulverize the articles separately and mix by passing several times through a fine sieve. The powder must be very dry.

Directions for Use.—On a saucer, or plate, place a couple of teaspoonsful of the powder, heaping it up into a cone. Light at the top, and let burn, inhaling the vapors as it does so. To make sure of getting the greatest benefit, a large funnel should be placed over the saucer (being supported at three or four points, so as to insure plenty of air for combustion), and the vapors inhaled through the point of same. This might be made a good selling article.—*Natl. Druggist.*

Saccharin in Holland.

The society of Beetroot manufacturers at the Hague have called the attention of the Dutch Minister of Finance to the increased consumption of saccharin in Holland, which in their opinion will eventually have the effect of considerably reducing the receipts of duty payable on sugar. So long as saccharin was obtainable in the form of powder only, the prospect of a more general consumption was not very great, but it is now obtainable from almost any grocer's shop in tablet form at low rates. Saccharin, they contend, has a great advantage over sugar, as it only pays 5 per cent import duty *ad val.*, whereas sugar has to pay about 200 per cent of its value. —*Chem. and Drug.*

In the Modern Department Store.

Customer (at the shirt counter)—"Here's a shirt I bought of you the other day. It's too small for me. I tore it in trying to put it on."

Salesman—"That's too bad, but you've spoiled it so we can't take it back. I'll tell you what you can do, though. Go over to the drug department and you can get a small bottle of anti-fat for 10 cents."—*Drug Topics.*

Eddyism.

This is the "scientific" or "profeshionable" name for Christian Science. This name is derived from its founder, Mrs. Mary Mason-Baker-Glover-Patterson-Eddy. Unfortunately her four husbands are dead. The Arena for May claims that Mrs. Eddy appropriated the "science" from one Phineas Quimby, now deceased, or at least he thinks he is, which is just as bad.—*Practical Druggist.*

A Wonderful Performance.

A man from Pine Knob stood watching a performance on a slide trombone. Suddenly seizing a companion's arm, the Pine Knob man excitedly exclaimed : "Look thar, Lige !"

"What's the matter ?"

"Look thar, he done it agin."

"Done what ?"

"W'y, crowded mo'n half thot blamed ho'n into his mouth. Did you see thot ?"—*Short Stories.*

A Sad Case.

A green little boy in a green little way
A green little apple devoured one day,
And the green little grasses now tenderly wave
O'er the green little apple boy's green little grave.

—*Current Literature.*

Used to It.

Photographer—Yes, I can take your picture, but it's a dark day and it will require a considerable exposure.

Seaside Belle—Oh, I don't mind that.—*Chicago Tribune.*

When a smart man comes out at the little end of the horn he turns around and blows it.

Business Personals.

T. W. Brown, Jr., Union and Hoover streets, has sold his business to H. W. Drenkel.

Geo. H. Freeman, Main and Washington streets, has sold his drug business to Banks & Greene.

J. T. Pendegast of F. T. Aspinwall & Co., Kingman, A. T., has bought his partner's interest in the business.

Mr. George Phillips, well known as an efficient drug clerk in Los Angeles, is now filling the position of head clerk for Jones & Son, Ventura.

C. S. Hutchinson, late manager of Pierce & Robbins' Chino branch store, will take the position in their Pomona establishment vacated by Mr. Simmons.

Francis Pursey, manager of the Abbey Pharmacy, Redlands, took a trip last month to Bear Valley, his place being supplied by B. O. Johnson.

Burbeck & Copeland, San Diego, have dissolved partnership. H. A. Burbeck will continue the business. Mr. Copeland goes into the news and stationery trade.

Mr. F. S. Beaman has accepted a position in the store of Dr. B. L. Saeger, Nordhoff. He was for some years with Jones & Son, Ventura, and is well qualified for his duties.

Fred Hudeberg, for several years in the employ of Dr. B. L. Saeger, Nordhoff, started Sept. 15, for Michigan, where it is his purpose to enter the College of Pharmacy of the State University.

The California State Board of Pharmacy held a meeting for examination of candidates for pharmacy certificates in Los Angeles Oct. 4, and in San Francisco Oct. 10. At the time of going to press we have not received a report of results.

Lloyd B. Simmons has purchased the Chino drug store from Pierce & Robbins. Mr. Simmons has for a long time occupied the position of head clerk in P. & R.'s Pomona store, and is thoroughly aquipped for his pursuit. We wish him abundant success in his new field of labor.

We are pleased to note the marriage, August 20, of Miss Maude, daughter of Mr. and Mrs. James S. Chambers of San Jacinto and Mr. G. Warde McKim of the firm of McKim & Chambers of the same place. We extend our warm congratulations and best wishes to the happy pair.

The marriage of Miss Merle S. Voak of Chicago to Mr. Edward T. Off of this city, which occurred Sept. 13th at the home of the bride's parents, was a society event of interest to Los Angeles and a subject of warm congratulation on the part the groom's many personal friends in this city, in which we join.

Arizona Personals.

Ben L. Bear, Phoenix, with Mrs. Bear, took a two weeks' trip to the mountains in August.

H. H. Watkins, Kingman, Arizona, spent two weeks of September on a visit to California, his former home.

J. C. Dalton, late of New York city, now holds the leading position in Dr. G. H. Keefer's fine establishment in Phoenix.

E. W. Jones, store manager for Congress Gold Co., Congress, Arizona, made a business trip East during August and September.

J. F. Kelley, pharmacist in charge at the Territorial Insane Hospital, Phoenix, took a fortnight trip to the Grand Cañon in September.

Lynn Boyd, Jerome, Arizona, now, has his store in full running order, after some delay in getting the premises in proper shape for business.

Mr. J. S. Williams, of Bisbee, Arizona, paid us a visit about the middle of September. He reports a prosperous condition in the big copper camp.

Mr. Furb, head clerk for H. Goodman, Phoenix, Arizona, had his outing in California in August, spending a fortnight in San Francisco and Los Angeles.

Mr. Fred Fleishman, the well known druggist of Tucson, Arizona, spent a fortnight in August on a visit to his many friends in Los Angeles and San Francisco.

T. F. Hudson, of Phoenix, accompanied by Mrs. Hudson, spent the month of August at the Grand Cañon of the Colorado, where they indulged in hunting and fishing *quantum suf.*

Dr. W. T. Heffernan, of Gonder & Co., Yuma, made a trip to Honolulu in August, and upon his return in September, Mr. Anthony, of the same firm, paid a visit of a couple of weeks to Los Angeles and other Southern California points.

Fred Culver, Murrieta's druggist, died last Friday evening of consumption. Funeral services were held on Sunday, and the remains interred in Temecula cemetery. Mr. Culver, with his wife and little son, came to Murrieta from San Diego about two years and a half ago, purchasing the drug business of the late Dr. Lawrence.

Remember the SOLUBLE GINGER of F. W. Braun & Co.'s manufacture, for the preparation of Syrup of Ginger. One trial will convince you of its advantages over other preparations of the kind. Strength and fine flavor are its special characteristics. Do you use Ginger Syrup at your soda fountain? That is a good place to test it. See advertisement for price.

Jasmal is the latest of the synthetic perfume products to be offered the public. It is said to be a perfect reproduction of the delicate odor of the jasmine and as such will be welcomed by perfumers.

I Wonder What's In It.

H. W. Wiley, chief chemist of the U. S. Department of Agriculture, is the author of the following effusion, which he recently sent to the Indiana Medical Journal:

We sit at a table delightfully spread
And teeming with good things to eat,
And daintily finger the cream-tinted bread
Just needing to make it complete
A film of the butter so yellow and sweet,
Well suited to make every minute
A dream of delight, and yet while we eat
We cannot help asking "what's in it?"
O, maybe this bread contains alum and chalk,
Or sawdust chopped up very fine,
Or gypsum in powder, about which they talk,
Terra alba just out of the mine.
And our faith in this butter is apt to be weak,
For we havn't a good place to pin it
Annatto's so yellow and beef fat so sleek,
O, I wish I could know what is in it.

Ah! be certain you know what is in it,
'Tis a question in place every minute.
Oh! how happy I'd be could I only see
With certainty all that is in it.

The pepper perhaps contains cocoanut shells
And the mustard is cotton seed meal,
The coffee, in sooth, of baked chicory smells,
And the terrapin tastes like roast veal.
The wine which you drink never heard of a grape
But of tannin and coal-tar is made,
And you could not be certain, except for their shape,
That the eggs by a chicken were laid.
And the salad which bears such an innocent look
And whispers of fields that are green
Is covered with germs, each armed with a hook
To grapple with liver and spleen.
No matter how tired and hungry and dry;
The banquet how fine; don't begin it
Till you think of the pass and the future and sigh,
O, I wonder, I wonder what's in it.

And the preacher who prates on the glory that waits
On the saints, and asks "Have you seen it?"
And tells you how hot it will be for the sot
And the sinner, at last, does he mean it?
The political boss who asks for your vote
And promises not to forget it,
When landed at last in a place of some note,
Don't you think you'll surely regret it?
And the maid of your choice, with the heavenly voice,
Whom you've loved for a month, if not longer,
Perhaps has said "Yes", and its time to rejoice
And foster the faith that grows stronger.
But that true heart so dear, O, you trembled with fear
And with doubt when you struggled to win it.
And now that it's yours, I beg do not jeer,
When I ask, "are you certain what's in it?"

—*Pharmaceutical Era.*

OUR ADVERTISERS.

It will be of interest and value to the trade to consult our advertising columns, in which will be found represented the following firms and goods:

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—Drug store in the largest mining camp in Southern California. Owner is compelled to sell on account of health. Address E. J. P., care of CALIFORNIA DRUGGIST.

WANTED—Situation as clerk by druggist; 15 years experience; 35 years old. Can come about January 1st. Salary reasonable. Can give satisfactory references as to character and ability. Registered in Missouri by examination. Have had country and city experience. Prefer country town. Address, W. E. Elliott, Centralia, Mo.

FOR SALE—A drug business and medical practice in a growing community in Arizona. A money making proposition for a physician wanting to run both branches. Price, including dwelling-house and land, $2,000. No competition nearer than 42 miles. Address for further particulars, W. A. Graham, M. D., Duncan, Ariz.

FOR SALE.—Small neat drug store in suburbs of Los Angeles. Will sell at invoice for cash. Recent invoice, stock and fixtures, about $1600. Established four years. Average daily cash sales for last twelve months, $12.50; total expenses, $30 per month. Business increasing; very little credit; first-class community; good school trade. Address "Druggist," care of F. W. Braun & Co.

FOR SALE.—Drug stock and fixtures in one of the best towns in Southern California. No cutting. Will sell at invoice. Owner has other business. Address S. S. Rogers, Escondido, Cal.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR SALE—Stock and fixtures for a small drugstore. Inquire of Viole & Lopizich, 427 North Main st., Los Angeles

WANTED—Position by a first-class watchmaker, jeweler and engraver. Am also a registered pharmacist. Address Box 208, Lander, Wyo.

The official organ of the San Diego Retail Druggists' Association.

The official organ of the Los Angeles County Pharmaceutical Association.

THE first annual meeting of the N. A. R. D., Cincinnati, Oct. 3-7, developed and demonstrated the warm interest which the retail druggists of America are taking in the important measures they have undertaken to secure justice from the "proprietors" and harmony among themselves. A large proportion of the trade are identified with the association through local or State organizations, and the work is well in hand for the coming year. The National Wholesale Drug Association are in almost complete harmony, apparently, with the program of the retail association, and the Proprietary Association of America have also given evidence of acquiescence in their reasonable demands.

While this is true of a large part, there are yet some proprietors who are antagonistic to the plans of the druggists, notably the Potter Corporation of Boston, whose attitude toward the Western Pennsylvania Retail Druggists' Association has attracted widespread attention among the trade, leading to vigorous denunciation, and, in some localities, to a boycott of their preparations. Secretary Wooton, in his report, gave the correspondence between himself and above corporation, in which the futility of efforts to effect a harmonious settlement between the parties seems to be demonstrated. With this exception no unplesantness has occurred in the secretary's correspondence with proprietors. Regarding the future work of the association it is confidently believed that the coming year will mark a great advance toward the fruition of the desires of the retail drug trade, as exemplified in the resolutions of their organization.

The election of Mr. Simon N. Jones of Louisville as president is warmly commended by our Eastern contemporaries, and the re-election of Mr. Thomas V. Wooton as secretary will gratify the entire trade.

We print elsewhere the resolutions passed at this meeting, which will be found of interest.

A CORRESPONDENT of the Alumni Report gives an instance illustrating the advantage of holding on to out-of-date preparations. A young man, 27 years of age, brought to the writer a plain 8-oz. vial without label or other marks, which, with its contents, had been purchased 17 years before at this pharmacy, for the bracing-up of the boy of 10, and he now wanted to renew the treatment! The druggist raked over his memory (and his stock) and supplied the demand.

Moral: Don't throw out anything that will keep.

PRESIDENT Charles E. Dohme of the American Pharmaceutical Association, in his address at the late meeting at Put-in-Bay, has these words of cheer for the N. A. R. D. * * * "The National Association of Retail Druggists appears as a splendid and deserved success. As a sister organization, I heartily congratulate it upon its apparently successful mission of squelching the cutter."

DR. WALTER LINDLEY of this city contributes an article in the October number of the Southern California Practitioner, describing a trip to the San Jacinto mountains, and highly commending their magnificent pine forests for health resorts and their valleys for "quiet, comfort and grandeur." These are our Alps, with a considerably increased altitude over the Swiss mountains, and easily accessible.

THE malarial mosquito, the insect that carries the infection from stagnant pools to its human victims, has been discovered and identified by a medical expedition in Sierra Leone, according to the British Medical Journal. This insect is not of the genus *Culex*, our common mosquito, but belongs to the genus *Anopheles*, quite similar in appearance to the *Culex*, but when at rest standing out nearly at right-angles to the wall, while the common mosquito stands with body parallel to it. This is an easy method of determining the character of the midnight assailant. It is found that kerosene oil poured upon the puddles furnishes the easiest method of destroying the larvæ. Whether the African insect has relatives in other parts of the world is not stated. We are quite certain, however, that they do not menace the health of Southern California.

Banquet to the Olympia's Pharmacist.

On Saturday, September 30th, the pharmacists of New York and vicinity gave a banquet to Alrik Hammar, pharmacist of the Olmypia. The dinner was given in the rooms of the Drug Trade Club, at 100 William street.

Mr. Hammar who is thirty-seven years old, was born in Wiesbaden, Germany, and when young served in the United States Navy. Later he studied pharmacy, and when, through the efforts of the American Pharmaceutical Association, the office of pharmacist became a commissioned one in the naval service, Mr. Hammar was one of those advanced.

Many members of the drug trade assembled to greet Mr. Hammar, and the guests also included the apothecaries of Admiral Sampson's squadron and the hospital stewards of the regular army present in the city.

Among those present were C. O. Bigelow, President of the Board of Pharmacy of New York; A. Paradis, President of the College of Pharmacy of Brooklyn; Dr. Henry H. Rusby, Dr. Coblenz and Dr. Dieckman of the College of Pharmacy of New York; T. P. Cook. President of the New York Quinine and Chemical Works; W. H. Ebbitt, Frederick T. Gordon, William Muir, Charles Weisz and Thomas F. Furey of McKesson & Robbins, Thomas J. MacMahan, Charles S. Erb, George E. Schweinfurth, Thomas J. Keenan, H. S. Tyrell, S. H. Carragan, Thomas F. Main and C. A. Mayo, editor of the American Druggist.

The rooms of the Drug Club were handsomely decorated with flags and palms, and the front of the menu bore a photograph of Admiral Dewey and of the Olympia. The sorbet was served in souvenir boxes encircled by bands of red, blue and white, and topped by silver and gilt models of the Olympia plowing through the silver waves.

To the guest of the evening a handsome loving cup of silver, with gold lines, was presented by his hosts. Mr. Ebbitt made the presentation speech, which was responded to by Mr. Hammar.

Albert H. Brundage acted as toastmaster, and briefly reviewed Dewey's brilliant dash into Manila Bay, and then alluded to the good services of the pharmacists and hospital stewards. William C. Anderson responded to the toast, "Our Country," H. H. Rusby to "Our Guest," Joseph R. Remington to "Looking into the Future," Elias H. Bartley to "The Education of the Pharmacist," Frederick T. Gordon to "Experiences of a Naval Pharmacist," in which he alluded to the battle of Manila; William C. Alpers to "Pharmacy and Medicine in the Navy and Elsewhere," and George F. Payne to "The Advancement of the Military Pharmacist."—*Drug Topics.*

Jag Defined.

A well known author is exhibiting to his friend with great glee a discovery he has made in an English dictionary of some note, which professes to include what the editor terms "Americanisms." Among them is the following: "Jag—An American term for an umbrella, as will be seen by the following illustration from an Albany (N. Y.) paper: 'Mr. Blank, a prominent citizen, returned from his club in a hilarious condition, and after vainly trying to unlock the door with his umbrella, climbed through the coal hole. He was found asleep in the bath-tub fully dressed, and with his jag.'"—*Era.*

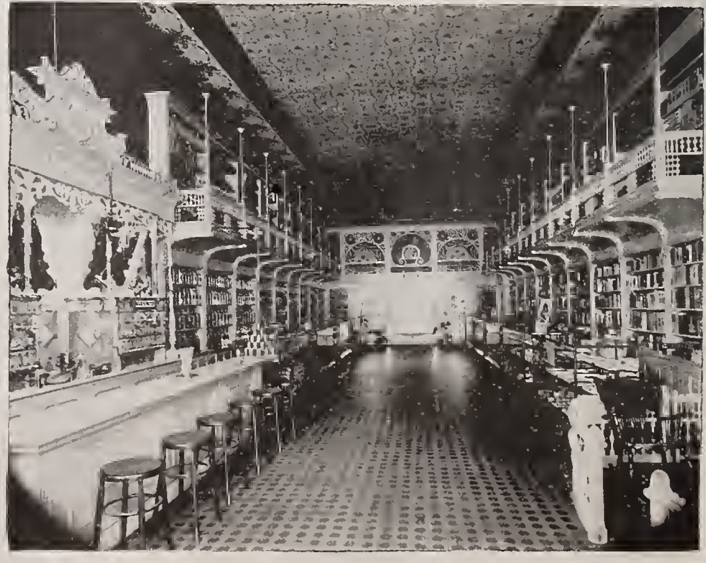
Bristol & Rowley's Pharmacy, Santa Ana.

We take pleasure in showing in this column two of the handsomest pharmacies in Southern California, and both in the little city of Santa Ana. This fact speaks volumes for the progressive capital of Orange County.

Unselfish Devotion to Medical Duty.

The English medical journals commented recently in glowing terms on a very striking example of unselfish devotion to duty on the part of an English medical man. Dr. R. J. Burns, of Sunderland, was summoned to attend a man who had swallowed some phosphorus paste in beer. He came provided with a stomach pump, but the instrument unfortunately was out of order. The doctor passed the stomach-tube and proceeded to empty the man's stomach by suction on the tube. His patient recovered only temporarily, though so faithful were the doctor's efforts that he himself has since been prostrated with some symptoms of phosphorus poisoning, partly from the effect of the fumes developed during the operation and partly from actual absorption of the phosphorous through his oral mucous membrane. He has, however, now entirely recovered.—*Medical News.*

The sixteenth annual exercises of the Los Angeles Medical College was held Oct. 25th. About 300 students and graduates were present.

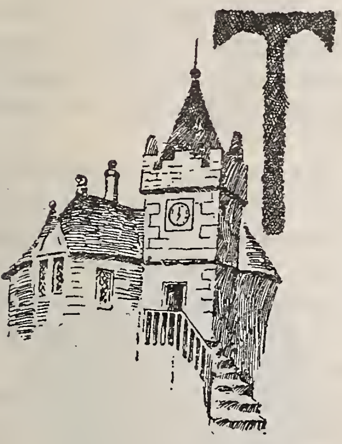


Q. R Smith's Pharmacy, Santa Ana.

A Pharmacy in Thrums.

"The lock-up was crammed with prisoners, and the Riot Act had been read from the town-house stairs."

BY WM. MAIR.



THRUMS was daft when that happened. Babbie stood at the stair-head beside Gavin, and the town was in an uproar. If that is not strictly accurate Barrie-worshipers can make it good. Mr. W. Hole, R. S. A., has etched a stirring picture of the midnight encounter, a bit of which is worked into the initial letter. Although the outside stair is gone from the town-house, the house itself remains, and it is a pharmacy. Hence this lapse into the Scotch kailyard. Thrums, or Kirriemuir, has always enjoyed the reputation of being out of the way; it is not on the road to anywhere, and it did not wake up to the importance of the steam-loom when it arrived. But it is different now. For example, in the matter of pharmaceutical progress we have in Mr. James Ford, "the chemist," the only pharmacist in the British Isles—perhaps in the whole empire—who has three daughters who have followed their father's footsteps; two of them, so far, having passed the Minor. The other chemist of Thrums, Mr. David Buchanan, "the postmaster," is the man who is responsible for bringing Barrie into the drug-trade by annexing the aforesaid town-house. If there are any in the trade who forget themselves so far as to visit the place for the sake of the ghosts of Tammas Haggart and Snecky Hobart, they will find it, as Barrie tells us, "altered a little, even in those days of enterprise, when places have enameled labels on them for the guidance of slow people who forget their address and have to run to the end of the street and look up every time they write a letter. Gone, too, is the stair of the town-house from the top of which the drummer roared the gossip of the week on Sabbaths to country folk; but the town-house itself, round and red, still makes exit to the south troublesome."

This prominent castellated structure is the property of the Lord of the Regality (the Earl of Home), whose coat-of-arms it bears; it was here that his ancestors of the house of Douglas held court as Barons of Killy-mure. The precise date of its erection is not known, but it is certain that it was used as a prison for over 200 years. Veritable dungeons were the cells, canopied with stone arches. Three sides of the original walls of the building—five feet thick—are intact. Half a century ago the square tower was added.

About two years ago Mr. Buchanan required more accommodation for postal work. He wished to keep his two departments distinct while yet under one roof, for he considers that postal work conducted in the same shop as dispensing is not conducive to the prosperity of the pharmacy part. As a good many chemists are postmasters, and as Mr. Buchanan's postal business is larger than any, his opinion will probably be taken as conclusive. A new prison having been provided, he cast his eye upon the "Toon's-house", and, after some negotiating, secured a twenty-one years' lease. It was stipulated that the necessary alterations were not to interfere with the exterior outline of the building, and this has been adhered to. From plans prepared by the Superior's architect, the interior has been converted into a handsome chemist's shop, the post-office adjoining. On the upper floor, what was the burgh Court-room—"a round room (which is oblong)"—is now a large sorting-room and telegraph-room. The new and substantial fitting has been done at the expense of the postmaster. The whole building is occupied, and has been in use for some months. From a window in this room Mr. Buchanan will show you "the window" which has made "Thrums" and its literary son famous.

Mr. Buchanan has been postmaster of Kirriemuir district for fifteen years; he has eight sub-offices under his charge, and a paid staff of forty-one, including four mounted postmen. He was custodian of the early Barrie manuscripts on their timid pilgrimage to London, "perfect blethers" thought Margaret Ogilvy, his mother, which the "editor-man" would probably not print. And through Mr. Buchanan also there came, in time, the missives (Barrie found them again after she died)—"the envelopes which had contained my first cheques. There was a little ribbon round them."—*Chemist and Druggist.*

Canadian Pharmacies.

Probably very few druggists in the United States have any idea that the Canadian pharmacy is conducted on any different lines from those prevailing in most American places.

The drug store of Ontario is more in the nature of what the real pharmacy ought to be than is usually the case in "the States." There is but one language, and that is English.

The soda fountain in a drug store is a decided oddity, as are also cigars and tobacco, hence manufacturers of these lines find a poor field in the drug trade of the province. The business is mainly in drugs and prescription work. Occasionally a side line of stationery and school books is found in the small towns.

Jewelry, hardware or groceries, so often found in the small American towns, never find space in the Canadian pharmacy.

Branch telegraph offices are almost invariably in the drug stores, and the drug clerk of Ontario, in addition to having the necessary pharmaceutical qualification, must also be a telegraph operator—and that, too, at no increase in salary.

In the smaller cities and towns all drug stores close at 8 P. M., and during July and August close on Wednesday afternoon, that being the usual custom in all lines of trade. Sunday closing is universal. The salaries usually paid to clerks and managers range from $7 to $16 per week, according to qualification and experience.

In Quebec and the maritime provinces French is necessary to the pharmacist's education. The applicant to learn the drug business in Ontario must now hold a second-class teacher's certificate, or pass a matriculation examination before being admitted. The term of apprenticeship is four years, during the first years of which very little or no compensation is allowed. This tends to bring into the business the very best class of young men.

Taking all into consideration, the Canadian pharmacist fares better than the American.—*Drug. Circular.*

How to Make the Drug Business Pay.*

BY WM. MITTELBACH.

A good start in any business is necessary to obtain good results—especially is this so in the drug business. First of all, it is very necessary to have some money with which to buy your opening stock. You should be able to discount your bills right from the start. The amount necessary depends entirely on the location of your store. If you are in a country town, some distance from the jobber or manufacturer, you will, of course, need more capital than you will if only a block or two from them. It is by far better to borrow money with which to discount your bills than to wait on returns from sales. This is not only a saving in dollars and cents, but it gives you a good commercial rating, so absolutely necessary in these days of close competition and small profits. When you are properly located and have made your financial arrangements, you should then use printer's ink properly and let people know you are competent to conduct your business and desire their good will and trade. In buying your opening stock, be careful to buy what is absolutely necessary. Don't try to have everything called for at once. This is impossible. Rather lose a sale occasionally than fill your shelves with stuff that is a constant reminder of careless buying. In these days of quick transportation it is by far better to buy oftener and in smaller quantities. My town is located 200 miles from the jobber, and I am able to have goods laid down in my store in less than two days from the time I order them. The safest business today is done in a small way.

We are often tempted to buy in larger quantities by securing additional discounts. It is all right to take advantages of these offers if you have the spare money; but if you are operating with limited capital it will do you more harm than good. The money you thus invest is needed to keep up your regular stock.

It don't take many purchases of these larger quantities to make an additional investment of several hundred dollars. And should you have a month or two of dull business, you will certainly feel the shortage in your working capital. I have carefully watched this matter, and find such to be the case. Pharmacists doing business in country towns most generally handle paints, glass and other articles that require quite an extra capital to be invested, and the temptation to buy in larger lots is very great in certain seasons.

I have for the last few years bought lead and oil in such quantities only as I knew I could dispose of in a month or two, then I bought again. My experience shows that I have lost very little, if any, by change of prices. The money that I might have invested in larger lots, has brought a better profit otherwise used.

Another absolutely necessary thing in conducting a business, is to keep a set of books from which you can at any time quickly determine the condition of your affairs. You should be able to tell whether the business is on a paying basis or not. You may apparently be doing a prrofitable business, yet always short in cash. This is a mystery to the man that can't trace the cause of his condition through a set of well kept books. You will discover that the surplus money that you ought to have in cash is in your stock, and that you are carrying a much larger amount of goods than necessary. This is poor business. A man's success in merchandising is correctly judged by the amount of cash he from time to time withdraws from business. In my opinion a hundred dollars made and taken out of the business is worth two hundred dollars additional stock. Cash will hold its original value, and merchandise is subject to shrinkage and deterioration. Again, I repeat that the keeping of a clear, concise set of books is as necessary in conducting a small retail store, as it is in a large wholesale establishment.

Having established yourself and gained the confidence of your patrons, put up a line of your own articles, such as are most generally used, and push their sale. You will be agreeably surprised to see how easy it is to get your friends to use these preparations. There are so many things that an educated pharmacist should never think of buying. Your education is certainly very shallow, or you lack the proper amount of energy, if you don't put up such articles as headache powders, seidlitz powders, herb tea, toothache drops, liniment, etc. One thing especially that I am proud of in my store is a small upright showcase, filled with articles put up by me. Of some of these I have established such a reputation that I sell them exclusively.

The practice of pharmacy is remunerative today in spite of the general depression, if we will only grasp the situation and adapt our methods of action to present conditions, and use modern commercial tactics. In short, do business with the smallest amount of cash possible, watch your purchases as carefully as your sales, and, above all, establish individuality by manufacturing and selling your own products.

---

*Read before the Missouri Pharmaceutical Association.

The Etymology of "Drug."

It does not seem as if our philologists have satisfactorily settled the etymology of this word. I am aware that the generally accepted derivation is the Anglo-Saxon "dryge"=dry. Dr. Murray cautiously states that the ulterior origin is uncertain. The earliest quotation he gives is from the Close Roll of Edward III, 1327: "Novem balas de drogges de spicerie." In some MSS. of Chaucer the word appears as "dragges," and this has led some etymologists to the belief that the words "drug" and "dragee" (a stomachic sweetmeat) are of similar origin. Professor Skeat, however, says "dragges" and "drogges" cannot be the same word. Littré, following most continental authorities, says that the French "drogue," and the Spanish "droga," come from the Dutch "droog" or "drook," which also means dry. Some authorities explain that this etymology is based on the fact that a drug was generally a dried herb, while it has also been guessed that a drug was so called because it dried up and cleansed the body, affording no nourishment.—*Chemist and Druggist.*

Licensed Pharmacists.

Following is the list of successful candidates passing the examinations held by the State Board of Pharmacy October 4 in Los Angeles: Licentiates in pharmacy, A. R. Varga, G. H. McLain, C. F. Clapp, M. D. Allison, W. Towne, C. C. Toogood, W. P. Turner, George L. Smith, M. G. Stewart, A. V. Nelson, F. W. Howard. Assistants in pharmacy, J. R. Ruddick, W. S. Quinn. G. W. Gaskell was registered as a graduate in pharmacy upon presentation of a proper diploma.

Indiana Board of Pharmacy.

Successful candidates at the meeting of the Indiana Board of Pharmacy which occurred at Indianapolis, Ind., Oct. 12th, 1899: Wm. J. Molloy, Indianapolis, Ind.; B. C. Wright, Indian Springs, Ind.; J. G. Ferrell, Center Point, Ind.; W. G. LaSalnier, Muncie, Ind.; Roscoe Chancellor, Kokomo, Ind.; Orrin N. Morey, Mulberry Grove, Ill.; M. A. Johnson, East Chicago, Ind.; H. M. Allemong, Chicago, Ill.; Tom Shea, Wabash, Ind.; G. W. Ebert, Peoria, Ill.; W. N. Benson, Brazil, Ind.; J. B. Newland, Carlisle, Ind.; E. H. Robinson, Terre Haute, Ind. Assistants—Louis Speckbaugh, Tipton, Ind.; S. W. Bryer, Winchester, Ind.; H. L. Cullum, Decker, Ind.; Jesse D. Keehn, Valparaiso, Ind.

The next regular meeting of the Indiana Board of Pharmacy will occur at Columbus, Ind., Jan. 12th, 1900. Any one wishing further information or application blanks can address the Secretary, C. E. Crecelius, New Albany, Ind.

M. de Blowitz's anecdote about a monomaniac who poured a bucket of water over him to make him grow has a Scotch pendant. In a country lunatic asylum in Scotland there is an amiable visionary known as John, who had to be put under restraint because he imagined that he had been robbed of an estate which had no existence. He was so sane on other subjects that he was employed in the administrative work of the asylum and practically carried it on. He interviewed the new lunatics on their arrival. "What's the matter wi' ye?" he said to one. "A glass ball in the middle o' my back." "A glass ball in the middle of your back will bring ye here, ma freen, it will no tak' ye oot," remarked John.

N. A. R. D. Notes.

CHICAGO, Oct. 28, 1899.

The National Secretary's office has been located in the Association Building, 153–155 LaSalle street, a few doors south of Madison street. The quarters selected are very desirable for many reasons, prominent among them being central location and proximity to the wholesale drug and drug-specialty houses of Chicago, as well as the leading hotels. The Y. M. C. A. Building is one of Chicago's newer office buildings, and is first-class in every respect. A great deal of time was spent in securing a suitable location at moderate cost and it is believed the selection will give entire satisfaction. The secretary would be glad to have the members of the organization call and see him when in Chicago. The office is the property of the association, and it is superfluous to say is at all times at the service of its members. An appreciation of this fact manifested by friendly visits by making use of the office in any helpful way its services can be employed, will be appreciated by those who are trying to make of the office all it should be to the membership of the N. A. R. D.

The officers of the National Association of Retail Druggists for the year 1899–1900 are as follows:

President, Simon N. Jones, Louisville, Ky.; First Vice-President, Dr. Wm. C. Anderson, Brooklyn, N. Y.; Second Vice-President, Thos. Layton, St. Louis, Mo.; Third Vice-President, Alex. M. Robinson, Bangor, Me.; Secretary, Thos. V. Wooten, Chicago, Ill.; Treasurer, Chas. T. Heller, St. Paul, Minn. Executive Committee, F. E. Holliday, Topeka, Kans.; Simon N. Jones, Louisville, Ky.; D. E. Prall, Saginaw, Mich.; A Timberlake, Indianapolis, Ind.; Henry P. Hynson, Baltimore, Md.; James W. Cheswright, Pittsburg, Pa.; Alfred DeLang, Cincinnati, Ohio.

A Liquid in Which Cork Sinks.

Now that hydrogen has been liquified, there seems to be no more worlds to conquer in that special direction. It was a remarkable coincidence that the first public exhibition of this latest wonder was made in connection with the centenary of the Royal Institution of Great Britain. Prof. Dewar, in opening the exhibition, spoke of liquid hydrogen as a new instrument of research, which it eminently is, by virtue of the extremely low temperature, at which alone it can exist, and which low temperature it, by its presence or contact, enables other substances approximately to reach. The liquid was exhibited in a state of gentle ebullition in a vacuum tube immersed in liquid air, the latter serving to impede the access of the heat. The hydrogen is a transparent liquid and, besides being the coldest, is also the lightest liquid known.

A cork drops immediately to the bottom of it. At the bottom of the vessel containing the liquid, there appeared a whitish substance, which was in fact, solid air, or air ice. It is impossible to avoid the air ice in the bottom of the vessel, as the air at the surface of the liquid is, by the intense cold, condensed, liquefied, and subsequently solidified, and, being so much heavier than the hydrogen, it sinks and accumulates at the bottom. To show that the liquid was really hydrogen, a light was applied to a small quantity, which at once burst into brilliant flame. Solids immersed in the liquid long enough to attain the same temperature were, upon being taken out, covered with liquid air, which would run down and drop off.—*Rev. Pract.*

How Mica is Obtained.

The mica trade is controlled practically by three or four large concerns in New York, Chicago and Boston. These houses, says Godey's Magazine, have an agent who buys for cash whatever mica is brought by the miners. They control the market and fix the prices to be paid to the miner, as well as the prices for which it is sold in the markets. Mica, it need hardly be said, is a very valuable, almost precious, mineral, as those who are obliged to buy a small strip for their stove doors, will testify. A package worth hundreds of dollars can be carried in a basket slung over the arm, or in a pair of saddlebags on horseback. When prepared for the market, the solid block, as taken from the mine, is split into sheets. These are cut into squares or rectangles of almost every possible size, from 2 inches by 2 inches up to 8 inches by 10 inches, and sometimes even larger. There are no less than 183 regular sizes kept in stock by dealers.

The mining of mica is the poetry of mining. It is impossible to conceive a more exciting and fascinating employment. The vein of mica-bearing quartz, lying between rocks of different formation, has been found. The cap rock has been blasted away. Little "niggerheads"—small lumps of crumbling mica mixed with slate and other rock—are growing plentiful. The rock is carefully examined by the experienced miner, and all indications are that mica will soon be found. A blast is made. The rock and debris are cleared away, and there in the bottom is a block of the precious stuff, a ragged corner showing itself black and glittering in the white quartz in which it is imbedded. With the tips of the fingers the miner gently and affectionately brushes away the dirt and small stones which partly cover it. Its thickness is carefully noted, its position in the rock is learnedly discussed, and many a speculation indulged in as to its size and quality. The hole is quickly drilled, the small blast is made, just loosening the rock, and all eagerly crowd around as one of the men, with his pick, pulls away the broken stone. There it lies, a black, glittering mass, nine or ten inches across its face, three or four inches thick, and irregular in shape, as all blocks of mica are. A good-sized block, if solid and of a perfect cleavage, will be worth several hundred dollars. The excitement is not allayed, however, and will not be until the block is split open and we know how it looks on the inside. It is a very bad thing to split open a block at the time, and contrary to all rules, for there is danger that the fine polished faces will be scratched.—*National Drug.*

Preventing Injurious Action of Nicotine.

(Tobacco Heart.) A process for the treatment of tobacco leaves, preventing in a way the injurious action of nicotine and of acrid empyreumatic products, was devised some years ago by Professor Gerold of Halle. His process is thus described: He employes for eight kilograms of tobacco leaves containing the average percentage of nicotine a decoction prepared by boiling 15 grams of tannic acid with 1½ kilograms of water until the weight is reduced to 1 kilogram; then 30 grams of the essential oil of origanum vulgare are added, after which the decoction is immediately removed from the fire. Having stood for some minutes, the mixture is filtered and allowed to cool to about 16° C., when the preparation is ready to be spread over the previously weighed tobacco. When the absorbtion of this mixture by the tobacco leaves is completed they are subjected to slight pressure and moderate heat, after which they are ready for the manufacture of the various tobacco products. Heinrich Stern, M. D., in a paper read before the St. Louis Academy of Medicine, in March of the present year (St. Louis Med. & Surg. Journal), in discussing Gerold's process, said: "Tannic acid is an antidote for nicotine poisoning, and the use of the acid for preventing the injurious action of the energetic tobacco alkaloid is by no means original with Gerold. What he has pointed out is the proportion necessary to effectually avert nicotine distillation in a given quantity, as too small amounts of tannic acid exert no influence whatsoever upon nicotina, while excessive quantities deteriorate the tobacco. The undistilled nicotina is neutralized in its toxic quantities only by the tannic acid, which does not influence at all its peculiar odor nor most of its other characteristics. In this respect it is aided by the essential oil of origanum, the employment of which for this purpose is also original with Gerold. The oil, which is a valuable stimulant, counter-irritant and an active diaphoretic, does not produce a spicy flavor, nor does it call forth the formation of crystals when subjected to heat, as is generally the case with the other essential oils. The oleum origanum seems also to combine with the empyreumatic substances, rendering the same totally, or at least relatively, innocuous."

Correction of the Taste of Unpalatable Drugs.

Strychnine Hydrochloride Liq.—m i. by m x. syrup of orange or ginger, or m xv. fluid extract licorice.

Tannic Acid—gr. 1-12 by m v. syrup of ginger.

—*Dr. L. Freyberger, in "Pocket Formulary of Diseases of Children."*

Druggists who have not laid in a supply of Syrup White Pine Compound for their winter sales are hereby reminded that the article is the most effective of cough remedies, besides affording a satisfactory profit. The retail size is full 4-oz, and is supplied at $1.50 per dozen, with deductions for quantity lots. Supplied by F. W. Braun & Co.

Syrup and Vinegar From Watermelons.

Prof. H. A. Smeltz has been experimenting (Pract. Drug.) with watermelon juice, and has produced a syrup of deep amber color, quite heavy and intensely sweet, with a flavor decidedly its own, but at the same time agreeable. As compared with cane syrup it is clearer and heavier. The melons are cut and the red pulp placed in a strong, coarse cloth; this is hung over a barrel or any large convenient receptacle, squeezed, and allowed to drain until all of the juice has run through. The juice is then placed in a large kettle and boiled down to a syrup. The red coloring matter rises to the top and is skimmed off, leaving the remainder clear and colorless. A fine quality of vinegar of agreeable taste can also be made from watermelon juice, it is stated.

Our readers will note in our advertising pages that the Anti-Kamnia Chemical Company have brought out two new tablets, viz., the Anti-Kamnia Laxative and the Anti-Kamnia and Quinine Laxative, both being happy combinations of their products, and which are bound to have a large sale. The price of these is uniform with the other preparations of the manufacturers. Remember them when ordering "A. K" goods.

Red Noses.

From an English weekly we obtain the following advertising incident: A man sent a shilling to a certain "physician" who promised to send for that small sum instructions for the sure cure of a red nose. The "instructions" formed but one sentence: "Keep on drinking hard, and your nose will turn blue."—*M. B. Drug.*

Therapeutic Uses of Phenalgin.

Phenalgin is a derivative of coal tar and contains ammonia. Its chemical composition resembles that of ammoniated amidobenzines. In the stomach the ammonia becomes free and acts as a stimulant, thus avoiding the weakening of the heart's action which has been observed to follow the employment of most of these derivatives.

It is a fine white powder of penetrating odor, of slight taste, and is not soluble in water. It is prepared in powder, tablet and capsules. Hofheimer has experimented on himself in cases of headache, with a dose of 10 grains with good result. Further observation has shown that shortly after taking phenalgin there is a quickening of the pulse; then the action of the heart, with the strengthening of the first impulse, is gradually slowed.

After having taken 10 grains many patients experienced slight deafness which was followed by a calm sleep, the patients awakening free from pain which they had suffered. This was noticed in cases of headache and neuralgia. In cases of insomnia phenalgin alone often secured sleep; sometimes it was used in combination with the bromides, in which instances smaller doses were required.

In functional dysmenorrhea phenalgin had very good effect. It was so employed that at the beginning of the menses 10 grains was given; in the following one and one-half days 5 grains every quarter of an hour.

Phenalgin was administered alone in cases of malaria, neuralgia, grip, rheumatism, dyspepsia, gastritis, dysmenorrhea, etc., also in combination with natr. salicyl, salol, and lycetol in cases of rheumatism and gout; with carbonate of guaicol in phthisis; with arsenic and quinine in malaria.

It was found that in every instance phenalgin was useful in case of pain, particularly when there were marked symptoms of neuralgia or rheumatism.

It possesses hypnotic and anodyne qualities without having the deleterious effects which follow the taking of opium.

Phenalgin also possesses an antipyretic effect, and, either alone or in combination with small doses of quinine, shortens or banishes attacks of malaria.—*Klinisch Therapeutische Wochenschrift. Vienna. Sajous Monthly Cyclopædia. Philadelphia.*

The manufacture of Eucalyptus Oil has become an industry of some importance in Southern California. A new plant recently established at Garden Grove, under the management of Mr. J. W. Morris, has two copper stills of 250 cubic feet capacity each, and with an output of 60 lbs. daily of oil. The increasing demand for this product furnishes an outlet for all that is produced.

The correspondent of a London newspaper relates that he was traveling up from Windsor and met in the train Sir Laurence Alma-Tadema, who had been to Windsor to receive the dignity of knighthood from the Queen. The distinguished R. A. said that a day or so after he had been knighted a lady called on one of their "at home" days and expressed herself to him as follows: "Oh, dear Sir Laurence, I am awfully glad to hear of the honor you have received; I suppose now that you have been knighted you'll give up painting and live like a gentleman!"

H. C. Hitchcock Pharmacy, Globe, Ariz.

It is claimed to be the finest drugstore in Arizona, and Globe is but just connected with the world by a railroad. Globe is making a wonderful growth.

Petroline—Hayden Manufacturing Company.

This fine, high grade petroleum jelly, or petrolatum, is handsomely bottled and packed, and supplies to the druggist a more profitable article than other preparations of a similar nature.

Note the prices as follows, in 2-oz. size:

Petroline,	Plain, doz. 35 cents, 1 gross	$ 4 00
"	Camphorated, doz. 75 cents, 1 gross	8 50
"	Carbolated, doz. 75 cents, 1 gross	8 50
"	Pomade, doz. 75 cents, 1 gross	8 50
"	White, doz. 80 cents, 1 gross	9 00
"	Perfumed White, doz. $1.00, 1 gross	11 00

Include a supply with your next order to F. W. Braun & Co., and get the benefit of above low prices.

Drug clerks sending us advertisements should, if they want positions, state whether registered or not. Druggists want to know the standing of applicants without taking the trouble to write letters of inquiry on this point.

If indications are to be relied upon there will be a good holiday business this year. Times are never so bad as to forbid the making of Christmas presents, though the grade of the purchases is greatly affected by a scarcity of money. The best will be none too good to satisfy the shoppers next month. Many dealers have laid in fair supplies of the holiday lines, but some have hesitated to make adequate purchases. For the benefit of these latter F. W. Braun & Co. would call attention to their still large stock of fine cases with brush, comb and mirror, of Celluloid, Florence and Aluminum, ranging in price from $6.00 to $97.50 per dozen. Also to a line of decorated Perfume Atomizers, Perfume Bottles with gold-plated screw top, $2.00 to $18.00 per dozen, as well as a quantity of Perfumes in holiday styles, in elegant boxes. Dealers are invited to make an early examination of above lines.

Apollinaris, as usual on such occasions, was the only water served at the Dewey breakfast on board the steamer Sandy Hook, Sept. 30, when the Admiral was the guest of the city of New York, on the trip to the upper end of Manhattan Island.

Business Personals.

D. A. Falvey has started in the drug business at Highlands.

Dr. J. J. Sturges has purchased the drugstore of Dr. Frary, and the drugs belonging to Mrs. Culver, at Murietta.

Landrum Smith, late of Downey, has moved his stock to Whittier and opened business in the Mason Block.

J. C. Hardman, Riverside, has put in a handsome wall case for displaying cameras and photo supplies, of which he carries a large line.

W. T. Gillis, of Gillis & Spoor, Redlands, has just returned from a long visit to his old home in Nova Scotia. He was accompanied by his brother R. C. Gillis, of Santa Monica.

E. E. Hamilton, Corona, has disposed of his stock of groceries, and will put in a full line of paints, oils and glass, besides increasing his drug and druggists' sundries stock.

I. N. Wood has accepted a position with O. L. Halzell, Santa Ana. Mr. Wood is a brother of J. W. Wood, Pasadena, and is well known as a competent pharmacist.

The Orange Drug Store, under the new ownership of Mr. K. E. Watson, has been elegantly fixed up in modern style, with fine cases, waiting-room, and fresh decorations. A good investment, as we look at it.

W. E. Neblett, lately with C. E. Weck, Riverside, has gone to Pasadena to take a position in the establishment of J. W. Wood, his place being taken by Mr. Joe Whitlock, from the Court House Pharmacy, San Bernardino.

J. W. Vaughn, our popular townsman, took an extended trip to the East, returning the middle of October. He was fortunate enough to get a good view of Dewey on the occasion of the great naval display and reception in New York.

The J. T. Baker Drug Co., Hanford, are happy in the completion of the new building constructed specially for their use, which is now ready for occupancy. We were informed by Messrs. Cousins and Howland of the company many months ago that their new store was to be the finest in the San Joaquin Valley, and the result seems to justify the claim. It is indeed a beautiful conception in style, convenience and finish. The woodwork is of natural light mahogany, the show cases the most modern, glass from the floor style, a fine plate-glass mirror rising from the floor and covering the large prescription case, doubling the apparent depth of the room. Above the side cases a beautiful balcony with metal rail extends around the sides and end, and adds much to the effect as well as capacity of the room. The ceiling is decorated with excellent taste. The rooms back of the prescription department are the firm's private office, a large laboratory and a public telephone room —the latter having a separate entrance from the side street, and being in charge of Mr. J. T. Baker. Between the laboratory and prescription department is a unique sink arrangement, which by means of an opening in the partition accommodates both rooms. The upper story of the building is elegantly fitted up for physicians' offices, and will be completely occupied.

Arizona Personals.

Mr. C. B. Farmer, of Hillsville, Virginia, has accepted a position with T. F. Hudson, Phoenix.

Mrs. E. F. Tarr, Jerome, has returned from Newton, Kansas, where she spent three weeks visiting her parents.

W. R. Campbell, Winslow, returned on November 5th from a successful one-week deer hunting trip in the Chevelon mountains.

James Johnson succeeds Dr. F. E. Hinch in the firm of Hinch & Warring, Gallup, the firm now being Warring & Johnson.

Dr. W. T. Heffernan has purchased the interest of H. F. Anthony in the house of Gonder & Co., Yuma, Ari. Mr. Anthony returns to the East.

Wm. M. Scott, formerly of Los Angeles, and late of Prescott, has accepted position as head clerk with George Martin, Tucson, Ariz.

John Stillman, lately in charge of drug department of the Copper Queen Company's store, has accepted a position with the Bisbee Drug Company.

Col. Ed. Butt, Sr., is again at his post at the Phoenix (Ariz.) Drug Co., after some days of confinement to his bed from an attack of rheumatism.

The Bisbee Drug Company succeeds J. S. Williams & Co., Bisbee, Arizona. Mr. J. P. Ferguson, lately with George Martin, Tucson, is manager.

T. F. Miller & Co., Jerome, are now located in their new commodious store building, lately erected in the business center of the town. Chas. Miller has charge of the drug department.

H. H. Robinson, late manager of Dr. Cotter's drugstore, Yuma, Arizona, has resigned his position, and goes to Mexico. He will be succeeded by F. S. Bayley, recently from the Baldwin Hotel Pharmacy, San Francisco.

Geo. Rounseville, clerk for Williams Drug Co., Williams, made a hurried trip to Cataract Cañon first part of November and succeeded in locating seven promising platinum claims, close to Owens Bros. property, from which assays as high as $380 in platina have been made.

We are advised by the Trommer Extract of Malt Co. that under a ruling made by the Commissioners of Internal Revenue, dated Aug. 7, 1899, the extract of malt and all combinations therewith manufactured by them are exempt from the provisions of the Stamp Tax Act of 1898.

Druggists will take note of the mailing slip sent out by F. W. Braun & Co., making special offer on Armour's Soluble Beef for November and December. The article is a special one, and is sold through the drug trade only, it being advertised to the medical profession.

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—Drug store in the largest mining camp in Southern California. Owner is compelled to sell on account of health. Address E. J. P., care of CALIFORNIA DRUGGIST.

WANTED—Situation as clerk by druggist; 15 years experience; 35 years old. Can come about January 1st. Salary reasonable. Can give satisfactory references as to character and ability. Registered in Missouri by examination. Have had country and city experience. Prefer country town. Address, W. E. Elliott, Centralia, Mo.

FOR SALE—A drug business and medical practice in a growing community in Arizona. A money making proposition for a physician wanting to run both branches. Price, including dwelling-house and land, $2,000. No competition nearer than 42 miles. Address for further particulars, W. A. Graham, M. D., Duncan, Ariz.

FOR SALE.—Small neat drug store in suburbs of Los Angeles. Will sell at invoice for cash. Recent invoice, stock and fixtures, about $1600. Established four years. Average daily cash sales for last twelve months, $12.50; total expenses, $30 per month Business increasing; very little credit; first-class community; good school trade. Address "Druggist," care of F. W. Braun & Co.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—A fine drug business in Norwalk; splendid location; no opposition, there being no other drug store within a radius of five miles. Norwalk has about 1000 inhabitants and lies in the center of a thickly settled and productive valley. Owner must sell on account of ill health. Address DR. W. T. MERCHANT, Norwalk, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt; 10 miles from ocean; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

WANTED—Position by a first-class watchmaker, jeweler and engraver. Am also a registered pharmacist. Address Box 208, Lander, Wyo.

FOR EXCHANGE—40-acre ranch in Orange County, free of incumbrance, for drug business. Address F. S. L., care F. W. BRAUN & CO., Los Angeles.

FOR SALE—Drug store in Arizona, in the best mining camp in the Territory; no opposition; no cutting of prices; first-class place for a doctor wishing to run drug store in connection. For particulars address Arizona, care F. W. BRAUN & CO., Los Angeles.

WANTED—To trade good dwelling in the town of Revere, Mo., and 16 acres good land adjoining town for stock of drugs in a good town in one of the western States. Address A. G. Ehrhart, Revere, Mo.

WANTED—Position as drug clerk by a married man 30 years old; good habits; best reference. Address box 173, Santa Maria, Cal.

THE CALIFORNIA DRUGGIST extends the compliments of the season to its readers, and congratulates them upon the rounding out of a successful business year.

WE approach the one hundredth year of the nineteenth century with excellent business conditions in prospect. The period of prosperous trade already enjoyed for two years has softened the memory of past troubles, and given courage to meet whatever the future may bring. It is a matter of sincere congratulation that the drug trade throughout the country have taken a long step toward reconciling their differences during the past year, and that a spirit of coöperation has taken the place of strife.

In our own city a marked improvement has taken place in the relations of the trade, and the promise of the future is toward a complete reversal of the late unpleasant and unsatisfactory conditions.

The general outlook for our Pacific Coast States is full of hope. Situated as we are in relation to the great East—which is our West—our commerce with China, Japan and the Philippines must vastly increase. Manufacturing operations, having in view such commerce will be established on this Coast, and the benefits derived from an increased population be felt in every channel of industry and business. Let us then leave 1899 behind us, and go forward with confidence and high hopes for the coming time.

Pure Food and Drug Laws.

IT is important to our entire country that a proper and adequate oversight of our food supplies by government should be had. Such oversight and control to be efficacious must be supplied by the United States government, and not by that of the several States, for in the latter case the communities with inadequate food laws, or none at all, are made the dumping ground for all the discarded and disreputable stuff elsewhere thrown out, and the practice of adulteration is not blocked. Recent attempts to procure legislation by Congress against food and drug adulteration have awakened much public interest, and bills will doubtless be introduced in the near future, looking to the suppression of such practices, and the fixing of standards of purity, particularly of medicinal substances.

In the matter of food supplies there would seem to be little difficulty in formulating an act covering the necessary regulations and providing adequate penalties for their violation, but drug legislation is expected to cover a wider field, involving the fixing of standards of strength as well as purity, and will bring into antagonism many honest members of the drug trade, who are averse to an espionage like that endured in recent years in the State of Ohio, for example, when many acts of injustice were done toward druggists and when blackmailing practices, even, were charged against officials.

To facilitate really necessary legislation, therefore, it would be wise to separate the subjects of the proposed law, and to formulate a Pure Foods Bill by itself, not hampering its successful passage by connecting with it matters sure to provoke long discussion if not intense opposition. A bill to regulate the standards of medicinal substances should be the subject of careful consideration by those most competent to decide how far such legislation is practicable. To that end, committees from the various associations interested, both medical and pharmaceutical, including the N. A. R D., should be taken into council, to the end that, when the bill shall be put upon its passage, a wise and common-sense law shall be established—a law that can be lived up to and enforced, without blackmailing and without dishonesty.

THE attempt to put down or curtail the influence of the department store by a system of progressive license taxes, which has been advocated in Chicago and elsewhere in this country, has also been made in France and Germany, and is the subject of a consular report to the United States government. In France a general law controls such taxation, which seems to be heavy, as it appears that the Bon Marche, of Paris, pays a tax of $81,000 annually. Several attempts to increase the taxes on department stores have been defeated in France, while in Germany no government plan for such taxation has been adopted, the matter having been left to the various municipalities, which in some locations are thus levying these discriminating taxes.

Protection of the smaller tradesmen is the object, of course, this class being very numerous and apparently entitled to protection from the monopolies which would inevitably swallow them up. Whether the progress of the department store, with its economical methods and vast resources, can be stayed through the paternalism that seeks to uphold the small dealer in his struggle for existence, remains to be seen. The tendency of the times is toward the concentration of capital, in mercantile no less than in manufacturing operations, and it is a wise man that can foretell the outcome. The socialistic followers of Edward Bellamy, however, are persuaded that matters are working toward solution by the coming of the day of common ownership of all productive industries, a belief that has a remarkably large following, although we do not remember that any registered pharmacist is advocating that disposition of his professional perquisites.

AN interesting paper was read before The Society of Chemical Industry in London, Nov. 6th, by Mr. Walter F. Reid, F. I. C., F. C. S., relating to a new substitute for India rubber and gutta percha. The name given to the new material is Velvril, and its description and uses are given as follows in the Chemist and Druggist :

> The new material "Velvril" is prepared from semi-dried linseed oil or castor oil, the latter preferably. These oils are treated with nitric acid, forming what is termed "nitrolinolein" or "nitroricinolein." This is then mixed with nitrocellulose of a very low degree of nitration, and the whole worked into a perfectly homogeneous mass. The product which most nearly resembles Para rubber is said to be formed by combining two parts of the nitrated oil with one part of the nitrated cellulose. The nitrated oils, specimens of which were shown, are sherry colored viscid liquids, insoluble in most solvents of oils. The nitrated cellulose is used in the wet state, and after being thoroughly incorporated the mixture is dried.
>
> A great variety of articles were exhibited to illustrate the wide application of "Velvril", such as machine-belting, made by coating cotton canvas with the substance, soldiers' water-proof blankets, loin-cloths for horses which are said not to be acted upon by the grease of perspiration, garden-hose, and ordinary hose or tubing for conveying oil or gas. For laboratory purposes it is recommended especially for extraction apparatus, not being acted upon by carbon bisulphide or benzine, and may also be used as stoppers for bottles or by impregnating corks with the substance. Trunks and portmanteaus made from it are said not to become moldy in damp weather. A "Velvril" fiber is adapted for surgical dressings and for printing-ink rollers, and it is also used for insulating and water-proofing electrical wires, for enameling leather, as a paint for wood, glass, metal, etc.

THE stamp tax on medicine should be taken off. It was, and is, an improper and unjust taxation of a special industry. Should an equal tax be placed upon patented proprietary articles of every kind we could have no special reason for complaint, for the necessities of government require the raising of adequate revenues. There is no apparent need of continuing the discriminating medicine tax, and our members of Congress should be interviewed, personally or by letter, by every interested individual, and made to feel the pressure of an aroused sentiment against the injustice of this special taxation.

THE very large amount (60,000 tons) of India rubber annually consumed in manufactures indicate the wide field for "Velvril", the new artificial substitute.

WITH a commendable desire to promote the interests of the retail trade the N. W. D. A. have increased their annual membership dues $25.00, the direct purpose being to raise a fund to assist in furthering the objects of of the N. A. R. D.

There is no question about the sincerity of the wholesale trade in their attitude toward the retail organization. We wish there were as general a sympathy among the proprietary association, for then the clouds of trouble would soon roll away.

Eucalyptus Oil for Poultry.

This oil has been found an efficient means of driving insects from the nests of chickens and pigeons through its powerful odor, which, however, has no deleterious effect on the health of the birds or their young. The method of operation recommended is to perforate an egg at each end, blow out the contents, and introduce a small sponge, which has been well dried and then saturated with oil of eucalyptus. The holes are closed with wax and the egg placed in the midst of those in the nest under the setting hen, where it remains during the entire period of setting. The vapors of the oil emanating through the pores of the shell are sufficient to drive away all vermin infesting the nest within a few hours.—*L'Union Phar.*

Chemical Garden.

One of the finest effects is produced by immersing lumps of ammonium chloride in a 25 per cent solution of nitrate of lead strongly acidified with nitric acid. (Suitable proportions are 2 ounces lead nitrate, 6 ounces distilled water, ½ ounce nitric acid, 2 to 3 drams ammonium chloride.) The nitric acid decomposes the ammonium chloride, forming ammonium nitrate, and setting free hydrochloric acid gas, which, the moment the outer circumference of each minute bubble comes in contact with the lead solution, forms insoluble lead chloride. This is piled up in the most fantastic shapes, hollow stems reaching to the surface of the solution. After a few hours splendid crystals of ammonium nitrate begin to form, producing an indescribably beautiful effect Imagination will make out winter landscapes, trees, ruins, etc. The dish containing the solution must not be stirred, and if undisturbed the crystals will last for days.

By the use of silicate of soda, precipitations can be brought about that still more closely resemble vegetation. A suitable container is one-third filled with silicate of soda solution (water glass), and the remainder is filled with water. Stir and shake vigorously till the two are mixed. Then by means of a wide tube or funnel place a layer of sand, one-half or one-fourth inch thick, in the bottom of the bottle. Then drop in a few clear crystals, the size of a pea, of aluminum phosphate, potash alum, ferrus sulphate, copper sulphate, etc., and with a glass rod press them into the sand until half embedded. The bottle is then put aside in a quiet place. From each variety of crystals will spring a beautiful and characteristic growth, beautiful indeed. Other salts, as sulphate of nickel, cobalt, chromium, etc., give different results. To arrest the growth the silicate solution is displaced with clear water, which is poured in very gently through a tube reaching nearly to the bottom of the bottle.

The "lead tree" is a favorite for window decoration. A rod of zinc is suspended in a strong solution of lead acetate containing a few drops of nitric acid, metallic lead being deposited in beautiful forms. Some crystals of lead acetate in a muslin bag suspended in the upper portion of the solution makes this experiment more satisfactory. Solutions of tin or silver may replace the lead if desired. With a little taste and skill, there may be produced in the foregoing, or similar ways, window ornaments of great beauty and attractiveness.—*Era.*

N. A. R. D. Notes.

CHICAGO, Nov. 25, 1899.

Among the communications received at national headquarters relative to the place of holding the next annual convention of the N. A. R. D., is an earnest appeal on behalf of Asheville, N. C. The druggists of North Carolina believe this location to be a desirable one, among other reasons on account of the lack of interest hitherto manifested in the South in the national organization, which interest they believe will be greatly stimulated by holding the convention in their section. The matter of selecting a place for holding the meeting has been placed in the hands of the National Executive Committee, as it was last year. A decision will probably not be reached by the committee until the early spring of 1900.

The Retail Druggists Association of Hamilton County (Cincinnati), Ohio, has adopted the Louisville certificate plan. There is little doubt this method of dealing with the cut-rate problem will be employed before long by all the societies affiliated with the N. A. R. D. As a means of education it has no equal; the lesson it teaches is imparted with a directness severe in its simplicity.

One of the latest associations to cast its lot with the N. A. R. D. is the Defiance (Ohio) Association of Retail Druggists. The organization includes in its membership every druggist in Defiance county except one. There is no price-cutting, a catastrophe the membership of the new society is determined to avoid. A liberal contribution accompanied the remittance of the membership dues. The officers are Geo. W. Bechel, president; Frank P. Weisenberger, secretary, and N. G. Woodward, treasurer.

President Jones and Secretary Wooten spent Wednesday, Thursday and Friday of the past week in the cities of Cleveland, Toledo and Detroit. They were received with enthusiasm by the drug trade of each of these places, and in each large audiences gathered to hear the work of the national organization discussed. A feature most pleasing to the officers was the friendly relations that now exist in each of the cities visited, between the wholesale and retail trade, a friendliness that augurs well for the improvement of the condition of each which the N. A. R. D. is trying to effect. Messrs. Jones and Wooten speak in highest praise of the hospitality shown them. The recollection of incidents attendant upon their first missionary journey will be, for a long time to come, a source of pleasure.

The number of requests received for Bulletin No. 6 has been very gratifying. The Georgia Pharmaceutical Association has distributed a thousand copies, and almost every affiliated association has ordered its full quota.

NEW YORK CITY, N. Y., Nov. 21, 1899.

MR. THOS. V. WOOTEN, Secy.

Dear Mr. Wooten—I am greatly pleased to inform you that at a stated meeting of the Manhattan Pharmaceutical Association, held at the College of Pharmacy Building New York city, on Monday, Nov. 20th, it was unanimously resolved to apply for membership in the National Association of Retail Druggists. The question came up upon the presentation of a report of a special committee which had been appointed at a previous meeting to consider the advisability of affiliating with the national organization. The committee reported favorably on the proposition after a full consideration of all that was involved in the consummation of membership. The adoption of the report of the special committee came up at the meeting last evening, and this was done by unanimous vote, a circumstance which must be very gratifying to you, who have worked so earnestly and devotedly for the complete organization of the trade throughout the country, and the affiliation of county and State associations with the national body. I would now ask you to do me the favor to send the necessary blanks on which formal application may be made for membership. With every good wish for the success of the movement, very sincerely yours,

(Signed) THOS. J KEENAN, Secy.

The annual dues of the Louisville Retail Druggists Associations have been increased to $3. The organization is in fine condition, and since the accession of one of their number to the presidency of the N. A. R. D. its members are more enthusiastic than ever over the work of the National Association.

The National Secretary has received the following letter from the Committee on Legislation of the Proprietary Association of America:

Dear Sir: I take pleasure in advising you that a meeting of this association held at Niagara Falls, Oct. 10–13, 1899, the following resolution was adopted: "Resolved, that the Proprietary Association of America heartily indorses the spirit of the resolution passed by the National Association of Retail Druggists in Cincinnati, urging the repeal or modification of the war tax, and the Legislative Committee of this association is instructed to take such action in coöperation therewith as may be deemed judicious."

Very truly yours,

E. C. DEWITT, Chairman.

A contribution of $25 has been received by the National Treasurer from the Adams County (Quincy, Ill) Druggists Association. The efficient officers are J. O. Christie, president, W. H. Schmiedeskamp, secretary, and J. W. Reed, treasurer. It is very gratifying to report that there is no cutting in the populous territory covered by the association, and that the conditions of the drug trade there are very satisfactory.

At a recent meeting of the Waterbury (Conn.) Pharmaceutical Association, Thos. F. Casey was elected to the secretaryship of the organization. It should be remembered that this organization was one of the first in New England to become affiliated with the National body. Its membership includes every druggist in Waterbury, and they have almost no price-cutting, what there is being confined to the dry-goods stores.

Waterbury has a population of 40,000; there are in the city twenty-five drug stores.

The Western Pennsylvania Retail Druggists Association sent to each of its members early in the present month the following communication:

Dear Sir: You will please take notice that the sense of the association is: First, to refuse to order any new preparation or compound, or any commodity, the price of which exceeds the $2, $4 or $8 price per dozen. Second, demand that each salesman produce the association's "Yellow Card." Third, do not order direct; have everything come through your jobber. Please act promptly on the above and oblige,

Yours very truly,
E. C. Garbor, Secy.

The Douglas County (Omaha, Neb.) Druggists Association has been added to the list of local associations affiliated with the National body. The organization embraces in its membership seventy-five per cent of the drug trade. P. B. Myers is president; Otto Seiffert, secretary, and W. J. Shrader, treasurer.

A decision has been reached by the National Executive Committee that in the future the treasurer may accept contributions through affiliated organizations, or from manufacturers, jobbers or individuals direct, as preferred by the donor. It will be remembered that last year it was required that all contributions should be transmitted by a society in affiliation.

Brattleboro, Vt., Nov. 6, 1899.

Thos. V. Wooten, Secy.

My Dear Sir: I take great pleasure in notifying you that this association at its meeting in St. Albans, Oct. 25th and 26th, voted to join and heartily indorse the N. A. R. D. If you will please forward proper blank or instructions I shall take pleasure in forwarding check and copy of the resolution.

Very truly,
(Signed) W. F. Root, Secy.

Following are the closing words of the Annual Address of President Hynson, of the N. A. R. D., at the Cincinnat meeting:

MAKE THE N. A. R. D. A GREAT BROTHERHOOD.

And last, and above all things, I would have you make of this Association a great guild, a broad brotherhood; with all, a commercial conservator, wielding the united power of our worthy craft. Why not? Every tendency of the times teaches us to follow the popular way. The daily doing of the world states the strength, and mighty it is, of the many, striking as one. Nature, too, forgets the individual always; to the species only it is kind; in the general uplifting alone does it glory. So must it be with man. Man is of nature and must follow nature's bent. This tendency to associate, to unite, to combine, everywhere present, strangely active, is as resistless as is yonder great Niagara. Attempt to oppose it and it spreads far and wide. Spreads with the opposing force all the while accumulating power, until everything, even the mightiest, is swept before its immensity. Yet even such a tendency as this can be made to do our bidding, if properly led off in parts, while unknown and unknowable will be the benefits, if the force is properly directed. Just as that mighty flood has been made to turn its power into light and gladness; light for the many and gladness for all, so must we catch the rills running off from this great out-burst of co-operative sentiment, harness them to the chariot of our purposes and send its influence and resultant benefits throughout all the land.

Overbuying,

BY J. HURST PURNELL.

The tendency to overbuy seems to be one of the greatest difficulties that the retail merchant of the period has to overcome. Many a merchant goes to the market and, as it would seem, buys with the idea that he is purchasing something that cannot be duplicated. When buying, he does not seem to look into the future, realizing that the bills he is making are to mature. How much better, on the other hand, would it be for him to buy a bill, say today, and in sixty days duplicate it, thus spreading the payments, than to buy the whole amount at one time, making it all fall due at one time. How much discount could he save upon this plan? Many times he could discount his bills by splitting them up, whereas, by making them large at the beginning of the season, he is driven to the necessity of letting them run to maturity, or even worse, he finds it necessary to take them up by notes.

The retail merchant should realize that by cautious buying he almost entirely eliminates the chance of being overstocked. The moment a merchant gets into the condition of being overstocked, he wants an extension. For the most part he attributes the cause of his embarrassment to the weather, or to the condition of the crops, whereas the true reason is that he has been carelessly overbuying.

The condition of business today is such that it is only a matter of a very few days after an order is given until the goods are in the store of the merchant, This justifies frequent purchases in comparatively small amounts. How many times are letters received by the wholesaler and the jobber from a retail dealer, saying, "I cannot possibly send you a check at present. Much to my regret I find my stock very little broken. I am afraid I am overstocked." Then it becomes evident that had the merchant bought lighter, he would have been in better shape to meet his bills.

Almost any house would prefer an account that is active—that is, where purchases are made frequently, with the bills maturing at different dates—to an account in which the purchases are made only two or three times a year, in large amounts, at the maturity of which it is necessary to close the account by notes. Every merchant has felt at one time or another the ill effects of being overstocked. The chief trouble is that they do not profit by experience.

My advice to all is this: At the opening of the season buy a good assortment and then duplicate the goods as you find you need them. By adhering to this plan you will find that at the end of the season you will be in position to purchase an entirely new line of goods, without finding it necessary to sell off at a loss what you would otherwise carry over at a considerable cost, and at the same time find yourself overstocked.

A new and attractive product of the Hayden Manufacturing Co.'s laboratory is their Lavender Water in 4-oz. and 8-oz. sizes, which is sold at the exceptionally low price of $2.00 and $4.00 per dozen respectively. The quality of this product is most satisfactory, and we look for a large output of the article. Order from F. W. Braun & Co.

Have you bought the latest edition (eighteenth) of the U. S. Dispensatory? It is supplied by F. W. Braun & Co. Price in sheep, $6.50; with thumb index, $7 00.

OTTO OF ROSES
KAZANLIK
Botu Pappazoglou & Co. Kazanlik
from Bulgaria

This very desirable package enables the drug trade to buy the article strictly as imported from Bulgaria, as the original seals and marks upon the coppers preclude any possibility of tampering with the contents.

We are confident that purchasers will be pleased with the goods, and solicit orders for the same. **Price, per oz., $6.50**

Be sure and specify Pappazoglou's.

F. W. BRAUN & CO.
LOS ANGELES, CAL.

An Injustice.

Probably no drug has been more unjustly maligned than Erythroxylon Coca. Yet no drug has really rendered more aid to therapeutics, as demonstrated in the many writings by authors, botanists and medical observers during the past century. At the time of the Incas (twelfth century), long before the discovery of Peru by Pizarro (1524), Coca was in extensive use. It rendered the greatest of service as a restorative, a fortifier, a sustainer. It was entirely depended upon to insure resistance to disease, fatigue, hardships or toil. For centuries Coca proved its usefulness and merit; it so has continued, notwithstanding the systematic series of attacks instigated in the sensational press, about three years ago, by malicious persons who had special interests in endeavoring to bring Coca into disrepute, if possible to dissuade its use.

The fast-growing popularity of Coca through the untiring efforts of Mariana, of Paris, who was the first to introduce it in Europe and in America in a uniformly reliable and agreeable form, and his labor and serious work in this direction were appreciated by the medical profession.* His preparation has become a most formidable rival to the many so-called tonics, restoratives and stimulants.

When it was clearly demonstrated that Coca was vastly superior and was being adopted universally by the physician, each manufacturer hastened to add Coca in some form or ananother to their various mixtures. While this was an admission of the value of Coca, it really injured its reputation, owing to the defective preparation produced. Unsatisfactory, even harmful results induced the profession to reject the many valueless, at times dangerous, concoctions. An active campaign was opened against Coca in the medical and daily press. Sensational articles without any basis of fact were instigated, with the dual purpose of inciting the opinion of the physician and the public against the drug, and thus prevent its use.

The manufacturers had no knowledge of the requisite treatment and preparation of this delicate, probably most volatile of plants—in fact, were unable to procure reliable leaves, there being even a vastly greater variation than in tea. Due to aforesaid causes, the manufacturers were either compelled to or voluntarily stopped the use of Coca. thus proving again the old saying, "the survival of the fittest," as, notwithstanding the combined efforts of the many competitors and antagonists, the well known preparation of Coca by Mariani, of Paris, France, which bears his name, is the only one which has resisted all attacks directed against Coca.

Introduced to the profession more than thirty-five years ago, it stands without an equal, and continues to be endorsed and upheld by all who subject it to thorough test. It certainly merits the attention of practitioners who for any of the aforesaid reasons may have not considered Coca in its true light, or who may have become prejudiced.

Mariani's Coca can be conscientiously recommended; its adoption into practice as an adjuvant in treatment of the innumerable cases where an absolutely reliable tonic, effective but mild stimulant is indicated, will render more assistance than any drug or medium known to therapeutics.

Its field of usefulness will gain for Coca in the form of a reliable preparation as great, or if possible, even a greater reputation in the future than it enjoyed at the time of the Incas.

There Are Others.

The Iowa Board of Pharmacy has received the following pathetic appeal, but unfortunately finding it impossible to give the relief sought, referred it to the Health Department, which, after due deliberation, declared also that the case was beyond its reach:

"Secretary State Pharmacy Board, Des Moines, Ia.—Dear Sir: In Communicating With you I wish to Explain my Position. In the first place I am a married man With a Family of Eight Children, Rangeing in age from Two Years to 18 Year Old. I Also Have a wife, who is infatuated With the Idea that she canbe come a Great Specialist Physician curing Tumors, Fever sores and Exzema; also skin Diseases. She has become so thoroughly taken up With the Idea that she will not stay at Home, and as she knows nothing about Materia Medica, Or has never seen a U. S. Dispensory, Hence she knows nothing of medicine.

Now this is what I would like to you have to do for Me is to arrest Her and Give her a good Scare and release her upon condition that she will never more attempt anything More of the kind. A scare of this Kind will have the desired effect. I do not want you To use my name or let her know In any manner that I am counected with the movement, or have Knowledge of it, AS IT WOULD COMPLICATE MATTERS AT HOME, and I do this hoping that She will come home after she finds out she cannot do business contrary to Law and Order. I am left in a bad plight, With a two year-old babe and three other small children, the oldest Ten Years of Age, all boys. I must earn my living by the Sweat of my Brow, but cannot do it and take Care of the Little People.

"I would like to have you notify me as to Whether You can do This. My friends have thought this the best way to Deal with the Case. Hoping to hear from you favorably, I remain, Very Respectfully Yours,

—. —. ———.

"N. B.—I cannot Locate her to Certainty, But think she is in Highland Park, Or south of Coon River."—*Era.*

IN 5-GAL. DEMIJOHNS

Price, Inclusive, per gal.............................80c.

This article is proving satisfactory to the trade and is quite low in price.

F. W. BRAUN & CO.

Formulas.

DRY SHAMPOO

The simplest form of this preparation is found in the following:

Tincture of soap bark	4 drams
Sodium borate	4 drams
Ammonium carbonate	4 drams
Oil of bay	10 minims
Alcohol	5 ounces
Distilled water	15 ounces

Dissolve the salts in the water and add to the solution the alcohol in which is dissolved the oils.—*Amer. Drug.*

FURNITURE RENOVATOR.

Linseed oil	20 parts
Resin, in powder	2 parts
Antimony hydrochlorate	1 part
Dilute acetic acid	4 parts
Methylated alcohol	1 part
Hydrochloric acid	1 part

Melt the oil, resin and butter of antimony together, adding the acetic acid dilute (good strong vinegar will answer) and the hydrochloric acid, and stirring in well. Remove from heat, let cool down somewhat and add the alcohol, stirring it in.

Apply the renovator with a soft flannel rag, using as little as possible. Finally polish off with a soft chamois. This renovator will make an old piece of furniture shine like new, if applied in the same manner, and plenty of "elbow grease" be used in the final polishing.—*Nat. Drug.*

FRAGRANT MOUTH WASH.

℞	Ol. Menth. Pip	m 60
	Ol. Anisi	m 90
	Ol. Caryoph	m 15
	Ol. Cinnam	m 15
	Saffron	gr. 10
	Alcohol	ozs. 20

Mix. —*Drug Topics.*

LIQUEUR DE BURROW.

Notwithstanding, says the *Annales de Pharmacie de Louvain*, that among the many antiseptic solutions and formulæ that have been presented in the last few years, that of Burrow has held the highest position, it has been denied a place in the Pharmacopœia (Belgian). As at present prepared we have it sometimes as clear as water, and again turbid, made after differing formulæ. In order to remedy this condition of uncertainty, the Medical Society of Anvers, after a conference with the Pharmaceutical Society of the same city, has indicated the following formula by which the antiseptic may be prepared always clear and bright, and always the same strength:

Plumbic acetate, crystals	100 parts
Distilled water	300 parts

Dissolve and set aside.

Sulphate of aluminum and potassium	66 parts
Sodic sulphate	12 parts
Distilled water	500 parts

Dissolve. Mix the two solutions. Let stand for two days and filter.—*Nat. Drug.*

The following extracts from the report of the Committee on Credits and Collections of the National Wholesale Druggists Association, at its October meeting, by Mr. A. Cressy Morrison, chairman, are of interest:

TRUSTS.

The most conspicuous feature of the financial situation is the development of that extraordinary aggregation of capital, energy and enterprise typified by the trust. So conspicuous have the great concentrations of capital become during the past two years that it has led to considerable uneasiness on the part of a large per cent of the population, and this distrust will be undoubtedly crystallized into political platforms before the next Presidential election.

The history of business in this country has shown that great business movements like, for instance, the series of tariff agitations, which ultimately resulted in the election of a low tariff party with strong free-trade tendencies, have always led to hesitancy in business transactions and to ultimate disaster. The aggregation of capital known as a trust is a natural evolution. The principle of the trust is, therefore, probably fixed on a firm foundation.

AGGREGATION OF CAPITAL HAS COME TO STAY.

That the concentration of energies and the great aggregations of capital have come to stay there can be no doubt. It is also probably true that many modifications of the present methods of the trust will be effected by the efforts of the political parties.

The country has settled down to bearing the burden of expense caused by the war and its subsequent responsibilities. The chief danger for the business man today, therefore, appears to be in the friction of the great parties during the next Presidential campaign, and the consequent sharp accentuation of the attack which is to be made upon aggregated capital. There are many who believe that the present administration will be sustained and continued, but whatever our political predilections may be, the credit man, who reads the signs of the times must begin, even now, to consider carefully the jeopardies which are certain to result from the turmoil of financial theories in 1900. Respectfully submitted.

A Treatment for Hydrophobia.

The arrival in New York of a Frenchman, named Paille, for the purpose of enlisting governmental aid in the promulgation of a plan for treating hydrophobia, recalls the curious fact that more than ninety years ago the Legislature of New York made an appropriation for carrying out an apparantly very similar method. M. Paille proposes first to endeaver to get an appropriation from the State Legislature, and, failing in that, to appeal to Congress. His remedy is said to consist of an internal medication, the basis of which is the pulverized bone of a rabbid dog's tail, which is mixed with a diluted tincture of laudanum, and other ingredients which he keeps secret. The French philanthropist will probably be astonished to learn that his "pulverized-dog-bone" remedy is a very old one in New York. In the early part of the century a New Yorker by the name of Crous, after failing to secure the coöperation of Major De Wit Clinton for the municipal sanction of a similar "cure", successfully applied to the State Legislature, and the following is the official record of the transaction:

STATE OF NEW YORK, COMPTROLLER'S OFFICE.

March 25th, 1806.

Pursuant to the direction of an act entitled, "An Act for granting compensation to John M. Crous for discovering a cure for canine madness", passed the second day of February, 1806, I do hereby certify the said John M. Crous hath this day deposited in this office a certain writing purporting to be the remedy used by him with certain success for more than twenty years past for the cure of hydrophobia, or canine madness, which writing is in the words and figures following, to wit (then follows a description of the remedy and the method of administration): The ingredients consist of one ounce of the pulverized jawbone of a dog, the dried and pulverized "false tongue of a newly foaled colt" and one scruple of the "verdigrisse which is raised on the surface of old copper by lying moist in the earth." The details of administration having been given, the record goes on to say: "If after-symptoms appear, a physician must be immediately applied to to administer the following, namely: Three drams of verdigrisse of the kind above mentioned, mixed with half an ounce of calomel, to be taken at one dose. This quantity the physician need not fear to administer, as the reaction of the venom then diffused through the whole system of the patient neutralizes considerably the powerful quality of the medicine. Secondly, if in three hours thereafter the patient is not completely relieved, administer four grains of pure opium or 120 drops of liquid laudanum."

This document in duly attested by Elisha Jenkins, comptroller, after having been sworn to before Chief Justice James Kent. Governor Lewis not only signed the bill but showed that he personally approved of it by writing several letters to friends praising Mr. Crous as a public spirited benefactor. There is no record extant, however, of how many people this wonderful treatment cured or killed.—*Boston Med. and Surg. Jour.*

A Man's Own Business.

BY FRANK SIBLEY

Stick to it; 1893 caught thousands of individuals, firms, and corporations with too many irons in the fire. It swamped them. They dropped like rows of sticks. The majority of business men and manufacturers can make money in the particular line in which they have been schooled. The majority of business men drop money when they go into side ventures. This country of ours is a country of ups and downs. We have been down for five years. We will now have several years of fairly prosperous times. But the day of panics is not over. Panics will come again. In the days of prosperity avoid outside speculation. Concentrate your capital in the business in which you are engaged. Put yourself in a position where you can go to bed at night owing no man a dollar. Then panics, long periods of depression and financial stringency for you will have no terrors.

A great many men seem to take considerable pride in being connected with a variety of enterprises. Once in a while those side enterprises pay. Twice in a while they lose. Those men die as do all others, but their estates are harder to settle. The other fellows engaged within the side enterprises "scoop" the estate. Liabilities never shrink. Stick to your own business and wipe them out.

If you can make more money than your business requires, don't entangle yourself with new alliances, but spend the surplus money or give it to charity and enjoy life.

Value of Antiseptic Soaps.

M. Curzio relates his experiments on the value of so-called antiseptic soaps, basing his results on the effect of the soap on B. pyogenes aureus. He finds that 1 per cent sublimate soft soap is neither aseptic nor antiseptic even after 24 hours' contact with the micro-organism. Sublimated hard soap is but little more active. Carbolic soap, 10 per cent., has no antiseptic action whatever, but salicylic acid, 3 per cent, and boric 5 per cent soaps are aseptic and antiseptic, the former being the most powerful, arresting the development of the micro-organism after a few minutes' contact.—*La Semaine Med.*

Druggists having inquiries for assay goods and chemical apparatus should consult F. W. Braun & Co.'s assay goods catalogue. There is always an opportunity for them to secure a margin of profit on orders taken.

OFFICE OF
Louisville Retail Druggists Association,
FIRST AND CHESTNUT,
Louisville, Kentucky.

Louisville, Ky., Nov. 27, 1899.

Messrs. F. W. Braun & Co., Los Angeles, Cal.:

Herewith find resolutions adopted by our local association. If the jobbers really appreciate the advantages that will certainly come to them if we succeed in limiting all direct supplies through them, they should certainly render the little assistance that is asked by these resolutions. If the retailers are true to their association, and desire to again conduct their business with some degree of profit, they will certainly approve and endeavor to give effect to these resolutions :

Whereas, The Potter Drug and Chemical Corporation have, within the past year, manifested a determined opposition to the interests of the retail drug trade by making no efforts to confine their sales to such legitimate channels as would afford a fair profit to the retailer, but instead have used every endeavor to concentrate the demand for their goods into the hands of department stores and aggressive cutters ;

Whereas, Various retail associations have, both directly and indirectly, endeavored to secure from this corporation some form of consideration of their requests for protection, which have been treated with absolute disregard ;

Whereas, The National Wholesale Druggists Association has placed itself on record as indorsing and favoring the plans adopted by the National Association of Retail Druggists, believing that the interests of the allied branches of the business could in this way be best subserved ; therefore, be it

Resolved, That the members of the National Wholesale Druggists Association, and all other wholesale druggists, as an evidence of their sincerity and loyalty to the National Association of Retail Druggists, be requested to refuse, from this time forward, to carry in stock or offer for sale, any of the products of the Potter Corporation until such time as the latter will endeavor to give all concerned a reasonable profit ;

Resolved, That a copy of these resolutions be forwarded to every wholesale druggist in this country, and to every pharmaceutical journal ;

Resolved, That a copy be also forwarded to each retail association affiliated with the National Association of Retail Druggists, with the request that they petition the jobbers from whom they make their purchases to accede to the requirements of these resolutions.

The above resolutions were adopted by the Louisville Retail Druggists Association on November 20, 1899.

Yours very truly,
G. L. Curry, Secretary.

Uricsol, the pharmaceutical product recently brought out by C. A. Laux Co., has received high commendation by the medical profession, and the demand for the article is proof of its increasing popularity.

He may be "a thing that grieves not and that never hopes, stolid and stunned, a brother to the ox," but somehow the man with the hoe is still astute enough to put the largest potatoes at the top of the barrel.—*Arizona Graphic.*

The Uses of Misfortune.

"The sun certainly does shine brighter after a rainy day," said Mr. Billtops, "and after a storm we enjoy smooth sailing all the more. So I suppose a certain amount of misfortune should not be regarded as anything very dreadful. We don't want crushing blows that burst our armor and cripple us, but a gentle whack now and then only serves to stir us up and improve our circulation. In fact, taken in moderate quantities, and not too often, misfortune gives to life a zest which otherwise it would lack."—*New York Sun.*

Business Personals.

Are you learning to write "1900"?

Frank Williams has resumed his old position with E. E. Armour, Pomona.

The Lincoln Proprietary Co., Fort Wayne, Indiana, have a word to say to druggists. See advertisement, this number.

Mr. J. C. Ferguson returns from Bisbee to Tucson, to assume the management of the Arcadian Pharmacy in that city.

J. L. Wallace, shipping clerk for F. W. Braun & Co., had the misfortune to break his right arm near the shoulder, Nov. 26th.

Mr. W. M. Gray, manager of F. W. Braun & Co.'s San Diego House, spent a few days in Los Angeles early this month.

Harry Lippen of Orange, a recent graduate from the Philadelphia College of Pharmacy, has accepted a position with C. E. Weck, Riverside.

F. H. Furnald, San Diego, has moved into his new quarters on the opposite corner from his old location, and has a very elegant place of business.

H. G. Dean, the Third and Main-street druggist, has a large and elegant disply of holiday goods and we bespeak a rushing trade for that department during the month.

If you have not secured a supply of Hildreth's "Velvet" Molasses Candy for a holiday sweetener, send to F. W. Braun & Co. for one or more cases. There's nothing like it.

Mr. George H. Francis has once more entered the drug trade at Congress, A. T., where he was burned out last January. We wish him a lively business and no more fires.

The Arcadian Pharmacy, Tucson, has been purchased by Mr. C. J. Flower. The store will be managed by J. P. Ferguson, who was formerly in the employ of Mr. George Martin of that city.

D. F. Everett has purchased the drugstore of Dr. W. T. Merchant, Norwalk. Mr. Everett is a thoroughly competent pharmacist and will be an acquisition to the locality he has chosen for residence.

We note the marriage at Long Beach, Nov. 19th, of Chas. S. Kelley and Louisa Kingcade. Mr. Kelley is a well known pharmacist in the employ of F. L. Wingard. Our congratulations are cordially extended to the happy pair.

Schlott & Seccombe have opened a new drugstore in San Bernardino, opposite the Stewart Hotel, fitting it up in modern style and with a fine line of standard drugs and prescription medicines, and an elegant assortment of showcase and holiday goods. The proprietors are well known in the pharmaceutical line in San Bernardino, and will make a strong pull for their share of the trade of that city.

We are pleased to note that Godfrey & Moore are putting in handsome and elegant glass showcases and counters combined, which will be a great attraction and give them larger facilities for displaying their large and selected stock of Druggist Sundries and Holiday goods.

Jones & Son, Ventura, have greatly improved and modernized their store by an entire new plate-glass front, a change which will be appreciated by their many friends and patrons. They have also laid new linoleum and repainted in white the woodwork, inside and front. These improvements testify to the progressive spirit of the firm.

Mr. N. E. Ferguson, lately representing F. W. Braun & Co. in Arizona and New Mexico, has resigned his position for the purpose of taking charge of the Bisbee Drug Co.'s store, in which he recently bought an interest. His place on the road will be taken by Mr. M. E. Conboy, who has for some years held an office position with the Los Angeles house.

The death of Dr. S. Rosenberger, Pasadena, which occurred Dec. 5th, removes from us not only a member of the drug fraternity, but a gentleman of high standing in the medical profession, and a citizen of culture and public spirit. Dr. Rosenberger was 68 years of age at the time of his death, and was a veteran of the Civil War, during which he served as a surgeon in the Union army.

In a paper to the American Association for the Advancement of Science, Dr. E. W. Scripture described a method of producing anæsthesia by direct application of the electric current without the aid of drugs. An alternating current, with equal positive and negative phases, is made to traverse the nerve, and at a proper frequency of about 5,000 periods in a second it can be made to cut off all sensory communication by the particular nerve acted upon by the current. Complete anæthesia of the portion of the body traversed by the nerve is thus secured.—*Drug Topics.*

We are in receipt of Elliott & Ferguson's System of Instruction in Qualitative Chemical Analysis, third edition, revised and enlarged, price $1.50, by Arthur H. Elliott, Ph. D., Professor Emeritus of Chemistry and Physics in the College of Pharmacy of the city of New York, and George A. Ferguson, Ph. B., Professor of Analytical Chemistry and Director of the Chemical Laboratory in the same college. To those familiar with the previous editions of this manual, which has become widely known through its use as a text-book in many institutions, this revised edition will receive the appreciation due to its merits as well as to the high character of its authors.

It has a special value in the instruction of classics in laboratory work, the plan commended by the authors being a simultaneous demonstration of each operation by instructor and students, the material and apparatus used by each being precisely alike.

Concise and lucid paragraphs subdivide and simplify each subject, permitting easy memorizing of important facts.

The work is divided into sixteen chapters, of which the five groups of metals occupy eleven, the acid radicals three, while one chapter is devoted to the treatment of mixtures containing compounds insoluble in water. With the introduction is given a list of apparatus and reagents required by the student.

Communications should be addressed to the authors, who are also the publishers, 115–119 West Sixty-eighth street, New York city.

Industrial Extraction of Iodine.

The manufacture of iodine is of interest, both to chemical industry and to pharmacy, because the use of iodine and iodides in thereapeutics is increasing.

Industrially, iodine is extracted from seaweed, a term by which all the different plants of the algæ family are designated. These plants, gathered at certain seasons, by scraping the surface of rocks, used to be dried and burned ; the iodine was extracted by lixiviating the ashes. The new and more remunerative method allows us to obtain at the same time an excellent nitorgenous manure well adapted to agricultural purposes.

By this process iodine is extracted by lixiviating either fresh or air-dried plants, but not those which have been calcined.

The iodine all passes out with the drainage water and the seaweeds preserve their fertilizing substance, which is about 3.73 per cent nitrogen and 10 per cent potash.

Here is the operation, according to La Revue des Products Chimiques : Seawater is limed in the proportion of eight kilograms of lime to each cubic meter of seawater in order to get an alkaline reaction and precipitate the magnesia. This solution is poured on the seaweed in the proportion of 2 to 1. After twelve hours' contact 60 to 65 per cent of the iodine passes in solution and the remaining quantity is nearly totally extracted by two more lixiviations with the limed seawater. The last waters are quite weak and consequently are put aside for the first drainage of another operation. The lixiviation is thus made methodical.

The second part of the operation consists of the extraction of the iodine, now united in the limed seawater. First, all organic mucilaginous matter is separated by the addition of ferrous sulphate in the proportion of three kilograms to the cubic meter. The ferric hydrate, precipitated with the organic matter, is easily separated by decantation and reunited to the seaweed by subsequent treatment. The remaining solution is limpid and colorless. It is now drawn off into vast wooden vats and neutralized by sulphuric acid in the proportion of two kilograms of acid at 66 degree B to the cubic meter. The iodine is then freed by the use of nitrous nitric acid (1, 500 gr. to the ton) or some other appropriate reagent (persulphates, etc.). The iodine is then finally separated by two applications of petroleum in the proportion of thirty kilograms to the cubic meter. The petroleum then gives up its iodine in an alkaline lye of soda or potash, from which the pure iodine can then be obtained. It is then sublimated and put on the market.—*American Druggist.*

WANTS, Etc., Etc.

[*Under this heading we will be pleased to publish FREE OF CHARGE, notices of clerks wanted, positions desired, stores for sale or exchange, propositions for purchasing, etc.*]

FOR SALE.—Drug store in the largest mining camp in Southern California. Owner is compelled to sell on account of health. Address E. J. P., care of CALIFORNIA DRUGGIST.

WANTED—Situation as clerk by druggist ; 15 years experience ; 35 years old. Can come about January 1st. Salary reasonable. Can give satisfactory references as to character and ability. Registered in Missouri by examination. Have had country and city experience. Prefer country town. Address, W. E. Elliott, Centralia, Mo.

FOR SALE—A drug business and medical practice in a growing community in Arizona. A money making proposition for a physician wanting to run both branches. Price, including dwelling-house and land, $2,000. No competition nearer than 42 miles. Address for further particulars, W. A. Graham, M. D., Duncan, Ariz.

FOR SALE—Small drugstore in residence district of Los Angeles. Growing neighborhood. Established five years. Very little credit. Rent and other expenses low. Average cash sales about $400 per month. Will sell at invoice for cash (about $1600). Reason for selling, owner wishes to go East. Address "Matricaria", care of CALIFORNIA DRUGGIST.

STOCK of Drugs, etc.—A $1,600 stock of drugs, books and notions, including furniture and fixtures, in a small town eight miles from San Diego, Cal., in the midst of 3,000 acres of orange and lemon orchards ; owner is old and in poor health, and will sell at a bargain for cash. Address Box 174, Chula Vista, Cal.

FOR SALE—Only drug store in Southern California town of 600 inhabitants, with a large tributary population. Rich dairy country in artesian belt ; 10 miles from ocean ; no competition nearer than 8 miles. Stock of about $2000. Rent only $8.00 per month. Will sell at invoice, with reasonable discount for cash. Inquire of F.W. BRAUN & CO., Los Angeles.

FOR SALE—City drugstore, established 13 years, at invoice—$2,100. Cash sales $4,500. Address "Rare Bargain," care F. W. Braun & Co.

FOR EXCHANGE—40-acre ranch in Orange County, free of incumbrance, for drug business. Address F. S. L , care F. W. BRAUN & CO., Los Angeles.

FOR SALE—Drug store in Arizona, in the best mining camp in the Territory ; no opposition ; no cutting of prices ; first-class place for a doctor wishing to run drug store in connection. For particulars address Arizona, care F. W. BRAUN & CO., Los Angeles.

WANTED—To trade good dwelling in the town of Revere, Mo., and 16 acres good land adjoining town for stock of drugs in a good town in one of the western States. Address A. G. Ehrhart, Revere, Mo.

WANTED—Position as drug clerk by a married man 30 years old ; good habits ; best reference. Address box 173, Santa Maria, Cal.

For beautifying the complexion; an infalible and radical cure for Freckles, Tan, Sunburn, Pimples, Moth Patches, Liver Mole, Ringworms, Salt Rheum Dandruff, Scaly Eruptions and all other Skin Diseases.

Its unrivaled beautifying and healing properties are amply attested by the innmerable persons using it, by thousands of unsolicited testimonials in our possession, by the unequaled sale it has gained in ten years, solely through verbal recommendations (not having been advertised until the present time by any paid method whatever), and the almost entire disappearance of cutaneous affections in portions of the country where generally used. Only articles of merit and success are imitated. See that you get

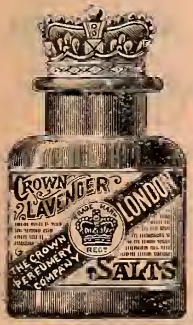
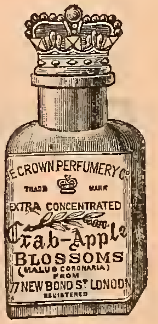
Crown Perfumery Company.

Trade-Mark Injunction





Lavender Salts and Crab-Apple Blossoms

The United States Circuit Court has issued a perpetual injunction against the Winkelmann & Brown Drug Company for infringing the trade-marks of the Crown Perfumery Company, and has forbidden the use of the names "Lavender Salts" and "Crab-Apple Blossoms" on imitation products.

The following is the full text of the injunction:

Circuit Court of the United States,

DISTRICT OF MARYLAND.

William Sparks Thomson,
Complainant,
against
Winkelmann & Brown Drug Company,
John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall,
Defendants.

The President of the United States of America:

To Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, their attorneys, servants, agents, and all persons in privity with them, or either of them, Greeting:

Whereas, William Sparks Thomson, citizen of the State of New York, has filed on the equity side of the Circuit Court of the United States for the District of Maryland, a bill against Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, and has obtained an allowance for an injunction as prayed for in said bill;

Now, Therefore, We having regard to the matters contained in said bill, do hereby command and strictly enjoin you, the said Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, your attorneys, servants, agents and all persons in privity with you or either of you, from manufacturing and from selling, and from in any manner offering to sell, and from distributing and from in any way disposing of any preparation or article to which shall be applied in any form or manner as the name or designation thereof, the words "Lavender Salts," or "Crab-Apple Blossom," or "Crab-Apple Blossoms," with or without other words, and from making use of either of the labels like that annexed to complainant's bill filed herein, marked "Defendant's Label No 1," and "Defendant's Label No. 2," and from making use of labels, substantially like either of said labels, and from in any other form or manner using any name or designation which is calculated to cause your property to be known in the market, and sold under the name of complainant's article or as "Lavender Salts" or "Crab-Apple Blossom" or "Crab-Apple Blossoms," which commands and injunctions you, and each of you are respectively required to observe and obey, perpetually and forever hereafter.

Witness the Honorable Melville W. Fuller, Chief Justice of the United States, this 28th day of June, 1897, and in the one hundred and twenty-first year of the Independence of the United States of America.

[SEAL]

JAS. W. CHEW,
Clerk of our said Circuit Cour

Special Notice.—The Crown Perfumery Company desire to say they trust that the above injunction, which is so directly in accord with the conscience and sense of justice of every honorable business man, will be all that is necessary to induce the trade to at once abandon the sale of these imitation articles bearing the titles of "Crab-Apple Blossom Perfume" or "Lavender Salts," and not compel the Company to take further proceedings in defense of their rights.

CALIFORNIA
CREAM OF LEMON
CLEANSES BETTER
LEAVES THE SKIN
AND SOFT.
UNEQUALE FOR BATH
CREAM OF LEMON
BALLOU & COSGROVE
AGENTS U.S. SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the California Cream of Lemon Co. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

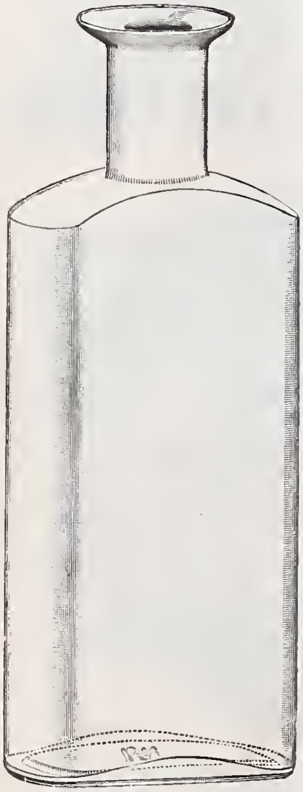
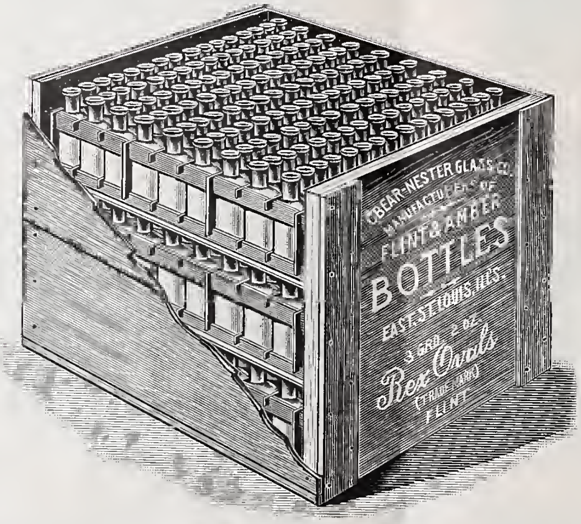
"Rex Ovals"

1899

[TRADE MARK]

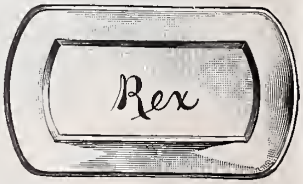
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing,** which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "Rex Ovals."

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special style of finish.** Our brand, "Rex Oval," is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine "Rex Oval."** Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "Rex Ovals" or users of this style of packing.

Try a few cases in your next order and be convinced.

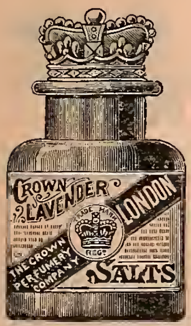
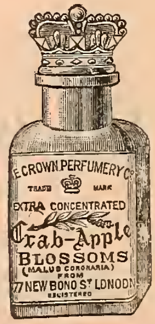
Crown ❧ Perfumery ❧ Company.

Trade-Mark Injunction





Lavender Salts and Crab-Apple Blossoms

The United States Circuit Court has issued a perpetual injunction against the Winkelmann & Brown Drug Company for infringing the trade-marks of the Crown Perfumery Company, and has forbidden the use of the names "Lavender Salts" and "Crab-Apple Blossoms" on imitation products.

The following is the full text of the injunction:

Circuit Court of the United States,

DISTRICT OF MARYLAND.

William Sparks Thomson,
Complainant,
against
Winkelmann & Brown Drug Company,
John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall,
Defendants.

The President of the United States of America:

To Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, their attorneys, servants, agents, and all persons in privity with them, or either of them, Greeting:

Whereas, William Sparks Thomson, citizen of the State of New York, has filed on the equity side of the Circuit Court of the United States for the District of Maryland, a bill against Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, and has obtained an allowance for an injunction as prayed for in said bill;

Now, Therefore, We having regard to the matters contained in said bill, do hereby command and strictly enjoin you, the said Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, your attorneys, servants, agents and all persons in privity with you or either of you, from manufacturing and from selling, and from in any manner offering to sell, and from distributing and from in any way disposing of any preparation or article to which shall be applied in any form or manner as the name or designation thereof, the words "Lavender Salts," or "Crab-Apple Blossom," or "Crab-Apple Blossoms," with or without other words, and from making use of either of the labels like that annexed to complainant's bill filed herein, marked "Defendant's Label No 1," and "Defendant's Label No. 2," and from making use of labels, substantially like either of said labels, and from in any other form or manner using any name or designation which is calculated to cause your property to be known in the market, and sold under the name of complainant's article or as "Lavender Salts" or "Crab-Apple Blossom" or "Crab-Apple Blossoms," which commands and injunctions you, and each of you are respectively required to observe and obey, perpetually and forever hereafter.

Witness the Honorable Melville W. Fuller, Chief Justice of the United States, this 28th day of June, 1897, and in the one hundred and twenty-first year of the Independence of the United States of America.

[SEAL]

JAS. W. CHEW,
Clerk of our said Circuit Court

Special Notice.—The Crown Perfumery Company desire to say they trust that the above injunction, which is so directly in accord with the conscience and sense of justice of every honorable business man, will be all that is necessary to induce the trade to at once abandon the sale of these imitation articles bearing the titles of "Crab-Apple Blossom Perfume" or "Lavender Salts," and not compel the Company to take further proceedings in defense of their rights.

F. W. BRAUN & CO.'S DRUGGISTS' SUNDRIES DEPARTMENT.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1 00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure." It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist.

A. R. BREMER CO., 15-21 La Salle St., CHICAGO.

CREAM OF LEMON
CLEANSES BETTER
LEAVES THE SKIN AND SOFT.
UNEQUALED FOR BATH AND
CREAM OF LEMON CO.
BALLOU & COSGROVE
AGENTS U.S. SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the CALIFORNIA CREAM OF LEMON Co. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

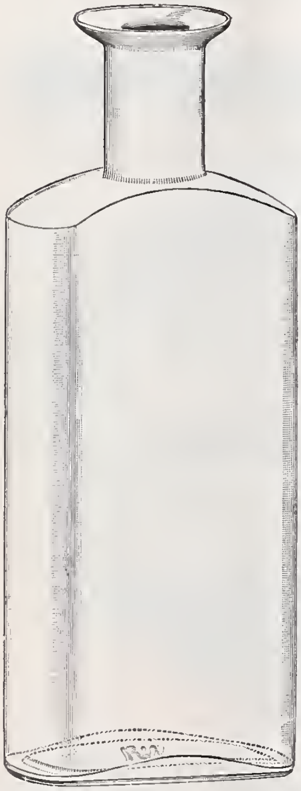
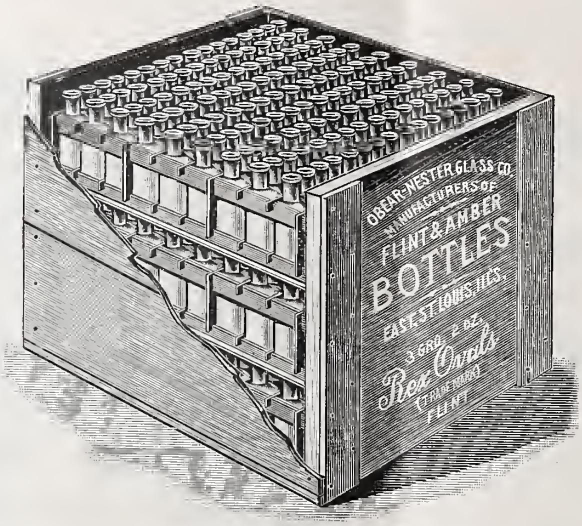
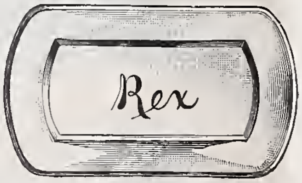
[TRADE MARK]

PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY
OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "Rex Ovals."

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special styl of finish.** Our brand, "Rex Oval," is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine "Rex Oval."** Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "Rex Ovals" or users of this style of packing.

Try a few cases in your next order and be convinced.

Chamberlain's
Cough
Remedy...

DANGERS OF THE GRIP.

The greatest danger from La Grippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventive of that dangerous disease. It will cure la grippe in less time than any other treatment. It is pleasant and safe to take.

EUCALYPTUS PLASTERS

(On Canton Flannel)

Price to the Trade, $1 50 Per Doz.

A remarkably prompt and efficient relief and remedy for Colds on the Lungs, Pains in the Back or Side, and wherever a warming and stimulating plaster is indicated.

Wyeth's Granular Effervescing Salts.

The following list of Granular Effervescing Salts embraces those in popular and general demand. We ask the trade to compare their general physical appearance with those usually found in the market.

For uniformity and fineness of granule, ready and complete solubility, sparkling effervescence and general freshness, delicacy of flavor and character, they are unsurpassed. They are prepared with scrupulous exactness as to the strength and contents of each drachm or sixty grains.

LIST PRICES, SUBJECT TO USUAL DISCOUNTS.

TOOTHBRUSH FACTS

⁂

The PROPHYLACTIC is the only right tooth brush. It is offered as the very best brush that can be made. It is best because it best does what a tooth brush is meant to do. It cleans the teeth clean. The differing lengths of its bristles permit it to penetrate all the crevices of the teeth and remove all foreign matter. No other brush does this. The shape of the handle, and the tapering, wedge shape given to the bristle end of the brush give it added advantage.

There's a profit in selling it, of course. Two profits—a direct one in cash, and an indirect one growing out of the satisfaction of the buyer. It's a good brush to sell.

THREE SIZES, Adult's, Youth's and Child's.

Lavender Salts and Crab-Apple Blossoms

E CROWN PERFUMERY C
TRADE MARK
EXTRA CONCENTRATED
Crab-Apple
BLOSSOMS
(MALUS CORONARIA)
FROM
77 NEW BOND ST LONDON
REGISTERED

The United States Circuit Court has issued a perpetual injunction against the Winkelmann & Brown Drug Company for infringing the trade-marks of the Crown Perfumery Company, and has forbidden the use of the names "Lavender Salts" and "Crab-Apple Blossoms" on imitation products.

The following is the full text of the injunction:

Circuit Court of the United States,

DISTRICT OF MARYLAND.

WILLIAM SPARKS THOMSON,
Complainant,
against
WINKELMANN & BROWN DRUG COMPANY,
JOHN H. WINKELMANN, CARL STOFFREGEN AND F. A. OHRENSCHALL,
Defendants.

The President of the United States of America:

To Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, their attorneys, servants, agents, and all persons in privity with them, or either of them, Greeting:

WHEREAS, William Sparks Thomson, citizen of the State of New York, has filed on the equity side of the Circuit Court of the United States for the District of Maryland, a bill against Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, and has obtained an allowance for an injunction as prayed for in said bill;

NOW, THEREFORE, We having regard to the matters contained in said bill, do hereby command and strictly enjoin you, the said Winkelmann & Brown Drug Company, John H. Winkelmann, Carl Stoffregen and F. A. Ohrenschall, your attorneys, servants, agents and all persons in privity with you or either of you, from manufacturing and from selling, and from in any manner offering to sell, and from distributing and from in any way disposing of any preparation or article to which shall be applied in any form or manner as the name or designation thereof, the words "Lavender Salts," or "Crab-Apple Blossom," or "Crab-Apple Blossoms," with or without other words, and from making use of either of the labels like that annexed to complainant's bill filed herein, marked "Defendant's Label No 1," and "Defendant's Label No. 2," and from making use of labels, substantially like either of said labels, and from in any other form or manner using any name or designation which is calculated to cause your property to be known in the market, and sold under the name of complainant's article or as "Lavender Salts" or "Crab-Apple Blossom" or "Crab-Apple Blossoms," which commands and injunctions you, and each of you are respectively required to observe and obey, perpetually and forever hereafter.

WITNESS the Honorable Melville W. Fuller, Chief Justice of the United States, this 28th day of June, 1897, and in the one hundred and twenty-first year of the Independence of the United States of America.

JAS. W. CHEW,
[SEAL] Clerk of our said Circuit Cour

Special Notice.—The Crown Perfumery Company desire to say they trust that the above injunction, which is so directly in accord with the conscience and sense of justice of every honorable business man, will be all that is necessary to induce the trade to at once abandon the sale of these imitation articles bearing the titles of "Crab-Apple Blossom Perfume" or "Lavender Salts," and not compel the Company to take further proceedings in defense of their rights.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure." It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist.

Cream of Lemon

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the CALIFORNIA CREAM OF LEMON CO. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

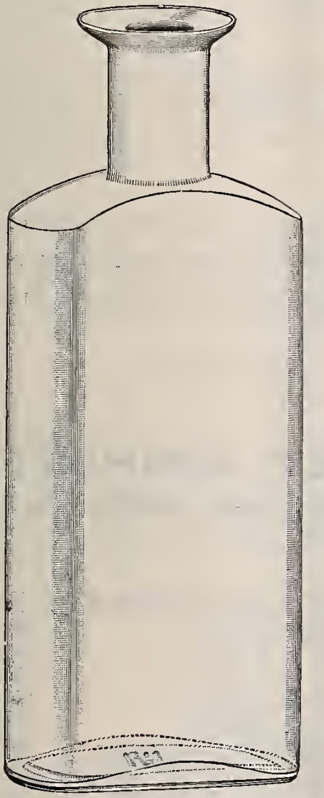
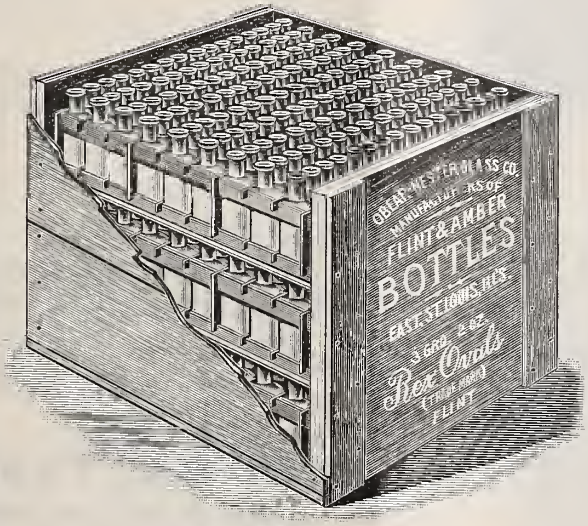
1898 "Rex Ovals" 1899

[TRADE MARK]

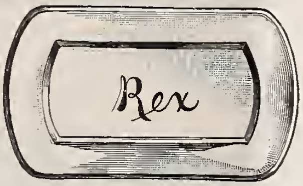
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "**Rex Oval**" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "Rex Oval." Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

Chamberlain's Cough Remedy...

DANGERS OF THE GRIP.

The greatest danger from La Grippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventive of that dangerous disease. It will cure la grippe in less time than any other treatment. It is pleasant and safe to take.

THE RIGHT TOOTHBRUSH

The PROPHYLACTIC Toothbrush is the one druggists ought to sell, because it gives better satisfaction than any other. No one who has used the PROPHYLACTIC is ever willing to do without it. It is the only brush that will clean between the teeth. It is the only brush that is not exactly like all other brushes. A glance at the brush and a word from the druggist sells it every time—quickly, easily and without argument.

THREE SIZES, Adult's, Youth's and Child's.

Always Sold in a Yellow Box.

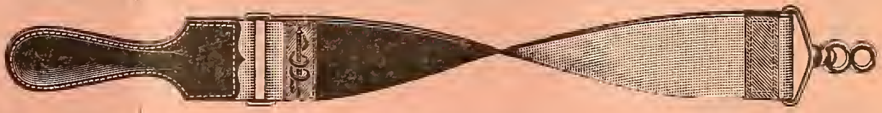
Boar Skin Razor Strops

The superiority of the Boar Skin for razor strops is a recent discovery. It is the only leather found which is free of pores, and the grain is so close and firm that it possesses unusual frictional qualities. The leather is light, however, and it is necessary to reinforce it. With the Boar Skin reinforced by a good finishing leather, we get an ideal razor strop—extra heavy and firm—and to all intents and purposes a single swing.



Strops under this illustration are single, but being boar hide cemented to leather, have all the qualities of a two-piece strop, the boar's hide taking the place of canvass, and doing the work much more effectively.

THESE STROPS ARE UNUSUALLY HANDSOME

No.	Size—In.		Per Doz.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. Bremer Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure." It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me.

Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. Riddell, Druggist.

A. R. BREMER CO., 15-21 La Salle St., CHICAGO.

UNEQUALE FOR BATH AN
REAM OF LEMON
BALLOU & COSGROVE
AGENTS US SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the California Cream of Lemon Co. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

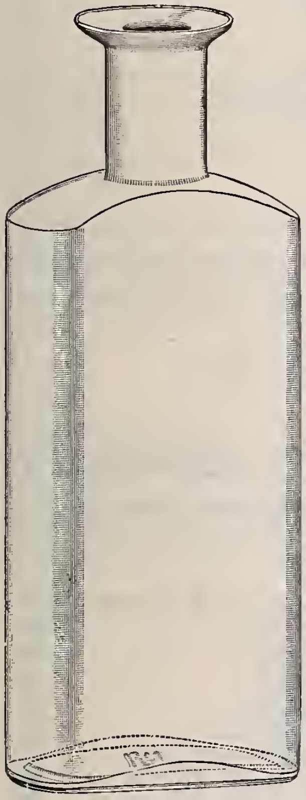
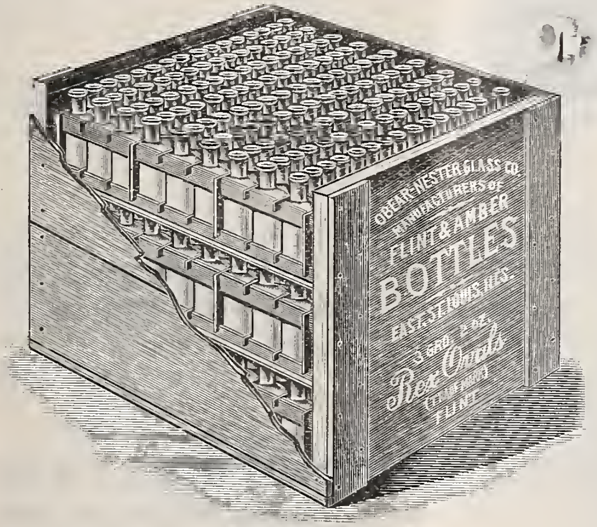
"Rex Ovals"

[TRADE MARK]

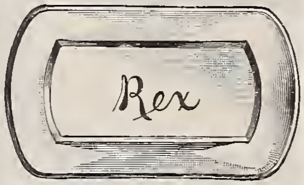
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "Rex Ovals."

We take especial pains with the **selecting and finishing of this ware**, and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "Rex Oval." Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "Rex Ovals" or users of this style of packing.

Try a few cases in your next order and be convinced.

Chamberlain's
Cough
Remedy...

DANGERS OF THE GRIP.

The greatest danger from La Grippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventive of that dangerous disease. It will cure la grippe in less time than any other treatment. It is pleasant and safe to take.

MALVINA ICHTHYOL SOAP

For beautifying the complexion; an infalible and radical cure for Freckles, Tan, Sunburn, Pimples, Moth Patches, Liver Mole, Ringworms, Salt Rheum Dandruff, Scaly Eruptions and all other Skin Diseases.

Its unrivaled beautifying and healing properties are amply attested by the innumerable persons using it, by thousands of unsolicited testimonials in our possession, by the unequaled sale it has gained in ten years, solely through verbal recommendations (not having been advertised until the present time by any paid method whatever), and the almost entire disappearance of cutaneous affections in portions of the country where generally used. Only articles of merit and success are imitated. See that you get

THE COST OF A
TOOTHBRUSH

Is so small a matter that every one would buy the best if they knew which was the best. It doesn't take more than a minute to show that the PROPHYLACTIC is the best—so much better than any other that no other is to be thought of. Decision is quickly made and the druggist realizes the much desired "quick sales and big profits."

THREE SIZES, Adult's, Youth's and Child's.

Always Sold in a Yellow Box.

HUGHSON & MERTON, 421 Market St., San Francisco

FOR SALE BY

F. W. BRAUN & CO.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure." It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me.

Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist.

A. R. BREMER CO., 15-21 La Salle St., CHICAGO.

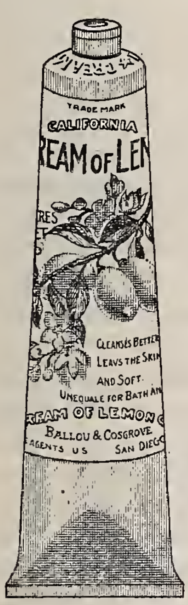
Cream of Lemon



TRADE MARK
CALIFORNIA
CREAM OF LEMON
CLEANSES BETTER
LEAVES THE SKIN
AND SOFT.
UNEQUALED FOR BATH AND
CREAM OF LEMON
BALLOU & COSGROVE
AGENTS U.S. SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the California Cream of Lemon Co. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

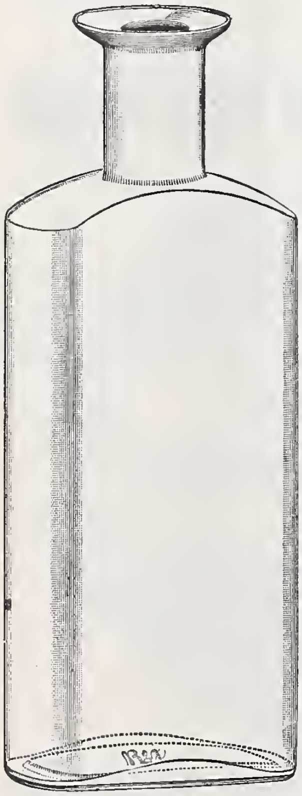
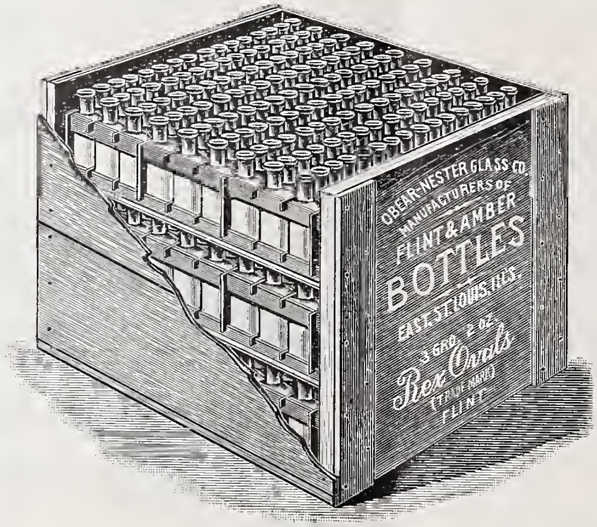
"Rex Ovals"

[TRADE MARK]

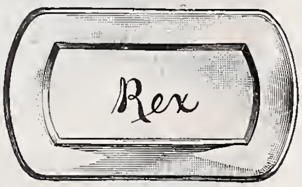
**PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER**





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware**, and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine "Rex Oval."** Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

Chamberlain's Cough Remedy...

DANGERS OF THE GRIP.

The greatest danger from La Grippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventive of that dangerous disease. It will cure la grippe in less time than any other treatment. It is pleasant and safe to take.

Wyeth's Granular Effervescing Salts.

The following list of Granular Effervescing Salts embraces those in popular and general demand. We ask the trade to compare their general physical appearance with those usually found in the market.

For uniformity and fineness of granule, ready and complete solubility, sparkling effervescence and general freshness, delicacy of flavor and character, they are unsurpassed. They are prepared with scrupulous exactness as to the strength and contents of each drachm or sixty grains.

LIST PRICES, SUBJECT TO USUAL DISCOUNTS.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. Bramer Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure." It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. Riddell, Druggist

CALIFORNIA
REAM OF LEM
CLEANSES BETTER
LEAVS THE SKIN
AND SOFT
UNEQUALE FOR BATH AN
REAM OF LEMON
BALLOU & COSGROVE
AGENTS US SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the California Cream of Lemon Co. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

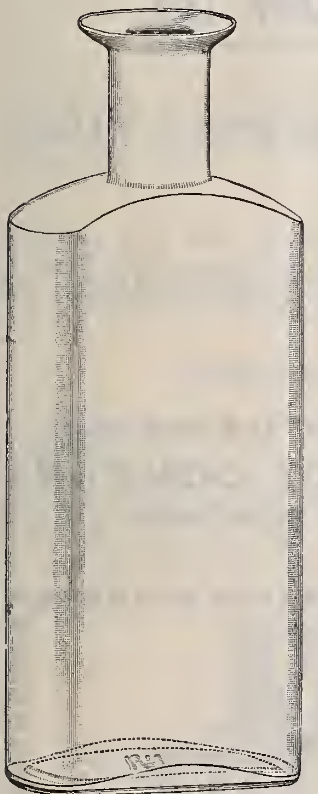
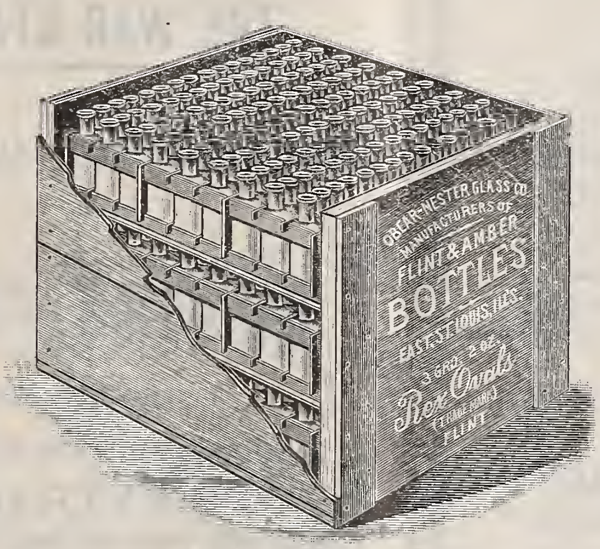
1898 "Rex Ovals" 1899

[TRADE MARK]

PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY
OBEAR-NESTER GLASS CO. St. Louis Mo.

The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing,** which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "**Rex Oval.**" Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

...., Instructor in Materia Medica. (To be appointed.)
...., Instructor in Microscopy, Vegetable Histology and Pharmacognosy. (To be appointed.)

IMPORTANT ANNOUNCEMENT.

In order to somewhat extend the course of instruction, and yet allow the Senior Class to be graduated with the Academic, Scientific and other Professional Departments of the University, the next term will open earlier than heretofore, viz., on

MONDAY, AUGUST 15th, 1899

On which date those who have not credentials entitling them to matriculate will appear to be examined for entrance, **at the College, Parnassus Avenue (Affiliated Colleges), at 9 a. m.**

Holders of satisfactory credentials can be matriculated any time before the above mentioned date by presenting their diplomas or other evidences of qualification to the Dean, at his office, **400 Sutter Street,** or on that date at the College.

The course leading to the degree of Graduate in Pharmacy consists of two terms of thirty-two weeks each, including two weeks' vacation at Christmas. A third-year course for the degree of Ph. C. or Phar. D. will probably be in operation in 1900. The hours of instruction are from 8:30 a. m. to 12:30 daily, Sundays excepted. For further particulars apply to

W. M. SEARBY, Dean, 400 Sutter St., San Francisco, Cal.

Massage Rollers and Developers

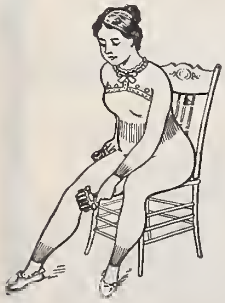
Emerson says: "A beautiful woman is a practical poet, teaching her savage mate, planting tenderness, hope and eloquence in all whom she approaches."

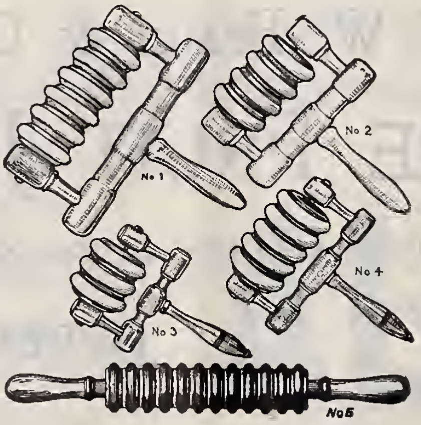
IT is every woman's duty to be as beautiful as possible, to cultivate the beauty, be it little or much, that nature has endowed her with.

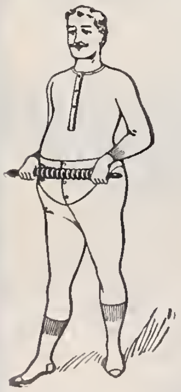
The Health and Massage Rollers are scientific instruments for a rapid and healthy development of the face, neck and bust, and constitute much to a woman's health and appearance.

The rollers consist of a series of wheels about 1½ inch diameter on a flexible axle; around the center of each is a band or buffer of elastic rubber. This is set in a suitable handle and is convenient for use.

These instruments are being prescribed by physicians and beauty specialists, and to supply the demand **F. W. BRAUN & CO.** have placed the following in stock:



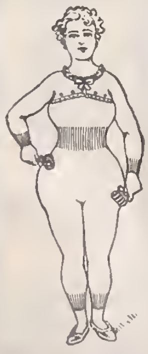




Health and Massage Rollers.

No. 1, SIX WHEELS—With wide buffers, the cross piece of locust, and handle of rosewood or black walnut, all highly polished. This is very strong and can be used with one or both hands over the back, the stomach and bowels and on the limbs. Price **$2.00**

No. 2, FOUR WHEELS—Frame and handle of white maple, light but strong, well adapted for small women and men who are not strong; many use both for best results. Price **$1.50**



Face and Bust Developers.

The developers are made of elegant Central American woods, tulip, ebony, mahogany, etc., all highly polished in natural colors and are an ornament to any lady's toilet table. The wheels are all ebonized and covered with a soft gum buffer so they cannot cause any pain or injury.

No. 3, FACE DEVELOPER—This is used for the cheeks, to fill out and give color, to remove wrinkles from the forehead, increase size of neck, and for head massage to prevent falling of the hair. Price **$1.50**

UNEQUALE FOR BATH AN
CREAM OF LEMON
BALLOU & COSGROVE
AGENTS U.S. SAN DIEGO

California Cream of Lemon...

is made entirely from the soluble substance of the whole lemon. It contains no chemicals or adulterants.

Used as a bath soap, it not only cleanses the skin quickly and thoroughly, but leaves it delightfully soft, smooth and white.

Being a natural skin food, it cannot be excelled for babies' baths. It keeps the skin sweet and pure and prevents all irritation. It is a skin tonic and a skin builder.

It restores faded complexions to the freshness of youth, and removes wrinkles.

After using the Cream, either in the bath or otherwise, the skin is strengthened, invigorated and beautified.

It is put up in three-ounce collapsible tubes and retails at 15 cents per tube.

It is manufactured by the CALIFORNIA CREAM OF LEMON CO. (Incorporated), San Diego, Cal. The trade supplied by the wholesale druggists, who will be pleased to quote prices.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist

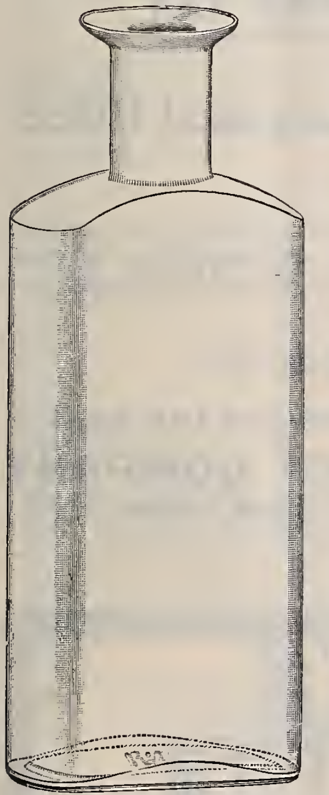
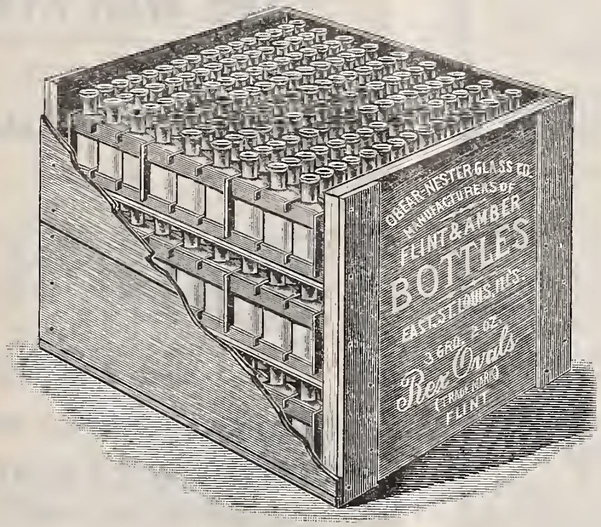
1898 "Rex Ovals" 1899

[TRADE MARK]

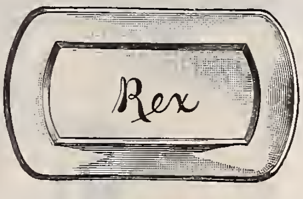
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware**, and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "**Rex Oval.**" Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

J. E. BARBAT, Ph. G., Instructor in Materia Medica.
LUTHER W. BAHNEY, Ph. G., Instructor in Microscopy, Vegetable Histology and Pharmacognosy.

IMPORTANT ANNOUNCEMENT.

In order to somewhat extend the course of instruction, and yet allow the Senior Class to be graduated with the Academic, Scientific and other Professional Departments of the University, the next term will open earlier than heretofore, viz., on

MONDAY, AUGUST 14th, 1899

On which date those who have not credentials entitling them to matriculate will appear to be examined for entrance, **at the College, Parnassus Avenue (Affiliated Colleges), at 9 a. m.**

Holders of satisfactory credentials can be matriculated any time before the above mentioned date by presenting their diplomas or other evidences of qualification to the Dean, at his office, **400 Sutter Street,** or on that date at the College.

The course leading to the degree of Graduate in Pharmacy consists of two terms of thirty-two weeks each, including two weeks' vacation at Christmas. A third-year course for the degree of Phar. D. will probably be in operation in 1900. The hours of instruction are from 8:30 a. m. to 12:30 daily, Sundays excepted. For further particulars apply to

W. M. SEARBY, Dean, 400 Sutter St., San Francisco, Cal.

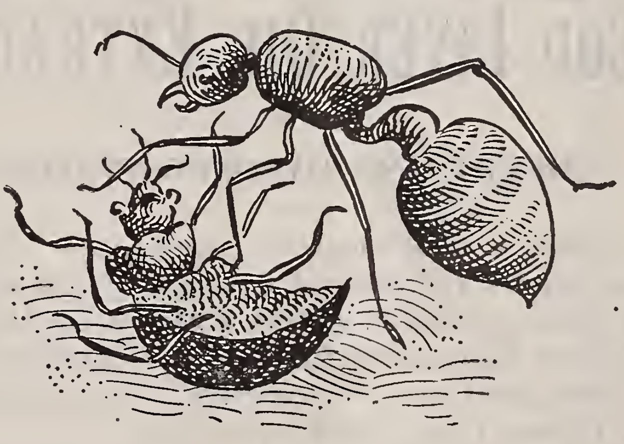
ANTILENE ANT AND BED BUG EXTERMINATOR



TRADE-MARK

An entirely new, **guaranteed** specific for the extermination of Ants, Bed Bugs, Fleas, Roaches and Mice.

ANTILENE is particularly adapted for Ants, as it is clean, has no offensive odor, does not spoil furniture and can scarcely be seen where applied.

ANTILENE will rid your house, fruit trees, rose bushes, vines, gardens and walks of Ants. See directions on each bottle.

FOR FLEAS—The use of an atomizer is necessary to rid your house of Fleas. Spray some Antilene on floors or carpets. We guarantee Antilene.

Ask your dealer for it. Price 25c., 50c., $1.00.

WINE OF
COD LIVER OIL EXTRACT
—WITH—
CHERRY AND HYPOPHOSPHITES.

Each fluidounce represents one-fourth its volume of Cod Liver Oil with Extract of Malt, Fluid Extract of Wild Cherry Bark, and the Hypophosphites of Lime, Sodium, Potassium, Manganese, Quinine, Iron and Strychnine.

ADULT DOSE.—One tablespoonful three or four times daily. For a child, one to two teaspoonfuls.

Offered to the Trade in Pint Bottles and in Bulk at the following List Prices.

Per gallon	$4.50
Per dozen pints	9.00

WYETH'S
Peptonate of Iron and Manganese
NEUTRAL.

(LIQUOR MANGANO FERRI PEPTONATUS—WYETH.)

ANÆMIA, CHLOROSIS, SCROFULA.

The marked indication of the value of this remedy is exhibited by the change in the appearance of the skin, notably of the lips, which becomes a ruddy red, after a few weeks of continuous use, showing conclusively the increase in the number of red blood corpuscles.

This remedy can readily be taken in a little water, milk or sweet wines, free of tannin as may be preferred. Is non-astringent, and does not injure the teeth or constipate the bowels.

DOSE.—For an adult one tablespoonful well diluted with water, milk or sweet wines, three or four times a day; dose for a child is one or two teaspoonfuls, and for an infant, 15 to 60 drops, according to directions of attending physicians.

Offered in 12-ounce Bottles (Original Package) and in Bulk at the following List Prices:

Per gallon	$5.00
Per five-pint	3 50
Per dozen 12 ounces	9.00

PRICES SUBJECT TO USUAL DISCOUNTS TO THE TRADE.

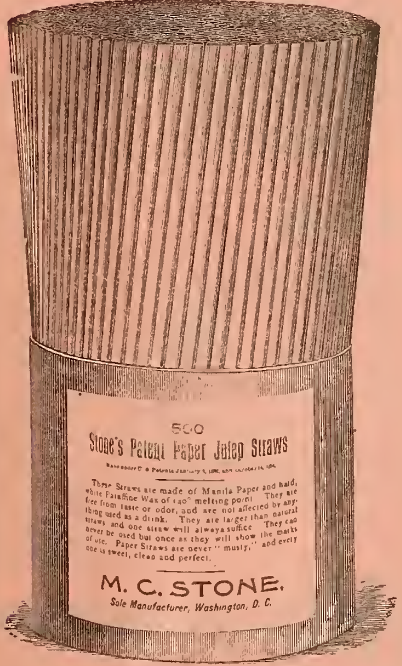
Soda Fountain Requisites.



500
Stone's Patent Paper Julep Straws
These Straws are made of Manila Paper and hard, white Paraffine Wax of 140° melting point. They are free from taste or odor, and are not affected by anything used as a drink. They are larger than natural straws and one straw will always suffice. They can never be used but once as they will show the marks of use. Paper Straws are never "musty," and every one is sweet, clean and perfect.
M. C. STONE.
Sole Manufacturer, Washington, D. C.

Just the thing for crushed fruits, fruit juices or
chocolate at the soda fountain.

Ornamental and Useful.

New price..each $1 50

Mr. Druggist :—

Below is one of our advertisements that will be seen by at least one-third of the Dentists of the U. S., the very best of the profession. This advertising is bound to help you if you will avail yourself of it. We will gladly tell you how to enlist your local dentists and it will pay you well to do so. Yours for "better teeth" (especially for children).

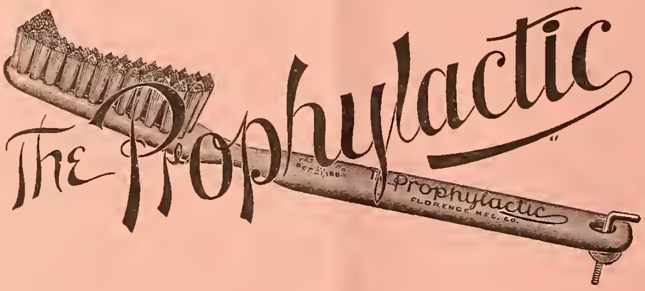
FLORENCE MFG. COMPANY, Florence, Mass.

NAPOLEONIC WISDOM

It was the illustrious Napoleon who said: "If you set out to take Vienna, take Vienna."

If you set out to get a tooth brush, *get the tooth brush*—the famous **"Prophylactic."**

Don't hesitate. The question of tooth health is too serious; the consequence of using, selling or recommending poor tooth brushes is too risky, and it's altogether too detrimental to dental prestige to experiment with any other kind.



is the only tooth brush that always upholds the dignity, the character and the good standard of the profession, for it is designed right, made right and works right. It must, therefore, give the right service—cleanse the teeth—get into the crevices. The nature of the design makes this absolutely certain.

"Prophylactic" tooth brushes also wear, wear beyond all other brushes, wear until you are fully satisfied to purchase a new one. They literally are the greatest cleansing tooth brushes known to man.

Write for interesting data regarding our new Child's and Youth's sizes. They will prove to be great sellers just as soon as the profession appreciate their superlative merits.

Always sold in a yellow box.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1 00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me.
Respectfully,
Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist

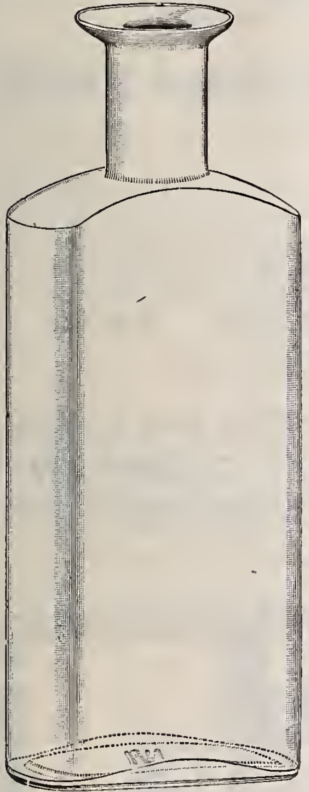
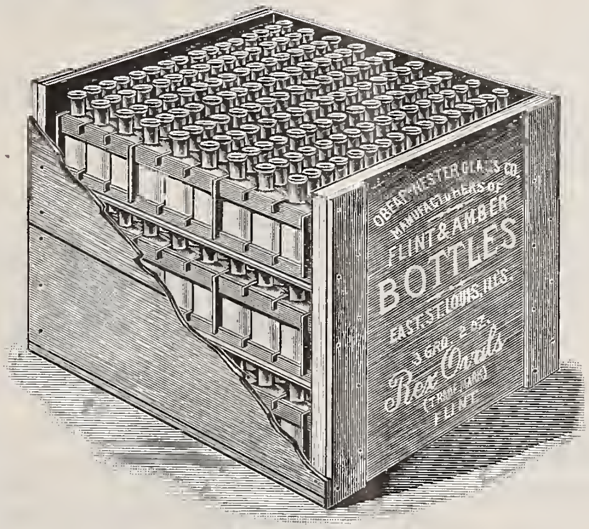
1898 # "Rex Ovals" **1899**

[TRADE MARK]

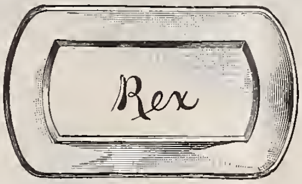
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee** will **prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware**, and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "Rex Oval." Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

LUTHER W. BAHNEY, Ph. G., Instructor in Microscopy, Vegetable Histology and Pharmacognosy.

IMPORTANT ANNOUNCEMENT.

In order to somewhat extend the course of instruction, and yet allow the Senior Class to be graduated with the Academic, Scientific and other Professional Departments of the University, the next term will open earlier than heretofore, viz., on

MONDAY, AUGUST 14th, 1899

On which date those who have not credentials entitling them to matriculate will appear to be examined for entrance, **at the College, Parnassus Avenue (Affiliated Colleges), at 9 a. m.**

Holders of satisfactory credentials can be matriculated any time before the above mentioned date by presenting their diplomas or other evidences of qualification to the Dean, at his office, **400 Sutter Street,** or on that date at the College.

The course leading to the degree of Graduate in Pharmacy consists of two terms of thirty-two weeks each, including two weeks' vacation at Christmas. A third-year course for the degree of Phar. D. will probably be in operation in 1900. The hours of instruction are from 8:30 a. m. to 12:30 daily, Sundays excepted. For further particulars apply to

W. M. SEARBY, Dean, 400 Sutter St., San Francisco, Cal.

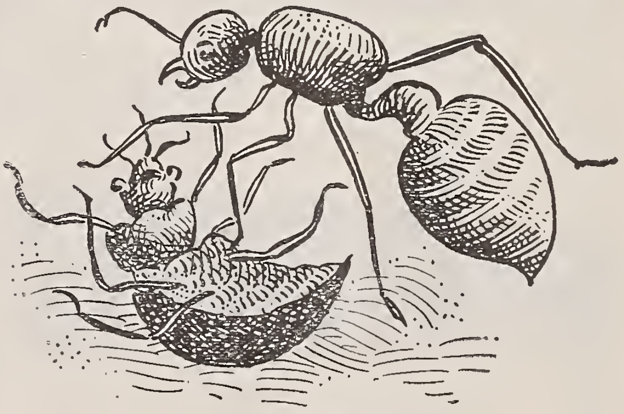
ANTILENE ANT AND BED BUG EXTERMINATOR



TRADE-MARK

An entirely new, **guaranteed** specific for the extermination of Ants, Bed Bugs, Fleas, Roaches and Mice.

ANTILENE is particularly adapted for Ants, as it is clean, has no offensive odor, does not spoil furniture and can scarcely be seen where applied.

ANTILENE will rid your house, fruit trees, rose bushes, vines, gardens and walks of Ants. See directions on each bottle.

FOR FLEAS—The use of an atomizer is necessary to rid your house of Fleas. Spray some **Antilene** on floors or carpets. We guarantee **Antilene**.

Ask your dealer for it. Price 25c., 50c., $1.00.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1 00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me.
Respectfully,
Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist

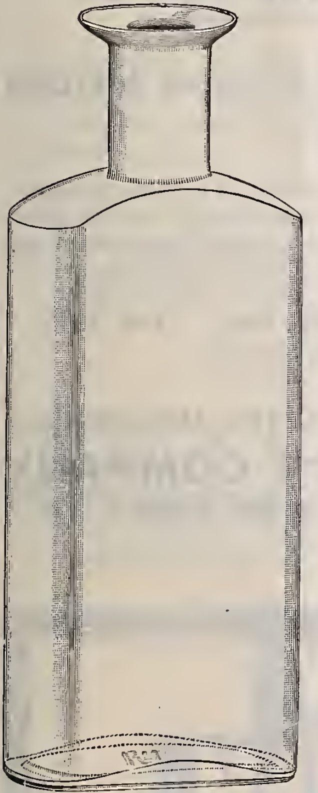
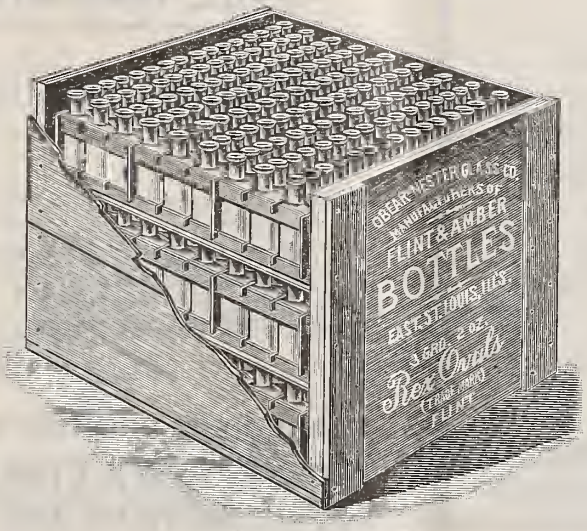
"Rex Ovals"

1899

[TRADE MARK]

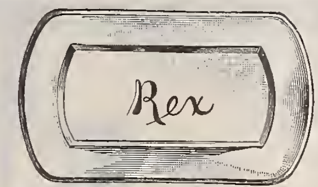
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing**, which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware**, and call particular attention to our **special style of finish**. Our brand, "Rex Oval," is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "Rex Oval." Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

H. M. McQUEEN, Ph. G., Instructor in Chemistry.
J. E. BARBAT, Ph. G., Instructor in Materia Medica.
LUTHER W. BAHNEY, Ph. G., Instructor in Microscopy, Vegetable Histology and Pharmacognosy.

IMPORTANT ANNOUNCEMENT.

In order to somewhat extend the course of instruction, and yet allow the Senior Class to be graduated with the Academic, Scientific and other Professional Departments of the University, the next term will open earlier than heretofore, viz., on

MONDAY, AUGUST 14th, 1899

On which date those who have not credentials entitling them to matriculate will appear to be examined for entrance, **at the College, Parnassus Avenue (Affiliated Colleges), at 9 a. m.**

Holders of satisfactory credentials can be matriculated any time before the above mentioned date by presenting their diplomas or other evidences of qualification to the Dean, at his office, **400 Sutter Street,** or on that date at the College.

The course leading to the degree of Graduate in Pharmacy consists of two terms of thirty-two weeks each, including two weeks' vacation at Christmas. A third-year course for the degree of Phar. D. will probably be in operation in 1900. The hours of instruction are from 8:30 a. m. to 12:30 daily, Sundays excepted. For further particulars apply to

W. M. SEARBY, Dean, 400 Sutter St., San Francisco, Cal.

Chamberlain's Cough Remedy...

Is Famous as a cure for bad colds.

Famous as a preventive of pneumonia.

Famous as a preventive and cure for croup.

Famous for the relief it affords in cases of whooping-cough.

Famous as a safe and pleasant medicine for children.

It acts on nature's plan — loosens the cold, relieves the lungs and makes expectoration easy; thereby aiding nature in restoring the system to a healthy condition and effecting a complete and permanent cure.

Price 25 cents and 50 cents per bottle.

This excellent whiskey fills a very well defined want in the drug business. That of a really good article that is profitable to handle at $1 00 a bottle. It has no mention of whiskey upon the label, and is recommended as a tonic medicinal article.

It is supplied to the trade at $7.00 per dozen for single case, or $6.75 for 5-case lots.

WINE OF

COD LIVER OIL EXTRACT

—WITH—

CHERRY AND HYPOPHOSPHITES.

Each fluidounce represents one-fourth its volume of Cod Liver Oil with Extract of Malt, Fluid Extract of Wild Cherry Bark, and the Hypophosphites of Lime, Sodium, Potassium, Manganese, Quinine, Iron and Strychnine.

ADULT DOSE.—One tablespoonful three or four times daily. For a child, one to two teaspoonfuls.

Offered to the Trade in Pint Bottles and in Bulk at the following List Prices.

Per gallon	$4.50
Per dozen pints	9.00

WYETH'S

Peptonate of Iron and Manganese

NEUTRAL.

(*LIQUOR MANGANO FERRI PEPTONATUS—WYETH.*)

ANÆMIA, CHLOROSIS, SCROFULA.

The marked indication of the value of this remedy is exhibited by the change in the appearance of the skin, notably of the lips, which becomes a ruddy red, after a few weeks of continuous use, showing conclusively the increase in the number of red blood corpuscles.

This remedy can readily be taken in a little water, milk or sweet wines, free of tannin as may be preferred. Is non-astringent, and does not injure the teeth or constipate the bowels.

DOSE.—For an adult one tablespoonful well diluted with water, milk or sweet wines, three or four times a day; dose for a child is one or two teaspoonfuls, and for an infant, 15 to 60 drops, according to directions of attending physicians.

Offered in 12-ounce Bottles (Original Package) and in Bulk at the following List Prices:

Per gallon	$5.00
Per five-pint	3 50
Per dozen 12 ounces	9.00

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist

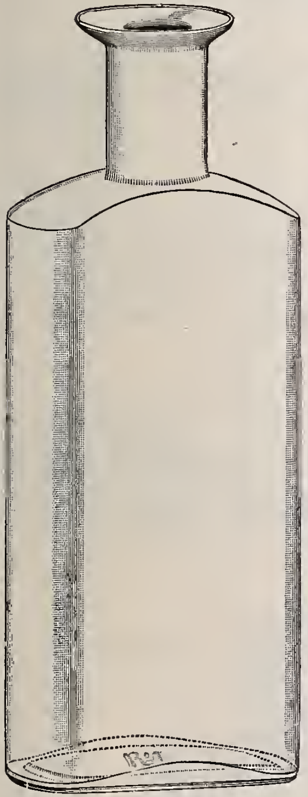
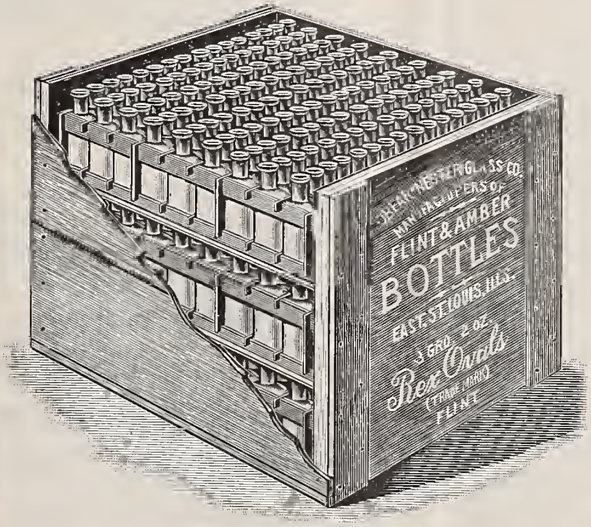
1898 "Rex Ovals" 1899

[TRADE MARK]

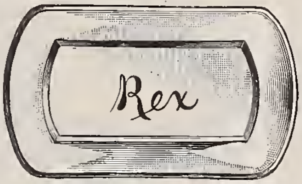
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "**Rex Oval**" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing,** which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine "Rex Oval."** Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

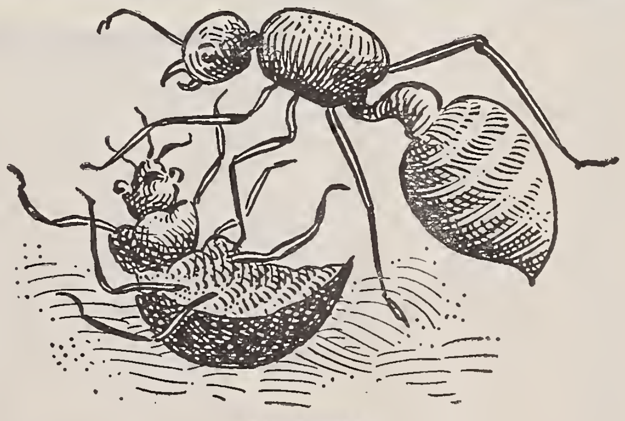
ANTILENE ANT AND BED BUG EXTERMINATOR



TRADE-MARK

BISHOP & COMPANY
MANUFACTURERS OF
CANDY AND CRACKERS

LOS ANGELES, CAL., August 18, 1899.

ANTILENE CO.,

Dear Sirs:—We have been annoyed for a number of years by ants and have used every known remedy we could hear of to get rid of them.

It has now been two months since we have commenced the use of your Antilene and we have entirely rid ourselves of ants from our factory by the use of your preparation.

Yours truly,
BISHOP & COMPANY.

Ask your dealer for it. Price 25c., 50c., $1.00.

F. W. BRAUN & CO., Wholesale Distributers, 501-505 North Main Street, Los Angeles, California.

MR. DRUGGIST :—

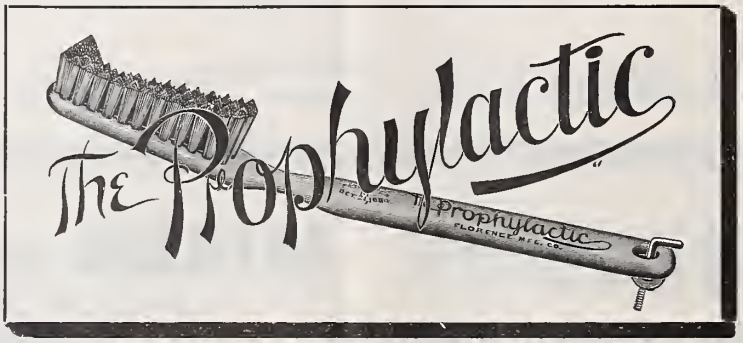
Below is one of our advertisements that will be seen by at least one-third of the Dentists of the U. S., the very best of the profession. This advertising is bound to help you if you will avail yourself of it. We will gladly tell you how to enlist your local dentists and it will pay you well to do so. Yours for "better teeth" (especially for children).

FLORENCE MFG. COMPANY, Florence, Mass.

At the Top

No article can maintain a higher distinction than its merit deserves, and the fact that the Prophylactic tooth brush stands at the very top in the estimation of dentists, simply shows that it merits their esteem.

Under the leveling process of competition each article, like water, finds its level.



If they did not best serve the dentist's interests, if they did not aid his work by aiding his clients to keep their teeth absolutely clean he would soon discard them, and they would soon descend to a lower plane in everybody's opinion. Instead, however, Prophylactic tooth brushes ascend higher and higher above all imitations every day.

Wherever good dentistry is known, wherever tooth hygiene is valued, wherever correct principles and mechanical perfection are appreciated, there you will find the Prophylactic tooth brush recommended, and prized.

Every time a dentist prescribes the Prophylactic, he adds to his prestige as a good, reliable dentist, for the Prophylactic never disappoints.

(Write us for Prophylactic Pointers.)

FLORENCE MFG. COMPANY, Makers
FLORENCE, MASS.

It is made in three sizes, for Adult, Youth, and Child, and is always sold in a yellow box.

Children who are taught to clean their teeth thoroughly with the proper size Prophylactic tooth brush acquire a priceless habit.

"Children's teeth should receive more attention than those of adults."

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. BREMER Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me.

Respectfully,
Fall River, Mass., Nov. 28, '98. B. F. RIDDELL, Druggist

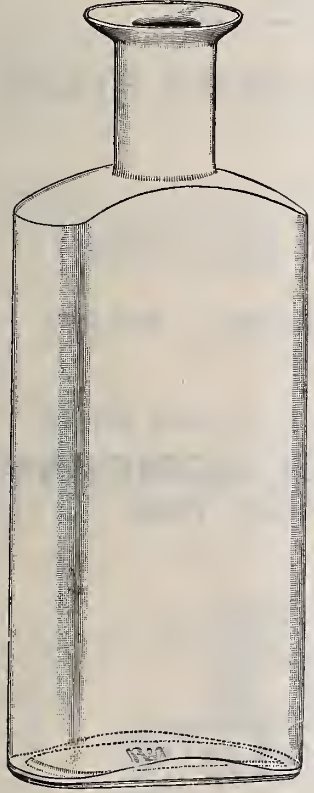
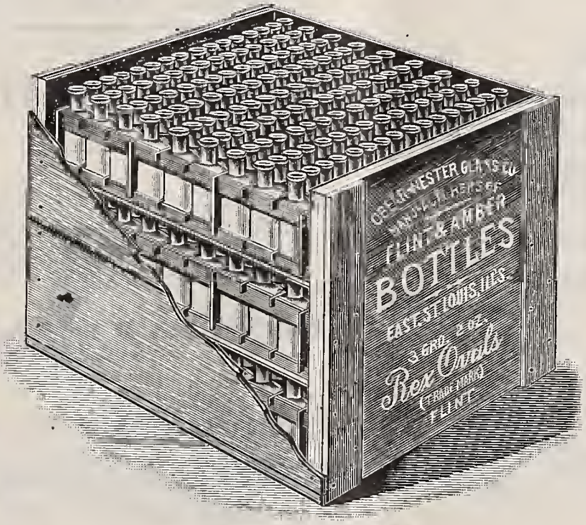
"Rex Ovals"

1899

[TRADE MARK]

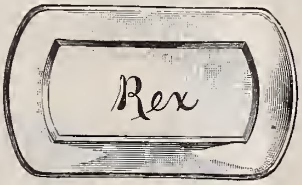
PACKED IN OUR WOOD PARTITION PACKING
ABSOLUTELY NO STRAW OR PAPER





MANUFACTURED ONLY BY

OBEAR-NESTER GLASS CO. St. Louis Mo.



The King of all Prescription Bottles

Our "Rex Oval" has proven by its large and increasing sale its **superiority** over all styles of prescription bottles on the market. **We were the first factory** to adopt the paper packing; but as it was necessary to use in connection with paper some straw to prevent excessive breakage, we have been continually experimenting to find a packing that would prevent **breakage** and at the same time do away entirely with any dirt or straw getting in the bottles. We take pleasure in bringing to your notice our **Wood Partition Packing,** which we **guarantee will prevent dirt of any kind from getting in the bottles, the chipping of the necks, and to be the safest prescription bottle carrier on the market.** Remember there is positively no straw or paper to litter your store up and ready to catch fire when unpacking a case of "**Rex Ovals.**"

We take especial pains with the **selecting and finishing of this ware,** and call particular attention to our **special style of finish.** Our brand, "**Rex Oval,**" is fully protected by registered trade mark, and appears on both the **cases and the bottom of bottles.** In ordering, please see that **you get the genuine** "**Rex Oval.**" Place your orders through your jobbing house, as they buy in car loads, saving freight, and are therefore in position to give you close prices.

Do not forget we are the only makers of "**Rex Ovals**" or users of this style of packing.

Try a few cases in your next order and be convinced.

WINE OF

COD LIVER OIL EXTRACT

—WITH—

CHERRY AND HYPOPHOSPHITES.

Each fluidounce represents one-fourth its volume of Cod Liver Oil with Extract of Malt, Fluid Extract of Wild Cherry Bark, and the Hypophosphites of Lime, Sodium, Potassium, Manganese, Quinine, Iron and Strychnine.

ADULT DOSE.—One tablespoonful three or four times daily. For a child, one to two teaspoonfuls.

Offered to the Trade in Pint Bottles and in Bulk at the following List Prices.

Per gallon	**$4.50**
Per dozen pints	**9.00**

WYETH'S

Peptonate of Iron and Manganese

NEUTRAL.

(LIQUOR MANGANO FERRI PEPTONATUS—WYETH.)

ANÆMIA, CHLOROSIS, SCROFULA.

The marked indication of the value of this remedy is exhibited by the change in the appearance of the skin, notably of the lips, which becomes a ruddy red, after a few weeks of continuous use, showing conclusively the increase in the number of red blood corpuscles.

This remedy can readily be taken in a little water, milk or sweet wines, free of tannin as may be preferred. Is non-astringent, and does not injure the teeth or constipate the bowels.

DOSE.—For an adult one tablespoonful well diluted with water, milk or sweet wines, three or four times a day; dose for a child is one or two teaspoonfuls, and for an infant, 15 to 60 drops, according to directions of attending physicians.

Offered in 12-ounce Bottles (Original Package) and in Bulk at the following List Prices:

Per gallon	**$5.00**
Per five-pint	**3 50**
Per dozen 12 ounces	**9.00**

PRICES SUBJECT TO USUAL DISCOUNTS TO THE TRADE.

Coke Dandruff Cure.

10 OZ. BOTTLE (RETAILS AT $1.00)
PRICE $8.00 PER DOZEN.

Guaranteed to Cure Dandruff or Money Refunded

The symptoms of scalp disease are always apparent in the white scales of dandruff found on the clothes and in the hair, brush and comb, the irritations of the scalp and the falling of the hair itself, until inevitable baldness appears.

A. R. Bremer Co., Chicago, Ill.

Gentlemen:—We are having a good sale for "Coke Dandruff Cure.' It is one of the things that I can stand at the counter and truly recommend, as I have demonstrated its utility and value personally, having been afflicted with itching scalp and dandruff for years; one-third of a bottle of "Coke Dandruff Cure" has completely cured me. Respectfully,

Fall River, Mass, Nov 28, '98. B. F. Riddell, Druggist

Chamberlain's Cough Remedy...

Is Famous as a cure for bad colds.
Famous as a preventive of pneumonia.
Famous as a preventive and cure for croup.
Famous for the relief it affords in cases of whooping-cough.
Famous as a safe and pleasant medicine for children.

It acts on nature's plan — loosens the cold, relieves the lungs and makes expectoration easy; thereby aiding nature in restoring the system to a healthy condition and effecting a complete and permanent cure.

Price 25 cents and 50 cents per bottle.

Mr. Druggist :—

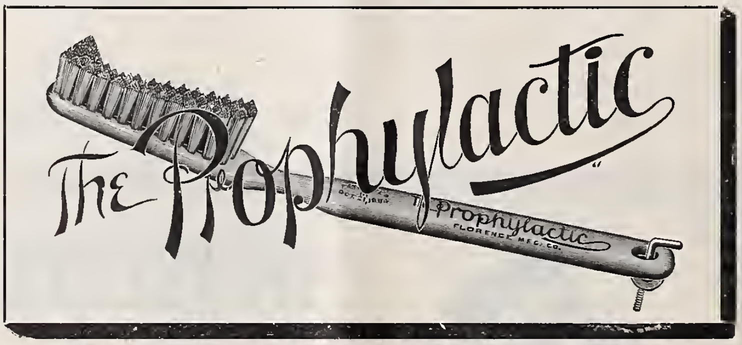
Below is one of our advertisements that will be seen by at least one-third of the Dentists of the U. S., the very best of the profession. This advertising is bound to help you if you will avail yourself of it. We will gladly tell you how to enlist your local dentists and it will pay you well to do so. Yours for "better teeth" (especially for children).

FLORENCE MFG. COMPANY, Florence, Mass.

At the Top

No article can maintain a higher distinction than its merit deserves, and the fact that the Prophylactic tooth brush stands at the very top in the estimation of dentists, simply shows that it merits their esteem.

Under the leveling process of competition each article, like water, finds its level.



If they did not best serve the dentist's interests, if they did not aid his work by aiding his clients to keep their teeth absolutely clean he would soon discard them, and they would soon descend to a lower plane in everybody's opinion. Instead, however, Prophylactic tooth brushes ascend higher and higher above all imitations every day.

Wherever good dentistry is known, wherever tooth hygiene is valued, wherever correct principles and mechanical perfection are appreciated, there you will find the Prophylactic tooth brush recommended, and prized.

Every time a dentist prescribes the Prophylactic, he adds to his prestige as a good, reliable dentist, for the Prophylactic never disappoints.

(Write us for Prophylactic Pointers.)

FLORENCE MFG. COMPANY, Makers
FLORENCE, MASS.

It is made in three sizes, for Adult, Youth, and Child, and is always sold in a yellow box.

Children who are taught to clean their teeth thoroughly with the proper size Prophylactic tooth brush acquire a priceless habit.

"Children's teeth should receive more attention than those of adults."
